Memoir on Maps illustrating the Ancient Geography of Kaśmīr.—
By M. A. STEIN, PH.D.

CHAPTER I.

INTRODUCTORY.

1. The maps accompanying this memoir are primarily intended to show the results which a detailed study of Kalhana's RĀJATARAṄGIṆĪ has furnished regarding the early topography of Kaśmīr and the adjacent territories. From the first when engaged in preparing a critical edition of that text,¹ the earliest and most important of the Sanskrit Chronicles of Kaśmīr, I had realized that an exact identification of the very numerous old localities mentioned in it was indispensable for a correct understanding of the narrative. This conviction forced itself even more strongly upon me in the course of the labours I devoted to the preparation of the commentated translation of the work which is now passing through the press.²

¹ Kalhana's *Rājatarāṅgiṇī* or *Chronicle of the Kings of Kaśmīr*, Bombay Education Society's Press, 1892, pp. xx and 296, 4to.

² To be published, with a Historical Introduction, by MESSRS. A. CONSTABLE AND Co., London, in two volumes, 4to.

Many of the questions thus raised were so detailed and intricate that it would have been manifestly impossible to attempt their solution without carefully studying on the spot those topographical facts which alone could elucidate them. It was, therefore, fortunate for my researches in this direction that I was able during successive years to make a series of antiquarian tours in Kāśmīr. These acquainted me not only with the extant ancient remains of the Valley, but also with its actual topography and that of the neighbouring mountain regions.¹ I cannot feel too grateful for the advantage I thus enjoyed. It has allowed me in more than one case to fix with certainty the position of important ancient sites, which no amount of philological acrobacy would have sufficed to locate correctly.

2. In order to place before the student of the Kāśmīr Chronicle the results of these researches, as well as the evidence on which they were based, the preparation of maps appeared necessary that

Preparation of Maps.

would show the modern topography of the country in full detail together with the ancient sites and local names identified. While considering the means for the execution of such maps I received in the autumn of 1896 the generous offer of the Asiatic Society of Bengal to bear the cost connected with their preparation, on the understanding that the maps would be published also in the Society's Journal with a separate explanatory memoir. I accepted this offer all the more readily as it gave me the desired opportunity of treating the subject of the early geography of Kāśmīr in a connected form and before a larger public. For the liberal assistance thus rendered to me, I wish to record here my sincere thanks. I owe special obligations to Dr. G. A. GRIERSON, C.S., C.I.E., and Dr. A. F. R. HOERNLE, C.I.E., whose kind offices were mainly instrumental in securing the above arrangement.

The successful execution of the maps as now published was rendered possible by the ready co-operation of Colonel J. WATERHOUSE, I.S.C., late Assistant Surveyor General, in charge of the Lithographic and Photographic Office of the Survey of India Department. The preparation of a new ground map to show on a sufficiently large scale the details of the modern topography of Kāśmīr would have cost much trouble and entailed very heavy, almost prohibitory, expense. At the same time it had to be considered that there were no other materials available for such a map but those supplied by the Trigonometrical

¹ The tours referred to occupied the greatest part of my summer vacations in 1888, 1889, 1891, 1892, 1894 and were supplemented by shorter visits to particular sites during the summers of 1895-96.

Survey operations in Kaśmīr, 1856-60, which had been embodied on the scale of 4 miles to 1 inch in the corresponding sheets of the 'Atlas of India.'

It hence appeared to me the most convenient plan to use as a ground-map a mechanical reproduction of that portion of the 'Atlas of India' which contains Kaśmīr and the adjacent territories. Over this ground-map the entries relating to the ancient topography of the country could be printed in a distinguishing colour. This plan having received Colonel Waterhouse's approval, the required portions of the engraved plates containing Sheets 27 and 28 of the 'Atlas,' were transferred to the stone and the copies of the larger map reproduced from the latter by lithography. A similar process was used for the smaller map showing the capital, ŚRINAGAR, and its environs on the enlarged scale of 1 mile to 1 inch. But in this case the original map which was not engraved but only zincographed, had to be retraced on the stone.¹

In the case of either map the entries marking ancient sites and names were printed in red over the ground-map from a separate stone. In order to distinguish at a glance the old local names in the Rājatarāṅgiṇī from those known only to the later Chronicles and other sources, the former were shown in GROTESQUE type and the latter in *Italic*.

By following the method here briefly explained it was possible to provide maps which exhibit in all needful detail the latest and most authentic survey of Kaśmīr and at the same time show clearly all important features of the old topography. The success of the technical execution is due mainly to the great care and attention bestowed on it by Colonel WATERHOUSE and his staff. For this as well as much valuable advice accorded to me in connection with the work I may be allowed to offer here my grateful acknowledgments.

3. It has already been stated that the maps here presented are in the first place intended to illustrate those data of the ancient geography of Kaśmīr which are contained in KALHAṆA's Chronicle. But in addition to the old local names and sites taken from this our most important source of information those mentioned in the later Sanskrit Chronicles and other Kaśmīrian texts have also been inserted as far as they can claim antiquity and interest. These maps may, therefore, equally well serve to illustrate a comprehensive account of the historical topography of Kaśmīr, such as I shall attempt to give here, up to the close of the Hindu epoch.

¹ The original of this smaller ground-map had appeared as an inset in the "Map of Jummoo, Kashmir and Adjacent Territories," 4 miles to 1 inch, published by the Survey of India, 1861.

In treating this subject it appears to me most convenient to examine first the sources of information from which our knowledge regarding the ancient topography of Kāsmīr is drawn. I shall next proceed to notice what we can learn from these sources as to the general physical features of Kāsmīr geography and their bearing on the historical and economical conditions of the country during the Hindu period. In the last chapter I intend to discuss the political divisions of the territory and to indicate briefly the information available to us regarding the particular places of historical or religious interest.

Most of the data upon which this account of the old topography of Kāsmīr is based, are contained in Kalhana's Chronicle, and have therefore already been explained by me in the notes which accompany my translation of that work. In order to avoid unnecessary repetition I shall refer to these notes for all such detailed evidence as could not conveniently be set forth within the limits of the present paper.

4. Before, however, closing these preliminary remarks it is necessary to refer briefly to those few publications in which facts bearing on the old topography of Kāsmīr have received an earlier treatment.

In view of what has been said above we naturally turn first to the works which have dealt directly with the interpretation of the Rājatarāṅgiṇī. Dr. WILSON who was the first European to study the Chronicle in the original, published an abstract of the contents of the first six Books as early as 1825.¹ He seems to have fully realized the importance of an accurate and sober examination of the geographical questions connected with the narrative. The textual materials at his disposal were, however, extremely defective, and European knowledge of Kāsmīr restricted at the time solely to the accounts of BERNIER and FORSTER. He could hence scarcely do more than indicate the more or less corrupt modern equivalents by which the Persian Chronicles render some of the Kāsmīr local names taken from Kalhana's account. The judgment and accuracy with which Dr. Wilson discussed the Chronicle's notices of countries and places situated outside Kāsmīr and better known at that time, shows sufficiently that only the defective character of the available materials prevented that distinguished Sanskrit scholar from doing justice to the task.

The elaborate commentary with which Mr. TROYER accompanied his French translation of the Rājatarāṅgiṇī,² does not represent any material advance beyond the contents of Wilson's Essay. Yet Mr. Troyer

¹ *An Essay on the Hindu History of Cashmir, in Asiatic Researches, vol. xv., 1825, pp. 1 sqq.*

² *Rājatarāṅgiṇī ou Histoire des rois du Kachmir, Paris, 1840-52.*

had already the whole text of the Chronicle to refer to, and in the meantime a considerable amount of information about Kaśmir had become available through the works of travellers like Moorcroft, Jacquemont, Vigne, Von Hügel, and others. The serious shortcomings which characterize Mr. Troyer's labors notwithstanding his patient devotion to the task, have already been fully indicated by Prof. Bühler.¹ Detailed reference to the defects of the topographical notes is hence unnecessary.

The English translation of the Chronicle published in the years 1879-87 by Babu Jogesh Chunder DUTT makes no attempt whatever to elucidate the many points of topographical interest. Though the translation itself is decidedly better than that of Mr. Troyer, yet it necessarily shares the defects arising from the use of the same corrupt text. Both versions strikingly demonstrate the importance of topographical researches by the frequent instances in which the translators have mistaken local names for words of ordinary meaning or *vice versa*.²

The advantages offered for enquiries of this kind by a personal acquaintance with the country were fully illustrated by the valuable contributions which General (then Captain) CUNNINGHAM was able to make to our knowledge of ancient Kaśmir in connection with his visit to the Valley in November 1847. Though his stay was short and primarily devoted to a survey of the more conspicuous of the temple-ruins still extant, he succeeded in identifying correctly a number of important ancient sites such as *Purāṇādhiṣṭhāna* 'the old capital,' *Jyeṣṭheśvara*, *Mārtāṇḍa*, *Padmapura*, *Pattana*, *Khonamuṣa*.³

General Cunningham subsequently had occasion to discuss comprehensively these localities in his *Ancient Geography of India*, a work which, notwithstanding its deficiencies in detail, amply testifies to the great antiquarian experience and natural acumen of its author. The chapter on the "Kingdom of Kashmir"⁴ utilizes the evidence afforded by the Chinese sources and Alberūnī, and indicates correctly the old names of the petty hill states to the south and south-east of Kaśmir (*Rājapurī*, *Vallāpura*, *Campā*, *Kāṣṭhavāṭa*). It further adds to the identifications already mentioned equally important notes on *Pravarapura*, the present Srinagar, *Vijayeśvara*, *Huṣkapura*, *Juṣkapura*, *Jayapura*. If General Cunningham was less successful in his attempts at

¹ See *Report on a tour in search of Sanskrit Manuscripts made in Kashmir*, J. Bo. B. R. A. S. 1877, pp. 55 sqq.

² For some of the imaginary territories and places which figure in these translations, see *Vienna Oriental Journal*, 1898, pp. 67 sqq.

³ See his *Essay on the Arian Order of Architecture as exhibited in the temples of Kashmir*, J. A. S. B., 1848, pp. 242-327.

⁴ See *Ancient Geography of India*, 1871, pp. 89-103, 128-141.

locating *Parihāsapura* and some other ancient sites, this may fairly be attributed to his inability to consult the Sanskrit sources in the original.¹

Professor LASSEN's "Indische Alterthumskunde" gives an extensive analysis of the historical contents of Kalhana's work.² But his explanations as to the ancient localities mentioned are generally only there well-founded where they are based on General Cunningham's researches. Ancient territories and places are often connected with modern localities merely on the ground of a faint resemblance of the names and without sufficient internal evidence. This tendency has frequently led that distinguished scholar to ignore the narrow territorial limits within which most of the local and ethnic names occurring in the later portion of Kalhana's narrative have to be looked for. It is only natural that identifications of real (or imaginary) localities which transferred the scene of contemporary events described by Kalhana to territories so distant as Lahore, Eastern Afghānistān or Ajmir,³ have helped to produce a very ill-focussed picture of the political power and extent of the Kāśmīr kingdom in those later times.

The merit of having definitely shown the right methods and means for re-constructing the ancient geography of Kāśmīr belongs to Professor BÜHLER. This great scholar by whose lamented death so many branches of Indian research have suffered irreparable loss, had in the masterly

¹ If particular proof were wanted to show that a thorough acquaintance with the modern topography of a country is in itself not sufficient to lead to useful results in regard to its historical geography, Mr. VIGNE's work, *Travels in Kashmir, Ladak, Iskardo*, (London, 1842, two Vols.) would supply it. This estimable artist and traveller evidently took a great deal of interest in the antiquities of the country which he traversed in many directions. His book, however, as far as the old geography of Kāśmīr is concerned, furnishes scarcely anything more than a series of amusingly naïve etymologies of local names. Thus *Hūrāpūr* (Sūrapura) is "the Diamond City," *Pāndrēṭhan* (Purānādhiṣṭhāna) the place of the 'Pandus and Duryodun' (i. e., Duryodhana), Sōpūr (Suyyapura) 'the Golden City,' etc.; see i. p. 267, ii. pp. 37, 157.

Mr. Vigne is responsible for the strange derivation of the name of the Kāśmīr capital, *Srinagar* (Srinagara), or as he spells it, 'Siri-Nagur,' from "*Surya Nagur*, the city of the sun" (p. ii. 137). Judging from the persistence with which the error has been copied by a succession of modern writers on Kāśmīr, this etymology bids fair to establish itself as a piece of orthodox creed with European visitors to the Valley.

² See *Indische Alterthumskunde* (second ed.), ii. pp. 885-915; iii. pp. 984-1128.

³ I refer to locations like those of *Lohara* (Loharin) at Lahore; of the [imaginary] province *Kampanā* in eastern Afghānistān; of the *Lavanya* tribe near the Sambhar salt lake; of the feudal chief *Koṣṭheśvara* at Kōtgarh on the Satlej, etc.; comp. *Ind. Alterth.* iii. pp. 1057, 1041, 1069, 1105, and for the supposed territorial extent of the Kāśmīr state, iii. p. 1119.

report on his Kaśmīr tour lucidly set forth the work that remained to be done in connection with the Rājatarāṅgiṇī.¹ He had there shown that for a full comprehension of its contents a minute study of the ancient geography of Kaśmīr was indispensable. He was the first to call attention to the ample materials which are offered for such a study by the later Sanskrit Chronicles, the Nilamatapurāṇa and other Kaśmīrian texts. But he also realized that "some of the geographical questions would probably require a final re-examination in Kaśmīr."

Other labors prevented my lamented master from undertaking this task himself. But the most graphic and accurate notices which his Report gives of those sites in the Valley he had himself been able to visit,² prove convincingly—if any proof were needed—that no important point connected with the old topography of the country could easily have escaped his attention. The particular identifications first made by Prof. Bühler will be duly mentioned in their proper places. It was a source of true satisfaction to me that I was able during my last year's visit to Europe to present personally the departed with the first clean copies of the maps now published. That the results recorded in them were such as obtained his approval, will always appear to me the highest reward for the labour their preparation and the preceding researches had cost me.

CHAPTER II.

ACCOUNTS OF OLD KASHMIR.

SECTION I.—CLASSICAL NOTICES.

5. Our sources for the early geography of Kashmir may be conveniently divided into foreign notices and indigenous records. As the information supplied by the former is on the whole earlier in date though by no means more precise or important, we shall commence our review with them. Having learned what little the outer world knew or recorded of the secluded alpine land, we shall appreciate all the more the imposing array of Kashmirian authorities which offer themselves as our guides in and about the Valley. With the foreign accounts but in a kind of intermediate position we may class those Indian texts the authors of which may have possessed some more detailed information of Kashmir, but have not thought it necessary to vouchsafe it to us.

| It is significant for the isolated position which its mountain barriers assured to Kashmir, that we do not find any mention of the country in those accounts to which we are accustomed to look for the first truly historical notices of the North-West of India. I mean the relations of Alexander's invasion. The march from Taxila to the Hydaspes (Jehlum) took the Macedonian forces along a line of route which lay comparatively near to the confines of Kashmir. Yet there is no notice in the accounts of Alexander's expedition which can be shown to imply even a hearsay knowledge of the Kashmir Valley. On the other hand the names of the neighbouring territories on the West and South have long ago been recognized in the names of their rulers *Arsakes* and

Abisares. These names clearly represent ethnic appellations derived from *Uraśā* (Ptolemy's *Oṽapra*) and *Abhisāra*.¹)

(The only certain reference to Kaśmīr which classical literature has preserved for us, is found in PTOLEMY'S Geography. There can be no doubt that D'Anville was right in recognizing its name in that of the region of *Κασπερία* situated 'below the sources of the Bidaspes (*Vitastā*) and of the Sandabal (*Candrabhāgā*) and of the Adris (*Ilavati*)'.² Ptolemy mentions this territory correctly enough between that of the *Daradrai* or *Dards* on the Indus and *Kylindrine* or the land of the Kulindas on the Hyphasis (*Biās*) and eastwards. In his subsequent detailed description of Indian territories, however, he makes the region 'held by the Kaspeiræans' extend eastwards from the land of the Pandouoi on the Bidaspes as far as Mount Onindion or the Vindhya.³

It is clear that the limits here indicated which would embrace a great portion of the present Panjāb with parts of the North-West Provinces and Central India, can have nothing to do with Kaśmīr. It has been suggested that Ptolemy's statement refers to a period when the power of the dynasty ruling over Kaśmīr actually extended over the wide territories above indicated.⁴ The assumption, put into a form more in keeping with historical probability, would be that Kaśmīr was then subject to a great foreign dominion the rulers of which, for one reason or the other, were in Ptolemy's source designated from this part of their realm.

However this may be, it is curious to note that we meet with the name *Κασπερα* also in the long list of cities located within the region belonging to the Kaspeiræans. The geographical position assigned to it by Ptolemy's table (or map) would bring Kaspeira close to the junction of the Hydaspes and Zaradros (*Satlej*), i.e., the neighbourhood of Multān.⁵ Yet it seems difficult to believe that the information originally underlying this entry referred to any other locality but Kaśmīr.⁶)

¹ See LASSEN, *Ind. Alt.*, ii. p. 174; WILSON, *Essay*, p. 116; also my notes on *Rājatar.* i. 180; v. 217.

² See Ptolemy vii. i. 42 and pp. 21, 40 sq. in *Antiquité Géographique de l'Inde*, par M. D'Anville, *Premier Géographe du Roi*, etc., Paris, 1775.—The accuracy and sound judgment displayed in this work fully justify the great fame it has enjoyed.

³ Ptolemy, vii. i. 47.

⁴ Compare, e.g., LASSEN, *Ind. Alt.* ii. p. 898; V. DE ST. MARTIN, *Mémoires de l'Académie des Inscriptions*, Sav. étrang., 1re Série, t. v., p. 880.

⁵ See the old map reproduced in Dr. McCrindle's *Ancient India as described by Ptolemy*, Bombay, 1885.

⁶ This had been rightly seen already by D'ANVILLE. He points out, p. 40, that the error in latitude implied by Ptolemy's position of Kaspeira (if Srinagar

It would be useless to attempt to seek now for an explanation of the erroneous location. The researches of the most competent scholars have amply proved how little reliance can be placed on the apparent exactness of Ptolemy's latitudes and longitudes in the Asiatic portion of his work.¹ None of the other city names in the same list can be connected with Kāśmīr. Nor is the identification of any one of them certain, except that of Μόδοῦρα ἡ τῶν Θεῶν, the sacred Mathurā. This alone suffices to show how far away from Kāśmīr we are liable to be taken.

The value of Ptolemy's notice of *Kaspeiria* lies mainly in the fact that it presents us with an accurate enough transcription of that form of the country's name which on independent phonetic evidence we must assume as an intermediate stage between the Sanskrit *Kāśmīra* and the modern Kāśmīri form *Kaśīr*. The explanations given below (§ 36) will show that a well-established phonetic law presupposes a form **Kaśvīra* for the earlier Prakrit stage of Kāśmīri. Of this form we have in *Kaspeira* (pronounced Kaspīra) as close a rendering as Greek writing permitted.²

The Sanskrit form of the name, *Kāśmīra*, has, as far as we can go back, been always the one in official use. By it the country has been, and is still to this day, generally known abroad (Hindi *Kāśmīr*, Persian *Kashmīr*.) The preservation of the popular Prakrit **Kaśvīra* by Ptolemy deserves hence attention with regard to the original source from which this particular item of information was obtained.

6. It is very probable that we have also to connect with Kāśmīr

Kaspeiroi of Dionysios and Nonnos.

a curious notice which Stephen of Byzance has preserved from the *Bassarika*, a lost poem of Dionysios of Samos. The passage, first apparently noticed by D'Anville, mentions the KASPEIROI as a tribe famous among all Indians for their fast feet.³ We do not know the

is really meant) is not greater than that which can plainly be proved in the case of his entry for *Barbarei*, the port at the mouth of the Indus.

¹ I cannot refrain from quoting here in full the very just remarks of SIR HENRY YULE, *Cathay and the Way Thither*, p. cli, which ought ever to be remembered by those who have to deal with Ptolemy on Indian soil. "We see here how Ptolemy's Asiatic Geography was compiled. It is evident that he first drew his maps embodying all information that he had procured, however vague and rough it might be. From these maps he then deduced his tables of latitudes and longitudes and his systematic topography. The result is that everything assumes an appearance of exact definition; and indications on the map which meant no more than (somewhere hereabouts is said to be such a country), became translated into a precision fit for an Act of Parliament."

² Thus the tribal name *Aspasioi* of Arrian (iv. 23) reproduces the Sanskrit *Aśvaka*; comp. McCRINDLE, *Invasion of India*, p. 333.

³ The text of the passage is reproduced by TROYES, ii. p. 307. Another short quotation from the same text mentions the *Ariēnoi* along with the *Kaspeiroi*.

time of this Dionysios. Nor is there any indication as to the source from which he may have taken the reference. That the Kaśmīris had abroad the reputation of being good pedestrians may be concluded from a remark of Albērūnī.¹ It is clear that the natural conditions of an alpine valley enclosed by difficult mountain ranges are likely to develop the marching powers of its inhabitants. The Rājatarāṅgiṇī gives us in fact several instances of very respectable marching performances. It shows at the same time the scant use made of riding animals in the mountains.² There is thus more than the mere name to justify us in referring the notice of Dionysios of Samos to Kaśmīr.

We meet with the name of the *Kaspeiroi* also in the Dionysiaka of Nonnos. There they are mentioned among the Indian tribes rising in arms against Bacchos.³ As Nonnos' list names in the same passage also the Ariēnoi whose name we see coupled with that of Kaspeiroi in the fragment of the Bassarika, it is probable that Nonnos has taken his reference either from the latter work or from some common source.

7. We should, indeed, have a far earlier reference to Kaśmīr in classical literature, and one by no less an authority than the 'Father of history,' if the opinion of those scholars could be accepted who

**Kaspatyros of
Herodotos.**

have thought to recognize the name of the Valley in the KASPATYROS of Herodotos. The facts are briefly the following. Herodotos mentions the city of Kaspatyros as the place at which the expedition under Scylax of Koryanda, sent by Darius to explore the course of the Indus, embarked.⁴ He distinctly places this city in the Paktyan land (Πακτυῶν γῆ). This is described as being to the north of the other Indians and apparently bordering on the Baktrian territory. The place meant by Herodotos is evidently the same that Hekataios knew before him by the name of KASPAPYROS and as a city of the Gandarians.⁵

The notice of Hekataios (circ. 549-486 B.C.) makes it clear that Kaspatyros or Kaspapyros, whichever form may be more accurate, must have been situated in that territory where the Indus first becomes navigable, i.e., in the ancient Gandhāra, the present Peshawar District. That the designation *Paktyikē* used by Herodotos refers to the same

¹ *India*, transl. Sachau, i. p. 206.

² Compare *Rājat.* vii. 140, 1301; viii. 192, 379, 1588, 1796, 1887, 2673 sq.

³ See *Dionysiaka*, xxvi. 165 sqq. I take this reference from TROYER, ii. p. 308.

⁴ See iv. 44, also iii. 102. The points bearing on the interpretation of the passage have been fully discussed by SIR E. H. BUNBURY, *History of Ancient Geography*, i. pp. 228, 256.

⁵ See Stephanos Byzant., s.v. ΓΑΝΔΑΡΙΚΗ; also Müller's *Fragmenta historicæ graecæ*, i. p. 12.

territory and represents the earliest mention of the ethnic name *Pakhtūn* or the modern Indian *Pathān*, seems also probable.¹ The exact site of Kaspatyros has not been identified. Considering the great changes which local nomenclature in Gandhāra has undergone, it perhaps never will be.²

WILSON was the first who distinctly attempted to connect the name of Kaspatyros with Kaśmīr.³ But the idea seems to have occurred earlier. For D'Anville thought it necessary to refer to it and to refute it. Wilson saw clearly enough that the city of Scylax must have been situated close to the Indus and hence far away from Kaśmīr. If notwithstanding this important fact he yet proposed to identify its name with that of Kaśmīr, on the assumption that the borders of the latter kingdom extended as far as the Indus, the mistake must be traced to a fanciful etymology of the latter name.

Wilson assumed that the name Kaśmīr was derived from **Kaśyapa-pura*, a name which he supposed to have been given to the country owing to its colonization by the Ṛṣi Kaśyapa. He supported this strange derivation by a reference to the uniform assertion of 'Oriental writers.'⁴ But it is difficult to believe that he could have meant any

¹ This identification seems to have been first made simultaneously by DORN and LASSEN; compare V. DE ST. MARTIN, *Étude sur la géographie grecque de l'Inde*, Mém. de l'Acad. des Inscriptions, Sav. Étrang., 1re Série, V., p. 17 sqq. His note on Kaspatyros, ib. pp. 81-86, contains a judicious review of the whole question from the geographical point of view and a detailed account of earlier opinions. For a more recent résumé compare DARNESTETER, *Chants Populaires des Afghans*, pp. clxxx sqq.

² Proper navigation begins now at Jahāngīra, a place situated on the left bank of the Kābul River, some six miles above the confluence of the latter with the Indus at Attock. The lower part of the Kābul River's course lies in a well-defined single bed which, in view of the natural configuration of the banks, cannot have changed materially in historical times. Above Jahāngīra the current becomes too strong for safe navigation.

I doubt very much whether the Indus immediately above Attock can ever have been suitable for proper navigation. The river is cut up there into many, often very shallow, channels and obstructed by continually shifting sandbanks. On the eastern bank spreads the low plain of Chach, which must have always left a wide scope to the vagaries of the great river. Taking into account these circumstances I should not be surprised if Scylax's expedition had chosen some place near Jahāngīra for the start on their voyage. There are many ruined sites near the latter place, and near Alladhēr closeby on the Indus.

³ See *Essay*, p. 117; for a reproduction of the argument, also, *Ariana Antiqua*, p. 136 sq.

⁴ "This (the name of Cashmir) was derived, it is uniformly asserted by the Oriental writers, from the colonization of the country by Casyapa, the first settlement or city being named after him Casyapapur, converted in ordinary pronuncia-

better authorities than the Persian *Tārīkh*s of Kāśmīr, of the 17th and 18th century, which he had occasion to consult in connection with his above-quoted Essay. They, indeed, indulge in whimsical etymologies like Kashmīr, *i.e.*, *Kashap* (Kāśyapa) + *mar* (maṭha), etc. But neither these etymologies nor the name **Kāśyapapura* are in any way known to our genuine sources.

Wilson would scarcely have chosen to put forth such a derivation, had the whole of the Chronicle or the other Kāśmīrian texts been at the time accessible to him. Extensive as this literature is, it does not furnish any evidence whatever for **Kāśyapapura* or a similar name having ever been used as a designation of the country. This fact is all the more significant as allusions to the legendary origin of the country are otherwise so frequent. The philological impossibility of deriving Kāśmīra from **Kāśyapapura* need scarcely be specially indicated at the present day.¹ A reference to the theory was, however, here necessary, as it has found its way into works of authorities like Ritter, Lassen and Humboldt, and has hence been reproduced even by recent writers.²

SECTION II.—CHINESE RECORDS.

8. If classical literature has thus nothing to tell us of Kāśmīr but the bare name, it is very different with the
Earliest Chinese notice. Chinese records. Buddhist pilgrims from China on their way to the sacred sites of the Indian plains visited Kāśmīr and chose it as a resting place. Their itineraries as well as the records of the political relations established with Kāśmīr during a period of Chinese extension to the west, furnish us with a series of interesting data for the old geography of Kāśmīr.

It seems difficult to ascertain from the materials at present accessible in translations or notices of European scholars, which is to be considered the earliest Chinese reference to Kāśmīr. The difficulty is connected with the use of the geographical term *Ki-pin*. This name

tion into Cashappur or Caspapur, the latter of which forms is the proper reading of the Greek text;” *Essay*, p. 117.

¹ It is curious to note that Kāśyapapura was, according to an Indian authority quoted by Alberūnī, *India*, transl. Sachau, i. p. 298, one of the old names of Multān.

² See RITTER, *Erdkunde*, ii. p. 1087; LASSEN, *Ind. Alt.*, ii. p. 635 (where for **Kāśyapapura* > Kāśmīra an equally unfounded derivation from **Kāśyapamīra* is substituted); HUMBOLDT, *Asie Centrale*, i. p. 102; for modern works, *e.g.*, McCRINDLE, *Ancient India*, p. 108; Beal, *Si-yu-ki*, i. p. 148.

originally and properly designated the Upper Kābul Valley.¹ It appears, however, at a period when Chinese knowledge of India was less developed, to have been used in a vague and general fashion for a variety of territories on the northern confines of India, among them also Kāsmīr. However this may be, our loss seems scarcely to be great, as these notices of the Chinese Annalists regarding Ki-pin do not seem to give characteristic local details.²

The first clear reference to Kāsmīr which I can trace at present, is contained in a record dating from 541 A.D. It is taken from the account of an Indian envoy who reached China during the early part of the reign of the T'ang dynasty.³ The name of Kāsmīr is not mentioned. Yet it is evident that M. PAUTHIER who published the extract, was right in referring to Kāsmīr the description given of the northern portion of India as a country "situated at the foot of the snowy mountains and enveloped by them on all sides like a precious jewel. In the south there is a valley which leads up to it and serves as the gate of the kingdom." The points noticed here are exactly those with which we meet in all Chinese accounts of Kāsmīr.

9. Ninety years after the date of this notice Kāsmīr was visited by

Visit of Hiuen
Tsiang.

HIUEN TSIANG. He reached the Valley from Uraśā in the west and resided in it as an honoured guest for fully two years. The records of the great Chinese pilgrim contain by far the fullest and most accurate description of Kāsmīr that has come down to us from a foreign pen during the period with which we are here concerned.⁴

Hiuen Tsiang must have entered Kāsmīr by the valley of the Vitastā as he describes his route as leading to the south-east of Uraśā, the present Hazāra District. After 'crossing over mountains and treading along precipices' he arrived at the 'stone gate which is the western entrance of the kingdom.' We shall see below that this gate known also to Ou-k'ong and Albērūnī, was the frontier watch-station or *Dvāra* in the gorge of Bārāmūla (Varāhamūla). He passed the first night on Kāsmīr soil at *Huṣkapura*, the modern Uṣkūr, opposite Bārāmūla. Thence he proceeded to the capital which he describes

¹ Compare the explanations of Messrs. Lévi and Chavannes in their paper '*L'Itinéraire d'Ou-k'ong*, *Journal asiatique*, 1895, vi. pp. 371 *sqq.*, together with the supplementary and modifying statements, *ib.*, 1896, vii. pp. 161 *sq.*

² These notices are enumerated by Messrs. Lévi and Chavannes, *Journal asiat.*, 1895, vi. pp. 378 *sq.*

³ G. PAUTHIER, *Examen méthodique des faits qui concernent le Thian-Tchou ou l'Inde*, Paris, 1839, p. 40.

⁴ See *Si-yu-ki*, transl. Beal, i. pp. 148 *sqq.*; *Life of Hiuen Tsiang*, transl. Beal, pp. 68 *sqq.*

exactly in the position of the present Srinagar. There he was lodged in the convent known as the *Jayendravihāra* which is named also in the *Rājatarāṅgiṇī*.¹ A two years' stay, though chiefly passed in the study of 'the Sūtras and Śāstras', must have enabled Hiuen Tsiang to acquaint himself thoroughly with the Valley.

His description of the kingdom *Kia-shi-mi-lo* shows clearly that the geographical application of the term Kaśmīr must have been then, exactly as now, restricted to the great basin of the Vitastā and the side valleys drained by its tributaries above the Bārāmūla defile. He notices that the country is enclosed on all sides by mountains which are very high. "Although the mountains have passes through them, these are narrow and contracted." These natural bulwarks protected the country from neighbouring states 'which had never succeeded in subduing it.' Though the climate is cold and the snow plentiful, the soil is fertile and abounds with fruits and flowers. The inhabitants seem to have changed as little as the soil since Hiuen Tsiang's days. It is still easy to recognize in them the people whom he describes as "light and frivolous, and of a weak, pusillanimous disposition. The people are handsome in appearance, but they are given to cunning. They love learning and are well-instructed."

"Since centuries learning had been held in great respect in this kingdom." Hiuen Tsiang dwells with evident pleasure on the recollection of the learned conferences he had with the Kaśmīr doctors of the sacred law.² Kaśmīr had in earlier times played a great part in the traditions of the Buddhist church. Hiuen Tsiang relates at length the legends how the Arhat Madhyāntika had first spread the law of Buddha in the land; how in the time of Aśoka the five hundred Arhats had taken up their abode there; and how finally under the great Kaniṣka, king of Gandhāra, Kaśmīr had been the scene of the universal Council which fixed and expounded the Sacred Canon. Yet he observes that in his own time the kingdom as a whole was "not much given to the faith, and that the temples of the heretics were their sole thought."³

It is probably owing to this not very flourishing condition of contemporary Buddhism that Hiuen Tsiang mentions only a comparatively small number of Vihāras and Stūpas in the Valley. Among the Stūpas there were four ascribed to Aśoka. Beneath another Kaniṣka was believed to have deposited the canonical texts as fixed by his Council, engraved on sheets of copper. None of these structures have yet been

¹ Compare note iii. 355.

² See *Life*, p. 71 sq.

³ See *Si-yu-ki*, i. p. 158.

identified with any certainty. But in their description the pilgrim furnishes us incidentally with a valuable topographical indication.

Speaking of the convent which prided itself on the possession of a miraculous tooth of Buddha, he indicates its site as being about 10 *li* (circ. 2 miles) to the south-east of the new city and to the north of the old city.¹ This proves that the capital of Hiuen Tsiang's time which corresponds to the present Srinagar, was then a comparatively new foundation, exactly as the Chronicle's account has it. At the same time the reference to the 'old city' enables us to fix with absolute certainty the earlier capital of Srinagari at the present *Pāndrāthan*, the *Purāṇadhīsthāna* of Kalhaṇa.²

The two full years which Hiuen Tsiang, according to his own statement spent in Kāsmīr,³ represent a longer halt than any which the pious traveller allowed himself during his sixteen year's wanderings through the whole of India and Central Asia.⁴ With all due respect for the spiritual fervour of the pilgrim and the excellence of his Kāsmirian preceptors, it is difficult to suppress the surmise that the material attractions of the Valley had something to do with his long stay. The cool air of Kāsmīr, the northern aspect of its scenery and products, have at all times exercised their powerful charm over those visitors who themselves born in colder climes have come to the Valley from the heat and dust of the Indian plains. Just as these advantages attract in yearly increasing numbers European visitors from India Proper, so the modern Turki pilgrims from Kashgar, Yarkand and other parts of Central Asia, whether on the way to Mecca or on their return, never fail to make a long stay in Kāsmīr.

We should undoubtedly find the example of the modern Hājis followed also by Buddhist pilgrims if there were still any from those northern regions to take their way through Kāsmīr to the holy places of India. It would be an interesting task to examine to what extent the fame of Kāsmīr as the 'paradis terrestre des Indes,' is the creation of the Valley's northern visitors, both European and Asiatic. Here it may suffice to add that Hiuen Tsiang before he reached Kāsmīr, must have had already his experience of the torrid heat and the other amenities of a Panjāb summer.⁵ We shall also see that the example of the other Chinese pilgrim whom we are able to follow on his visit to Kāsmīr, points exactly to the same conclusion.

¹ *Si-yu-ki*, i. p. 158.

² See below §§ 88, 89.

³ See *Life*, p. 72.

⁴ Compare the table of dates for Hiuen Tsiang's itinerary, CUNNINGHAM, *Ancient Geography*, pp. 563 sqq.

⁵ See CUNNINGHAM, *Ancient Geography*, p. 563 sq.

Hsien Tsiang's narrative tells us that he left the Valley going in a south-westerly direction. He reached *Pun-nā-tso*, the Parnotsa of the Chronicle and the modern Pruntz, after crossing mountains and passing precipices.¹ As the Tōṣ²maidān route is the direct and most frequented route to that territory, it is very probable that Hsien Tsiang also followed it. Parnotsa as well as Rājapuri (Ho-lo-she-pu-lo) to which the pilgrim subsequently proceeded, had at the time of his visit no independent ruler, but were subject to Kaśmīr.

10. The next Chinese notice of Kaśmīr, and one which is of considerable historical interest, is contained in the *T'ang Annals*.³ They inform us

that the first embassy from Kaśmīr arrived at the imperial court in or shortly after A.D. 713. In the year 720 *Tchen-t'o-lo-pi-li*, ruler of Kaśmīr, the Candrāpīḍa of the Chronicle, was accorded by imperial decree the title of king.

His brother and successor *Mou-to-pi* in whom Kalhaṇa's Muktāpīḍa or Lalitāditya has long ago been recognised, sent after the first Chinese expedition against *Po-liu* or Baltistan (between 736 and 747) an envoy called *Ou-li-to* to the Chinese court. He was to report the alleged victories of his master over the Tibetans but at the same time also to solicit the establishment of a camp of Chinese troops by the banks of the lake *Mo-ho-to-mo-loung* (the Mahāpadma Nāga or Volur lake). The Kaśmīr king offered to provide all necessary supplies for an auxiliary force of 200,000 men. But the 'Divine Khān' found it more convenient to content himself with issuing decrees for the sumptuous entertainment of the ambassador and for the registration of Muktāpīḍa with the title of king. Since that time the relations of Kaśmīr with the celestial empire and the receipts of tribute from the former are said to have continued without interruption.

The description of Kaśmīr which is coupled with this record of the T'ang Annals, appears to be in the main copied from Hsien Tsiang's *Si-yu-ki*. But in addition it furnishes us with an exact statement as to the Kaśmīr capital at that time. In my *Notes on Ou-k'ong's Account of*

¹ *Si-yu-ki*, i. p. 162 *Life* p. 72.

² The notice was first made known by A. RÉMUSAT's translation of the corresponding extract in Matuanlin's encyclopædia; see *Nouveaux Mélanges asiatiques*, Paris, 1829, i. pp. 196 sqq. An abstract of the same notice, but from the original text of the Annals, where the names are more correctly rendered, will be found in Messrs. LÉVI and CHAVANNES' *L'Itinéraire d'Ou-k'ong*, *Journal asiat.*, 1895, vi. pp. 354 sqq.

From REINAUD, *Mémoire sur l'Inde*, pp. 189 sq. it would appear that the names of Kaśmīr kings in this Chinese record and that of the Mahāpadma lake were first correctly identified by KLAPROTH, *Mémoires relatifs à l'Asie*, ii. pp. 275 sq. This work is at present not accessible to me.

*Kāsmīr*¹ I have shown that the *Po-lo-ou-lo-po-lo* of the Annals is a correct reproduction of *Pravarapura*, the old and official name of *Srinagara*. In the same way the name *Mi-na-si-to* given to the great river which flows to the west of the capital, represents a correct enough transcription of *Vitastā*. Both the names are recorded in the form which they bore in the official Sanskrit, and are, therefore, evidently taken from the information given by the Kāsmīr envoys.

11. Not many years after Muktāpīḍa's embassy Kāsmīr was visited by another Chinese pilgrim, Ou-k'ong. Though greatly inferior to Hiuen Tsiang in learning and power of observation, he has yet left us

information regarding the country which is of interest and value. The itinerary of Ou-k'ong's discovery and recent publication of which we owe to Messrs. Lévi and Chavannes,² contains the reminiscences of forty years' wanderings, taken down after the pilgrim's return to China and in a form regrettably brief. But whether it be due to Ou-k'ong's long stay in Kāsmīr or to other causes, his account is fortunately far more detailed in the case of Kāsmīr than in that of any other territory visited by him. His description of the Valley and the several sites mentioned by him have been fully discussed by me in the separate paper already quoted.³ I need hence indicate here only the main results of this analysis.

Ou-k'ong reached Kāsmīr in the year 759 from Gandhāra, presumably by the same route as Hiuen Tsiang had followed. He took there the final vows of a Buddhist monk and spent there fully four years engaged, as his itinerary tells us, in pilgrimages to holy sites and in the study of Sanskrit.⁴ Though he is said to have studied from day-break till night-fall, his diligence does not seem to have brought him much literary culture. This is curiously shown by the popular Apabhraṃśa forms in which our pilgrim records the names of the monasteries he specially singles out for notice. Four of these I have been able to identify with Vihāras mentioned in the Chronicle,⁵ and two of them have left their names to villages which survive to the present day.

¹ See pp. 26 sqq. in the above-quoted paper, published in the "Proceedings" of the Imperial Academy, Vienna (Philos.-histor. Class), 1896, vol. cxxxv.

² See *L' Itinéraire d'Ou-k'ong*, Journal asiat., 1895, vi. pp. 341 sqq.

³ See *Notes on Ou-k'ong's account of Kāsmīr*, loc. cit.

⁴ See *L' Itinéraire d'Ou-k'ong*, p. 356.

⁵ Thus the monastery of *Ngo-mi-t'o-p'o-wan* (**Amitābhavana*) corresponds to the *Amṛtabhavana* Vihāra of Rājat. iii. 9, which has given its name to the present *Antabavan* near Srinagar. The 'monastère du mont *Ki-tché*, (**Kicā* < Skr. *kṛtyā*) is no other than the *Kṛtyāśrama* Vihāra, at the modern village *Kiṅgāhōm*, the legend of which is related at length by Kalhana, i. 131 sqq. The Vihāra of the great king *Moung-ti* (**Matti*) was one of Muktāpīḍa's foundations, probably the **Mukta-*

While Hsien Tsiang mentions only about one hundred convents in the country, Ou-k'ong found more than three hundred and speaks in addition of the number of Stūpas and sacred images as considerable. We may conclude from this that there had been a rise in the popularity of Buddhism in the century intervening between the visits of the two pilgrims.

Ou-k'ong describes the kingdom of Kaśmīr correctly enough as enclosed on all sides by mountains which form its natural ramparts. Only three roads have been opened through them, and these again are secured by gates. In the east a road leads to *T'ou-fan* or Tibet; in the north there is a road which reaches into *Polu* or Baltistān; the road which starts from 'the western gate' goes to *K'ien-t'o-lo* or Gandhāra.¹

We have here a clear enough description of the great routes through the mountains which since ancient times have formed the main lines of communication between the Valley and the outer world. The road to *T'ou-fan* corresponds undoubtedly to the present route over the *Zoji-Lā* to Ladākh and hence to Tibet. The road to *Po-lu* is represented by the present "Gilgit Road," leading into the Upper Kiśangaṅgā Valley and thence to Skardo or Astōr on the Indus. The third road can be no other than the route which leaves the Valley by the gorge of Bārāmūla and follows the Vitastā in its course to the west. We have seen already that Hsien Tsiang followed it when he entered Kaśmīr by 'the stone gate, the western entrance of the kingdom.' There can be doubt that in the gates (*fermetures*) closing these roads we have a reference to the ancient frontier watch-stations of which we find so frequent mention in our Kaśmirian records.

Besides these three roads Ou-k'ong knew yet a fourth. "This, however, is always closed and opens only when an imperial army honours it with a visit." It is probable that this curious notice must be referred to one of the roads leading over the Pīr Panṭsāl range to the south. Owing possibly to political causes these routes may have been closed to ordinary traffic at the time of Ou-k'ong's visit.²

The political relations between China and the northern kingdoms of India seem to have ceased soon after the time of Ou-k'ong. This was probably due to the Chinese power under the later T'ang gradually losing ground in Central Asia before the Uigurs and the Tibetans. The

vihāra at Huṣkapura: Uskūr, iv. 188. In the 'monastère du général (*tsiang-kiun*)' it is easy to recognize the Vihāra of the Turk (Tuḥkhāra) *Cañkuna* who was one of Muktāpīḍa's ministers. He is reported to have founded two monasteries called after his own name (iv. 211, 215).

¹ See *L' Itinéraire d' Ou-k'ong*, p. 356.

² See *Notes on Ou-k'ong*, p. 24 sq.

pilgrimages, however, of Chinese Buddhists to India continued during the next two centuries, and of one at least of these pilgrim parties it is recorded that it took the route through Kāśmīr.¹ But no detailed account bearing on Kāśmīr has yet come to light of these later pilgrimages.

SECTION III.—MUHAMMADAN NOTICES.

12. After the Greeks and the Chinese the early Muhammadan writers are our next foreign informants regarding the historical geography of India. If with one very remarkable exception they have nothing to tell us of Kāśmīr topography, the explanation is not far to seek. The first rush of Arab invasion in the Indus Valley during the eighth century had carried the Muhammadan arms at times close enough to the confines of Kāśmīr.² No permanent conquest, however, had been effected even in the plains of the Northern Panjāb. Protected in the West by the unbroken resistance of the Sāhis of Kābul and in the South by a belt of war-like Hindu hill-states, Kāśmīr had never been seriously threatened. Even when Islām at last after a long struggle victoriously over-spread the whole of Northern India, Kāśmīr behind its mountain ramparts remained safe for centuries longer.

Conquest and trade were the factors which brought so large a part of the ancient world within the ken of the early Muhammadan travelers and geographers. Both failed them equally in the case of Kāśmīr. For a classical witness shows us that a system of seclusion,—ever easy to maintain in a country so well guarded by nature as Kāśmīr,—hermetically sealed at that time the Valley to all foreigners without exception.

Even the well-informed Al-Mas'ūdī who had personally visited the Indus Valley, is unable to tell us more about Kāśmīr than that it is a kingdom with many towns and villages enclosed by very high and inaccessible mountains, through which leads a single passage closed by a gate.³ The notices we find in the works of Al-Qazwīnī and Al-Idrīsī are practically restricted to the same brief statement. The references in other geographical works are even more succinct and vague.⁴

¹ Compare YULE, *Cathay*, p. lxxi., and JULIEN, *Journal asiat.*, 1847, p. 43.

² See REINAUD, *Mémoire sur l'Inde*, pp. 195 sq.; ALBĒRŪNĪ, *India*, i. p. 21.

³ See Al-Mas'ūdī's "Meadows of Gold," transl. Sprenger, i. p. 382.

⁴ The silence of the early Muhammadan geographers as regards Kāśmīr was duly noticed by RITTER, *Asia*, ii. p. 1115.—For Al-Qazwīnī, see GILDENMEISTER, *De rebus Indicis*, p. 210; for Al-Idrīsī, ELLIOT, *History of India*, i. pp. 90. sq.

For the notices of other Arab geographers, see *Bibliotheca geographorum*

13. Notwithstanding the circumstances above indicated, Arabic literature furnishes us with a very accurate and valuable account of old Kāśmīr. We owe it to the research and critical penetration of

ALBĒRŪNĪ of whom indeed it might be said as of an early British explorer of Afghānistān,¹ that he could look through the mountains. The great Muhammadan scholar had evidently utilized every opportunity during his long stay at Ghazna and in the Panjāb, (A.D. 1017-30) for collecting information on Kāśmīr.

His interest in the distant alpine valley is easily understood. He, himself, tells us in the first chapter of his great work on India, how Hindu sciences when the victories of Maḥmūd had made the Hindus 'like atoms of dust scattered in all directions,' had retired far away from the conquered parts of the country. They "fled to places which our hand cannot yet reach, to Kāśmīr, Benares and other places."² In another passage he speaks again of Benares and Kāśmīr as the high schools of Hindu sciences.³ He repeatedly refers to Kāśmīrian authors, and from the notices shown below it is evident that among his informants, if not among his actual teachers, there were Kāśmīrian scholars.⁴

The curious fact that Albērūnī himself composed some Sanskrit treatises for circulation among 'the people of Kāśmīr,'⁵ proves beyond all

arabicorum, ed. De Goeje, i. p. 4; ii. pp. 9, 445; v. p. 364; vi. pp. 5, 18, 68; vii. pp. 89, 687; also *Abū-l-Fidā*, ed. Reinaud, pp. 361, 506.

¹ Mountstuart Elphinstone.

² ALBĒRŪNĪ'S *India*, transl. Sachau, i. p. 22.

³ *India*, i. p. 173.

⁴ Albērūnī, ii. 181, refers particularly to Kāśmīrian informants with whom he conversed regarding the miracle of the '*Kūdaishahr*,' i.e., the *Kapateśvara* Tirtha (see below § 112). The way in which the pilgrimage to this spot was described to Albērūnī, makes it quite certain that his informants were personally familiar with the Tirtha. The same must be said of his note on the pilgrimage to the temple of Śārādā (i. 117; see below § 127). The details regarding a local Kāśmīr festival (ii. p. 178), the anecdote about the propagation of the *Sīsyahitāvṛtti* in Kāśmīr (i. 135), are such as could not well have reached Albērūnī otherwise but by verbal communication.

Writing himself in A.D. 1030 he refers to a statement contained in the almanac for the Śaka year 951 (A.D. 1029-30) 'which had come from Kāśmīr' (i. p. 391). He could scarcely have secured such an almanac except through Kāśmīrian Paṇḍits who even at the present day, wherever they may be, make it a point to provide themselves from home with their local *nakṣatrapatrikā*.

For references to Kāśmīrian authors or texts specially connected with Kāśmīr, see i. pp. 126, 157, 298, 334, i. p. 54 (*Viṣṇudharma*), etc. Compare also the very detailed account of the calendar reckoning current in Kāśmīr and the conterminous territories, ii. p. 8.

⁵ See *India*, Prof. Sachau's preface, p. xxiv., and the introduction to his edition of the text, p. xx.

doubt the existence of special relations between the great *Mleccha* scholar and that jealously guarded country. These relations seem strange considering what Albērūni himself tells us so graphically about the rigid isolation of Kāsmīr. We can scarcely explain them otherwise than by personal intercourse with Kāsmīrian Pandits.

In view of these indications we can hardly go wrong in attributing a great portion of Albērūni's detailed knowledge of Kāsmīr topography to these learned informants. But we also know that the chances of war had given him an opportunity of supplementing this knowledge in part by personal observation. Albērūni refers in two places to his personal acquaintance with the fortress *Lauhūr* (or *Lahūr*) on the confines of Kāsmīr. In an extract from my commentary on the *Rājatarāṅgiṇī* already published,¹ I have proved that Albērūni's *Lauhūr* is identical with the castle of *Lohara*, so frequently mentioned in the Chronicle. Its position is marked by the present *Loharin* on the southern slope of the *Pir Panṭāl* range.

'*Loharakoṭṭa*' is undoubtedly the same as the Fort of *Lōh-kōt* which according to the uniform report of the Muhammadan historians brought Maḥmūd's attempt at an invasion of Kāsmīr to a standstill. It is hence certain that Albērūni had accompanied this unsuccessful expedition. It probably took place in A.D. 1021. Though it failed to reach Kāsmīr, it must have given Albērūni ample opportunity to collect local information and to acquaint himself with the topography of those mountain regions which formed Kāsmīr's strongest bulwark to the south. The result is yet clearly traceable in the accuracy with which he describes the relative position of the most prominent points of this territory.

Is it too much to suppose that Albērūni had at one time or the other Kāsmīrian Pandits in his employ? We know that in preparing the vast materials digested in his book he worked largely with the help of indigenous scholars. Judging from his own description of the state of Hindu sciences in the conquered territories and the bitter enmity prevailing there against the dominant *Mlecchas*, it is doubtful whether he could have secured there such assistance as he required.

Albērūni himself, when describing the difficulties in the way of his Indian studies, tells us (i. p. 24): "I do not spare either trouble or money in collecting Sanskrit books from places where I supposed they were likely to be found, and in procuring for myself, even from very remote places, Hindu scholars who understand them and are able to teach me."

Kāsmīr has always been distinguished by an over-production of learning. Its Pandits have been as ready in old days as at present to leave their homes for distant places wherever their learning secured for them a livelihood (compare BÜHLER, *Introd. to the Vikramāṅkadevacarita*, p. xvii; also *Indische Palæographie*, p. 56).

¹ See my note on the '*Castle of Lohara*,' *Indian Antiquary*, 1897, pp. 225 sqq., or Note E, on *Rājat.* iv. 177, §§ 12, 13.

14. Albēri's main account of Kaśmīr is contained in Chapter

**Albēri's account
of Kaśmīr.**

xviii. which gives 'various notes on the countries of the Hindus, their rivers and their ocean.'¹ Compared with the description of the rest of India, it is disproportionately detailed. Albēri first sketches in broad but correct outlines the political division of the mountain region which lies between the great Central Asian watershed and the Panjāb plain. He then refers to the pedestrian habits of the Kaśmīrians and notes the use by the nobles of palankins carried on the shoulders of men, a custom fully illustrated by the Chronicle and accounted for by the nature of the communications in the mountains.²

What follows deserves full quotation. "They are particularly anxious about the natural strength of their country, and therefore take always much care to keep a strong hold upon the entrances and roads leading into it. In consequence it is very difficult to have any commerce with them. In former times they used to allow one or two foreigners to enter their country, particularly Jews, but at present they do not allow any Hindu whom they do not know personally to enter, much less other people."

We have here a full and clear statement of that system of guarding all frontier-passes which we have found alluded to already in the Chinese records. It explains the great part which is played in the Kaśmīr Chronicles by the frontier watch-stations, the *Dvāras* and *Draṅgas*. It is of all the more interest as the last traces of the system, in the form of *rāhdārī*, have disappeared in Kaśmīr only within quite recent memory.³

Albēri then proceeds to describe the 'best known entrance to Kaśmīr.' Though the starting point of his itinerary cannot be identified with absolute certainty, it is clear that he means the route which ascends the Jehlam Valley. From "the town *Babrahān*, half way between the rivers Sindh (Indus) and Jailam, 8 farsakh are counted to the bridge over the river where the water of the *Kusnārī* is joined by that of the *Mahwī*, both of which come from the mountains of *Shamīlān* and fall into the Jailam." Though there seems to be here some slight confusion, I have little doubt that the point meant by 'the bridge over the river' corresponds to the present Muzaffarābād, at the confluence

¹ See *India*, i. pp. 206 sqq.

² Compare e.g. *Rājāt* iv. 407; v. 33, 219; vii. 478; viii. 2298, 2636, 2674, 3165, etc.

The word *katt* which Albēri gives as the indigenous term of the palankin, is perhaps a corrupted Apabhraṃśa form of *karpīratha*, often named in the *Rājāt*.

³ Compare my *Notes on the Ancient Topography of the Pir Panjal Route*, J. A. S. B., 1895, pp. 382 sqq.; also below § 40.

of the Jehlam and Kīṣaṅgaṅgā. The easiest route to Kāśmīr from the west leads through the open central portion of Hazāra (Uraśā) to Mansahra; hence across the Kunhār and Kīṣaṅgaṅgā rivers to Muḡaffarābād, and then up by the right side of the Jehlam Valley to Bārāmūla.¹ In *Kuśnārī* it is easy to recognize with Prof. Sachau the present Kunhār River which falls into the Jehlam a few miles below its great bend at Muḡaffarābād.² The Mahwi is evidently meant to designate the Kīṣaṅgaṅgā.³ If thus interpreted the only error in Albērūnī's description is that it makes the Kunhār join the Kīṣaṅgaṅgā whereas in reality it falls into the Jehlam after the latter's junction with the Kīṣaṅgaṅgā.

I have shown in my note on Rājat. v. 215 that the route here indicated, which was a favorite one until the modern "Jehlam Valley Tonga Road" was constructed, is distinctly referred to already in Kalhaṇa's account of Śaṃkaravarman's march to and from Uraśā. The distance of 8 farsakh corresponds according to Albērūnī's reckoning to about 39 English miles.⁴ Referring to the map and the modern route measurements⁵ this distance carries us to a point between Mansahra and the next stage Abbottabad, *i.e.*, exactly into the neighbourhood where according to the evidence given in the above-quoted note the old capital of Uraśā must be located. 'Babrahān' which cannot be identified at present, is perhaps intended to represent the name of this old town which could fairly be described as situated midway between the Indus and Jehlam.

From Muḡaffarābād onwards,—where there is still a bridge over the Kīṣaṅgaṅgā just as at the time (1783) when Forster crossed here on his way from Kāśmīr to Attock,⁶ and as, if our explanation is right, in the time of Albērūnī,—we can follow the route quite plainly. Albērūnī counts five days of march "to the beginning of the ravine whence the

¹ This route is described, *e.g.*, by DREW, *Jummoo*, p. 528, 'as the easiest route from the Panjāb to Kāśmīr.'

² *Kunhār* represents the regular phonetic derivative of a Skr. **Kuśnārī*, medial *ś* becoming always *h* under a phonetic law common to Kāśmīrī and the related dialects; for the change *hn* > *nh* compare GRIERSON, *Phonology of Indo-Aryan Vernaculars*, Z. D. M. G., 1896, p. 33.

³ I am unable to account for the name *Mahwi*. Could it be the corruption of an Apabhraṃśa derivative of *Madhumatī*? This name, though properly applied to an affluent of the Kīṣaṅgaṅgā, is used in a *Māhātmya* also for the latter river itself; see Note B, Rājat. i. 37, § 16.

⁴ Compare Prof. Sachau's note, *India*, ii. p. 316. Albērūnī values his *farsakh* at 4 Arabian miles or approximately 4×2186 yards. Hence 1 *farsakh* = $4 \frac{1728}{1000}$ English miles.

⁵ See DREW, *loc. cit.*

⁶ See G. FORSTER, *Journey from Bengal to England*, 1808, ii. p. 46.

river Jailam comes,' that is, of the gorge through which the river flows immediately below Bārāmūla. This estimate agrees closely with the actual road distance between Muẓaffarābād and Bārāmūla which is given by Drew as 84 miles.¹ At the other or Kaśmīr end of the ravine Albērūni places quite correctly 'the watch-station *Dvār*' (Skr. *Dvāra*) the position of which, as we shall see below, is marked to this day by the site of the old gate known as *Drang*.

"Thence leaving the ravine you enter the plain, and reach in two more days *Addishātān*, the capital of Kaśmīr, Albērūni's description of the Valley. passing on the road the village *Ūshkārā*." All this is perfectly accurate. *Adhiṣṭhāna* 'the capital' is, of course, meant for *Srinagara*² and *Ūshkārā* for *Uṣkūr*, opposite Bārāmūla, the ancient *Huṣkapura* already mentioned by Hiuen Tsiang.³ Albērūni's mention of *Uṣkūr* which is on the left river bank, shows that then as now the ordinary road from the 'Gate of *Varāhamūla*' to *Srinagara* passed on the left or southern side of the Valley. Two marches are still counted for this part of the journey.

The capital is correctly described as "being built along both banks of the river Jailam which are connected with each other by bridges and ferry boats." It is said to cover 'a space of four *farsakh*.' This if interpreted to mean 'a space of four *Farsakh* in circumference,' would not be too far from the truth, assuming that all suburban areas around the city are included in the estimate. The course of the river above and below the capital is traced rightly enough as far as the Valley is concerned. "When the Jailam has left the mountains and has flowed two days' journey, it passes through *Addishātān*. Four *Farsakh* farther on it enters a swamp of one square *Farsakh*." Here, of course, the *Volur* lake (*Mahāpadma*) is meant. "The people have their plantations on the borders of this swamp, and on such parts of it as they manage to

¹ See *loc. cit.* According to Drew's table six marches are counted, but one of them is very short. On the modern route following the opposite side of the river five marches are now reckoned from *Domēl*, opposite to *Muẓaffarābād*, to *Bārāmūla*.

² *Adhiṣṭhāna*, used again ii. p. 181, is a term which indicates that Albērūni's informant was a Sanskrit-speaking person. The common designation of the capital was *Srinagara* or simply *Nagara*; see § 91 below.

³ The text as rendered by Prof. Sachau, speaks of "*Ūshkārā* which lies on both sides of the Valley, in the same manner as *Bārāmūlā*." There is either some corruption in the text here or Albērūni's informant had not made himself sufficiently clear. What he must have meant, is that *Ūshkārā* lay on the opposite side of the river in the same manner as *Bārāmūlā*, that is at the entrance of the ravine. *Bārāmūlā* as the text spells the name, reproduces an earlier form of the Kaśmīrī *Varāhamul*, from Skr. *Varāhamūla*.

reclaim. Leaving this swamp, the Jailam passes the town of *Ūshkāṛā*, and then enters the above-mentioned ravine."

The only mistake and this one easily explained is contained in the account of the river's origin. It is described as rising "in the mountains *Haramakōt* where also the Ganges rises; cold, impenetrable regions where the snow never melts nor disappears." It is easy to recognize here the reference to Mount *Haramukūṭa* and the sacred Gaṅgā-lake at the foot of its glacier in which Kaśmīrian tradition places the source of the Sindhu river.¹ The latter is the greatest tributary of the Vitastā within Kaśmīr and is traditionally identified with the Gaṅgā, as on the other hand the Vitastā with the Yamunā.² The special sanctity of the Sindhu ('Uttaragaṅgā') and the popularity of its supposed source as a pilgrimage place sufficiently account for the substitution in Albērūnī's notice.

Entering the open plain of the Kaśmīr Valley by the Bārāmūla gorge "you have for a march of two more days, on your left the mountains of Bolor and *Shamilān*, Turkish tribes who are called *Bhattavaryān*. Their king has the title of *Bhatta-Shāh*." It is clear that Albērūnī's informant here means the mountain ranges to the north and north-west of the Valley which form its borders towards the Dard country and Baltistān. The latter has been known by the name of Bolor for many centuries.³ I am unable to trace in Kaśmīrian or other sources the names of the '*Shamilān*' and '*Bhatta*.'⁴ But as a subsequent remark mentions '*Gilgit*, *Aswīra*, and *Shūtās*,' that is the modern Gilgit, Hasōr (Astōr) and Cilās as their chief places, there can be no doubt that the inhabitants of the Dard territory to the north-west of Kaśmīr are meant together with the Baltis.

"Marching on the right side [of the river], you pass through villages, one close to the other, south of the capital and thence you reach the mountain *Kulārjak*, which is like a cupola, similar to the

Description of Pīr
Pantsāl.

¹ See below, § 57, and Rājāt. note i. 57.

² See Rājāt. note i. 57. In *Haracar*. iv. 54 the Vitastā itself is designated as the 'Gaṅgā of the north' (Uttaragaṅgā). This renders the location of its source in the lake of Haramukūṭa still more intelligible from a traditional point of view.

³ Compare YULE, *Marco Polo*, i. pp. 187, sq.; CUNNINGHAM, *Anc. Geogr.*, p. 83.

⁴ Albērūnī's *Bhatta* may possibly represent the term *Bhutṭa* or *Bhautṭa* (the modern Kś. *Buṭ*) which is applied in the Sanskrit Chronicles to the population of Tibetan descent generally, from Ladākh to Baltistān. (See Rājāt. note i. 312). Albērūnī calls their language Turkish, but it must be remembered that he has spoken previously (i. p. 206) of 'the Turks of Tibet' as holding the country to the east of Kaśmīr. There the Tibetans in Ladākh and adjacent districts are clearly intended.

mountain *Dunbāwand* (Damāwand). The snow there never melts. It is always visible from the region of *Tākēshar* and *Lauhāwar* (Lahore)."

I have already elsewhere shown that the mountain here described is the *Taṭakūṭi* peak ($33^{\circ} 45'$ lat. $74^{\circ} 33'$ long.).¹ It rises to a height of 15,500 feet in the central part of the *Pir Panṭsāl* range and is the loftiest as well as the most conspicuous point of the mountain chain to the south of *Kāsmir*. It has the shape described by *Albērūnī*, is surrounded by extensive snow-fields and can be seen through the greatest part of the year from the *Panjāb* districts of *Siālkōt* and *Gujrānwāla* corresponding to the old *Tākēshar* (*Takkadeśa*). *Albērūnī* puts the distance between this peak and the *Kāsmir* plain at two *farsakh*. This estimate is somewhat too low, inasmuch as the direct distance on the map between the peak and the nearest point of the open Valley is about 15 miles.

He is, however, quite exact in placing the fortress *Lauhūr* to the west of it as we have already seen that this stronghold is identical with the *Loharakoṭṭa* of the Chronicle, the present *Loharīn*. The entrance to the *Loharīn* Valley lies almost due west of *Taṭakūṭi*. To the south of the peak he places 'the fortress *Rājagiri*' which is also mentioned by *Kalhana*, vii. 1270, and must be looked for somewhere in the Upper *Sūran* Valley. *Albērūnī* speaks of these two hill fortresses as "the strongest places" he had ever seen.

He had personally had an opportunity of judging of their strength when accompanying *Maḥmūd's* expedition against *Kāsmir*. On that occasion he had made the observation of the latitude of *Lauhūr* (*Lohara*) to which he refers in another chapter of his work.² The result of this observation, $33^{\circ} 40'$ lat. as shown in the author's *Canon Masudicus*, very closely approaches the real one, which is $33^{\circ} 48'$ according to the Survey map. It is very probable that he obtained at the same occasion the very accurate information regarding the distance from *Lauhūr* to the *Kāsmir* capital. He gives it as 56 miles, "half the way being rugged country, the other half plain." *Albērūnī's* measurement according to the previously stated valuation represents about 69 English miles. This is but little in excess of the actual road distance viā the *Tōṣmaidan* pass as estimated by me on the tour referred to in the above-quoted paper. The description of the road, too, corresponds closely to the actual character of the route.

Albērūnī closes his account of *Kāsmir* geography with a reference to the town of *Rājawarī* which is the *Rājapuri* of the Chronicles, the

¹ See my paper 'The Castle of Lohara,' *Ind. Ant.*, 1897, § 12.

² See *India*, i. p. 317, with Prof. Sachau's note ii. p. 341. In the same passage he quotes the latitude of *Srinagar* as $34^{\circ} 9'$ from the *Karaṇasāra*.

modern *Rajauri*. In Hindu times it was the capital of a small hill-state situated immediately to the south of the Pir Panthāl range and often tributary to Kāsmīr. Albērūnī distinctly names it as the farthest place to which Muhammadan merchants of his time traded and beyond which they never passed. We have already seen what the connection was which enabled him to collect reliable and detailed information of the region beyond that barrier. As another proof of the accurate knowledge thus acquired, we may finally mention his description of the Kāsmīr climate which is far more exact than any account available to us previous to the second quarter of this century.¹

SECTION IV.—INDIAN NOTICES.

15. Nothing, perhaps, can illustrate better the lamentable lack of exact geographical information in general Sanskrit literature than to turn from the accounts of the Chinese pilgrims and Albērūnī to what Indian authors, not Kāsmīrians themselves, can tell us of the Valley.

Were we to judge merely from the extreme scantiness of the data to be gleaned from their extant works, we might easily be led to assume that Kāsmīr was to them a country foreign and remote in every way. However, we observe the same vagueness and insufficiency of local references in the case of territories immediately adjoining the old centres of literary activity. It is hence evident that the conspicuous absence of useful information on Kāsmīr may equally well be attributed to the general character of that literature.

The name *Kāsmīra*, with its derivative *Kāsmīra*, as the designation of the country and its inhabitants, respectively, is found already in the *Gaṇas* to Pāṇini's grammar and in Patañjali's comments thereon.² The *Mahābhārata* too refers in several passages to the *Kāsmīras* and their rulers, but in a fashion so general and vague that nothing more but the situation of the country in the hill region to the north can be concluded therefrom.³

The *Purāṇas* enumerate the *Kāsmīras* accordingly in their lists of northern nations. But none of the tribal names, partly semi-mythical,

¹ See *India*, i. p. 211, and below, § 77.

² See the references in the *Thesaurus* of BÖHTLINGK-ROTH, s. v. *Kāsmīra*, and in supplement V., p. 1273. The references to other texts in this paragraph have also been taken from that work except where otherwise specified.

³ Compare in particular *Mahābh.* II. xxvii. 17.

which are mentioned along with them in the Purāṇas examined by me, indicate any more distinct location of the country.¹

Varāhamihira (circ. 500 A.D.) in his *Brhatsaṃhitā* includes the Kāśmīras curiously enough in the north-eastern division. Among the regions and peoples named under the same heading there are a number of purely legendary character like 'the kingdom of the dead' (*naṣṭa-rājya*), the 'gold region,' 'the one-footed people,' etc. But besides these names and others of a different type which cannot be clearly identified, we recognize the names of tribes which undoubtedly must be located in the immediate neighbourhood of Kāśmīr. Thus we have the *Abhisāras*, *Daradas*, *Dārvas*, *Khaśus*, *Kīras*, and somewhat more distant the country of *Kulūta* (Kulu) and the *Kaṇṇindus* or *Kaulindras* (Ptolemy's *Καλανδρίνη*).²

Perhaps the most specific piece of information regarding Kāśmīr that Sanskrit literature outside the Valley can convey to us, is contained in the term *Kāśmīra* or *Kāśmīraja* which designates the saffron and according to the lexicographers also the root of the *kuṣṭha* or *costus speciosus*. Both the saffron and the *Kuṣṭha* have since early times been famous products of Kāśmīr.³

SECTION V.—THE KĀSMĪR CHRONICLES.

16. The want of detailed and exact geographical information just noticed in old Indian literature generally stands in striking contrast to the abundance of data supplied for our knowledge of old Kāśmīr by the indigenous sources. The explanation is surely not to be found in the mere fact that Kāśmīrian authors naturally knew more of their own country than others for whom that alpine territory was a distant, more or less inaccessible region. For were it so, we might reasonably expect to find ourselves equally well informed about the early topography of other

¹ Compare *Vāyupur.* xlv. 120; xlii. 45; *Padmapur.* I. vi. 48, 62; *Bhāgavatapur.* XII. i. 39; *Viṣṇupur.* IV. xxiv. 18.

² See *Brhatsaṃhitā*, xiv. 29 sqq., and *Ind. Ant.*, 1893, pp. 172, 181; also ALBERŪNĪ, *India*, i. p. 303.

³ Regarding the saffron cultivation of Kāśmīr, compare LAWRENCE, *Valley*, p. 342, and below, § 78.

The *kuṣṭha*, now known in Kāśmīr by the name of *kuṭh*, is the aromatic root of the *Saussurea Lappa* which grows in abundance on the mountains of Kāśmīr; see LAWRENCE, p. 77. The *kuṭh* is still largely exported to China and might be hence one of the medicinal plants which Hiuen Tsiang particularly notices among Kāśmīr products; see *Si-yu-ki*, i. p. 148.

parts of India which have furnished their contingent to the phalanx of Sanskrit authors. Yet unfortunately this is by no means the case.

The advantageous position we enjoy in Kāsmīr is due to a combination of causes of which the most important ones may at once be here indicated. In the first place we owe it to the preservation of connected historical records from a comparatively early date which acquaint us with a large number of particular localities and permit us to trace their connection with the country's history.

Another important advantage results from the fact that Kāsmīr, thanks chiefly to its geographical position and the isolation resulting from it, has escaped those great ethnic and political changes which have from time to time swept over the largest portion of India. Local tradition has thus remained undisturbed and still clings to all prominent sites with that tenacity which is characteristic of alpine tracts all over the world. The information preserved by this local tradition in Kāsmīr has often proved for our written records a most welcome supplement and commentary.

Finally it must be remembered that in a small mountain country like Kāsmīr, where the natural topographical features are so strongly marked and so permanent, the changes possible in historical times as regards routes of communication, sites for important settlements, cultivated area, etc., are necessarily restricted. The clear and detailed evidence which the facts of the country's actual topography thus furnish, enables us to elucidate and to utilize our earlier data, even where they are scanty, with far greater certainty and accuracy than would be possible on another ground. The observations here briefly indicated will be in part illustrated by the review of our Kāsmīrian sources.

17. Epigraphical records on stone or copper such as elsewhere in

Kalhana's Rājatarāṅgiṇī.

India form the safest basis for the study of local topography, have not yet come to light in Kāsmīr. The few fragmentary inscriptions hitherto found are all of a late date and do not furnish any topographical information. In their absence Kalhana's Rājatarāṅgiṇī is not only the amplest but also the most authentic of our sources for the historical geography of Kāsmīr. The questions connected with the historical value of the work, its scope and sources, have been fully discussed in the introduction to my translation. Here we have only to consider its character as our chief source of information on the old topography of Kāsmīr.

KALHAṆA's work, composed in the years 1148-49 A.D., is our oldest record of the history of the various dynasties which ruled Kāsmīr from the earliest period to the time of the author. The earlier Chronicles

which Kalhana has used and quoted, have all been lost. We are hence unable to judge what he took from each, and how he worked up their contents. Largely legendary in the first three Books, his narrative reaches firm historical ground with the Kārkoṭa dynasty in the Fourth Book. From Avantivarman's reign (A.D. 855-883) onwards which opens the Fifth Taraṅga, the Chronicle may be considered an accurate and reliable historical record. As the author approaches his own time, his narrative grows more and more detailed.

In illustration of the latter fact it may be mentioned that of the whole work comprising nearly eight thousand Ślokas, more than one-half is devoted to the relation of the reigns which fill the century and a half immediately preceding the date of composition. We have certainly no reason to regret the fulness with which Books vii. and viii. relate the events of the author's own time and of the period that lay near it. From a historical point of view, Kalhana's detailed account of contemporary history and the near past must always retain its value. We can appreciate its advantages also with special regard to the elucidation of the old topography of the country. This will become at once clear by a brief analysis of the topographical information contained in the Chronicle.

It is doubtful whether Kalhana writing for readers of his own country and time, would have deemed it necessary to give us a connected and matter-of-fact description of the land, even if the literature which he knew and which was his guide, had furnished him with a model or suggestion for such a description. The nearest approach to it is contained in a brief passage of his introduction, i. 25-38. This acquaints us in a poetical form with the legends concerning the creation of Kaśmīr and its sacred river, the Vitastā, and enumerates besides the most famous of the many Tirthas of which Kaśmīr has ever boasted in abundance. The few panegyric remarks which are added in praise of the land's spiritual and material comforts, i. 39-43, do credit to the author's love of his native soil. But they can scarcely be held to raise the above to a real description of the country.

18. Notwithstanding the absence of such a description Kalhana's

**Kalhana's notices
of Tirthas.**

Chronicle yet proves by far our richest source of information for the historical geography of Kaśmīr. This is due to the mass of incidental notices of topographical interest which are spread through the whole length of the narrative. They group themselves conveniently under three main heads.

Considering the great attention which the worship of holy places has at all times claimed in Kaśmīr, we may well speak first of the

notices which appertain to the *Topographia sacra* of the Valley. Kāsmīr has from early times to the present day been a land abundantly endowed with holy sites and objects of pilgrimages. Kalhaṇa duly emphasizes this fact when he speaks, in the above-quoted introductory passage, of Kāsmīr as a country 'where there is not a space as large as a grain of sesamum without a Tirtha.'¹

Time and even the conversion to Islām of the great majority of the population has changed but little in this respect. For besides the great Tirthas which still retain a fair share of their former renown and popularity, there is scarcely a village which has not its sacred spring or grove for the Hindu and its Zīārat for the Muhammadan. Established as the latter shrines almost invariably are, by the side of the Hindu places of worship and often with the very stones taken from them, they plainly attest the abiding nature of local worship in Kāsmīr.

This cannot be the place to examine in detail the origin and character of these Tirthas and their importance for the religious history of the country. It will be enough to note that the most frequent objects of such ancient local worship are the springs or *Nāgas*, the sacred streams and rivers, and finally the so-called *svayambhū* or 'self-created' images of gods which are recognized by the eye of the pious in various natural formations. These several classes of Tirthas can be traced throughout India wherever Hindu religious notions prevail, and particularly in the sub-Himalayan regions (Nepāl, Kumaon, Kāngra, Udyāna or Swāt). Still there can be no doubt that Kāsmīr has from old times claimed an exceptionally large share in such manifestations of divine favour.

Nature has indeed endowed the Valley and the neighbouring mountains with an abundance of fine springs. As each of these has its tutelary deity in the form of a *Nāga*,² we can easily realize why popular tradition looks upon Kāsmīr as the favourite residence of these deities.³ Hiuen Tsiang already had ascribed the superiority of Kāsmīr over other countries to the protection it received from a *Nāga*.⁴ Kalhaṇa, too, in his introduction gives due prominence to the distinction which the land

¹ i. 38.

² Compare my note i. 30 on the *Nāgas* and their worship.

³ The *Nilamatapurāṇa*, 900-972, gives a long list of Kāsmīr *Nāgas* and puts their number at thousands, nay *Arbudās* (see 971).

⁴ *Si-yu-ki*, i. p. 148. Hiuen Tsiang, like other Chinese pilgrims, calls the *Nāgas* by the term of 'dragon;' no doubt because the popular conception represents them under the form of snakes living in the water of the springs or lakes they protect.

enjoys as the dwelling-place of *Nīla*, king of *Nāgas*, and of many other of his tribe.¹

Kalhana's frequent references to sacred springs and other Tirthas are of topographical interest, because they enable us to trace with certainty the earlier history of most of the popular pilgrimage places still visited to the present day. The list already mentioned acquaints us with the miraculous springs of *Pāpasūdana* and *Tri-Saṁdhyā*, *Sarasvatī's* lake on the *Bheḍa* hill, the 'Self-created Fire' (*Svayambhū*), and the holy sites of *Nandikṣetra*, *Sārādā*, *Cakradhara* and *Vijayeśa*. It shows which were the Tirthas most famous in Kalhana's time. The legends connected with the early semi-mythical kings give the chronicler frequent occasion in the first three Books to speak in detail of particular sacred sites. Almost each one of the stories furnishes evidence for the safe location of the latter.² But also in the subsequent and purely historical portions of the work we read often of pilgrimages to such sacred places or of events which occurred at them.

Kalhana shows more than once so accurate a knowledge of the topography of particular Tirthas that his personal visits to them may be assumed with great probability. This presumption is particularly strong in the case of *Nandikṣetra* which his father Canpaka is said to have often visited as a pilgrim and to have richly endowed, and of the neighbouring shrine of *Bhūteśvara*.³ Also the distant Tirtha of *Sārādā* in the *Kiṣangaṅgā* Valley seems to have been known personally to the Chronicler.⁴ Considering the popularity which pilgrimages to sacred sites have always enjoyed among Kāsmīrians, the conclusion seems justified that Kalhana owed perhaps no small part of his practical acquaintance with his country's topography, to the tours he had made as a pilgrim.

19. A second fruitful source of valuable topographical notices is contained in those very numerous references Kalhana's references to foundations. which Kalhana makes to the foundation of towns, villages, estates, shrines, and buildings by particular kings. If we leave aside the curious list, i. 86-100, taken by

¹ *Rājat.* i. 28-31. The *Nāgas* are supposed to have come to Kāsmīr when *Kaśyapa*, their father, had drained 'the lake of *Satī*,' and to have found there a refuge from *Garuḍa*; comp. *Nilamata*, 59 sqq.

² Compare the legends of the *Sodara* spring, i. 123 sqq.; of the *Kṛtyāśrama* Vihāra, i. 131 sqq.; of the *Jyeṣṭharudra* at *Nandikṣetra* and *Srinagari*, i. 113, 124; the story of the *Suśravas* Nāga, i. 203 sqq.; the description of the pilgrimage to the *Takṣaka* Nāga, i. 220 sqq.; the story of the *Īśeśvara* temple, ii. 134; of *Raṇasvāmin*, iii. 409 sqq., etc.

³ See vii. 954; viii. 2365 and note v. 55 sqq. Compare also below, § 57.

⁴ See Note L, viii. 2492, § 4.

Kalhana from Padmamihira in which certain local names are by fanciful etymologies connected with seven of the 'lost kings,'¹ it may be safely assumed that these attributions are based either on historical fact or at least on genuine local tradition. Kalhana specially informs us in his introduction² that among the documents he had consulted for his work, there were 'the inscriptions recording the consecration of temples and grants [of land] by former kings.' Such records no doubt supplied a great portion of the numerous notices above referred to. Often such notices may have been taken from less authentic sources. But we may always claim for them the merit of acquainting us with the names of the respective localities and buildings, as used in the official language of Kalhana's time, and with the traditions then current regarding their origin and date.

The system of nomenclature which was regularly followed in Kāśmīr in naming new foundations, must have helped to preserve a genuine tradition regarding the founder. In the vast majority of cases the names of new towns and villages are formed by the addition of *-pura* to the name of the founder, either in its full or abbreviated form.³ Similarly the names of temples, monasteries, Maṭhas and other religious structures show the name of their builder followed by terms indicating the deity or the religious objects to which the building was dedicated.⁴ Many of

¹ See regarding this unhistorical list note i. 86. The local names, like *Khona-muṣa*, *Godharā*, *Samāṅgāsā*, etc., are all genuine enough. What Padmamihira did was to evolve fictitious names of kings out of these by means of popular etymology.

² i. 15.

³ Thus we have, e.g., the well-known localities of *Huṣkapura*, *Kaniṣkapura*, *Juṣkapura* (which retain the memory of their Indo-Scythian founders); *Pravarapura* (for *Pravarasenapura*), the old official designation of the present capital; *Padmapura*, *Avantipura*, *Jayapura* (for *Jayāpīḍapura*) and a host of others. The custom of naming new localities in this fashion, or of renaming earlier ones in honour of the actual ruler, can be traced through successive periods of Muhammadan and Sikh rule down to the present day; comp. e.g., *Zaināpūr* (named after Zainu-l-'ābidīn); *Shahābuddīnpūr* (now *Shādīpūr*); *Muḥammadpūr*; *Ranjirsinghpūr* (intended to replace *Shāhābād*), etc.

⁴ Thus in the case of Śiva-temples *-īśa* or *-īśvara* is invariably added (comp., e.g., *Pravareśvara*, *Amṛteśvara*, etc.), as in that of Viṣṇu-shrines with equal regularity *-svāmin* (*-keśava*); comp. e.g., *Muktasvāmin* (built by Muktāpīḍa), *Avantisvāmin*, *Bhīmakeśava* (erected by Bhīmapāla Śāhi), etc.

Buddhist monasteries receive the name of their founder with the addition of *-vihāra* or *-bhavana*; comp. *Jayendravihāra*, *Caṅkuṇavihāra*, *Amṛtabhavana* (founded by Queen Amṛtaprabhā, the present Āntabavan), *Skandabhavana* (for *Skandagup-tabhavana*), and many more, as shown in my *Notes on Ou-k'ong*, p. 4.

For Maṭhas compare e.g. *Diddāmaṭha* (*Didmar*); *Subhataṃmaṭha*, *Nandāmaṭha*, *Loṭhikāmaṭha*, *Cakramaṭha*, etc.

these religious structures left their names to the sites at which they were erected. They can thus be traced to the present day in the designations of villages or city quarters.¹

The topographical interest which Kalhana's notices of town-foundations possess is considerably enhanced by the fact that in more than one case they are accompanied by accurate descriptions of the site chosen and the buildings connected with them. Thus Kalhana's detailed accounts of the foundation of *Pravarapura*, iii. 336-363, is curiously instructive even in its legendary particulars. It enables us to trace with great precision the original position and limits of the city which was destined to remain thereafter the capital of Kāśmīr.² Similarly the description given of *Parihāsapura* and its great shrines has made it possible for me to fix with accuracy the site of the town which Lalitāditya's fancy elevated for a short time to the rank of a capital, and to identify the remains of the great buildings which once adorned it.³ Not less valuable from an antiquarian point of view is the account given to us of the twin towns *Jayapura* and *Dvāravatī* which King Jayāpīḍa founded as his royal residence near the marshes of Andārkoṭh.⁴ We shall see below to what extent the correct identification of the extant ruins of Kāśmīr has been facilitated by these and similar accounts of the Rājatarāṅgiṇī.

20. Valuable as the data are which we gather from the two

Topographical data
in historical
narrative.

groups of notices just discussed, it may yet be doubted whether by themselves, that is, unsupported by other information, they can throw as much light on the old topography

of Kāśmīr as the notices which we have yet to consider. I mean the whole mass of incidental references to topographical points which we find interwoven with the historical narrative of the Chronicle.

It is evident that where localities are mentioned in the course of a connected relation of events, the context if studied with due regard to the facts of the actual topography, must help us towards a correct identification of the places meant. In the case of the previous notices the Chronicler has but rarely occasion to give us distinct indications as to the position of the sites or shrines he intended. In our

¹ The name of the *Amṛtabhavana*, iii. 9, survives in the present Āntābavan; *Diddūmaṭha* and *Skandabhavana* in the Didmar and Khandābavan quarters of Srinagar; similarly Lalitāditya's great temple of *Mārtāṇḍa* left its name to the village and district of Maṭan.

² See note iii. 339-349 and below, § 92.

³ Compare Note F, iv. 194-204, and below, § 121.

⁴ See note iv. 506-511; also below, § 122.

attempts to identify the latter we have therefore only too often to depend either on the accidental fact of other texts furnishing the required evidence, or to fall back solely on the comparison of the old with modern local names. That the latter course if not guided and controlled by other evidence, is likely to lead us into mistakes, is a fact which requires no demonstration for the critical student.

It is different with the notices the consideration of which we have left to the last. Here the narrative itself, in the great majority of cases, becomes our guide and either directly points out to us the real locality meant or at least restricts to very narrow limits the area within which our search must proceed. The final identification can then be safely effected with the help of local tradition, by tracing the modern derivative of the old local name, or by other additional evidence of this kind.

For the purpose of such a systematic search it is, of course, a very great advantage if the narrative is closely connected and detailed. And it is on this account that, as already stated above (§ 17), Kalhana's lengthy relation of what was to him recent history, in Books vii. and viii., is for us so valuable. An examination of the topographical notes in my commentary on the Chronicle will show that the correct identification of many of the localities mentioned in the detached notices of the first six Books has become possible only by means of the evidence furnished by the more detailed narrative of the last two.

In this respect the accounts of the endless rebellions and other internal troubles which fill the greater portion of the reigns of the Lohara dynasty, have proved particularly useful. The description of the many campaigns, frontier-expeditions and sieges connected with these risings supplies us with a great amount of topographical details mutually illustrating each other. By following up these operations on the map,—or better still on the actual ground, as I was often able to do,—it is possible to fix with precision the site of many old localities which would otherwise never have emerged from the haze of doubt and conjecture.

In order to illustrate these general remarks it will be sufficient to refer to a few typical examples among the many identifications thus arrived at. As the corresponding notes of my commentary fully indicate the evidence on which these identifications are based, as well as the process of reasoning by which they were arrived at, it will not be necessary here to go into details. A very characteristic example is furnished by the important stronghold and territory of LOHARA, which was formerly supposed to be Lahore. Its correct location at the present *Loharin* and the identification of the several places and routes

mentioned in the same neighbourhood became possible only, as Note E, iv. 177, shows,¹ through the indications contained in Kalhaṇa's description of the several sieges which this mountain fastness underwent in his own time. Similar instances are the identifications of the Gopādrī hill (the present Takht-i Sulaimān), and of the streams MAHĀSARIT and KṢĪPTIKĀ (Mār and Kutākul). Though prominent features in the topography of the capital itself, they could not have been correctly located but for the evidence supplied by the narrative of the last Book.² The same is the case, e.g., with the name of the district HOLAPĀ (Vular) and the important ethnic designation of *Khaśa*.³

21. It is impossible to read attentively Kalhaṇa's Chronicle and in particular those portions which give fuller occasion for the notice of localities, without being struck with the exactness of his statements regarding the latter and with, what I

**Accuracy of
Kalhaṇa's
topography.**

may call, his eye for matters topographical.

We must appreciate these qualities all the more if we compare Kalhaṇa's local references with that vague and loose treatment which topographical points receive at the hands of Sanskrit authors generally.⁴ If it has been possible to trace with accuracy the great majority of localities mentioned in the Chronicle, this is largely due to the precision which Kalhaṇa displays in his topographical terminology. It is evident that he had taken care to acquaint himself with the localities which formed the scene of the events he described. Here too I may refer for more detailed evidence to my translation of the work and the notes which accompany it. A few characteristic points may, however, be specified as examples.

Striking evidence for the care with which Kalhaṇa indicates topo-

¹ Compare also my paper on the 'Castle of Lohara,' *Ind. Ant.* 1897, p. 225 *sqq.* below, § 49.

² Compare for *Gopādrī*, notes i. 341; viii. 1104-10; for the *Mahāsarit*, note iii. 339-349; for the *Kṣiptikā*, note viii. 732.

³ See notes i. 306 and i. 317.

⁴ Nor should we forget the difficulty which Kalhaṇa had to face by writing in metrical form. True indeed it is what Albērūnī says of this form as adopted by Hindu scientific writers: "Now it is well-known that in all metrical compositions there is much misty and constrained phraseology merely intended to fill up the metre and serving as a kind of patchwork, and this necessitates a certain kind of verbosity. This is also one of the reasons why a word has sometimes one meaning and sometimes another" (*India*, i. p. 19).

Fortunately Kalhaṇa has managed to escape these dangers as far as the topographical notices of his work are concerned. We find in his local terminology neither that mistiness nor multiplicity of meaning Albērūnī so justly complains of.

graphical details, is furnished by his description of the great operations which were carried out under Avantivarman with a view to regulating the course of the Vitastā and draining the Valley.¹ Thanks to the exactness with which the relative position of the old and new confluence of the Vitastā and Sindhu is described, before and after the regulation, respectively, it has been possible even after so many centuries to trace in detail the objects and results of an important change in the hydrography of the Valley.²

Equal attention to the topographical details we find in numerous accounts of military operations. Of these it will suffice to quote here the descriptions of the several sieges of Śrīnagar, under Sussala;³ the battle on the *Gopātri* hill in the same reign;⁴ the blockade of *Lohara*, with the disastrous retreat through the mountains that followed,⁵ and, last but not least, the siege of the *Siraḥśilā* castle. The topographical accuracy of the latter account as proved in Note L, viii. 2492, almost presupposes on Kalhaṇa's part a personal examination of the site. It is all the more noteworthy, because the scene of the events there recorded was a region outside Kaśmīr proper, distant and difficult of access.

There are also smaller points that help to raise our estimate of Kalhaṇa's reliability in topographical matters. Of such I may mention for example the close agreement we can trace everywhere between Kalhaṇa's statements regarding distances, whether given in road or time-measure, and the actual facts. The number of marches reckoned by him is thus always easily verified by a reference to the stages observed on the corresponding modern routes.⁶ Not less gratifying is it to find how careful Kalhaṇa is to distinguish between homonymous localities.⁷ In addition we must give credit to our author for the just observation of many characteristic features in the climate, ethnography, and economical condition of Kaśmīr and the neighbouring regions.⁸ All these notices help to invest with additional interest the data furnished for the old topography of the country.

⁷ Compare notes i. 113; i. 124; v. 123 on the several *Jyeṣṭharudras* and the way in which Kalhaṇa specifies them.

⁸ Compare below, §§ 77-79.

If the advantages thus accorded to us are duly weighed there seems every reason to congratulate ourselves on the fact that the earliest and fullest record of Kāśmīr history that has come down to us was written by a scholar of Kālhaṇa's type. Whatever the shortcomings of his work from a historical point of view may be, we may well claim for him the merit that he has provided us with a sound and ample basis for the study of the historical geography of his country.

22. Another point still remains to be considered here in connection

**Sanskrit form of
local names.**

with Kālhaṇa's Chronicle, *viz.*, to what extent can we accept the Sanskrit forms found in his text as the genuine local names of the period.

This question deserves attention, because the popular language actually spoken in Kāśmīr in Kālhaṇa's time and for many centuries earlier, was not Sanskrit but undoubtedly an Apabhraṃśa dialect derived from it, which has gradually developed into the modern Kāśmīrī.

Notwithstanding this circumstance I think that Kālhaṇa's local names can on the whole safely be taken as the genuine designations of the localities, *i.e.*, those originally given to them. My grounds for this belief are the following.

We have ample evidence to show that Sanskrit was the official and sole literary language of the country, not only in Kālhaṇa's own time but also in those earlier periods from which the records used by him may have dated. This official use of Sanskrit we know to have continued in Kāśmīr even into Muhammadan times. It assures us at once that the vast majority of village and town names must from the beginning have been given in Sanskrit. A detailed examination of Kālhaṇa's local names will easily demonstrate, on the one hand that these names are of genuinely Sanskrit formation, and on the other, that their modern Kāśmīrī representatives are derived from them by a regular process of phonetic conversion. We look in vain among this class of old local names for any which would show a foreign, *i.e.*, non-Aryan origin and might be suspected of having only subsequently been pressed into a Sanskrit garb.

As Sanskrit was used as the language of all official records for many centuries previous to Kālhaṇa's time, the Sanskrit names originally intended for the great mass of inhabited places could be preserved, in official documents anyhow, without any difficulty or break of tradition. And from such documents most of Kālhaṇa's notices of places were undoubtedly derived, directly or indirectly.

Only in rare cases can we suppose that the original form of a local name of this kind had been lost sight of, and that accordingly the Chronicler, or his authority, had to fall back on the expedient of Sanskriti-

zing in its stead the Apabhraṃśa or Kaśmīrī form, as well as he could. There are in fact a few instances in which we have indications of such a metamorphosis. Thus we find the same local name spelt either *Bhaleraka* or *Baleraka* in the Chronicle, and a village which Kalhaṇa calls *Ghoramūlaka*, referred to by Abhinanda, the author of the *Kādambarīkathāsāra* (first half of 9th century), as *Gauramūlaka*.¹ It is difficult to avoid the conclusion that we have here varying attempts to reproduce in a Sanskrit garb original Apabhraṃśa names. But these cases are very rare indeed, and even in them other explanations of the different spellings are possible.

These observations apply with nearly the same force also to other local names recorded in the Chronicle, such as those of mountains, streams, passes, etc. The great majority of these names must have very early found their place in official documents or, as we shall see below, in the Sanskrit legendaries or *Māhātmyas* of the numerous Tirthas. If any of them are in reality adaptations of Prakrit or Apabhraṃśa forms, their quasi-official use is yet likely to have originated a long time before the date of Kalhaṇa.

Even to the present day the local nomenclature of Kaśmīr, whether in the Valley or in the mountains, shows throughout an unmistakeably Sanskrit character. This is most clearly illustrated by the constant recurrence of such terms as *-pūr* or *pūr* (< pura), *-mar* (< maṭha), *-hōm* (< āśrama), *-kōṭh* (< koṭṭa), *-gām* or *gōm* (< grāma), *-kuṇḍal* (< kuṇḍala), *-vōr* (< vāṭa), in village names; of *-sar* (< saras), *-nambul* (< naḍvalā), *nāg* (< nāga) in names of lakes, marshes, etc.; of *-van* (< vana), *-nār*, (< nāḍa), *-marg* (< maṭhikā), *-gul* (< galikā), *brāṭ* (< bhāṭṭārikā), *-vath* (< patha) in designations of alpine localities, peaks, passes, etc.; *-kul* (< kulyā), *-khan* (< khani) in names of streams and canals.

The Sanskrit etymology of the specific names preceding these terms, is even in their modern phonetic form very often equally transparent. At an earlier stage of the language the Apabhraṃśa names must have approached the corresponding Sanskrit forms much more closely. The reproduction of the popular names in a Sanskrit form could have then but rarely been attended with much difficulty or doubt. We may hence safely assume that the Sanskrit forms recorded by Kalhaṇa represent in most cases correctly the original local names, and in the remainder cannot differ much from them.

23. The later Sanskrit Chronicles which were composed with the distinct object of continuing Kalhaṇa's work, furnish valuable supplements to the topographical information contained in the latter.

Later Sanskrit
Chronicles.

¹ Compare notes viii. 1861, and vii. 1239; viii. 2410.

These Chronicles are the *Rājatarāṅgiṇī* of Jonarāja who continued the narrative down to the reign of Sultān Zainu-l-'ābidin and died over his work, A.D. 1459;¹ the *Jaina-Rājatarāṅgiṇī* composed by Jonarāja's pupil Śrīvara which deals in four Books with the period A.D. 1459-86;² and finally, the Fourth Chronicle which was begun under the name *Rājāvalipatākā* by Prājyabhaṭṭa and completed by his pupil Suka some years after the annexation of Kāśmīr by Akbar, A.D. 1586.³

It will be seen from the above dates that the narrative of the last two works falls entirely beyond the period of Hindu rule to which our enquiry is limited, and which may be considered to close finally with the usurpation of Shāh Mir, A.D. 1339. The same holds good of the greater portion of Jonarāja's Chronicle. The reigns of the late Hindu rulers, from Jayasimha to Queen Koṭā, are there disposed of with a brevity corresponding more to their own insignificance than to the intrinsic historical interest of the epoch.⁴ Notwithstanding this difference in date the materials supplied by these later Chronicles have often proved of great use in clearing up points of the old topography of Kāśmīr. For the mass of localities mentioned in them goes back to the Hindu period, and the names by which they are referred to, are also still mostly the old ones.

Yet on the whole the inferiority of these later Chronicles when compared with Kalhaṇa's work, is as marked in the matter of topographical information as it is in other respects. In the first place it must be noted that the whole text of these three distinct works does not amount to more than about one-half of Kalhaṇa's work. For references to sacred sites and buildings and other places of religious interest the account of Muhammadan reigns offers naturally but little opportunity. The incidental notices of other localities are also in proportion less numerous and instructive. For these later authors allow considerably more room to episodic descriptions and do by no means show that care for accuracy in topographical statements which we have noticed in Kalhaṇa.

It is curious to note how the gradual decline of Hindu learning in Kāśmīr during the period of troubles and oppression which lasted with short interruptions for two and a half centuries previous to Akbar's conquest, is marked also in the character and contents of these later

¹ See *Śrīv.* i. 6.

² See Fourth Chron. 6.

³ Compare Fourth Chron. 8 *sqq.* Prājyabhaṭṭa's composition ended with the year A.D. 1513-14 and the reign of Fatah Shāh (verses 14-64).

⁴ The narrative of the period 1149-1339 A.D. fills only 305 verses in Jonarāja's Chronicle (347 according to the Bombay edition).

Chronicles. JONARĀJA was a scholar of considerable attainments, but apparently without any originality. He shows himself yet well-acquainted with the old local nomenclature of the Valley, though outside it he too commits himself to forms like *Puruṣavīra* (for Peshawar, recte *Puruṣapura*), etc.

ŚRĪVARA is a slavish imitator of Kalhaṇa, not above reproducing whole verses of his predecessor. His text looks often more like a *cento* from the *Rājatarāṅgiṇī* than an original composition. Notwithstanding the thorough study of Kalhaṇa's work which this kind of exploitation presupposes, we find Śrīvara more than once betraying ignorance of the old names for well-known Kāśmīr localities. Thus we have the name of the *Mahāsarī* stream transformed into *Mārī*, an evident adaptation of the modern Mār;¹ *Siddhapatha*, the modern Sidau, represented as *Siddhādeśa*;² the Tīrtha of Mārtāṇḍa regularly referred to by its modern name *Bhavana* (Bavan), etc.³

The work of PRĀJYABHAṬṬA and ŚUKA is inferior in composition even to Śrīvara's Chronicle, and by the increased number of modern local names proves its authors' scant familiarity with the old topography of Kāśmīr. Thus the ancient *Kṛtyāśrama*, the scene of Kalhaṇa's Buddhist legend, i. 131 *sqq.*, figures repeatedly in their narrative as *Kicāśrama*, i.e., by its modern name Kīṭhōm.⁴ Even the well-known *Rājapurī* is metamorphosed into *Rājavīra* (!), a queer reproduction of the modern *Rajaurī*.⁵ The old castle of *Lohara* reappears as *Luhara*, an evident approach to the present Lōhārīn;⁶ the ancient site of *Oakradhara* is turned into *Cakrādhāra*, etc.⁷

It is evident that when Sanskrit ceased to be the language used for official purposes, the knowledge of the ancient names of localities and of the traditions connected with the latter must have become gradually more and more restricted. In view of this decrease of traditional knowledge we have to exercise some caution when utilizing the evidence of the later historical texts for the elucidation of the old topographical data. At the same time it is easy to realize that their help is often of considerable value when connecting links have to be traced between those earlier data and the facts of modern topography.

⁵ Fourth Chron. 542, *sqq.*

⁶ *Ib.*, 134, 143, *sqq.*

⁷ *Ib.*, 330.

24. It is convenient to refer here briefly to the Persian Tārīkh of Kaśmīr which to some extent may be looked upon as continuing the works of Kalhaṇa and his Paṇḍit successors. Unfortunately they furnish no material assistance for the study of the old topography of the country.

All these works give in their initial portion an account of the Hindu dynasties which pretends to be translated from the Rājatarāṅgiṇī. Yet the abstract so given is in each case very brief and chiefly devoted to a reproduction of the legendary and anecdotal parts of Kalhaṇa's narrative. We thus look in vain in these abstracts for the modern equivalents of those local names, the identification of which is attended with any difficulty.

In illustration of this it may be mentioned that even the Tārīkh of Ḥaidar Malik Cādura (Tsāḍḍṛ),¹ which is the earliest work of this class accessible to me and the fullest in its account of the Hindu period, compresses the narrative of Jayasimha's reign, filling about two thousand verses in the Rājatarāṅgiṇī, into two quarto pages. Of the localities mentioned in the original account of this reign not a single one is indicated by the Muhammadan Chronicler.

The later works which all belong to the 18th or the present century, are still more reticent on the Hindu period and seem to have largely copied Ḥaidar Malik's abstract. Taking into account the endless corruptions to which local names written in Persian characters are exposed, it will be readily understood why reference to these texts on points of topographical interest yields only in the rarest cases some tangible result.

25. It is a fortunate circumstance that several of the older Kaśmīr poets whose works have been preserved for us, have had the good sense to let us know something about their own persons and homes. The topographical details which can be gleaned from these authors, though comparatively few in number, are yet of distinct value. They enable us to check by independent evidence Kalhaṇa's local nomenclature, and in some instances acquaint us with localities of which we find no notice in the Chronicles.

The first and most helpful of these Kaśmīrian authors is the well-known polyhistor Kṣemendra. His works, composed in the second and third quarter of the 11th century, form important landmarks in various fields of Indian literature. Kṣemendra seems to have felt a genuine

¹ Written A.H. 1027, i.e., A.D. 1617, in the twelfth year of Jahāngīr's reign. Ḥaidar Malik takes his epithet Cādura, recte Tsāḍḍṛ, from the Kaśmīr village of that name situated in the Nāgām Pargana, some 10 miles south of Srinagar, close to the village of Vahātōr.

interest, rare enough among Indian scholars, for the realities of his country and the life around him. He does not content himself with informing us of his family, the date of his works and the places where he wrote them.¹

In the *Samayamātrkā*, one of his most original poems, which is intended to describe the snares of courtezans, he gives among other stories an amusing account of the wanderings of his chief heroine, Kaṅkāli, through the length and breadth of Kaśmīr.² The numerous places which form the scene of her exploits, can all easily enough be traced on the map. More than once curious touches of true local colour impart additional interest to these references. To Kṣemendra's poem we owe, e.g., the earliest mention of the Pir Panteāl Pass (*Pañcāladhārā*) and its hospice (*maṭha*).³ There too we get a glimpse of the ancient salt trade which still follows that route with preference. Elsewhere we see the heroine smuggling herself as a Buddhist nun into the ancient Vihāra of *Kṛtyāśrama*, etc.⁴

A different sketch of topographical interest we owe to the poet BILHAṆA. He left his native land early in the reign of King Kalaśa (1063-89 A.D.), and after long wanderings became famous as the court poet of the Cālukya king Tribhuvanamalla Parmāḍi in the Dekhan. In the last canto of his historical poem, the *Vikramāṅkadevacarita*, Bilhana gives us a glowing picture of the beauties of the Kaśmīr capital. Notwithstanding its panegyrical character, this account is laudably exact in its local details.⁵ In another passage the poet describes to us his rural home and its surroundings at the village of *Khonamuṣa*, south-east of Srinagar. His touching verses attest as much his yearning for his distant home as the faithfulness of his local recollections.⁶

¹ Compare the colophons of the various works first discovered and noticed by Prof. BÜHLER, *Report*, pp. 45 sqq. and Appendix.

² This humorous peregrination fills the ii. *Samaya* of the work; see *Kāvya-mālā* edition, pp. 6-16. The abundance of curious local details makes a commentated translation of the little *Kāvya* very desirable, notwithstanding the risky nature of part of its contents. A personal knowledge of Kaśmīr would certainly be required for the task.

³ See *Samayam*. ii. 90 sqq. The *maṭha* on the pass corresponds to the present 'Alīābād Sarai, a short distance below the top of the pass on the Kaśmīr side; see below, § 44.

⁴ *Samayam*. ii. 61 sqq.

⁵ Prof. BÜHLER to whom we owe the discovery of Bilhana's chief work, has given in his Introduction an admirable analysis of the contents of *Sarga xviii*. as illustrating the poet's biography. For his description of contemporary Srinagara, see pp. 7 sqq.

⁶ See *Vikram*. xviii. 70 sqq. Prof. Bühler during his Kaśmīr tour, 1875, had the satisfaction of visiting the poet's native place, the present village of *Khunāmoh*.

Similar in character though less ample in detail, is the description of Kāsmīr and its capital Pravarapura which Mañkha, Kalhapa's contemporary, inserts in the iii. Canto of his *Kāvya Śrīkañṭhacarita*.¹ Here we have the advantages of a commentary written by Jonarāja, the Chronicler, which duly notices and explains the points of local interest.

26. To complete our review of those Kāsmīrian texts of topographical interest which may be distinguished as secular, we must refer briefly to the curious glossary and manual which goes by the name of *Kṣemendra's Lokaprakāśa*. Professor A. Weber has recently published valuable extracts from this text.² I myself have had occasion to refer to it frequently in the notes on the *Rājatarāṅgiṇī*.³ The work represents a strange mixture of the usual Kośa and a practical handbook dealing with various topics of administration and private life in Kāsmīr.

A great deal of the information contained in it is decidedly old, and probably from the hand of our well-known Kṣemendra. But there are unmistakeable proofs, both in the form and contents of the book, showing that it has undergone considerable alterations and additions down even to the 17th century. This is exactly what we must expect in a work which had remained in the practical use of the Kāsmīrian 'Kārkuns' long after the time when Sanskrit had ceased to be the official language of the country.

The *Lokaprakāśa* supplies us with the earliest list of Kāsmīr Parganas. It gives besides the names of numerous localities inserted in the forms for bonds, 'Huṇḍis,' contracts, official reports, and the like which form the bulk of *Prakāśas* ii. and iv. The Pargana list as well as these forms exhibit local names of undoubtedly ancient date side by side with comparatively modern ones. Some of the latter belong to places which were only founded during the Muhammadan rule.⁴

He could thus verify on the spot every point of the description which Bilhana gives of that "coquettish embellishment of the bosom of Mount Himālaya;" see *Report*, pp. 4 sqq.

¹ See *Śrīkañṭhac.* iii. 10-24, 68 sqq.

² See *Zu Kṣemendra's Lokaprakāśa*, in *Indische Studien*, xviii. pp. 289-412.

³ See particularly Note H (iv. 495), on the Kāsmīr monetary system, § 10.

⁴ Compare, e.g., in *Prakāśa* ii. *Jainanagara*, founded by Zainu-l-'ābidīn (see *Jonar.* 1153); *Alābhadrapura* (*Śrīv.* iv. 318), etc.

SECTION VI.—THE NĪLAMATA AND MĀHĀTMYAS.

27. We have already above drawn attention to the fact that Kashmir has since early times been pre-eminently a country of holy sites and places of pilgrimage of all kinds. These objects of ancient local worship have always played an important part in the historical topography of the Valley and the adjacent mountain regions. It is hence no small advantage that there are abundant materials at our disposal for the special study of this *Topographia sacra* of Kashmir.

The oldest extant text which deals in detail with Kashmirian Tirthas, is the *Nīlamatapurāṇa*. This work which Kalhaṇa used as one of his sources,¹ claims to give the sacred legends regarding the origin of the country and the special ordinances which Nīla, the lord of Kashmir Nāgas, had revealed for the worship and rites to be observed in it.²

It is unnecessary to refer here to the legends which are related at the commencement of work, and to 'the rites proclaimed by Nīla' which together with the former occupy about two-thirds of the extant text.³ These parts have been fully discussed by Prof. Bühler in his lucid analysis of the *Nīlamata*.⁴ The remaining portions, however, deserve here special notice as forming,—to use Prof. Bühler's words—"a real mine of information, regarding the sacred places of Kashmir and their legends."

In the first place we find there a list of the principal Nāgas or sacred springs of Kashmir (vv. 900-975). This is followed by the interesting legend regarding the Mahāpadma lake, the present Volur, which is supposed to occupy the place of the submerged city of *Candrapura* (vv. 976-1008).⁵ The *Purāṇa* then proceeds to an enumeration of miscellaneous Tirthas chiefly connected with Śiva's worship (vv. 1009-48). To this is attached a very detailed account, designated as *Bhūteśvaramāhātmya*, of the legends connected with the sacred lakes and sites on Mount Haramukūṭa (vv. 1049-1148).⁶ Of a similar *Māhātmya* relating to the Kapateśvara Tirtha, the present Kōṭhēr,⁷ only a fragment is found in our extant text (vv. 1149-68). The list of

Viṣṇu-Tirthas which succeeds it (vv. 1169-1248), is comparatively short, as indeed the position of this god is a secondary one in the popular worship of Kāśmīr.

After a miscellaneous list of sacred Saṅgamas or river-confluences, Nāgas and lakes (vv. 1249-78) we are treated to a somewhat more detailed synopsis of the chief Tirthas of Kāśmīr (vv. 1271-1371). This is of special interest, because an attempt is made here to describe the Tirthas in something like topographical order, and to group with them such localities as are visited on the same pilgrimage. It is thus possible to determine, with more certainty than in the case of other Tirtha lists, the particular holy sites intended by the author.

This synopsis starts in the east with the fountain of the Nilanāga (Vērṇāg), and follows with more or less accuracy the course of the Vitastā and its affluents down to the gorge of Varāhamūla. A short *Vitastāmāhātmya*, describing the origin and miraculous powers of this the holiest of Kāśmīr rivers (vv. 1371-1404), closes the text of Nilamata, such as it is found in our Manuscripts.

This text is unfortunately in a very bad condition owing to numerous lacunæ and textual corruptions of all kinds. Prof. Bühler held that the Nilamata in its present form could not be older than the 6th or 7th century of our era.¹ It appears to me by no means improbable that the text has undergone changes and possibly additions at later periods. On the whole, however, the local names found in it bear an ancient look and agree closely with the forms used by Kalhaṇa. The difference in this respect between the Nilamata and the Māhātmyas, in their extant recensions, is very marked and helps to prove the comparatively late date of most of the latter. On the other hand it deserves to be noted that without the more systematic and detailed accounts of the various Tirthas as found in the Māhātmyas, the identification of many of the sacred places referred to in the Nilamata would probably have been impossible.

The fact of all extant copies of the work showing practically the same defective text, seems to indicate that the changes and additions to which I alluded above, cannot be quite recent. If such a revision had been made at a time comparatively near to the date of our oldest MS. we could, after the analogy of other instances, expect an outwardly far more correct, *i.e.* 'cooked,' text. The operation here suggested was actually performed some thirty years ago by the late Paṇḍit Sāhibrām. Receiving the orders of Mahārāja Raṇbir Singh to

¹ Compare *Report*, p. 40. The oldest and best MS. of the Nilamata which I was able to secure and collate, is dated in the Laukika year 81. This date judging from the appearance of the MS. probably corresponds to A.D. 1705-6.

prepare the text of the Nilamata for edition, he 'revised' the work with scant respect for its sacred character by filling up the lacunæ, expanding obscure passages, removing ungrammatical forms, etc.¹ Fortunately Prof. Bühler reached Kāsmīr early enough to learn the origin of this 'cooked' text, and to give due warning as to its true character.

The Nilamata seems thus to have escaped in recent times that process of continual adaptation which, as we shall see, must be assumed to have greatly affected all extant Māhātmyas. The reason probably is that it could never have been used, like the latter, as a practical pilgrims' manual and itinerary by the Purohitas of the various Tirthas.

28. Among the texts dealing specially with the sacred sites of

**The Haracarita-
cintāmaṇi.**

Kāsmīr the *Haracaritacintāmaṇi* can be placed, perhaps, nearest in date to the Nilamata-purāṇa. It is not like the latter and the Māhātmyas, an anonymous composition, claiming recognition in the wide folds of canonical Purāṇa literature. It owns as its author the poet Jayadratha, of the Kāsmīrian family of the Rājānukas, and a brother of Jayaratha. The pedigree of the family as given in Jayaratha's *Tantrāloka-viveka*, a Śaiva treatise, shows that Jayadratha must have lived about the end of the 12th or beginning of the 13th century.²

His work which is written in a simple Kāvya style, relates in thirty-two Cantos as many legends concerning Śiva and his various Avatāras.³ Eight of these legends are localized at well-known Kāsmīrian Tirthas. They give the author ample opportunity of mentioning other sacred sites of Kāsmīr directly or indirectly connected with the former.⁴

Jayadratha's detailed exposition helps to fix clearly the form which the legends regarding some of the most popular of Kāsmīrian Tirthas had assumed in the time immediately following Kalhaṇa. The local names as recorded by Jayadratha, agree closely with those of the Rājatarāṅgiṇī.⁵ They prove clearly that the forms employed by Kalhaṇa must have been those generally current in the Sanskrit usage of the period. For the interpretation of Nilamata's brief notices the Hara-

¹ See *Report*, pp. 33, 38.

² Compare BÜHLER, *Report*, pp. 61, 81, clii.

³ The *Haracaritacintāmaṇi* has recently been printed as No. 61 of the *Kāvyamālā* Series, Bombay, (1897), chiefly from the text as contained in my MS. No. 206.

⁴ The cantos containing these legends are i. Jvālālingāvatāra, iv. Nandirudrāvatāra, vii. Cakrapradāna; x.-xiv. Vijayeśvara-, Piṅgaleśvara-, Vitastā-, Svayaṃbhunātha-, Kapaṭeśvara Avatāras.

⁵ An index of the Kāsmīr local names in the *Haracaritacintāmaṇi*, with explanatory notes, has been prepared under my supervision by P. Govind Kaul and printed as an Appendix to the *Kāvyamālā* edition.

caritacintāmaṇi is of great value. Its plain and authentic narrative enables us often to trace the numerous modifications which the various local legends as well as the names of the localities connected with them have undergone in the extant Māhātmyas.

29. Reference has already been made above to the numerous texts

known as *Māhātmyas* which we possess of
The Māhātmyas. all the more important Tirthas of Kāśmīr.

They claim with few exceptions to be extracted from Purāṇas or Purāṇic collections (*Samhitās*).¹ Ordinarily they set forth in detail the legends relating to the particular pilgrimage place, the spiritual and other benefits to be derived from its visit, and the special rites to be gone through by the pilgrims at the various stages of the itinerary. The abstract given of the Śāradāmāhātmya in Note B, on Rājat. i. 37, may serve to indicate the manner in which these subjects are usually treated in the average texts of this class.

Prof. Bühler was the first to recognize the value of the Māhātmyas for a systematic study of the old topography of Kāśmīr. Among the Sanskrit Manuscripts which he acquired during his tour in Kāśmīr, there are sixteen distinct texts of this kind.² My own search in this direction, facilitated by successive visits to the various Tirthas themselves, has enabled me to collect altogether fifty-one separate Māhātmya texts. The list of my collection which has been given in a supplementary Note,³ may be considered fairly to exhaust the present range of this literature.

In extent the Māhātmyas vary greatly. By the side of texts like the *Vitastāmāhātmya* with its fifteen hundred Ślokas, we have legends of more modest dimensions amounting only to a few dozens of verses. Equally marked differences in the matter of age become apparent on closer examination.

Unmistakeable indications prove that many of the Māhātmyas now in actual use are of late composition or redaction. Among the texts so characterized, the Māhātmyas of some of the most popular pilgrimage places, like the Haramukūṭa lakes, the cave of Amaranātha, Īśēvara (Īśābar), are particularly conspicuous. The indications here referred to are furnished chiefly by the local names which in their very form often betray a modern origin. This may conveniently be illustrated by a

¹ Most of the Kāśmīr Māhātmyas allege to be portions of the *Bhṛṅgiśasamhitā*. Others claim special authority by representing themselves as parts of the Ādi, Brahma, Brahmaparivarta, Varāha and Bhaviṣyat Purāṇas.

² See *Report*, pp. iv. sqq. Nos. 48, 51, 52, 55, 62, 75, 82, 84, 99, 100 there quoted as separate texts are only chapters of the *Amaranāthamāhātmya*.

³ See Supplementary Note A.A.

brief analysis of the most instructive of such names found in the *Vitastāmāhātmya*.

This text claims to furnish an account of all the Tirthas along the course of the holy river and is designated as a portion of the *Bhr̥ngīśa-saṁhitā*. Notwithstanding this pretended antiquity we find the famous Nilanāga introduced to us by the name of *Viranāga* (i. 58; ii. 33). This form is wholly unknown to the Nilamata, Rājatarāṅgiṇī or any old text. It is nothing but a clumsy rendering of the modern name of the village *Vērṇāg* near which this fine spring is situated.¹ The ancient site of *Jayavana*, mentioned by Bilhana and Kalhana, the present *Zevan*, is metamorphosed into *Yavanī* (vi. 4).² The village of Pāndrēthan which derives its name from *Purāṇādhiṣṭhāna*,³ 'the old capital,' and bears the latter designation even in Śrīvara's Chronicle, figures as *Pādadr̥ṣṭika* (!), xii. 24. That *Mākṣikasvāmin* (Māy²sum)⁴ and the *Mahāsarit* (Mār)⁵ appear as *Māyāsīmā* and *Mārī*, can after this specimen of fancy nomenclature scarcely surprise us.

But we must all the same feel somewhat startled when we find that this text which claims to be revealed by Śiva, refers repeatedly to the modern village of *Shādīpūr*, at the confluence of the Vitastā and Sind, by the name of *Sārādāpura*. *Shādīpūr*, an abbreviation for *Shahābuddīn-pūr*, was, as Jonarāja's Chronicle shows, founded only in the 14th century by Sultān *Shahābu-d-dīn*.⁶ Quite on a level with the knowledge of old topography here displayed are many other references to localities, e.g., the mention of the modern garden *Shālimār*, a creation of the Mughals (Śālamāra), xxi. 39; of the ancient *Huṣkapura* as *Uṣaḥ-karaṇa*⁷ (for *Uṣkūr*!), xxix. 103, etc.

In several cases these fancy renderings of modern local names are explained by whimsical etymologies which again in due turn give rise to new-fangled legends quite in the style of the old *nidānakathās*.

Similar proofs of modern origin can be traced in several other popular Māhātmyas, though perhaps not with equal frequency. Thus we find in the *Haramukutaṅgāmāhātmya* the name of the sacred mountain itself transformed from *Haramukuta* into *Haramukha* (the

¹ The name *Vērṇāg* is probably derived from the name of the Pargaṇa *Vēr*, mentioned by Abū-l-Faḍl, ii. p. 370.

² See below, § 105.

³ See *Rājat.* iii. 99 note and below, § 89; also *Śrīv.* iv. 290.

⁴ See *Rājat.* iv. 88 note and below, § 99.

⁵ Compare *Rājat.* iii. 339-349 note and below, § 65.

⁶ See *Jonar.* 409. A popular etymology accepted in good faith by more than one European writer, sees in *Shādīpūr* the 'village of the marriage,' scil. between the Vitastā and Sind Rivers!

⁷ Compare *Rājat.* i. 168 note and below, § 124.

present Haramukh),¹ the ancient site of *Bhūteśvara* (Buth'śēr) so well-known to the Rājatarāṅgiṇī and all old texts, turned into *Bodheśvara*, etc. In the *Amaranāthamāhātmya* of which there is a comparatively old copy in the Poona collection, we are also treated to *Paḍrṣṭi* as the Sanskrit name of Pāndrēthan, to *Suśramanāga* (for Kś. *Suśramnāg*) as the name of the lake where the Nāga *Suśravas* of the old legend took up his abode,² and the like. Examples of local names similarly perverted in other Māhātmyas will have to be mentioned *passim* in our account below.

It is important to note that by the side of texts like those just mentioned, there are others which on the whole show close conformity with our genuine old sources both in matter of legend and local names.³ And even in the Māhātmyas which in their present form we have every reason to consider as recent compositions, there is often abundant evidence of the use of earlier materials and traditions.⁴ It will be easier to understand the singular discrepancies in the value and character of these texts on examining the peculiar conditions under which they have originated.

30. The Māhātmyas are in the first place hand-books for the

Origin and purpose of Māhātmyas.

Purohitas of the particular Tirthas who have the privilege of taking charge of the pilgrims. They serve the priests as chief authorities for the claims they put forth on behalf of the holiness of their Tirtha, and for the rewards they promise for its visit. They are also intended to support their directions as to the rites to be observed by the pilgrim, and the route to be taken by him on the journey. It is usual for the Purohitas to recite the Māhātmya for the benefit of their clients in the course of the pilgrimage tour. At the same time its contents are expounded to them by a free verbal rendering in Kāśmīrī.

¹ See below, § 57. The *kh* at the end of the modern name is due to a phonetic law of Kāśmīrī which requires the aspiration of every final tenuis; see J. A. S. B., 1897, p. 183.

² Compare *Rājat.* i. 267 note. The modern Kś. form *Suśramnāg* is the regular phonetic derivative of *Suśravanāga* by which name the lake is designated in the Nilamata, Haracaritacintāmaṇi, etc.

³ Among such the Māhātmya collection known as the *Sarvāvatāra* (No. 213 in my list of MSS.), the *Mārtāṇḍamāhātmya* (No. 219), the *Vijayeśvaramāhātmya* (No. 220), may be particularly mentioned. None of these, however, are now known to the local Purohitas, more recent and inferior texts having taken their place.

⁴ Thus e.g., the Māhātmya of the present *Iśgar* (*Iśeśvara*; see *Rājat.* ii. 134) shows plainly its very recent origin by calling the Tirtha *Iśavihāra* (a garbled reproduction of *Iśgar* < *Iśeśvara*), and by similar blunders. Yet it knows correctly the sacred spring of *Sataḍhārā* already mentioned by Kṣemendra.

As but very few of the priests have enough knowledge of Sanskrit to follow the text intelligently, these translations are more or less learned by heart. Often as my manuscripts show, interlinear Kāśmīri glosses are resorted to in order to assist the reader's memory.

These local priests known now in Kāśmīr as *sthānapati*¹ (Skr. *sthānapati*), are as a rule quite as ignorant and grasping as their confrères, the Pujāris, Bhōjkis, etc., of India proper. They are held deservedly in very low estimation by the rest of the Brahman community. That their condition was more or less the same in earlier times too, though their influence and numbers may have been greater, can be safely concluded from more than one ironical allusion of Kalhaṇa.¹ These are the people to whose keeping the Māhātmya texts have always been entrusted. Their peculiar position and calling explain, I think, most of the curious changes which the latter have undergone.

Tenacious as local worship is, there is the evidence of concrete cases to show that not only the route of pilgrimage, but the very site of a Tirtha has sometimes been changed in comparatively recent times. In proof of this it will suffice to refer to the detailed account I have given of the transfers that have taken place in the case of the ancient Tirthas of *Bheḍā* and *Sārādā*.² Minor modifications must naturally have been yet far more frequent. The visit of a principal Tirtha is regularly coupled with bathings, Śrāddhas and other sacrificial functions at a series of other sacred spots. The choice of these subsidiary places of worship must from the beginning have depended on local considerations. As these changed in the course of time, variations in the pilgrimage route must have unavoidably followed.

To bring the text of the Māhātmya into accord with these successive changes was a task which devolved upon the local Purohitas. The texts we have discussed above bear, in fact, only too manifestly the traces of their handiwork. Sound knowledge of Sanskrit and literary culture are likely to have been always as foreign to this class of men as they are at present. When it became necessary for them to introduce the names of new localities into the text of the Māhātmya there was every risk of these names being shown not in their genuine old forms, but in hybrid adaptations of their modern Kāśmīri equivalents. This risk naturally increased when Sanskrit ceased to be the official language of Kāśmīr, and the knowledge of the old local names was gradually lost even among those maintaining scholarly traditions in the country.

¹ Compare *Rājat.* ii. 132 note and v. 465 sqq.; vii. 13 sqq.; viii. 709, 900 sqq., 939.

² Compare Notes A (*Rājat.* i. 35) and B (*Rājat.* i. 37).

31. Another potent cause seems to have co-operated in this vitiation of the local nomenclature of the Māhātmyas. I mean 'popular etymology.' We have already referred to the tendency displayed throughout these tracts of making the names of localities, rivers, springs, etc., the starting-point for legendary anecdotes. For men of such very scant knowledge of Sanskrit as the *thān^apat^s* invariably are, it was naturally far easier to explain such etymological stories when they were based on the modern local names.

It is undoubtedly this reason which has, *e.g.*, led the compiler of the present Haramukutaṅgaṅgāmāhātmya to substitute the name *Karaṅkanadī* for the old *Kanakavāhinī*. By the latter name the stream coming from the Haramukuta lakes is designated in all our old texts, as explained in my note on Rājat. i. 149-150. By turning *Kānk^anai*, the modern derivative of this old name, into *Karaṅkanadī*, 'the skeleton-stream,' the compiler of the Māhātmya gets an occasion to treat his readers to a legend likely to appeal to their imagination. The river is supposed to have received this appellation, because Garuḍa had dropped at its Saṅgama with the Sindhu the skeleton (*karaṅka*) of the Ṛṣi Dadhici which Indra before had used as his weapon, etc.¹ This story, it is true, is wholly unknown to the Nilamata or any other old text. But, on the other hand, it has got the great merit of being easily explained and proved to any Kāśmīrī pilgrim. He cannot fail to realize the manifest connection between *Karaṅka* and his familiar *k^aranz*, 'skeleton.'

An exactly similar case of 'popular etymology' has been noticed in the analysis of the Śāradāmāhātmya as contained in my Note B (i. 37). There the name of the village *Sun^a-Draṅ* is reproduced as *Suvarṇārdhāṅgaka* and explained by a legend, how the Muni Sāṇḍilya had at that spot half his body (*ardhāṅgaka*) turned into gold (*suvarṇa*), etc. In reality the village name is derived from the old term *Draṅga*, 'watch-station,' by which the place is mentioned by Kalhaṇa.² The distinguishing prefix *Sun^a-*, meaning 'gold' in Kāśmīrī, was given to it, because it lay on the route to the old gold-washing settlements in the Kiṣaṅgaṅgā Valley.³

¹ The story is spun out at great length in Paṭala iii. of the *Haramukutaṅgaṅgāmāhātmya*, MS. No. 221.

² See viii. 2507, 2702.

³ For other examples of local names in Māhātmyas metamorphosed for the above reason, compare my notes Rājat. vi. 177 (*Bhūmadvīpa* in the Mārtāṇḍamāh., for *Bum^azu*); i. 267 (*Śeṣanāga* in the Amareśvaramāh., for the older *Suśramanāga*, recte *Suśravonāga*); Note C, i. 124 (*Jyeṣṭheśvara*, the present *Jyēṭhēr*, turned into a site of *Jyēṭhā*), etc.

It would be easy to multiply examples showing the strange vicissitudes to which old topographical names are exposed at the hands of the local Purohita. But the explanations already given will suffice to prove that the topographical data found in Māhātmyas can only then be used safely when they are critically sifted and supported by our more reliable sources.

A critical examination of these data is, however, much impeded by the difficulty we experience in fixing the exact age of particular Māhātmyas and their component portions.¹ Even in the case of apparently old texts modern additions and changes may be suspected, while again the most recent concoctions may preserve fragments of genuine tradition.² In view of these considerations I have not thought it safe to crowd my maps with hundreds of names of petty Tirthas as found in the Māhātmyas, but have marked only those pilgrimage sites the ancient names of which can be established with certainty.

¹ The difficulty here indicated is increased by the fact that no really old manuscripts of Māhātmyas seem to be preserved in Kāśmir. MSS. written on birch-bark, i.e., earlier than the 17th century, are quite unknown at present. Of the numerous paper MSS. I have examined, none seem to me older than two centuries at the utmost. It is probable that this absence of older copies is due to the rough usage to which Māhātmya MSS. are exposed when carried about on the pilgrimage tours.

² I am glad that chance gave me an opportunity of gaining some personal experience of the manner in which Māhātmyas are occasionally produced. Some ten years ago the Purohitas or Bāchbāṭṭas of the Ganāpatyār quarter in Śrīnagar recovered an ancient Liṅga from a Mosque and began to erect a small shrine for it near the river Ghāt of Malāyār. Guided by a local tradition which, as far as I can judge, may be genuine, they believed this to have been the site of the shrine of Śiva Vardhamāneśa mentioned already in the Rājatarāṅgiṇī (see note ii. 123). The Liṅga was re-consecrated accordingly by this name.

In 1891, when examining old sites in this part of the city, I also visited the temple of Vardhamāneśa then under construction. The interest I showed in the old Liṅga and in the tradition regarding it, coupled with an appropriate Dakṣiṇā, soon secured me the confidence of the head-Purohita of the little shrine. 'Paṇḍit' T.R., a man more intelligent than the average of his fraternity, was not slow to confess to me that the Māhātmya of the Tirtha *in spē* was as yet under preparation. Some weeks later when in camp near Śrīnagar, I received the visit of my Purohita from Vardhamāneśa's shrine. He brought me the draft of the new Māhātmya and asked my assistance in revising it.

I found it to consist chiefly of extracts from the Vitastāmāhātmya. The passages dealing with Vardhamāneśa and the neighbouring Tirthas within the city had been suitably amplified with laudatory verses in the usual Māhātmya style culled from other texts. The vested interests of other local shrines had received due recognition by being included in the *Yātrā* of Vardhamāneśa. I did what I could to indicate the genuine names of these localities. This quasi-antiquarian co-operation does not seem to have detracted from the popularity of the new Māhātmya among the Bāchbāṭṭas of Ganāpatyār.

32. It is a curious fact that among our authorities for the *Topographia sacra* of Kaśmīr we must allow a conspicuous place to a Muhammadan writer. It is ABŪ-L-FAẒL, the minister of Akbar, who in the chapter of his *Āin-i Akbarī* dealing with the 'Sarkār of Kaśmīr' has left us a very accurate account of many of the holy places in the Valley.¹ Abū-l-FaẒl's detailed description of Kaśmīr is valuable in many respects to the historical student. But it is particularly in connection with our topographical search that we must feel grateful to the author for having like his great master "caught some of the enthusiasm of the Valley" (Rennell).

Abū-l-FaẒl tells us that "the whole country is regarded as holy ground by the Hindu sages." He also refers in general terms to the numerous shrines dedicated to the various deities and to the popular worship of 'snakes,' i.e., the Nāgas, "of whom wonderful stories are told." He then proceeds to describe in detail the most notable sites, giving among these particular prominence to what Dr. Bernier aptly called 'les merveilles' of the country.

This account of Abū-l-FaẒl represents for us an authentic survey of all the Kaśmīrian Tirthas that were well-known and popular at the end of the 16th century. It serves as a most useful link between our older texts dealing with these pilgrimage places and the modern tradition. It helps us to check the data of the Māhātmyas in many particulars of topographical interest. Abū-l-FaẒl's notes have enabled me to trace in more than one instance the position of ancient Tirthas or particular features regarding them which have since his time been wholly forgotten.² It cannot be doubted that Abū-l-FaẒl's list of sacred sites to which we have to refer so frequently in our subsequent notes, was supplied by competent Brahman informants just as his abstract of the Sanskrit Chronicles.

¹ Vol. i. pp. 564-570 in Prof. Blochmann's edition of the *Āin-i Akbarī*; vol. ii. pp. 354-366 in the Bibliotheca Indica translation of the work (Col. H. S. Jarrett). Abū-l-FaẒl's account of Kaśmīr would well deserve a fuller commentary than the one which the translator, in the absence of special local studies, was able to give. The account of Mirzā Ḥaidar (in the *Tārīkh-i Rāshidī*) and Bernier's notes could conveniently be discussed on the same occasion.

² Compare my notes on *Bheḍagiri* (i. 35), the *Sārada-tīrtha* (i. 37), the *Tuḡṣakanāga* (i. 220); also supplementary note to i. 107.

SECTION VII.—LOCAL TRADITION.

33. It now remains for us only to indicate briefly what help surviving tradition offers for the study of the ancient topography of Kāsmīr. The tradition with which we are here concerned, presents itself in two forms. One is the tradition of the 'learned,' regarding the ancient sites of the country in general, kept up more or less in connection with written records. The other is that genuine local tradition which is strictly confined in its limits but is kept up equally among literate and illiterate of particular places.

Among those who represent in Kāsmīr learned tradition of the former type there must again be distinguished the few Paṇḍit families of Śrīnagar in which the serious study of Sanskrit Śāstras has been maintained, and the great host of 'Bāchbaṭṭas.' With the latter class we have already become partially acquainted in the course of our examination of the Māhātmyas. We have had occasion to note the conspicuous absence of genuine knowledge as regards the ancient topography of the country in those texts which form the characteristic products of this class' literary activity.

The Purohitas' knowledge of Sanskrit is ordinarily of the scantiest kind, and their 'reading' confined to Māhātmyas and devotional texts learned by heart without proper comprehension. We can hence scarcely expect them to have preserved genuine traditions regarding those historically interesting localities which are mentioned only in the Chronicles. It is only in the matter of those sacred sites, pilgrimage routes and the like which form as it were, their own particular professional domains, that their testimony can claim special attention. Yet even in this limited field the Purohitas' traditions are, as we have seen, often of a very modern growth. Their statements, therefore, require under all circumstances to be tested with critical caution.

34. 'Learned' tradition as represented by the Śrīnagar Paṇḍits of modern times, is best gauged by an examination of what the late Paṇḍit SĀHIBRĀM († 1872) has specially recorded on the subject of ancient sites.

Sāhibrām's Tīrtha-
saṅgraha.

P. Sāhibrām who was undoubtedly the foremost among Kāsmīrian Sanskrit scholars of the last few generations, had been commissioned by the late Mahārāja Ranbir Singh to prepare a descriptive survey of all ancient Tīrthas of Kāsmīr. For this purpose a staff of Paṇḍits was placed at his disposal whose business it was to collect the necessary

materials in the various parts of the country. The large work which was to be prepared on the basis of these materials, was never completed, and of the latter themselves I was able to recover only small portions.¹ But some time before his death Paṇḍit Sāhibrām had drawn up abstracts of the information he had collected under the title of *Kāśmīratīrthasaṃgraha*, and of these I have been also able to obtain copies. The most detailed and apparently latest recension of this Tīrthasaṃgraha is the one contained in No. 61 of Prof. Bühler's collection of MSS. now at Poona.

This little work gives a list of numerous Tīrthas with brief indications of their special features and position, arranged in the topographical order of Parganas. It is useful enough as a comprehensive synopsis of such sacred sites as were known at the time to local worship. The references to many obscure little shrines, Nāgas, etc., show that the enquiries of Paṇḍit Sāhibrām's assistants had been extensive. But the work proves at the same time how little help traditional learning in Kāśmīr could offer in our days for the serious study of the old topography of the Valley.

Paṇḍit Sāhibrām's plan is to indicate each Tīrtha's position by mentioning the territorial division in which it is situated, as well as the nearest village or other well-known locality. It was undoubtedly the learned author's desire to give all local names in their old Sanskrit forms as far as they were known to him. Accordingly we find a number of localities correctly mentioned by their genuine old designations. But unfortunately the number of the latter is truly insignificant when compared with those local names which are plainly recognizable as new fabrications, as worthless as those already mentioned in connections with the topography of the modern Māhātmyas.

In consideration of the fact that P. Sāhibrām deserves to be looked upon as the best representative of modern Kāśmīrian scholarship,² it is only just to illustrate the above remarks by a few examples. I take them only from among those local names the genuine forms of which can be easily ascertained from the Rājatarāṅgiṇī. The lake of the Nāga *Suśravas*,³ the present Suśram Nāg, is named *Suśramanāga* in one

¹ The papers acquired by me refer to some of the north-eastern Parganas and contain descriptions (in Sanskrit) of the various Nāgas, Liṅgas, etc., the miraculous stories relating to them, together with the devotional texts which are supposed to be used at their worship. Quaint illustrations and maps accompany the text. The whole forms a large-sized folio. The critical value of these records is very slight.

² See Prof. BÜHLER's *Report*, pp. 4, 38.

³ See *Rājat.* i. 267 note, and below, § 59.

recension and *Suṣumṇanāga* (!) in the other. The old Parganas of *Holaḍā*, *Laulāha*, *Khūyāśrama* are turned on account of their modern names *Vular*, *Lōlau*, *Khuyāhōm*, into the 'Rāṣṭras' of *Volara*, *Lalava*, *Khoyahāma*. *Bānāhāl*, the old *Bāṇasālā*,¹ figures as *Bhāmusālā*; *Khruv*, the ancient *Khaḍūvī*,² known correctly even to so late a text as the *Lokaprakāśa*, as *Khrāva*. The well-known *Khonamuṣa* (*Khunmoh*) appears as *Kṣuṣṇamoṣagrāma* (!) The name of the ancient village *Jayavana*³ which fares badly too, as we have seen, in the *Māhātmyas*, is metamorphosed into *Jivana*; *Ranyil*, the old *Hiranyapura*,⁴ is with a flight of historical fancy turned into a foundation of king *Raṇāditya* (!).

Even the sacred Tirtha of *Tūlamūlya* (*Tulmul*) does not escape a renaming as *Shūlamūla*, though in this case the local *Māhātmya*, with its *Tūlamūla*, keeps close enough to the old name.⁵ After this, village names like *Uṣkara*, *Rāmāśrama*, *Kicakāśrama*, as designations of the old *Huṣkapura*, *Rāmuṣa*, *Kṛtyāśrama* can scarcely surprise us.⁶ The number of districts, towns, villages, streams, lakes and other topographical features (exclusive of Tirthas) mentioned by Paṇḍit Sāhibrām amounts to nearly three hundred. But scarcely two dozens of the names given for them are in accord with our old authorities.

Paṇḍit Sāhibrām was one of the few modern Kāśmīrian scholars who have seriously occupied themselves with the *Rājatarāṅgiṇī* and the later Chronicles. This is shown by the elaborate abstracts he had prepared of these works.⁷ Hence the indifferent knowledge of ancient topography as displayed in his *Tirthasaṃgraha*, must appear all the more striking. Yet in reality it is easily enough accounted for.

What knowledge learned tradition in Kāśmīr has retained of ancient sites as distinct from Tirthas and the like, is confined to a few prominent localities which, for one reason or the other, were of special interest to the Paṇḍits. Thus the capital *Pravarapura-Srinagara* with several of its quarters, *Vijayeśvara*, *Suyyapura*, *Varāhamūla*, *Padmapura*, and some other places of importance in the Valley have continued to be known by their ancient names. This was probably because these names never ceased to be employed in colophons of Sanskrit manuscripts, in horoscopes, and similar records. In the case of a

² See note viii. 733; also § 105 below.

³ Compare note vii. 607, and § 105 below.

⁴ See note i. 287, and § 104 below.

⁵ Compare note iv. 638.

⁶ See notes i. 168; ii. 55; i. 147.

⁷ These abstracts, called *Rājatarāṅgiṇīsaṃgraha*, were acquired by Prof. BÜHLER; see Nos. 176-8 of the Poona collection. It deserves to be noted that in them no attempt whatever is made to explain points of topographical interest.

few other localities again like *Jayapura*, *Dāmodara's Uḍar*, *Cakradhara*, there were well-known popular legends which plainly indicated their identity with sites mentioned in the *Rājatarāṅgiṇī*. But for the great mass of ancient places there were no special reasons of this kind to assure a recollection of their old names. It is hence only natural that all genuine knowledge of their identity and earlier history has gradually disappeared from the Paṇḍits' tradition.

Nothing but systematic enquiry on the lines of modern historical research could help towards a recovery of the knowledge thus lost. But such an enquiry could not be expected either from P. Sāhibrām or any other indigenous scholar uninfluenced by Western critical methods.

35. Popular local tradition has fortunately in Kaśmīr proved far more tenacious than the tradition of the learned. I have often derived from it valuable aid in my local search for particular sites. My antiquarian tours have given me ample opportunity to convince myself that when collected with caution and critically sifted, such local traditions can safely be accepted as supplements to the topographical information of our written records. In illustration of this statement I may refer to the evidence gathered from local tradition in reference to the sites of *Lohara*,¹ *Hastivañja*,² *Kramavarta*,³ *Jayapura*,⁴ *Skandabhavana*,⁵ etc.

In more than one instance it can be shown that local legends which Kalhana heard, still cling unchanged to the same sites. As striking examples may be mentioned here the legends concerning *Dāmodara's Uḍar*,⁶ the burned city of King *Nara*,⁷ the temple of *Pravareśa*.⁸

It cannot be doubted that this tenacity of local tradition in Kaśmīr is due largely to the isolation secured for the country by its alpine position. Nothing is more instructive in this respect than a comparison with the territories of ancient Gandhāra and Udyāna, or with the Panjāb plains. These regions so rich in ancient Hindu sites are particularly devoid of local traditions connected with them. This fact is easily understood if we think of the many and great ethnic changes which

¹ See *Rājat. Note E* (iv. 177), § 15.

have passed over the land. Kashmīr, fortunately for antiquarian research, throughout its known history has escaped such great convulsions and the breaks of tradition usually connected with them.

The influence of the geographical position of Kashmīr can be traced here also in another direction. Mountainous surroundings and consequent isolation tend everywhere in alpine countries to develop and foster conservative habits of life and thought. We find these habits most strongly marked in the population of the valley, and may safely ascribe to them a great share in the preservation of local traditions.

CHAPTER III.

GENERAL GEOGRAPHY.

SECTION I.—POSITION AND CONFIGURATION OF KĀSMĪR VALLEY.

36. Nature itself when creating the great Valley of Kāsmīr and its enclosing wall of mountains, seems to have assured to this territory not only a distinct geographical character but also a historical existence of marked individuality. We see both these facts illustrated by the clearly defined and constant use of the name which the territory has borne from the earliest accessible period.

This name, KĀSMĪRA in its original Sanskrit form, has been used as the sole designation of the country throughout its known history. It has uniformly been applied both by the inhabitants and by foreigners. We can trace back its continued use through an unbroken chain of documents for more than twenty-three centuries, while the name itself undoubtedly is far more ancient. Yet notwithstanding this long history the current form of the name down to the present day has changed but slightly in the country itself and scarcely at all outside it.

The Sanskrit *Kāsmīra* still lives as *Kāsmīr* (in Persian spelling *Kāshmir*) all through India and wherever to the West the fame of the Valley has spread. In the language of the inhabitants themselves the name is now pronounced as *Kāśīr*.¹ This form is the direct phonetic derivative of *Kāsmīr*, with regular loss of the final vowel and assimila-

¹ The adjective *Kāśūr* 'Kāsmīrian' corresponds to Skr. *Kāsmīra*. The *u* of the last syllable is probably due to the *v* of an intermediate form **Kāśvīra*; see below.

tion of *m* to the preceding sibilant. With reference to a phonetic rule, prevalent through all Indo-Aryan Vernaculars, which favours the change of medial Skr. *m* into *v*,¹ we are led to assume an intermediate Prakrit form **Kaśvir*[*a*]. In support of this we may point to the striking analogy of the Kaśmir local name *Sāngas* which, as shown in my note on Rājat. i. 100, goes back through an older recorded form *Svāngas* to **Smāngāsā*, the *Samāngāsā* of the Chronicle. It has already been shown above that we have to recognize in this **Kaśvira* the original Prakrit form which Ptolemy's *Κάσπειρα*, *Κασπερία* (pronounced Kaspīra, Kaspīria) are intended to transcribe.²

Linguistic science can furnish no clue to the origin of the name *Kaśmīra*, nor even analyze its formation.³

Etymologies of name.

This fact, however, has not saved the name from being subjected to various etymological guesses which for curiosity's sake may receive here a passing notice. It must be held to the credit of Kaśmirian Sanskrit authors that their extant writings are wholly innocent of this display of etymological fancy.

No less illustrious a person than the Emperor Bābar opens the list. His suggestion was that the name may be derived from the hill-tribe 'Kās' living in the neighbourhood of Kaśmīr.⁴ We easily recognize here the reference to the *Khaśas* of the lower hills. Their name, however, in its true form has, of course, no connection with Kaśmīr. Another etymology, first traceable in the Ḥaidar Malik's Chronicle and hence reproduced by other Muhammadan writers,⁵ derives the first part of the name from '*Kashap*,' i.e., Kaśyapa, and the second either from

¹ Compare DR. GRIERSON's remarks, *Z. D. M. G.*, i. p. 16.

² See above, § 5.

³ If the *Uṇādisūtra*, 472, *Kaśer muṭ ca* is to be applied to the word *Kaśmīra*, the latter would have to be dissolved into *kaś-m-īra* according to the traditional grammatical system.

⁴ See *Memoirs of Baber*, transl. by Leyden and Erskine, p. 313. A Persian MS. : of the text adds that *mīr* signifies mountain. ERSKINE, *Introduction*, p. xxvii., improves upon this etymology by extending it to Kashgar, the Casia regio and Casii Montes of Ptolemy. RITTER, *Erdkunde*, ii. p. 1127, from whom I take this reference, not unjustly queries why the learned editor should have stopped short of the *Caspium mare* and other equally manifest affinities.

Babar's conjecture figures still seriously in a note of the latest translation of the *Ain-i Akbarī*, ii. p. 381.

Regarding the name and habitation of the *Khaśas*, compare *Rājat*. i. 317 note.

⁵ It was first introduced to the European reader by TIEFFENTHALER's extract from Ḥaidar Malik's Chronicle compare *Description historique et géographique de l'Inde*, ed. Bernouilli (1786), i. p. 79 (also p. 89 as to source). Compare also WILSON, *Essay*, p. 94, for a similar note from the *Wāqī'āt-i Kaśmīr* of Muḥammad 'Aẓīm; here كشف مير is a clerical error for كشف مير.

Kś. *mar*, i.e., Skr. *maṭha* 'habitation,' or a word *mīr*, supposed to mean 'mountain.'¹

It was, perhaps, a belief that this whimsical etymology represented some local tradition, which induced even so great a scholar as Burnouf to risk the conjectural explanation of Kāsmīra as **Kaśyapamīra*, i.e., 'the sea of Kaśyapa.'² There is neither linguistic nor any other evidence to support this conjecture. It would hence scarcely have been necessary to refer to it had it not on the authority of a great name found its way also into numerous works of a more general character.³

37. Just as the name Kāsmīr has practically remained unchanged

**Extent and position
of Kāsmīr.**

through the course of so many centuries, so also has the territorial extent of the country which it designated. This has always been confined to the great valley drained by the headwaters of the Vitastā and to the inner slopes of the ring of mountains that surround it.

The natural limits of the territory here indicated are so sharply marked that we have no difficulty in tracing them through all our historical records, whether indigenous or foreign. Hiuen Tsiang, Ou-k'ong and Alberūnī's accounts, as we have seen, show them clearly enough. Kalhana's and his successors' Chronicles prove still more in detail that the Kāsmīr of Kāsmīrian tradition never extended materially beyond the summit-ridges of those great ranges which encircle and protect the Valley.

A detailed description of the geographical position of Kāsmīr does not come within the scope of this paper. Nor is it needed since there is an abundant modern literature dealing with the various aspects of the geography of the country. For an accurate and comprehensive account I may refer to the corresponding portion of MR. DREW's work and to the graphic chapter which MR. LAWRENCE devotes to the description of the Valley.⁴ It will, however, be useful to allude here briefly to some of the characteristic features in the configuration of the country which have an important bearing on its ancient topography.

Kāsmīr owes its historical unity and isolation to the same facts which give to its geographical position a distinct and in some respects

¹ The Kś. word *mar* < Skr. *maṭha*, is in common use in the country as the designation of Sarais, shelter-huts on passes, etc. *Mīr* might have been connected by Haidar Malik's Paṇḍit informants with the name of Mount *Meru* or with *mīra*, meaning according to a Kōśa *parvataikadeśa*, see *B. R.*, s. v.

² Compare his note in HUMBOLDT, *L'Asie centrale*, i. p. 92.

⁴ See F. DREW, *The Jummoo and Kashmir Territories*, 1875, Chapters viii.-x.; W. LAWRENCE, *The Valley of Kashmir*, 1895, pp. 12-39.

almost unique character. We have here a fertile plain embedded among high mountain ranges, a single valley large enough to form a kingdom for itself and capable of supporting a highly developed civilization. Its height above the sea, nowhere less than 5000 feet, and its peculiar position assure to it a climate equally free from the heat of India and the rigours of cold, peculiar to the higher mountain regions in the north and east.

The form of the country has been justly likened to a great irregular oval, consisting of a similarly shaped level vale in the centre and a ring of mountains around it. The low and more or less flat part of the country measures about 84 miles in length, from south-east to north-west, while its width varies from 20 to 25 miles. The area comprised in this part has been estimated at 1800 or 1900 square miles.¹ Around this great plain rise mountain ranges which enclose it in an almost unbroken ring. Their summit lines are everywhere but for a short distance at the southernmost point of the oval, more than 10,000 feet above the sea. For the greatest part they rise above 13,000 feet, while the peaks crowning them tower up to altitudes close on 18,000 feet. Reckoned from the summit lines of these ranges, the length of the irregular oval enclosed by them is about 116 miles, with a varying width from 40 to 75 miles. The whole area within these mountain boundaries may be estimated at about 3,900 square miles.

The slopes of the mountains descending towards the central plain are drained by numerous rivers and streams all of which join the Vitastā within the Kāśmīr plain. The side-valleys in which these tributaries flow, add much ground to the cultivated area of the country several of them being of considerable length and width. But even the higher zones of the mountain-slopes where cultivation ceases, add their share to the economical wealth of the country. They are clothed with a belt of magnificent forests, and above this extend rich alpine pastures, close up to the line of perpetual snow.

In the great mountain-chain which encircles the country, there is but one narrow gap left, near to the north-west end of the Valley. There the Vitastā after uniting the whole drainage of Kāśmīr flows out by the gorge of Bārāmūla (Varāhamūla) on its course towards the sea. For a distance of nearly 200 miles further this course lies through a very contracted valley which forms a sort of natural gate to Kāśmīr. It is here that we find the old political frontier of Kāśmīr extending beyond the mountain-barriers already described. For about 50 miles below the Varāhamūla gorge the narrow valley of the Vitastā was held in Hindu times as an outlying frontier tract of Kāśmīr.²

¹ Compare DREW, *Jummoo*, p. 162, for this and subsequent statements.

² See below § 53.

38. The general configuration of the country here indicated in its broadest outlines may be held to account for the ancient legend which represents Kāsmir to have been originally a lake. This legend is mentioned by Kalhapa in the Introduction of his Chronicle and is related at great length in the Nilamata.¹

According to this earliest traditional account the lake called *Satisaras*, 'the lake of Satī (Durgā),' occupied the place of Kāsmir from the beginning of the Kalpa. In the period of the seventh Manu the demon Jalodbhava ('water-born') who resided in this lake, caused great distress to all neighbouring countries by his devastations. The Muni Kaśyapa, the father of all Nāgas, while engaged in a pilgrimage to the Tirthas in the north of India, heard of the cause of this distress from his son Nila, the king of the Kāsmir Nāgas. The sage thereupon promised to punish the evil-doer and proceeded to the seat of Brahman to implore his and the other gods' help for the purpose. His prayer was granted. The whole host of gods by Brahman's command started for Satisaras and took up their position on the lofty peaks of the *Naubandhana Tirtha* above the lake Kramasaras (Kōns^{ar} Nāg). The demon who was invincible in his own element, refused to come forth from the lake. Viṣṇu thereupon called upon his brother Balabhadra to drain the lake. This he effected by piercing the mountains with his weapon, the ploughshare. When the lake had become dry, Jalodbhava was attacked by Viṣṇu and after a fierce combat slain with the god's war-disc.

Kaśyapa then settled the land of Kāsmir which had thus been produced. The gods took up their abodes in it as well as the Nāgas, while the various goddesses adorned the land in the shape of rivers. At first men dwelt in it for six months only in the year. This was owing to a curse of Kaśyapa, who angered by the Nāgas had condemned them to dwell for the other six months together with the Piśācas. Accordingly men left Kāsmir for the six months of winter and returned annually in Caitra when the Piśācas withdrew. Ultimately after four Yugas had passed, the Brahman Candradeva through the Nilanāga's favour acquired a number of rites which freed the country from the Piśācas and excessive cold. Henceforth Kāsmir became inhabitable throughout the year.

The legend of the desiccation of the lake is alluded to also by Hiuen Tsiang, though in another, Buddhistic form.² Its main features as related in the Nilamata, live to this day in popular tradition. They

¹ See *Rājat.* i. 25-27; *Nilamata*, vv. 26-237. A detailed extract of the Nilamata's story has been given by Prof. BÜHLER, *Report*, p. 39.

² See *Si-yu-ki*, transl. Beal, i. p. 149.

are also reproduced in all Muhammadan abstracts of the Chronicle.¹ From Haidar Malik's *Tārīkh* the legend became known to Dr. Bernier who prefaces with it his description of the 'Paradis terrestre des Indes.'² It has since found its way into almost every European account of Kāsmīr.

It is probable that this legend had much to do with drawing from the first the attention of European travellers to certain physical facts apparently supporting the belief that Kāsmīr was in comparatively

**Lacustrine features
of Valley.**

late geological times wholly or in great part occupied by a vast lake. But few seem to have recognized so clearly as the late MR. DREW, the true relation between the legend and the above facts. I cannot put his view which from a critical point of view appears to be self-evident, more clearly than by quoting his words: "The traditions of the natives—traditions that can be historically traced as having existed for ages—tend in the same direction, [*viz.*, of the Vale having been occupied by a lake,] and these have usually been considered to corroborate the conclusions drawn from the observed phenomena. Agreeing, as I do, with the conclusion, I cannot count the traditions as perceptibly strengthening it; I have little doubt that they themselves originated in the same physical evidence that later travellers have examined."³

The geological observations upon which modern scientific enquirers like Mr. Drew and Colonel Godwin Austin, have based their belief as to the former existence of a great lake, are mainly concerned with the undoubted 'lacustrine deposits' found in the so-called Uḍars or Karāwa plateaus to be noticed below. But it seems to me very doubtful whether we can reasonably credit the early Kāsmīrians with a correct scientific interpretation of such geological records. It appears far more probable that the legend was suggested by an observation of the general form of the valley and by a kind of natural inference from the historical changes in the country's hydrography.

We shall see below that great drainage operations took place at various periods of the country's history which extended the cultivated ground and reduced the area covered by lakes and marshes. To any one, however ignorant of geology, but acquainted with the latter fact, the picture of a vast lake originally covering the whole Valley might naturally suggest itself. It would be enough for him to stand on a hill-side somewhere near the Volur, to look down on the great lake and the adjoining marshes, and to glance then beyond towards that narrow gorge

¹ Compare, *e.g.*, *Āin-i Akb.*, ii. p. 380; WILSON, *Essay*, p. 93.

² See BERNIER, *Travels in the Mogul Empire*, ed. Constable, p. 393.

³ See *Jummoo*, p. 207.

of Bārāmūla where the mountains scarcely seem to leave an opening. It is necessary to bear in mind here the singular flights of Hindu imagination as displayed in the Purāṇas, Māhātmyas and similar texts. Those acquainted with them, will, I think, be ready to allow that the fact of that remarkable gorge being the single exit for the drainage of the country, might alone have sufficed as a starting-point for the legend.

In respect of the geological theory above referred to it may yet be mentioned that in the opinion of a recent authority "even the presence of true lacustrine deposits does not prove that the whole of the Kāsmīr lake basin was ever occupied by a lake."¹ At the present day true lacustrine deposits are still being formed in the hollows of the rock basin represented by the lakes of the north-west portion of the Valley. It is held probable "that the conditions have been much the same as at present, throughout the geological history of the Kāsmīr Valley," only a minor area of the latter having at various periods been occupied by lakes.

Whatever view may ultimately recommend itself to geologists, it is certain that the lacustrine deposits of Kāsmīr, though of no remote date, speaking by a geological standard, are far older than any monuments of man that have yet been discovered.² Mr. Drew was undoubtedly right in denying the existence of lacustrine deposits round any known ancient buildings or other works of man in the Valley.

39. None of the natural features of Kāsmīr geography have had a more direct bearing on the history of the Kāsmīr defended by its mountains. country than the great mountain-barriers that surround it. They may hence rightly claim our first consideration.

The importance of the mountains as the country's great protecting wall has at all times been duly recognized both by the inhabitants and foreign observers. Since an early time Kāsmīrians have been wont to pride themselves on their country's immunity from foreign invasion, a feeling justified only by the strength of these natural defences. We find it alluded to by Kalhaṇa who speaks of Kāsmīr as unconquerable by the force of soldiers and of the protection afforded by its mountain walls.³ The feeling is very clearly reflected in all foreign records. We have already seen what special notice is taken by Hiuen Tsiang and Ou-k'ong of the mountains enclosing the kingdom and of the difficulty of the passes leading through them.⁴ The statements of the early Arab

¹ See OLDHAM'S *Manual of Indian Geology* (1893), quoted by Mr. LAWRENCE, *Valley*, p. 50.

² See DREW, *Jummoo*, pp. 207 sq.

³ See *Rājat.* i. 31, 39.

⁴ Compare above, §§ 9, 11.

geographers brief as they are, lay due stress on the inaccessible character of the mountains. Albērūnī does the same and shows us besides the anxious care taken in old days to maintain this natural strength of the country by keeping strict watch over the passes.¹

Even when Kāsmīr had suffered a partial conquest from the north and had become Muhammadanized, the belief in the invincibility of its bulwarks continued as strong as before. Thus Sharifu-d-dīn, the historian of Timūr, writing apparently from materials collected during the great conqueror's passage through the Panjāb Kōhistān (circ. A.D. 1397), says of Kāsmīr: "This country is protected naturally by its mountains on every side, so that the inhabitants, without the trouble of fortifying themselves, are safe from the attacks of enemies." The subsequent account of the routes into Kāsmīr and other exact details suggest that the author of the *Zafarnāma* had access to genuine Kāsmīrian information.²

40. It is this defensive character of the mountain ranges to which

Watch-stations on
mountain routes.

we owe most of our detailed information regarding their ancient topography. We have already in connection with the accounts of Albērūnī and the Chinese pilgrims had occasion to note the system of frontier watch-stations by which a careful guard was kept on the passes leading through the mountains. These fortified posts and the passes they guarded, play an important part in the narrative of Kalhaṇa and his successors. As most of the Chronicle's references to Kāsmīr orography are directly connected with these watch-stations it will be useful to premise here a few general remarks regarding their character and purpose.³

The small forts which since ancient times closed all regularly used passes leading into the Valley, are designated in the Chronicles by the word *dvāra* 'gate' or by the more specific terms *draṅga* or *ḡhakka*. Numerous passages show that they served at the same time the purposes of defence, customs and police administration. They were garrisoned by troops under special commanders, designated as *draṅgeśa* or *draṅgādhipa*. The control over all these frontier stations and the command of the 'Marches' generally was vested in Hindu times in one high state officer, known by the title of *dvārapati*, 'lord of the Gate,' or equivalent terms.⁴

¹ See above, § § 12, 14.

² See the extract from Sharifu-d-dīn's *Zafarnāma* in *Tārīkh-i-Rashīdī*, transl. by N. ELIAS and E. D. ROSS, p. 432; compare also RITTER, *Asien*, ii. pp. 1122, sq.

³ For detailed references regarding these stations see my notes, *J. A. S. B.*, 1895, pp. 382 sqq.; *Rājat*. i. 122; iii. 227 (D).

⁴ Compare *Rājat*. note v. 214.

The organization of the system was somewhat changed in Muhammadan times when the guarding of the several routes through the mountains was entrusted to feudal chiefs known as *Maliks* (Skr. *mārgeśa*).¹ These held hereditary charge of specific passes and enjoyed certain privileges in return for this duty. In other respects the system underwent scarcely any change. The fortified posts with their small garrisons survived on all important routes almost to our own days being known as *rāhdārī* in the official Persian.²

It may be noted that apart from their character as military defences against foreign inroads the *Draṅgas* were also in another respect true 'gates' to the country. Nobody was allowed to pass outside them coming from the Valley without a special permit or pass. The system thus provided an important check on unauthorized emigration which was withdrawn only after the last Kāśmīr famine (1878).³

In order to appreciate fully the importance of these frontier watch-stations it should be remembered that the mountain regions immediately outside Kāśmīr were almost in every direction held by turbulent hill-tribes. To the hardy Dards (*Dard*) in the north and the restless Khakhas (*Khaśa*) in the south and west the rich Kāśmīr with its weak population has always appeared as a tempting prey. The last inroad of plundering Khakhas occurred not more than half a century ago and will not soon be forgotten.⁴ At the same time it is certain that the valour of these hardy mountain clans on the confines of Kāśmīr has at all times contributed greatly to the natural strength of the mountain defences. Without this protective belt the latter themselves would scarcely have remained so long proof against foreign invasion.

¹ A detailed and interesting account of the *Maliks* and the routes held by them is given by Baron HÜGEL, *Kaschmir*, ii., pp. 167 *sqq.*; i., p. 347.

² See *J. A. S. B.*, 1895, p. 385; also below, § 49, 52.

³ For an early reference to this system of passports at the *Dvāras*, see *Jonar*, 654. For a description of the cruel exactions often connected with 'Rāhdārī,' compare LAWRENCE, *Valley*, p. 215. I have never been able to visit the sites of the old watch-stations at the several passes without thinking of the scenes of human suffering they must have witnessed for centuries.

⁴ Compare *Rājat*, i. 317 note.

SECTION II.—THE PĪR PANTSĀL RANGE.

41. In order to understand correctly the data relating to the ancient topography of the mountains around Kāsmīr orography.

Kāsmīr, it is necessary to acquaint ourselves with their actual configuration and character. In the following account it will be possible only to indicate the most prominent features of this mountain system, and those directly connected with the historical data under discussion. For detailed information on Kāsmīr orography a reference to the lucid and instructive account in MR. DREW's work may be specially recommended.¹

The mountain ring enclosing Kāsmīr is divided into three main ranges. One of these, usually designated as the *Pīr Pantsāl* Range, forms the boundary of the Kāsmīr Valley to the south and southwest. It may be considered to begin from the southernmost part of the Valley where the Bān^ahāl Pass, 9200 feet above the sea, marks the lowest depression in the chain of mountains. After running for about 35 miles from east to west the range turns to the north-northwest. In this direction it continues for about fifty miles more, and after attaining its greatest elevation in the Tatakūṭī Peak (15,524 feet above the sea), gradually descends towards the Valley of the Vitastā. All important old routes towards the Panjāb cross this great mountain barrier, and this circumstance enables us to trace some interesting information regarding its ancient topography.

**Eastern portion of
Pīr Pantsāl Range.**

The Bān^ahāl Pass at the eastern extremity of the range must owing to its small elevation have always been a convenient route of communication towards the Upper Cināb Valley and the eastern of the Panjāb hill-states. It takes its modern name from a village at the south foot of the pass which itself is mentioned in Kalhaṇa's Chronicle by the name of BĀṆĀŚĀLĀ.² The castle of Bāṇāśālā was in Kalhaṇa's own time the scene of a memorable siege (A.D. 1130) in which the pretender Bhikṣācara was captured and killed. Coming from the Cināb Valley he had entered *Viṣalātā*,³ the hill district immediately south of the Bān^ahāl Pass with the view to an invasion of Kāsmīr. As his move-

¹ See *Jummoo*, pp. 192-206.

² See *Rājat.* viii. 1665 sqq. and note. Bān^ahāl is the direct phonetic derivative of Skr. *Bāṇāśālā*, medial Skr. *ś* being regularly changed into *h* in Kāsmīrī.

³ See *Rājat.* viii. 177. The name of *Viṣalātā* is probably preserved in that of the river *Bichlārī*. *Viṣalātā* more than once served as a safe retreat for Kāsmīrian refugees; comp. *Rājat.* viii. 177, 697, 1074.

ment fell in the commencement of the winter, he could not have selected a more convenient route. The Bānāhāl Pass is the only one across the Pir Pantsāl Range on which communication is never entirely stopped by snowfall. Kalhaṇa's narrative shows that the political and ethnographic frontier of Kāśmīr ran here as elsewhere on the watershed of the range. For the castle of Bānāsālā, though so near as to be visible already from the top of the pass (*saṃkṛāṭa*), was already held by a Khaṣa chief.¹

Proceeding westwards from Bānāhāl we come to a group of three snowy peaks reaching above 15,000 feet. With their bold pyramidal summits they form conspicuous objects in the panorama of the range as seen from the Valley.² Kāśmīr tradition locates on them the seats from which Viṣṇu, Śiva and Brahman, according to the legend already related, fought Jalodbhava and desiccated the Satisaras. The westernmost and highest of these peaks (15,523 feet) forms the famous NAUBANDHANA Tirtha. According to the legend related in the Nilamata and other texts and connected with the Indian deluge story, Viṣṇu in his fish Avatāra had bound to this peak the ship (*nau*) into which Durgā had converted herself to save the seeds of the beings from destruction.³ At the foot of this peak and to the northwest of it, lies a mountain lake over two miles long known now as *Kōṃsār Nāg*, the KRAMASARAS or *Kramasāra* of the Nilamata and Māhātmyas.⁴ It is supposed to mark a footstep (*krama*) of Viṣṇu, and is the proper object of the Naubandhana pilgrimage.

About 8 miles straight to the west of this lake, the range is crossed by a pass, over 14,000 feet high, known now by the name of *Sidan* or *Būdil*. It lies on a route which in an almost straight line connects Śrinagar with Akhnūr and Siālkōt in the Panjāb plain. Running up and down high ridges it is adapted only for foot traffic, but owing to its shortness was formerly a favourite route with Kāśmīris.⁵ The name *Sidan* is given to the pass from the first village reached by it on the

¹ *Rājat.* viii. 1674, 1683. *Samkṛāṭa* is the regular term for 'pass.'

² Marked on maps as 'Brama Sakal,' perhaps a corruption for *Brahmaśikhara* 'Brahman's peak.'

³ See *Nilamata*, 33 sqq.; *Haracar.* iv. 27; *Śrīv.* i. 474 sqq.; *Sarvāvatāra* iii. 4, 12; v. 43, etc.

⁴ See *Śrīv.* i. 482 sqq. where a visit of Sultān Zaimu-l-'ābidin to this lake is related at length; *Nilamata*, 121, 1272; *Naubandhanamāhātmya*, passim; *Sarvāvatāra* iii. 10; v. 174, etc.

⁵ According to DREW, *Jummoo*, p. 524, the distance from Jammu to Śrinagar by the *Sidan* route is reckoned at 129 miles while *viā* the Bānāhāl it is 177 miles.

The name *Būdil* is given to the pass from the hill-district adjoining it on the south; compare my note *Rājat.* vi. 318.

Kāsmīr side. It is by this name, in its original form SIDDHAPATHA, that the pass is mentioned in Kalhana's Chronicle as the route chosen for a pretender's irruption in Sussala's reign.¹

A snowy peak close to the west of the pass of Siddhapatha marks the point where the main range changes its direction towards north-northwest. From the same point there branches off in a westerly direction the lower Ratan Pir Range to which we shall have to refer below. Beyond this lie the passes of Rūpri and Darhāl, both above 13,000 feet in height. They are not distinctly named in the Chronicles. But as they give most direct access to Rajauri, the ancient *Rājapuri*, and are crossed without much trouble during the summer months they are likely to have been used from an early time. Near the Darhāl Pass lies the *Nandan Sar*, one of the numerous tarns which along this portion of the chain mark the rock-ground beds of old glaciers. It is probably the *Nandana Nāga* of the Nilamata.

42. About five miles due north of the Nandan Sar we reach the lowest dip in the central part of the whole range. It is marked by the pass known as *Pir Pantāl*, 11,400 feet high. The route which crosses it has from early days to the present time been the most frequented line of communication from Kāsmīr to the central part of the Panjāb. The frequent references which the Chronicles make to this route, permit us to follow it with accuracy from the point where it enters the mountains. This is in the valley of the Rembyār² River (*Ramanyātavi*), a little below the village of *Hūrpūr*.

This place, the ancient SŪRAPURA, is often referred to as the entrance station for those reaching Kāsmīr from Rājapuri and the neighbouring places, or *vice versa* as the point of departure for those travelling in the opposite direction.² Sūrapura was founded by Sūra, the minister of Avantivarman, in the 9th century evidently with the intention of establishing a convenient emporium on this important trade-route.³ He transferred to this locality the watch-station (*draṅga*) of the pass. Its site, as I have shown in my *Notes on the Ancient Topography of the Pir Pantāl Route*,⁴ can still be traced at the place known as *Ilāhi Darwāza* ('the gate of God'), a short distance above the village. We find the

¹ See *Rājat.* viii. 557. In the Chronicles of Śrīvara and his successors the tract about Sidan is repeatedly referred to as *Siddhādeśa*, an evident adaptation of the Kś. form of the name.

² See *Rājat.* iii. 227, Note D, § 1.

³ Compare *Rājat.* v. 39 note.

⁴ See J. A. S. B., 1895, p. 385. This paper should be compared for all details regarding the other sites along this route.

commanders of this frontier-station more than once engaged in military operations against intending invaders from the other side of the mountains.

Ascending the valley of the Rembyār² or Ramanyātavi for about 7 miles we reach the point where the streams coming from the Pir Pantsāl and Rūpri Passes unite. In the angle formed by them rises a steep rocky hillock which bears on its top a small ruined fort known as *Kāmelankōṭh*. These ruins probably go back only to the time of 'Aṭā Muḥammad Khān,' the Afghān Governor of Kāśmir, who, about 1812, fortified the Pir Pantsāl Route against the Sikh invasion then threatening. But I have proved in the above-quoted paper that they mark the original position of the ancient watch-station on this route before its transfer to Sūrapura.¹ Kalhāṇa, iii. 227, calls this site *Kramavarta*. This name is rendered by a glossator of the 17th century as *Kāmelanakōṭṭa* and still survives in the present *Kāmelankōṭh* (**Kramavartānān kōṭṭa*).

43. The old 'Imperial Road' constructed in early Mughal times then ascends the narrow valley, keeping on its left side high above the Pir Pantsāl stream.

At a distance of about four miles above Kāmelankōṭh and close to the Mughal Sarai of 'Alīābād, a high mountain-ridge slopes down from the south and falls off towards the valley in a wall of precipitous cliffs. The ridge is known as *Hastivañj*. This name and the surviving local tradition makes it quite certain that we have here the spot at which a curious legend told by Kalhāṇa was localized from early times.²

The Chronicle, i. 302 *sqq.* relates of King *Mihirakula* whose identity with the White Hun ruler of that name (circ. 515-550 A.D.) is not doubtful, that when on his return from a tour of conquest through India he reached the 'Gate of Kāśmir,' he heard the death-cry of an elephant which had fallen over the precipice. The gruesome sound so delighted the cruel king that he had a hundred more elephants rolled down at the same spot. The old glossator on the passage informs us that "since that occurrence the route by which Mihirakula returned, is called *Hastivañja*." The Persian Chroniclers too in reproducing the anecdote give *Hastivanj* as the name of the locality.

The local tradition of the neighbouring hill tracts still knows the story of a king's elephants having fallen down here into the gorge below. It also maintains that the old route to the Pass, in the times before the construction of the 'Imperial Road', crossed the *Hastivañj* ridge and followed throughout the right bank of the Pir Pantsāl

¹ J. A. S. B., 1895, pp. 384 *sq.*

² Compare J. A. S. B., 1895, pp. 378 *sqq.*

stream. This is fully borne out by a statement of Abū-l-Faẓl.¹ Describing the several routes available on the march from Bhimbhar to Kaśmīr, he clearly distinguishes "the route of Hastivānj (MSS. Hastivatar) which was the former route for the march of troops," from the 'Pir Panṭsāl route' which Akbar used on his visits to Kaśmīr.

The name Hastivānj contains in its first part undoubtedly *hast*², the Kś. derivative of Skr. *hastin*, 'elephant.' The second part is connected by the Persian compilers with the root *vañj* meaning 'to go' in Western Panjābi. The close connection between the name and the local legend already heard by Kalhana is evident enough. But whether the latter had any foundation in fact or merely arose from some 'popular etymology' of the name, cannot be decided.

The story helps in any case to make it quite clear that the ancient route from the Pir Panṭsāl Pass kept to the right or southern side of the valley. My enquiries on the spot showed that this route though neglected for many centuries is passable for laden animals and not unfrequently used by smugglers.²

44. 'Aliābād Sarai is a Mughal hospice erected for the shelter of travellers about half a mile above Hastivānj. It is about the highest point on the ascent to the pass where fuel can conveniently be obtained. I think it hence probable that the *Maṭha* or hospice which Kṣemendra mentions on the Pir Panṭsāl Pass, must have been situated somewhere in this neighbourhood.

¹ See *Āin-i Akb.*, ii. pp. 347 sq. The form *Hastivatar* in the text is a clerical error for *Hastivānj*, easily explained in Persian characters.

² Dr. BERNIER who in the summer of 1665 accompanied Aurangzeb's court to Kaśmīr, has left us, in his Ninth Letter to M. de Merveilles, an accurate and graphic account of the Pir Panṭsāl Route. While ascending the Pass from the Panjāb side he passed the spot where two days earlier an accident had happened curiously resembling Mihirakula's story. Fifteen of the elephants carrying ladies of the Imperial seraglio, owing to some confusion in the line of march, fell over the precipice and were lost; see *Bernier's Travels*, ed. Constable, p. 407. The curious Map of Kaśmīr given in the Amsterdam edition of 1672 shows accordingly the '*Pire Penjale*' mountain with a troop of elephants rolling in picturesque confusion over its side.

Former editions of Ince's '*Hand-book*' placed the scene of this accident at a spot called Lāl Ghulām just opposite Hastivānj on the 'Imperial Road.' It is evident that this wrong location was due to the original compiler having somehow confused Bernier's account and the local tradition referring to Hastivānj. The edition of 1888, p. 64, rectifies this mistake, but still indicates Lāl Ghulām as the site "of many a dreadful accident" before the causeway of the 'Imperial Road' was made. As a matter of fact, the left side of the valley was not used at all as a route before the construction of the 'Imperial Road' along its cliffs.

Of the accident on Aurangzeb's march no recollection survives.

Kṣemendra makes this interesting reference in that curious portion of the *Samayamātrkā* already alluded to, which describes the wanderings of the courtesan Kaṅkāli.¹ The heroine of his story after effecting some petty thefts in Kāśmīr proceeds to *Sūrapura*. There she passes herself off as the wife of a load-carrier (*bhārika*) engaged on the 'salt road.'² By this term the Pir Pantsāl route is quite correctly designated. It has remained to the present day the chief route by which the produce of the Panjāb salt-mines coming *viā* Jehlam and Bhimbhar enters Kāśmīr.³ She keeps up the disguise which is evidently intended to help her through the clutches of the officials at the frontier watch-station, by taking next morning a load on her head and starting with it towards the pass (*saṅkaṭa*). On the way she passes along high mountains by precipitous paths deeply covered with snow. By night-fall she reaches the PAÑCĀLADHĀRĀMAṬHA after having in the meantime assumed the guise of a respectable housewife and apparently disposed of her load. It being late in the season, she passes the night there shivering with cold. Thence she finds her way open to India where a career of successful adventures awaits her.

45. Kṣemendra's itinerary is of particular value because it supplies us with the only mention of the old name of the pass I can trace. It is certain that with him PAÑCĀLADHĀRĀ designates the highest portion of the route, *i.e.*, the Pass of the Pir Pantsāl. It is equally obvious that *Pañcāla* is the original of the modern Kś. *Pantsāl* which is in fact identical with the earlier form except for the regular change of Skr. *c* into Kś. *ts*. In the Pahāri dialect of the population inhabiting the valleys to the south the name is still pronounced *Pañcāl*.⁴

¹ See *Samayam*, ii. 90 *sqq.*, and above, § 25.

² Professional load-carriers or Coolies are found to this day in numbers in Hūrāpūr, Puṣiāna and other places near the Pir Pantsāl Pass. Of Zainu-l-'ābidin it is specially reported that he settled a colony of load-carriers from *Abhisāra* (*i.e.*, the country about Bhimbhar) at the customs-station of *Sūrapura*; see *Sūv.* i. 408. Coolies are the only means of transport on the Pir Pantsāl and other passes when the snow lies to any depth.

³ Salt is a considerable article of import into Kāśmīr where it is wholly wanting; see LAWRENCE, *Valley*, p. 393. I remember vividly the long strings of salt-laden bullocks which I used to meet daily when marching into Kāśmīr by the Pir Pantsāl route.

⁴ I am not certain of the origin of the pronunciation of the name as *Pir Panjāl* now accepted by Anglo-Indian usage. It is known neither on the Kāśmīr nor on the Panjāb side of the range itself. It meets us first in Bernier's 'Pire Penjale.' Tieffenthaler, however writes more correctly *Pensal*; see *Description de l'Ind* 1786, pp. 87 *sq.*

The term *dhārā* which is added to *Pañcāla*, represents in all probability the equivalent of our 'pass.' Skr. *dhārā* means generally the sharp edge of some object. According to Wilson's Dictionary, as quoted by Böthlingk-Roth, the word also carries the specific meaning of 'edge of a mountain.' It is probable that this meaning was taken by Wilson's Paṇḍits from some Kośa. In any case it agrees closely with the use of the word *dhār* in the modern Pahārī dialects south of Kāśmīr. There it is well-known as the designation of any high mountain ridge above the region of alpine pasture.

We are tempted to see in *Pañcāla* a distinct local name, either of the Pass itself or of the whole mountain chain. But the use of the modern derivative *Pantṣāl* presents difficulties in the way of a certain conclusion. The word *Pantṣāl* is applied in Kāśmīr chiefly to the great mountain chain which forms the boundary of the country to the south, i.e., the range to which conventional European usage gives the name of 'Pir Pantṣāl.' Yet the meaning now conveyed to a Kāśmīrī by the term *Pantṣāl*, is scarcely more than that of 'high mountain range.'

The word is used in combination with specific names for the designation of subordinate branches of the great range towards the Panjāb. Thus the range crossed on the way from the Pir Pantṣāl Pass to Rajaurī, is known as '*Ratan Pantṣāl*,' and the one crossed by the Hāji Pir Pass between Ūri and Prūntṣ (Pūnch) as '*Hāji Pantṣāl*.' Sometimes, but not so generally, the term is applied also to mountains wholly unconnected with the Pir Pantṣāl system.

On the whole I am inclined to believe that *Pañcāla* > *Pantṣāl* had originally the character of a specific local name. It may have been applied either to the whole of the great southern chain of mountains or its central portion about the Pir Pantṣāl Pass. Subsequent usage may then have extended the application of the term just as it has that of the name 'Alps' in Europe. Our materials, however, are not sufficient to enable us to trace the history of the word with certainty.¹

46. In this connection it will be useful briefly to notice also the word *Pīr* which forms the first part of the modern designation of the Pass. This word *Pīr*, a term for pass. is now used more or less frequently for 'Pass' both in Kāśmīr and the hill-tracts south of it. MR. DREW who seems to have given more attention to local nomenclature in these hills than other travellers, in his explanation of the term starts from the well-known meaning of *Pīr* in Persian, an 'old man' and thence a 'saint or Faqīr.'²

¹ The main facts regarding the modern use of the word *Pantṣāl* have been quite correctly recognized already by DREW, *Jummoo*, p. 157.

² See *Jummoo*, p. 157 note.

He refers to the common practice of Faqīrs establishing themselves on Passes for the sake of refreshing travellers and of receiving their alms. "When any noted holy Faqīr died on a Pass, the place became sacred to his memory, and was often called after him, his title of Pir being prefixed; at last it became so common for every important Pass to have a name beginning with Pir that the word acquired the secondary meaning of Mountain Pass." MR. DREW refers to the fact that Dr. Bernier already found an aged hermit established on the Pass who had resided there since the time of Jahāngīr. He was supposed "to work miracles, cause strange thunders, and raise storms of wind, hail, snow and rain." From this 'Pir,' Mr. Drew thinks, the Pass acquired the first part of its present name.

I agree with the above explanation as far as the use of the Persian word *Pīr* is concerned. But I suspect that the custom of connecting mountain passes with holy personages rests on a far older foundation. Superstitious belief has at all times and in all mountainous regions peopled the solitary summits and high ridges with spirits and other supernatural beings. To this day Kāśmīrian Brahmans fully believe in the presence of *Devatās* and '*Bhūtas*' of all sorts on high mountain passes. In those parts of the Himālaya where Hinduism has survived among all classes, this superstition can, no doubt, be found still more fully developed.

On all Kāśmīr Passes, however rarely visited, stone-heaps are found marking the supposed graves of imaginary 'Pirs.' Every pious Muhammadan on passing adds his stone to them. Yet these little cairns existed there in all probability long before Islām reached the country. Exactly the same custom is observed, *e.g.*, by the Hindu Pilgrims to Amaranātha on crossing the Vāv^ajan Pass above the lake of Suśravonāga, 'to please the Devas' as the *Māhātmya* says.¹

We can show that almost all famous Ziārats in Kāśmīr, whether of real or imaginary Muhammadan saints, occupy sites which were sacred in earlier times to one or the other Hindu divinity. We can scarcely go far wrong in concluding by their analogy that the 'Pirs' of the Muhammadan wayfarers have only taken the place of the older Hindu 'Devas.'

This surmise is strikingly corroborated by the only passage of the

¹ See *Amaranāthamāhātmya*, vii. 1 *sqq.* The stones placed are supposed to represent *maṭhikās*, 'shelter-huts', in which the gods can find refuge from the evil wind blowing on the pass (hence its alleged Sanskrit name *Vāyuvarjana*). The duty of making these *Maṭhikās* is enjoined in vii. 19. *Maṭhikām ye na kurvanti tattraiva Vayuvarjanc | dāruṇaṁ narakam yānti śatkalpaṁ na saṁśayaḥ || kṛtvā tu maṭhikām devī pūjayed vidhipūrvakam | arpayed devapūjyartham dakṣiṇābhīḥ samannitam ||*

Sanskrit Chronicles which mentions the Pir Pantṣāl Pass by its proper name. Śrīvara iii. 433, when relating the return of a Kāsmīr refugee 'by the route of Sūrapura' in the time of Ḥasan Shāh (circ. A.D. 1472-84), tells us of a fatal chill he caught "on the top of the *Pañcāladeva*." It is clear that the name here used corresponds exactly to the modern Pir Pantṣāl, 'Pir' being the nearest Muhammadan equivalent for 'Deva.' Dr. Bernier's account has already shown us that popular superstition had not failed to transfer also the supernatural powers of the 'Deva' to the Pir who acted as his representative on the Pass.

47. We may now return to the description of the old route where

Pass of Pir Pantṣāl.

we left it at 'Aliābād Sarai and resume our journey towards the Pass. From the Mughal hospice the road ascends in a gently sloping valley westwards until at a distance of about $4\frac{1}{2}$ miles the height of the Pass is reached. Close to the point where the descent towards the Panjāb begins, stands the hut of a Faqīr. He has inherited the post of Bernier's Pir, but little of his spiritual powers and his emoluments. An octagonal watch-tower close by, occupied by a Sepoy post till a few years ago, may mark the site of an earlier outpost.

The descent is here as on all Passes of the range far steeper on the Panjāb side than towards Kāsmīr. *Puṣiāna*, the next stage, which is reached by zigzag paths along the rocky slope of the mountain, lies already more than 3000 feet below the Pass. The little village is an ancient place. It is undoubtedly the *PUṢYĀNANĀPA* of Kalhaṇa who mentions it repeatedly in connection with the civil wars of his own time.¹ *Puṣyānanāḍa* served often as a refuge for rebel leaders for whom Kāsmīr had become too hot. They could thence conveniently resume their inroads. We see here again clearly that the Kāsmīr frontier ran on the watershed of the range; for of *Puṣyānanāḍa* it is distinctly said that it belonged already to the territory of Rājapuri.

From *Puṣiāna* the road descends in a westerly direction along the bed of a stream which belongs to the headwaters of the *Tauṣi* (*Tohī*) of *Prūṭṣ*. The next stage is the hill-village of *Bahrāmgala*, a considerable place which is mentioned already by Śrīvara under the name of *BHAIRAVAGALA*.² From *Bahrāmgala* the route turns to the south and crosses, by the Pass known as *Ratan Pir* (8200 feet), the range which has already been mentioned as a branch from the *Pir Pantṣāl* chain. There the route enters the region of the middle mountains and descends in an open valley to *Rajauri*, the ancient *Rājapuri*, where we may leave it.

¹ Compared *Rājat*. viii. 959 note. The ending *nāḍa* is identical with *nālu*, Anglo-Indic 'Nullah,' i.e., 'valley, ravine.'

² See *Śriv*. iv. 529, 589.

48. Beyond the Pir Pantsāl Pass the summit-line of the main range rises again considerably. The *Tang-*

Central part of Pir
Pantsāl.

tala Pass which is about five miles due north of the Pir Pantsāl Pass and is mentioned by

Abū-l-Faḡl, ¹ is already far higher. The track crossing it is scarcely practicable for animals.

The same is the case, as personal experience showed me, with the next two Passes, known by the Pahārī names of *Oittapānī* and *Cōṭī Galī*; they are both over 14,000 feet high. The first one was probably used on occasion of the inroad related by Śrīvara, iv. 589 sqq. We are told there of a rebel force which coming from Rajauri evaded the troops of Sultān Muḥammad Shāh posted at Sūrapura, by crossing the mountains in the direction of KĀCAGALA. This place, as shown on the map, corresponds undoubtedly to the alpine plateau or 'Marg' of *Kācagul* on the northern slope of the Pir Pantsāl range.

A short distance to the northwest of the Cōṭī Galī Pass the range culminates in its greatest snowy peak, Mount *Tatakūṭī*, which rises to a height of 15,524 feet. Owing to its bold shape and central position this peak is the most conspicuous object in the panorama of the whole range, whether seen from the Kāśmīr Valley or from the Panjāb plains. To the north it presents a precipitous face of unscaleable rocks. On the south it is surrounded by snowfields which on the occasion of an ascent made late in the season I found still of considerable extent. We have already seen that it is this peak which Albērūnī describes under the name of *Kulārjak*.² For an observer from the Panjāb plain about Gujrat the appearance of the peak, with its glittering dome of snow, is very striking, notwithstanding the great distance (about 87 miles as the crow flies). I have sighted it on very clear days even from Lahore Minārs.

From *Tatakūṭī* the chain continues at a great elevation for a considerable distance, the summit ridge keeping an average height between 14,000 and 15,000 feet. We find it crossed first by the Passes of *Sangsafed*, *Nūrpūr* and *Cōrgalī*, all difficult routes leading down into the valley of Loharīn, the ancient Lohara. It is only at the Tōṣmaidān Pass that we meet again with an important and ancient line of communication.

49. This Pass being on the most direct route between the Kāśmīr capital and Lohara, was of special importance during the reigns of the later Kāśmīrian kings whose original home and safest stronghold was in Lohara. We

¹ See *Āin-i Akb.*, ii. p. 348.

² Compare above, § 14.

find accordingly the route leading over the Tōṣṣ*maidān Pass often referred to in the last two Books of Kalhana's Chronicle.

But apart from this historical connection the Tōṣṣ*maidān route must have always been prominent among the old lines of communication from Kāśmir owing to its natural advantages. It was the shortest route into the Valley of Pūnch (Parṇotsa) and hence to that portion of the western Panjāb which lies between the Jehlam and Indus. It was besides under the old conditions of road and travel probably the easiest and safest route in that direction.¹

This old route started from the present village of *Drang*, situated at the foot of the mountains in the Biru Pargana, circ. 33° 57' lat. 74° 36' long. The name of the village is, of course, nothing but the old term of *draṅga*, 'watch-station.' In old times the place was distinguished as KĀRKOṬADRAṅGA.² It may have received the distinctive first part of its name, *Kārkoṭa*, from the mountain-ridge now known as *Kākōḍar*, which is passed higher up on the route. Kś. *Kākōḍar* could well be derived from an earlier Skr. form like **Kārkoṭadhara*. The Tirtha-saṁgraha also mentions a *Kārkoṭanāga* somewhere in this direction.

From *Drang* where a customs-station exists to this day, the road ascends over an easy forest-clad slope to the edge of the Tōṣṣ*maidān. This is, as the name indicates, a large upland plateau of undulating grazing grounds, rising very gradually from a level of about 10,000 feet. At the point where the road strikes the northern edge of the plateau, there are several ruined towers. They seem to have been last repaired on occasion of the Sikh invasion of 1814 to be referred to below, but are probably far older. The spot is known to this day as *Barbal* which in Kś. means 'the place of the Gate' (Kś. *bar* < Skr. *dvāra*). In view of this designation and the commanding position of the place we can safely locate here the proper *Dvāra* or 'Gate' of this route.³

The route after crossing the Tōṣṣ*maidān plateau ascends over gently sloping grassy ridges to the *Kākōḍar* spur and passing along the south foot of the latter reaches the Pass. The ascent is so gradual and easy that though the elevation of the latter is over 13,000 feet, the construction of a cart-road would so far meet with little difficulty. The Pass itself is equally easy.

On its west side two routes are available. One descends in the

¹ The historical references to this route will be found collected in Note E (*Rājat.* iv. 177) on Lohara, §§ 5-14.

² Compare *Rājat.* vii. 140; viii. 1596 notes.

³ The term *dvāra* is actually used by Kalhana, vii. 140, 1801, for a fortified post on this route. The village *Drang* is a suitable enough position for a customs and police station; the point for military defence, however, is higher up at 'Barbal.'

Gāgri Valley past the village of *Chāmbār* mentioned in the *Rājatarāṅgiṇī* by the name of *SĀRAMBARA*.¹ The other leads over a cross-spur in a south-westerly direction straight down into the valley now known as *Loharīn*. The position of the ancient castle of *LOHARA* which I was able to trace in the centre of this great and fertile valley, has been fully discussed by me in a separate note.² About 8 miles further down the valley and at the point where its waters meet the stream coming from *Gāgri*, lies the large village of *Maṇḍī*. It marks the site of the old 'market of *ATṬĀLIKĀ*,' repeatedly mentioned by *Kalhana*.³ From *Maṇḍī* onwards the route passes into the open valley of the *Tohī* (*Tauṣī*) of *Prūṇṭṣ* which offers an easy line of communication down to the plains.

The historical importance of the *Tōṣmaidān* route is best illustrated by the fact that it was chosen on two occasions for expeditions aiming at the invasion of *Kāśmīr*. We have already referred to *Maḥmūd* of *Ghazna's* expedition, probably of A.D. 1021, which *Alberūni* accompanied, and to which we owe the valuable information recorded by him.⁴ This attempt at invasion, perhaps the most serious of which we know during Hindu times, was frustrated by the valorous defence of the castle of *Lohara* and a timely fall of snow. Nor was *Mahārāja Ranjit Singh* more successful when in 1814 he first attempted to invade *Kāśmīr* by this route.⁵ The portion of the Sikh army led by him in person, safely reached the *Tōṣmaidān* plateau where the *Afghān* defenders were posted near the towers above mentioned. Difficulties of supplies, however, and the news of a reverse sustained by the column marching by the *Pir Pantsāl* route forced on a retreat. This ended in a complete rout in the mountain defiles about *Loharīn*.

It may yet be mentioned that the route over the *Tōṣmaidān* was already in all probability followed by *Hiuen Tsiang* on his way to *Parṇotsa* or *Prūṇṭṣ*.⁶ It remained a favourite trade route until the recent *Jehlam Valley* cart-road was constructed. Owing to the elevation of the Pass, however, this route is always closed by snow longer than, e.g., that of the *Pir Pantsāl*. During the winter, therefore, the road from *Lohara* to *Kāśmīr* lay by the lower passes in the west leading into the *Vitastā Valley* below *Bārāmūla*.⁷

¹ See *Rājat.* viii. 1875-77 note.

² See Note E, iv. 177; also *Ind. Ant.* 1897, pp. 225 sqq.

³ See *Rājat.* viii. 581 note.

⁴ See above, § 14.

⁵ For a more detailed account of this expedition, see Note E, iv. 177, § 14.

⁶ Compare above, § 9.

⁷ See Note E (*Rājat.* iv. 177), §§ 7, 8, for *Kalhana's* references to the occasions when this more circuitous route was used.

Not far to the north of the Tōṣṡmaidān Pass the range still attains a height of over 15,000 feet in a group of bold snowy peaks. Its summit ridge then gradually descends and is crossed by some lower passes from the neighbourhood of the well-known alpine plateau of Gulmarg. From a summit behind Gulmarg (marked 'Sallar' on the map) several spurs radiate. They form the northern end of the range, and descend very steeply and with faces of rugged cliffs into the narrow valley of the Vitastā.

SECTION III.—THE VITASTĀ VALLEY.

50. We have already spoken of the Vitastā Valley as the single outlet for the waters of Kāśmīr and as the great gate of the country. We may now cast a glance at the old route leading through it and at the defences by which nature has fortified it.

The Vitastā Valley below Bārāmūla is confined between two ranges of mountains. The one to the south is a branch of the Pīr Pāntsal Range separating from the main chain at a point behind Gulmarg. The range to the north belongs to a mountain-system which culminates in the Kājnāg Peak (14,400 feet) and is usually designated by the name of the latter. These two ranges accompany the course of the river for some eighty miles westwards down to the point near Muḡaffarābād where the Vitastā makes its sudden bend to the south.

Along the whole length of the Valley, cross-ridges, more or less steep and rugged, run from both sides down to the river-bed. This consists from below Bārāmūla of an almost unbroken succession of rapids, the fall in level being nearly 3000 feet in the above distance. The Valley is throughout narrow and wanting in level ground. But for about 50 miles, down to the old Kāśmīr frontier line, it may more fitly be described as a narrow ravine. Only occasional alluvial terraces high above the river afford room here for settlement and cultivation.

Owing to this extremely confined nature of the Valley, communication on the route leading along it must have always been troublesome and risky in old times. The natural difficulties of this long defile were no doubt considerably increased by the restless disposition of the Khasā tribe which has held it since ancient times. The Sikhs who were the last to fight their way through these passes, suffered more than one disaster at the hand of the hill-men. The line of forts erected by them along the valley attests to this day the trouble they experienced

in holding the passage.¹ The military difficulties of a march through such a succession of dangerous defiles must have been even greater in old times which knew no fire-arms. The protection of the route against an active enemy who could easily seize and hold all commanding positions, was then, no doubt, a still more difficult task.

51. It is probably on account of the circumstances here briefly indicated that we hear in the Chronicles comparatively little of the route following the Vitastā Valley Route. Being the shortest line of communication to the present Hazāra District and the Indus, it was certainly used from early times. We have seen that Hiuen Tsiang and Ou-k'ong coming from the ancient Gandhāra and Uraśā followed it on their way to Kāśmīr, and that it was well-known to Albērūnī.

But it seems probable that its importance, military and commercial, was then far smaller than that of the Pir Panthāl and Tōṣṡmaidān routes. It is only in modern times that this western route has attained real prominence. This originated in the time of the Afghān rule over Kāśmīr when the route along the Vitastā to Muẓaffarābād and hence though Hazāra afforded the shortest and least exposed line of communication between Kāśmīr and Peshawar.² Subsequently after the annexation of the Panjāb, the establishment of the hill-station of Murree naturally drew traffic in this direction. The construction of the Tonga Road from Murree to Bārāmūla in our own time finally assured to this route its present supremacy.

There is at present a road on each side of the Valley leading down to Muẓaffarābād. But only the route along the right bank of the river can claim any antiquity. The one on the opposite bank has come into general use only within the last few decades since traffic towards Murree and Rawalpindi sprung up. The track chosen for the old road is easily accounted for by topographical facts. We have already noticed that the Vitastā Valley route was of importance chiefly as leading to Hazāra (Uraśā) and hence to the old Gandhāra. A glance at the map will show that the open central portion of Hazāra is most easily gained by crossing the Kīṣangaṅgā just above Muẓaffarābād and then passing the comparatively low ridge which separates this river from the Kunhār stream. The route here indicated finds its natural continuation towards

¹ Moorcroft's account of his attempt to use the Muẓaffarābād route in 1823 gives a graphic picture of the obstacles created by the rapacious hill-tribes; see *Travels*, ii. pp. 281 sqq. Compare also LAWRENCE, *Valley*, p. 200.

² Baron Hügel quite correctly notes a Kāśmīr tradition that the Bārāmūla route was properly opened up only about 80 years before his own visit (1835) on the arrival of the Pāthāns; see *Kaschmir*, ii. p. 174.

Kashmir on the right bank of the Vitastā, the crossing of the latter being wholly avoided. It has already been shown above that this route, now marked by the stages of Abbottabad, Garhi Habibullāh, Muẓaffarābād and Bārāmūla, is directly indicated in Albērūni's itinerary.¹

52. We may now proceed to examine the old notices regarding this route. It started in Kashmir from the twin towns of *Varāhamūla-Huṣkapura* which occupied the sites of the present Bārāmūla and Uṣkūr, respectively. Huṣkapura on the left river bank, though the more important of the two places in ancient times, has dwindled down to a mere village. Varāhamūla-Bārāmūla, however, on the opposite bank is still a flourishing place and an emporium of trade. It occupies a narrow strip of open ground between the river and the foot of a steep mountain side.

Close to the western end of the town a rocky ridge with a precipitous slope runs down into the river-bed. Only a few yards' space is left open for the road. At this point there stood till last year (1897) an old ruined gateway known to the people as the *Drang* or 'watch-station.' It had been occupied as a military police post; until the 'Rāhdārī' system was abolished, watch was kept here over those who entered or left the Valley. I had examined the gateway in 1892. When revisiting the spot in May, 1898, I could scarcely trace its foundations. The decayed walls had meanwhile been sold by auction, and its materials carried away by a contractor.

Though the structure I had seen, was scarcely older than the time of Sikh rule, there can be little doubt that it marked the site of the ancient 'Gate' of Varāhamūla. This is clearly indicated by the situation of the spot which is by far the most convenient in the neighbourhood for the purpose of a watch-station. Moorcroft does not mention the name *Drang*, but describes the gateway itself accurately enough. Here then, we may assume, stood in ancient times "the stone gate, the western entrance of the kingdom", through which Hiuen Tsiang had passed before he reached Huṣkapura (*Hu-se-kia-lo*), his first night's quarter in the Valley. Ou-k'ong too and Albērūni, as we have seen, knew well this watch-station which is also mentioned by Kalhana under the general designation of *Dvāra*.²

The road keeps close by the bank of the river as it winds in rapid fall through the rock-bound gorge. About two and a half miles below 'Drang' the hill sides recede slightly, leaving room for a small village

¹ See above, § 14. [The construction of a Tonga road between Abbottabad and Muẓaffarābād, recently sanctioned (1899), is sure to make the old route through Hazāra again popular.]

² See *Rājat*, viii. 413 note.

called *Nārān Thal*. Near it stands a little temple, with a spring close by which is visited by pilgrims and is probably identical with the *Nārāyaṇa-sthāna* of the *Nilamata*.¹

About a mile below this point and close to the village of Khād²-niyār,³ the river turns sharply round a steep and narrow spur projecting into the valley from the north-west. A ledge of rocks continues the spur below the river-bed and forms the first serious rapid of the Vitastā below which boats cannot pass (see map). The road crosses the spur by a narrow and deep cut, known as *Dyār⁴gul*. Kalhana's Chronicle knows this curious cutting by the appropriate name of *Yakṣadara*, 'the demon's cleft.' According to the tradition there recorded the operations by which Suyya, Avantivarman's engineer, lowered the level of the Vitastā, extended to this point of the river bed.⁵

53. Two miles below Dyār⁴gul we pass near the village of Zehenpōr some ancient sites vaguely described by Vigne and Hügel. Still further down near the village of Gingal the map marks the ruins of a

temple which I have not been able to visit. But no localities on this route are known to us from our old sources until after about three and a half marches we reach the side valley marked on the map as 'Peliasa.' This valley and the large village at its entrance are known indeed to the Pahārī population by the name of *Peliāsa*. But the Kāśmīris settled at several places along the Vitastā Valley call them *Buliāsa*. This form of the name which I ascertained by local enquiries, enables us to identify this locality with the *BOLYĀSAKA* of the *Rājatarāṅgiṇī*.

Kalhana in his account of Saṃkaravarman's ill-fated expedition towards the Indus (A.D. 902) mentions *Bolyāsaka* as the place where the Kāśmīr army retreating from Uraśā reached the border of their own territory.⁴ This reference is of special interest as it shows that Kāśmīr authority extended in Hindu times down to this point of the Valley. We can easily reconcile this fact with the existence of the 'Dvāra' at Varāhamūla.

The gorge at the latter place offered a convenient position for establishing a watch-station which was to secure control over the traffic and the collection of customs. But in regard to military defence a frontier-line in the immediate vicinity of the Kāśmīr Valley would have been very unsafe. I believe, therefore, that the Vitastā Valley

¹ See *Nilamata*, 1179, 1315, 1349. The name occurs also repeatedly in the several *Varāhakṣetramāhātmyas*.

² Perhaps the *Khādanāvihāra* of *Rājat.* iii. 14.

³ Compare *Rājat.* v. 87 note.

⁴ See *Rājat.* v. 225 note.

below Varāhamūla was held as an outlying frontier-tract as far as the present Buliāsa. It is exactly a few miles below this place that ascending the Valley the first serious difficulties are encountered on the road. An advanced frontier-post could scarcely have occupied a strategically more advantageous position.

The conclusion here indicated is fully supported by what Kalhaṇa's narrative tells us of a locality almost exactly opposite to Buliāsa. Kalhaṇa mentions in two places a place called VIRĀNAKA in connection with events which make it clear that it lay in the Vitastā Valley and just on the border of Kaśmīr territory.¹ I have been able to trace the position of Virānaka at the modern hill-village of *Viran*, near the left bank of the Vitastā and only a short distance above Buliāsa. The valley below the old frontier thus marked is now known as *Dvārbidī*. Its ancient name is given by an old gloss of the Rājatarāṅgiṇī which speaks of Bolyāsaka as situated in DVĀRAVATĪ. Local enquiries have shown me that even to the present day popular tradition indicates a ridge a short distance above Buliāsa as the eastern limit of Dvārbidī.²

In the account of Saṃkaravarman's above-mentioned expedition six marches are reckoned from the capital of Uraśā to Bolyāsaka. This agrees exactly with the present reckoning which also counts six marches from the vicinity of Buliāsa to Abbottabad.³ Near this place, the modern head-quarter of the Hazāra District, the old capital of Uraśā was in all probability situated.

54. It remains for us to notice briefly what is known of ancient localities on the left side of the Valley. As already explained there was no great line of communication on this side corresponding to the present Murree-Bārāmūla Road. Yet for two marches down the Valley, as far as Ūrī, the route of the left bank is likely to have been much frequented. From Ūrī a convenient route leads over the easy Hāji Pir Pass to Prūṇṭa or Parṇotsa. This pass owing to its small elevation, only 8500 feet, is never completely closed by snow. It is hence much used during the winter-months when the more direct routes to Kaśmīr *viā* the Pir Panteāl, Tōṣ³maidān or other high Passes are rendered impracticable.

¹ See *Rājat.* v. 214 and viii. 409. In the first passage we hear of an attack made on Virānaka by the chief commander of the frontier posts (*dvāreśa*). In the second *Virānaka* is referred to as a settlement of Khaśas which offered the first safe refuge to Sussala when defeated before Varāhamūla, A.D. 1111.

² See *Rājat.* v. 225 and note v. 214.

³ Compare *Rājat.* v. 217 note; CUNNINGHAM, *Anc. Geogr.*, p. 104, and DREW, *Jummoo*, p. 528.

Marching down the valley from Uškūr: Huṣkapura, we first cross the spur which bounds the gorge of Varāhamūla from the south. We then reach a fertile little plain, about two miles broad, charmingly situated in an amphitheatre of high pine-clad mountains and facing the Dyāṅgul ridge. It is known as *Nāravān* and contains at the village of *Sīr* and *Fattegarh* considerable remains of ancient temples. On a small plateau which forms the western boundary of this plain by the river bank, lies the village of *Kiṭṭhōm*. It marks the site of the ancient Buddhist convent of *Kṛtyāśrama*, the foundation of which a curious legend related by Kalhaṇa attributes to the son of Aśoka.¹ Ou-k'ong refers to it as the 'monastère du mont *Kitché*.'

At Būniār, near the end of the first day's march we pass the well-preserved ruins of an ancient temple which are of considerable antiquarian interest. Its name and date cannot be traced in our extant records. Another similar ruin, but far more decayed, flanks the road about midway between Būniār and Ūri.

From near the latter place the Vitastā Valley is held on the left bank chiefly by the Khakha tribe, on the right by the closely related Bombas. In the former we recognize the ancient *Khaśas* whose settlements lower down the Valley, at Virānaka, are distinctly mentioned by Kalhaṇa.² The predatory habits and restless ways of the Khaśas form a frequent theme in the Chronicle. The modern Khakhas and Bombas have up to the middle of the present century done their best to maintain this ancient reputation, just as their seats have remained the old ones.

¹ See *Rājat.* i. 147 note; also my *Notes on Ou-k'ong*, pp. 13 sqq. *Kṛtyāśrama* is mentioned already by Kṣemendra, *Samayam.* ii. 61.

² *Rājat.* viii. 409.

SECTION IV.—NORTHERN MOUNTAIN RANGE.

55. The mountains which enclose the Kāśmīr Valley in the north-west and north, may be looked upon as one great range. Their chain nowhere shows any marked break though its direction changes considerably. The routes leading through these mountains have never been of such importance in the history of Kāśmīr as the routes towards India and the west. Hence our information regarding the old topography of this mountain range is also less detailed.

Range towards
Karnau and Sardi.

We are least informed about that portion of the range which joins on to the Kājnāg Peak north-west of Bārāmūla and then continues in the direction of south to north towards the upper Kiṣangaṅgā. The watershed of this portion forms the western boundary of Kāśmīr towards Karnau, the ancient KARṆĀHA.¹ This territory which may be roughly described as lying between the Kiṣangaṅgā and the Kājnāg Range, seems at times to have been tributary to Kāśmīr. Yet we hear of it only in the concluding portion of Kalhaṇa's Chronicle, and there too no details are given regarding the routes leading to it. These routes as the map shows, start from the ancient districts of *Samālā* (Hamal) and *Uttara* (Uttar).

At the point where the summit of the range comes nearest to the Kiṣangaṅgā, it takes a turn to the east and continues in this direction for more than 100 miles. The summit ridge keeps after this turn at a fairly uniform height of 12,000 to 13,000 feet for a long distance. From the northern parts of the Uttar and Lōlau Parganas several routes cross the range in the direction of the Kiṣangaṅgā.

Kalhaṇa has occasion to refer to these in connection with the expedition which took place in his own time against the *Sīraḥsīlā* castle. This stood on the Kiṣangaṅgā close to the ancient Tirtha of the goddess Sārādā still extant at the present Sardi.² One of these routes leads past the village of *Draṅg*, situated at 74° 18' 45" long. 34° 33' 30" lat. It is certain that the place took its name from an ancient watch-station here located and is identical with the *DRANGA* mentioned by Kalhaṇa in connection with the above expedition.³ I have not been able to visit the place in person but was informed in the neighbourhood that remains of

¹ Compare *Rājat.* viii. 2485 note.

² Compare regarding the *Sārādātīrtha* and the castle of *Sīraḥsīlā*, notes i. 36 (B) and viii. 2492 (L), respectively; also below, § 127.

³ See *Rājat.* viii. 2507 note.

old watch-towers are still found on the path which leads up to the pass behind the village of Drang.

Besides the route marked by this old frontier-station there are others leading in the same direction. One is to the west over the Sitalvan Pass; the other lies in the west and passing through the valley of Krōras descends directly to Sardi along the *Madhumatī* stream. The portion of the Kīṣangaṅgā Valley into which these routes lead, can never have been of much importance itself though there are indications of gold-washing having been carried on in it.¹ But from Sardi starts a route leading very directly, by the Kankatōri (Sarasvatī) River and over a high pass, into Cilās on the Indus;² this line of communication may already in old times have brought some traffic to Sardi.

Owing to the inroads made by Cilāsīs and the restless Bomba chiefs of the Kīṣangaṅgā Valley, the Paṭhān Governors found it necessary to settle Afridis at Drang and the neighbouring villages to guard the passes. The presence of these Afghān colonies shows that the conditions which necessitated the maintenance of the old frontier watch-station at Draṅga, had altered little in the course of centuries.

56. Above Sardi the course of the Kīṣangaṅgā lies for a long distance through an almost inaccessible and uninhabited gorge. Hence for over 30 miles eastwards we find no proper route across the mountain range. Kalhaṇa gives us a vivid and interesting account of the difficulties offered by a winter-march along the latter when he describes the flight of the pretender Bhoja from Sīrahśilā castle to the Darads on the Upper Kīṣangaṅgā.³

The line of communication we meet next is, however, an important one. It leads from the north shore of the Volur lake into that part of the Upper Kīṣangaṅgā Valley which is known as Gurēz, and connects with the routes leading to Astōr and the Balti territory on the Indus. The road used in recent years, and now improved by British engineers into the 'Gilgit Transport Road,' crosses the range by the *Trāg^abal* or *Rāzdiangan* Pass, nearly 12,000 feet high. But the route frequented in ancient times lay some eight miles further to the east.

Kalhaṇa refers in several places to the hill fort of DUGDHAGHĀTA which guarded the mountain-route leading into Kāśmīr territory from inroads of the Darads. The latter can easily be shown to have held

¹ Compare Note B on Sāradā (*Rājat.* i. 36), §§ 2, 16. To this circumstance the of Drang owes probably the distinguishing designation of *Sun⁴-Drang* 'the Gold Drang,' by which it is popularly known.

² See BATES, *Gazetteer*, p. 490.

³ See *Rājat.* viii. 2710 sqq.

then as now the Kīṣaṅgaṅgā Valley about Gurēz and the neighbouring territories to the north. From Kalhana's description it is evident that this frontier fort stood on, or close to, the summit of a pass. Thanks to the indications of the Chronicle I was able to identify its site on the top of the *Dudākhut* Pass.¹ The Pass (shown on the map by its ancient name *Dugdhaghātā*) is approached on the Kāśmīr side from the valley of the Baṇḍāpūr stream, still known to the Brahmans by its old name *Madhumatī*. At the small village of Ātavuṭh (map 'Atawat') a side valley is entered which is narrow and somewhat difficult below, but higher up widens. Its highest portion which forms the immediate approach to the pass, is an open alpine valley known to the mountain shepherds as *Vijje Marg*.

The term *Marg* which denotes any high alpine grazing ground frequented in the summer by herdsmen, is the modern Kāśmīrī equivalent, and direct derivative, of Skr. *maṭhikā*. It designated originally the small shelter-huts of stone or wood usually erected on such high plateaus or valleys by their summer occupants.² It is probably that *Vijje Marg* represents the *Prājimaṭhikā* which Kalhana mentions as the position occupied by the Kāśmīr forces during their unsuccessful siege of the fort.

As a characteristic point it may be mentioned that the garrison depended for its water-supply on the storage of snow. This had become exhausted at the late summer season when the siege took place, but, luckily for the Darad defenders, was replaced by a fresh fall of snow. The latter is explained by the elevation of the pass which I estimated at about 11,500 feet. Snow-storms occur sometimes on the neighbouring *Trāgābal* Pass so early as September.

From the *Dudākhut* Pass an easy track over the ridge marked 'Kiser' on the map leads down to Gurēz, the chief place of the Valley. The latter corresponds probably to the DARATPURI of the Rājatarāṅgiṇī. The route over the *Dudākhut*, being very direct and comparatively easy during the summer, was much frequented by Dard traders until the recent construction of the 'Gilgit Transport Road.' It was used by the Sikhs for military convoys until a disaster caused by an avalanche above Ātavuṭh induced them to change it for the *Trāgābal* route. It also seems to have been mentioned to Baron HÜGEL.³ In Muhammadan

¹ For detailed evidence regarding this location and a description of the site, see *Rājat.* vii. 1171 note.

² Skr. *maṭhikā* is the diminutive of *maṭha* 'hut', 'Saraī.' The Kś. derivative of the latter term, *mar*, is still used regularly for the rude shelter-huts which are found on the higher passes particularly towards the north.

³ See *Kashmir*, ii. p. 169.

times both routes were in charge of a 'Malik' who resided in the castle of *Baṇḍākhōth*, not far from the ancient *Mātrīgrāma* shown on the map.

In ancient times there probably existed in the same neighbourhood a watch-station or *Draṅga*. Ou-k'ong when speaking of the 'gate to the north' through which the road led to *Poliu* or *Baltistān*, may have meant either this *Draṅga* or the fort of *Dugdhaḥāta*.

57. To the east of the *Dudākhut* Pass the summits of the range **Mount Haramukuṭa**. gradually get higher and higher until we reach the great mountain-mass of the *Haramukh* Peaks. Rising to close on 17,000 feet and surrounded by glaciers of considerable size, these Peaks dominate the view towards the north from a great part of the *Kāśmīr* Valley. Sacred legends have clustered around them from early times. The lakes below their glaciers belong still to the holiest of *Kāśmīrian* *Tīrthas*. The ancient name of the Peaks is *HARAMUKUṬA*, 'Siva's diadem.' This is explained by a legend which is related at length in the *Haracaritacintāmaṇi*.¹ Their height is supposed to be Siva's favourite residence.² Hence *Kāśmīrian* tradition stoutly maintains that human feet cannot reach the Peaks' summit.³

The lake which lies at the foot of the north-eastern glacier, at a level of over 13,000 feet, is looked upon as the true source of the *Kāśmīr* *Gaṅgā* or *Sind* River. It is hence known as *UTTARAGAṅGĀ* or popularly *Gaṅgabal*.⁴ It is the final goal of the great '*Haramukuṭagaṅgā*' pilgrimage which takes place annually in the month of *Bhādrapada* and is attended by thousands of pilgrims. The bones of those who have died during the year, are on that occasion deposited in the sacred waters. A short distance below this lake is another also fed by a glacier and now known as *Nundkōl*. Its old name *Kālodaka* or *Nandisarasa* is derived from a legend which makes the lake the joint habitation of *Kāla*, i.e., Siva, and of his faithful attendant *Nandin*. From the

¹ See *Haracar*. iv. 62 sqq.

² The legends relating to Siva's residence on Mount *Haramukuṭa* and his connection with the several sacred sites of *Nandikṣetra*, are given at great length in the *Nilamata* 1049 sqq.

³ Owing to this superstition I had great difficulty in inducing any of my *Kāśmīri* Coolies (*Muhammadans*!) to accompany me on the ascent I made to the Peaks in September, 1894. My Brahman friends could not give credence to my having reached the summit. According to their opinion the very fact of my having reached the Peak was a sufficient proof of this not having been *Haramukuṭa*. An argument as simple as incontrovertible to the orthodox mind.

⁴ See my note *Rājat*. i. 57. Another name often used in the *Nilamata* and other texts is *Uttaramānasa*; see *Rājat*. iii. 448 noto.

latter the whole collection of sacred sites takes the name of *Nandikṣetra* by which Kalhaṇa usually designates it.¹

In the valley of the Kāṅk^anai stream (Skr. KANAKAVĀHINĪ) which issues from these lakes, lies the sacred site of Śiva BHŪTEŚVARA (now Butiśār). It is closely connected with the legends of Mount Haramukṣa and often mentioned in the *Rājatarāṅgiṇī*.² A series of interesting temple ruins marks the importance of this Tirtha and that of the ancient *Jyēṣṭheśvara* shrine which immediately adjoins it.³ Bhūteśvara is passed by the pilgrims on their way back from the sacred lakes, while on their way up they reach the latter by another route, passing the high ridge known as BHARATAGIRI and the smaller lake of BRAHMASARAS.

From the Gaṅgā lake a track passable for ponies leads over the *Satsaran* Pass to *Tilāl*, a Dard district on the Kiṣaṅgā. It is probably the route by which King Harṣa's rebel brother Vijayamalla escaped from Lahara (Lār) to the Darad territory.⁴

58. Eastwards from the Haramukṣa Peaks the range does not overlook on the south the main Valley of North-eastern range. Kāsmīr, but that of the Sind River. The general level of the summits rises, and glaciers of fair size become frequent on their northern slopes. Close to the head of the Sind Valley, the range we have been so far following joins on to the great chain of snowy mountains which stretches from Mount Nangā Parvat in a south-easterly direction to the Nankun Peaks in Sūru.⁵ A few miles south of this junction we arrive at a gap in the mountains which forms the lowest watershed between the Indus and the Vitastā basins. It is the Pass known generally by its Ladākhī name of *Zōji-Lā*. It leads at an elevation of 11,300 feet from Baltal, on the headwaters of the Sind, to a high-level valley draining into the Drās River and hence into the Indus.

The route leading over the *Zōji-Lā* undoubtedly has been already in ancient times a most important thoroughfare. It connects Kāsmīr with Ladākh and thence with Tibet and China. Here too the natural watershed has in old as in modern times been also the ethnic boundary. Beyond the Pass begins the land of the *Bhauṭtas* or *Bhūṭtas*, as the Tibetan inhabi-

¹ See *Rājat.* i. 36 note.

² See regarding the history and remains of *Bhūteśvara*, *Rājat.* i. 107 ; v. 55 notes. The Tirtha was rich enough to attract a special expedition of marauding hillmen in Kalhaṇa's time ; see viii. 2756.

³ See *Rājat.* i. 113 note.

⁴ See *Rājat.* vii. 911.

⁵ Compare regarding this great range which may fitly be called the main range of the mountain system around Kāsmīr, DREW, *Jummoo*, pp. 194 sqq.

taunts of the Indus region are uniformly designated in our Kāśmīrian texts (modern Kś. *Buṭṭe*).¹

Ou-k'ong is the first who refers distinctly to this route when speaking of the road which leads through the gate in the east to Tou-fan or Tibet. Kalhaṇa has scarcely occasion to refer to it, as the regions beyond the Pass lay quite beyond the reach of the political power of the later Kāśmīrian kings. He probably means, however, the Zōji-Lā when mentioning the route of the *Bhūtṭa*-land (*Bhūtṭarāṣṭrādhvan*) by which the Darads offered to pass the pretender Bhoja into Kāśmīr, while the more direct routes from their own territory were closed by the winter.² An easy pass connects Tilāl at the head of the Kiṣangaṅgā Valley with the Drās territory to the east. From there Bhoja could then have entered Kāśmīr *viā* the Zōji-Lā.

This Pass, the ancient name of which is not known to us, has more than once witnessed successful invasions of Kāśmīr. Through it came early in the 14th century the Turk (?) *Dulca* and the Bhautṭa *Riñcana* whose usurpation led to the downfall of Hindu rule in the Valley.³ About two centuries later Mirzā Muḥammad Ḥaidar with his small Mughal force successfully fought here his entrance into Kāśmīr (A.D. 1532). The account he gives of this exploit in his *Tārīkh-i-Rāshidī*, is not without topographical interest.⁴

59. A high peak situated about 10 miles east-southeast of the Zōji-Lā, marks the point where the range forming the eastern boundary of Kāśmīr branches off from the main chain. This range runs in an almost southerly direction until it reaches the southernmost headwaters of the Vitastā. It then turns to the north-west and at the Bān^ahāl Pass joins on to the Pir Panṭsāl Range. Through this range there lead routes connecting Kāśmīr with the Maḍivāḍvan Valley (see § 84) which drains into the Cināb, and with Kaṣṭ^avār, the ancient Kāṣṭavāṭa, on the Cināb itself. Both these Valleys are confined, difficult of access, and scantily populated. They have hence never played an important part either in the foreign relations or trade of Kāśmīr. On this account our notices regarding the old topography of the dividing range are extremely meagre.

¹ Compare *Rājat.* i. 312-316 note.

² Compare *Rājat.* viii. 2887.

³ See *Jonar.* 142 *sqq.*, and for the stratagem by which Riñcana forced his way into Lahara (Lār), 165 *sqq.* The *Laharakoṭṭa* mentioned in the last passage probably represents the old watch-station of this route, but its position is uncertain.

⁴ See *Tārīkh-i-Rāshidī*, transl. by Messrs. Elias and Ross, pp. 423 *sqq.*, and below, § 131.

At its northern end and close to the great snowy peak already mentioned, is the Tirtha of AMAREŚVARA or
Tirtha of AMARANĀTHA, known by its Kāśmīrī name as
Amaranātha. *Amburnāth.* Together with the sacred Gaṅgā-

lake on Mount Haramukūṭa, it is now the most popular of Kāśmīrian pilgrimage places. Its Yātrā in the month of Śrāvaṇa attracts many thousands of pilgrims not only from Kāśmīr but from all parts of India.¹ Their goal is a cave situated at a considerable altitude and formed by a huge fissure on the south side of a snowy peak, 17,300 feet high (marked 'Ambarnath' on map). In this cave there is a large block of transparent ice formed by the freezing of the water which oozes from the rock. It is worshipped as a self-created (*svayambhū*) Liṅga, and is considered the embodiment of Śiva-Amareśvara.

Judging from the scanty references made to this Tirtha in the Rājatarāṅgiṇī and the Nilamata, it appears doubtful whether it could have enjoyed in old times quite such great celebrity as now. But Jonarāja already relates a visit to this sacred site paid by Sultān Zainu-l-ābidīn,² and in the Māhātmya literature Amareśvara receives its due share of attention. The pilgrims' route described in great detail by the Amaranāthamāhātmya ascends the valley of the eastern branch of the Lidār or Ledarī.

There the lake of the Nāga SUŚRAVAS, now known as Suśramnāg or (with a popular etymology) Śeṣanāg, is visited at the north foot of a great glacier descending from the Kohenhār Peak. In this lake and a small rock-bound inlet of it called JĀMĀTRNĀGA (Zām*tur¹ Nāg), the local legend, related by Kalhaṇa, i. 267 *sqq.*, and connected with the ancient site of Narapura, has placed the habitation of the Nāga Suśravas and of his son-in-law.³ The route then crosses a high pass, known as Vāvajan (Skr. *Vāyuvarjana* in the Māhātmya), into a high-level valley drained by five streams which bear the joint designation of PAÑCATARAṅGIṆĪ. From there the pilgrims toil up a lofty spur to the north-east and descend into the narrow gloomy valley which lies at the foot of the Amburnāth Peak. It is watered by a stream (Amarāvati) which comes from the glacier of a still higher peak to the east. Joining the Pañcataraṅgiṇī it flows through an inaccessible gorge down to the head of the Sind Valley near Baltal.

¹ See for the old notices of the Tirtha, *Rājat.* i. 267 note; for a description of the modern pilgrimage, VIGNE, *Travels*, ii. pp. 10 *sqq.*, and BATES, *Gazetteer*, pp. 121 *sq.*

² Compare *Jonar.* (Bombay ed.) 1233 *sqq.*

³ Compare *Rājat.* i. 267 note.

60. Connected with the eastern range is a mass of mountains which it will be convenient to mention here though it does not form part of the mountain-barriers of Kāśmīr. It fills the great triangular space which lies between the Sind Valley and the range in the east we have just noticed, the level ground along the right bank of the Vitastā forming as it were the base. This mass of mountains separates from the eastern ridge between the Kohenhār and Amburnāth Peaks. Trending westwards it soon culminates in the conspicuous pinnacle of Mount *Gāśābrāṇ* (map 'Kolahoi'), close on 18,000 feet in height. From this conspicuous mountain numerous spurs radiate with glaciers in their topmost hollows.

The highest of these ridges runs for about thirty miles along the Sind Valley, of which it forms the southern side. A high cross-spur, now known as *Dūrūn Nār*, which descends to the north towards *Sun^amarg*, is probably identical with Mount *DHUPĀVANA*, the scene of a siege related in the *Rājatarāṅgiṇī*.¹ The extremity of this ridge in the west forms the amphitheatre of bold hills which encircle the *Ḍal* lake and *Srinagar* on the north. Here we have Mount *MAHĀDEVYA* which is much frequented as a *Tirtha*.²

Facing it from the south is the rocky spur which lines the eastern shores of the *Ḍal*. It bore in old days the name of *SRĪDVĀRA*,³ and is the site of a series of ancient pilgrimage places, such as *Sureśvara*, *Tripureśvara*, *Harṣeśvara*, and *Jyeṣṭheśvara*, which will be discussed below. The extreme offshoot of this spur is the 'Hill of *Gopa*' (*Gopādri*), the present *Takht-i Sulaimān*, which is so conspicuous a feature in the landscape of *Srinagar*. Other spurs descending into the vale further east form successively the semicircular side-valleys containing the *Pargaṇas* of *Vihi* and *Vular*.

We now return once more to the eastern range. South of the Kohenhār Peak which is still over 17,000 feet high, its summit ridge gets gradually lower. It is crossed by the *Margan* Pass into *Maḍi-vāḍvan*. Of the latter valley I can find no old mention. Still further south we come to the *Marbal* Pass, at an elevation of 11,500 feet, which forms the usual route towards *Kaṣṭ^avār*.

This territory which is now partially inhabited by Kāśmīris, is mentioned as an independent hill-state by *Kalhana*.⁴ The valley into

¹ See *Rājat.* viii. 595 note and below, § 131.

² It is mentioned in the *Nilamata*, 1324, and frequently in the *Sarvātārā*.

³ See *Rājat.* viii. 2422 note.

⁴ Compare regarding the old *Kāṣṭhavāṭa* note vii. 588-590, where also the references in the later *Chronicles* are given.

which the route descends immediately after crossing the Marbal Pass, is known now as *Khaśāl*. It is once mentioned as *Khaśālī* by Kalhana and more frequently referred to in the last Chronicle by the name of KHAŚĀLAYA.¹ From the latter source we learn that it was inhabited by Khaśas to whose occupation it may have owed also its name. So we note here once more in the east the coincidence of the ethnic boundary with the natural watershed.

SECTION V.—UPPER COURSE OF THE VITASTĀ.

61. We have now completed the circuit of the great mountain-barriers which enclose the Kāsmīr Valley, and can turn our attention to its interior. This is naturally divided into two great parts. One comprises the plain formed by the alluvium of the Vitastā and its main tributaries; the other consists of plateaus or Karēwas elevated above the river flats and largely caused by old lacustrine deposits. We shall first notice the alluvial plain and the river-system which has created it.

The great river which is the recipient of the whole drainage of the country, is now known to Kāsmīris by the name of *Vyath*. This modern designation is the direct phonetic derivative of the ancient Sanskrit VITASTĀ which we meet already among the river-names of the Rīgveda.² The intermediary Prakrit form **Vidastā* underlies the *Hydaspes* of the Greeks in which we note, as so frequently in Greek renderings of foreign names, the modifying action of popular etymology.³ In Ptolemy's *Bidaspes* we have another rendering which though later in date yet approaches closer to the sound of the Indian original.⁴ The name *Jehlām* which is

¹ Compare *Rājat.* vii. 399 note.

² The line of phonetic development may be roughly represented as Skr. *Vitastā* > Pr. **Vidastā* > Ap. **Vi[h]ath* > Kś. *Vyath*.

The name Vitastā is still well-known to Kāsmīr Brahmins from the Māhātmyas and similar texts, and is currently used by them. The form 'Vedasta' which Drew and other writers indicate as the old name of the river "still used by those who follow Sanskrit literature," is due to some error of hearing. It is curious to meet a similar form **Vidastā* in the transcription of the Chinese Annals of the 8th century; see my *Notes on Ou-k'ong*, p. 31.

³ The ending in the form *Hydaspes* is undoubtedly due to the influence of the numerous Persian names known to the Greeks which end in -ασπης (Old Persian *aspa*). For the rendering of initial *Vi-* by 'Y' compare *Hystaspes*: *Vishtāspa*.

⁴ Ptolemy's *Bi* (for *Vi*) is the most exact phonetic reproduction possible in Greek characters. It is evident from Ptolemy's Panjāb river names that he did not take

now borne by the Vitastā in its course through the Panjāb, is wholly unknown to the genuine usage of Kaśmīr. It is apparently of Muhammadan origin and has been brought to Kaśmīr only by Europeans and other foreigners.¹

The river to which the name Vitastā or Vyath is properly applied, is first formed by the meeting of the several streams which drain the south-eastern portion of the Valley. This meeting takes place in the plain close to the present town of Anantnāg or Islāmābād. But sacred tradition has not failed to trace the holiest of Kaśmīr rivers to a more specific source.

An ancient legend, related at length in the Nilamata and reproduced by the author of the Haracaritacintāmaṇi,² represents the Vitastā as a manifestation of Sīva's consort Pārvatī. After Kaśmīr had been created, Sīva at the request of Kaśyapa, prevailed upon the goddess to show herself in the land in the shape of a river, in order to purify its inhabitants from the sinful contact with the Piśācas. The goddess thereupon assumed the form of a river in the underworld, and asked her consort to make an opening by which she might come to the surface. This he did by striking the ground near the habitation of the Nilanāga with the point of his trident (*śūla*). Through the fissure thus made which measured one *vitasti* or span, the river gushed forth, receiving on account of this origin the name *Vitastā*. The spring-basin where the goddess first appeared was known by the several designations of *Nilakunḍa*, *Sūlaghāta* ('spear-thrust') or simply *Vitastā*.³ It is clear that the spring meant is the famous Nilanāga, near the village of Vērnāg in the Shāhābād Pargana. It is a magnificent fountain which amply deserves the honour of being thus represented as the traditional source of the great river.⁴

The legend makes Pārvatī-Vitastā subsequently disappear again from fear of defilement by the touch of sinful men. When brought to light a second time by Kaśyapa's prayer the goddess issued from the Nāga of Pañcahastā. In this locality we easily recognize the present

his nomenclature directly or indirectly from the historians of Alexander, but from independent sources. Bidaspes, Zaradros, Bibasis, Sandabal, these all represent unsophisticated attempts to reproduce in sound the genuine Indian forms. The same cannot be said of the names given by Arrian, Pliny, etc.

¹ Alberūnī already knows the name *Jailam*; see above, § 14. Srīvara when relating an expedition of Sultān Haidar Shāh into the Panjāb, sanskritizes this name into *Jyālamī*; see ii. 152.

² See *Nilamata*, 238 sqq.; *Haracar.* xii. 2-34.

³ See *Nilamata*, 1290; *Haracar.* xii. 17.

⁴ Compare for the Nilanāga and its round spring-basin (*kunḍa*), *Rājat.* i. 28 note

village of Pānzath, situated in the Div²sar Pargana and boasting of a fine spring which is still visited by the pious of the neighbourhood.¹ After another disappearance for a reason similar to the above, the goddess came forth a third time at *Narasimhāsrama*. This place I am unable to trace with certainty. Finally the goddess was induced to abide permanently in the land when Kaśyapa had secured for her the company of other goddesses, who also embodied themselves in Kaśmīr streams, like Lakṣmī in the Viśokā, Gaṅgā in the Sindhu, etc.

Another version of the legend which, however, seems of less ancient date, seeks the place of the Vitastā's second appearance in the spring of the modern *Vithavutur*, a small village situated about one mile to the N. W. of Vārnāg.² The place is known by the name of *Vitastātra* to Kalhaṇa who mentions Stūpas erected there by King Aśoka.³ This notice certainly seems to indicate some sacred character attaching to the spot. Yet Kalhaṇa's direct mention of the Nilakunḍa as the birth-place of the Vitastā leaves no doubt as to where the tradition prevalent in his own time placed the source of the sacred river.⁴

62. The streams which unite close to Anantnāg and there form the true Vitastā river, are the *Sāndran*, the *Bring*, *Headwaters of* *Ārāpath* and *Lidār*. Of these the first and *Vitastā*. southernmost drains the *Shāhābād* (or *Vēr*)

Pargana and receives the water of the sacred springs mentioned in the preceding paragraph. Its old name I am unable to trace with any certainty. The next affluent, the *Bring*, comes from the side-valley which forms the Pargana of the same name. The ancient name of the stream is unknown, the modern *Vitastāmāhātmya* which gives it as *Bhrṅgī*, being but a doubtful authority. The *Bring* too is fed by the water of some well-known Nāgas, among which the famous *Trisamdhya* fountain and the springs of *Ardhanārīśvara* (Nār^u) may be specially mentioned.

The *Ārāpath* which comes from the north-east, is mentioned repeatedly in the *Nilamata* by its ancient name of *Harṣapathā*.⁵ The

¹ Compare *Rājat.* v. 24 note.

² This version is found in the *Vitastāmāhātmya*, ii. 37, *sqq.*, which calls the place *Vitastāvartikā*; see also VIGNE, i. p. 335.

³ See *Rājat.* i. 102 note.

⁴ *Rājāt.* i. 28. I am unable to account for the mention made in the *Mahābh.* iii. lxxii. 90 of the Takṣaka Nāga in Kaśmīr as the Vitastā, i.e., its source. No such distinction is claimed for the well-known Takṣaka spring near Zevan (Jayavana); see *Rājat.* i. 220. The author of the *Tīrthayātrā* in the *Mahābh.* shows no accurate knowledge of Kaśmīr and seems to have made a mistake here.

⁵ See *Nilamata*, 232, 1299, etc.

valley it drains is known as the Kōthār Pargaṇa and takes its name from the sacred tank of *Kapātesvara*. At the western end of the spur on the slope of which this Tirtha is situated, issue the magnificent springs of Ach^abal (Akṣavāla). They form a small stream by themselves, which flows into the Harṣapathā. A short distance below the village of Khan^abal (map 'Kanbal') where the three streams hitherto mentioned unite, their waters are joined from the north by those of the Lid^ar.

This river, the ancient *Ledarī*,¹ receives a number of glacier-fed streams which drain the high range towards the Upper Sind Valley. It is hence in volume more considerable than any of the previously named affluents. The Ledarī spreads in several branches through the wide valley forming the Pargaṇas of Dachūnpōr and Khōvurpōr which take their names, 'Right Bank' and 'Left Bank,' respectively, from their position relative to this river. In old days a canal constructed on the hill-side to the east carried the water of the Ledarī, and with it fertility, to the barren plateau of Mārtāṇḍa or Maṭan.²

63. At Khan^abal the Vitastā becomes navigable and continues

Vitastā's course in
alluvial plain.

so on its whole course through the valley. There too the great flat plain begins which stretches on both sides of the river down to Bārāmūla in the north-west. In its course to the Volur lake, a direct distance of about 54 miles, the river falls only some 220 feet.³ The slope in the general level of the plain is equally gentle. The bed of the river lies everywhere in the alluvial soil, the result of the deposition of sediment at flood times when the river overflows its banks. Down to Śrinagar the river keeps in a single bed and its islands are but small, in fact mere temporary sandbanks. The course is in parts very winding. But as far we can judge from the position of the old sites along the river, no great changes are likely to have taken place in historical times in this portion of the river's course.

When the river is low as during the winter, the banks rise on an average about 15 feet above the water. But in the spring when the snow melts, the great volume of water brought down from the mountains rises to the top of the banks and often overflows it. Dangerous floods may also follow long and heavy summer-rains, and sometimes

¹ See *Rājat.* i. 87.

² The construction of this canal by Zainu-l-'ābidīn is described at length by *Jonar.* (Bo. ed.) 1232-60. It is probable that there existed earlier irrigation works on the same plateau. See below, § 111.

³ See DREW, *Jummoo*, p. 163.

cause immense damage to the crops over a great portion of the cultivated area of the Valley.¹

Such floods and the famines which are likely to follow, were a danger well-known in old times already and are more than once mentioned by Kalhana.² Against them the villages and riverside towns have always endeavoured to protect themselves by artificially raising the banks. The allusions found in the Chronicle suffice to show that the construction of embankments (*setu*, now *suth*), with the accompanying system of floodgates closing lateral drainage channels, has existed since ancient times.³ One great regulation scheme which was directly designed to diminish these risks, and of which we possess a detailed historical account, will be discussed below. The equally elaborate system by which water was secured for the irrigation of the otherwise dry alluvial flats along the river, will also be specially noticed.

The navigable waters of the Vitastā have from ancient times to the present day formed the most important highway of Kāśmīr. The value of the river and of the numerous canals, lakes, and streams which are also accessible to boats, for the development of internal trade and traffic can hardly be overestimated. Until a couple of years ago there were nowhere in Kāśmīr, not even in the flattest parts of the Valley, roads fit for wheeled traffic. Carriages were practically things unknown to the population bred in the Valley. As long as the communication with the outer world was restricted to difficult bridle-paths or tracks passable only for load-carrying Coolies, the construction of such roads would have been, in fact, of very slight advantage. The importance of river-traffic in Kāśmīr may be estimated from the fact that the number of boatmen engaged in it (and their families) amounted according to the census of 1891 to nearly 34,000.⁴ That boats were in old days, just as up to the present time, the ordinary means of travel in the Valley, is shown by the frequent references to river journeys in the Chronicles.⁵

Equally eloquent testimony to the historical importance of river navigation in Kāśmīr is borne by the position of the ancient sites. We

¹ Compare for data as to modern floods, LAWRENCE, *Valley*, pp. 205 sqq.

² See *Rājāt*. vii. 1219; viii. 2449, 2786; also vii. 1624; viii. 1417, 1422; *Jonar*. 408 sqq.

³ See *Rājāt*. i. 159; iii. 483; v. 91, 103, 120; viii. 2380, etc.; *Jonar*. 404, 887; *Śriv*. iii. 191 sq., etc.

⁴ Compare regarding the *Hānz* of Kāśmīr, LAWRENCE, *Valley*, p. 313; also *Rājāt*. v. 101 note.

⁵ See *Rājāt*, v. 84; vii. 347, 714, 1628, etc.

shall see that all the towns which from time to time were the capitals of the country, were built on the banks of the Vitastā, and that the great majority of other important places of ancient date were similarly situated. It is certain that then as now all produce of the country was brought to the great centres by water. Villages even when situated at a great distance, had, no doubt, just as at the present day, their landing places (Kś. *yārābal*) on the river or the nearest navigable waterway. Kalhaṇa's description of the semi-legendary city of *Narapura* shows how closely the busy "coming and going of ships" was connected in the Kāśmīrian mind with the splendour of a large town.¹

64. After these general remarks we may now proceed to follow the Vitastā's course through the Valley noticing its tributaries in due order as we reach the confluences. Below Khan^abal² the river receives in succession the several branches of the Ledari and then passes the ancient town and Tirtha of Vijayeśvara, the present Vij^abrōr. About a mile lower down, its course lies between high alluvial plateaus or Karēwas. One on the left bank, the Tsak^adar Uḍar, will be noticed below as one of the most ancient sites of the Valley (Cakradhara).

About three miles further down and not far from the village of Marhōm (the old *Maḍavāsrama*), the Vitastā is joined by the Veśau and Rembyār³ Rivers which meet a short distance above their common confluence with the Vitastā. This river junction is known to the Māhātmyas by the name of GAMBHĪRASAMGAMA ('the deep confluence') and is still visited as a Tirtha.³ The short united course of the Veśau and Rembyār³ bears the old name of GAMBHĪRĀ and is referred to under this designation repeatedly by Kalhaṇa. The Gambhīrā is too deep to be forded at any time of the year, and being on the route from Vijayeśvara to Srinagar, is of military importance. It was twice the scene of decisive actions. King Sussala's army on its retreat over the Gambhīrā (A.D. 1122) suffered a complete rout. Six years later Sujji, his son's general, gained an equally signal victory by forcing the passage in the face of a rebel army.⁴

¹ See *Rājat.* i. 201 sq.

² According to a gloss on *Nilamata* 1307, Khan^abal, the port, so to say, of Anātāg corresponds to the Khaṇḍapuccha Nāga of that text. This Nāga is elsewhere mentioned, but I have no distinct evidence for its identification.

³ See *Rājat.* iv. 80 note. Junctions of rivers and streams (*samgamas*) are everywhere in India favourite places for Tirthas.

⁴ See *Rājat.* viii. 1063 sqq., 1497 sqq.

The Vesāu, frequently mentioned by its ancient name of Viśokā in the Chronicles, the Nilamata and other texts,¹

The Viśokā. is a considerable river. It receives all the streams coming from the northern slope of the Pir Pantēāl Range between the Sidau and Bān^{ah}āl Passes. Its traditional source is placed in the Kramasaras or Kōns^{ar} Nāg Lake below the Peak of Naubandhana. The Nilamata, 271 sqq. relates a legend which identifies the Viśokā with Lakṣmī and accounts for its name ('free from pain'). The fine waterfall which is formed by the stream of the Kōns^{ar} Nāg not far from the village of Sidau, is now known as *Ahr^{ab}al*. The Nilamata calls it *Ākhor bila* 'the mousehole,' which may possibly be the origin of the modern name.² As soon as the Viśokā emerges from the mountains, numerous irrigation canals are drawn from it which overspread the whole of the old Pargaṇas of *Karāla* (Āḍ^{ar}vin) and *Devusarasa* (Div^{ar}sar).

One of these canals is the *Sun^{ar}manⁱ Kul* which is mentioned in the Rājatarāṅgiṇī by its ancient name of SUVARṆAMAṆIKULYĀ.³ If the story of its construction by King Suvarṇa, reproduced from Padmamahira, could be trusted, we should have to ascribe to this canal a high antiquity. It leaves the Viśokā near the village shown as 'Largoo' on the map and rejoins it near the village of Āḍ^{ar}vin (map 'Arwin'). Another old canal, called *Nāndī* (not shown on the map), leaves the Viśokā near Kaimuh, the ancient Kaṭimuṣa, and irrigates the land between the lower course of this river and the Vitastā. Its name is connected perhaps with that of the village *Nandaku* which is referred to in connection with Avantivarman's drainage operations.⁴ The Viśokā is navigable up to Kaimuh.

The *Rembyār^{ar}* which joins the Viśokā a little above Gambhira-saṅgama, we have met already before as the

The Ramanyāṭavī. river uniting the streams from the Pir

Pantēāl and Rūprī Passes. Kalhaṇa mentions it by its ancient name RAMAṆYĀṬAVĪ when relating the legend of the burned city of Narapura.⁵ The Rembyār^{ar} after leaving the mountains below Hūr^{ar}pōr flows divided in many channels within a wide and mostly dry bed of rubble and boulders. This strip of stony waste along the river attains a width of over two miles near the village of Tsūran (map 'Charran').

The local legend referred to attributes the creation of this waste to

¹ See *Rājat.* iv. 5 note.

² Compare *Nilamata*, 271 sqq., and for *Ākhor bila*, 283.

³ See *Rājat.* i. 97.

⁴ See *Rājat.* v. 85 note.

⁵ See *Rājat.* i. 263-265, note.

the Nāgi Ramaṇyā. She had come down from the mountains carrying masses of stone to assist her brother, the Suśravas Nāga, in the destruction of Narapura. When she learnt that he had already completed his task, she dropped the stones 'more than a Yojana' from the site of the doomed city. The distance indicated corresponds exactly to that of the village of Lit^ar where the Rembyār^a leaves behind its stony bed and passes into alluvial soil. The village land for five Yojanas above that place was buried by the mighty boulders which Ramaṇyā left along her trail. Similar tales regarding the origin of stone-wastes ("Murren") are well-known to European alpine folk-lore.

65. Below Gambhīrasaṅgama the Vitastā receives from the right the stream which drains the ancient district of Holadā, the present Vular. It then passes close to the foot of the Vastarvan spur, near the old town of Avantīpura. No important stream joins the river from the right until we reach Śrīnagar. The affluents on the left like the Rāmuṣa are also of small volume. Some do not reach the river direct but end in low marshes, communicating with the latter only by gates made in the river embankments. Of the ancient sites situated along the river, the town of PADMAPURA, the present Pāmpar, is the most considerable. As we approach Śrīnagar we pass the site of the ancient capital, PURĀṆADHIṢṬHĀNA, marked by the present village of Pāndrēthan. It lies between the right river bank and the southern foot of the ridge which encircles the Dal. For the streams we have next to notice, a reference to the special map of Ancient Śrīnagara is necessary.

Just before we reach the area of the city proper, the Vitastā is joined by a stream which drains the lake to the east of the city. This lake, known as *Dal* (Skr. *Dala*), is fed by plentiful springs and by streams which reach it from the north. Its surplus waters flow out towards the Vitastā by a canal which is now called *Tsūṇṭh Kul*, but in ancient times bore the name of MAHĀSARIT.¹ This canal passes through an ancient embankment (*setu*) which protects the city as well as the low shores of the Dal from floods of the river, and already figures in the traditional account of the foundation of Śrīnagar. The position of the gate which closes the outflow of the Mahāsarit is marked on the map by the entry 'Durgāgalikā.'

A small channel from the river—whether artificial or natural cannot

¹ For the identification of the Tsūṇṭh Kul and the Mār canal in the city with the *Mahāsarit*, my note on Rājat. iii. 339-349 should be consulted. In addition to the evidence there recorded, it should be noted that the Mahāsarit is twice mentioned by its old name also in the *Sarvātāra* iii. 74; iv. 129 sq.

be ascertained now—joins the Mahāsarit at this very point and turns the ground between it and the river into an island. This is now known by the name of Māy²sum, derived from the ancient MĀKṢIKASVĀMIN. We shall have to refer to it again in our account of the topography of Srinagar. From Durgāgalikā downwards the Mahāsarit or Tsūnṭh Kul was in old times the south-eastern boundary for that part of Srinagar which lies on the right bank of the Vitastā. Being a natural line of defence it is frequently referred to in the narrative of the various sieges of the capital.¹

The confluence of the Mahāsarit and Vitastā which is just opposite to the modern palace, the Shērgarhi, has been a Tirtha from early times and is mentioned by its correct name in Maṅkha's description of Kāśmīr.² Śrīvara refers to it by a more modern name, *Mārisaṅgama*, where *Māri* is an evident adaptation from the Kś. form *Mār*.³ The latter name, itself a derivative of Mahāsarit, is applied at the present day to another branch of the Ḍal outflow. This turning to the west passes through the marsh known as Brāṇ⁴nambal (*Bhattāraṇaḍvalā*) and then enters the city.

This canal is of considerable importance for the internal traffic of the city as it opens a convenient waterway to the Ḍal and greatly facilitates the transport of its manifold produce.⁴ After passing behind the whole of the city quarters on the right river-bank the Mār issues near the quarter of Narvor (Skr. *Naḍavana*) into the marshes of the Anchiār. Through the latter a connection is thus secured with the Sind river delta. This extension of the Mār to the west seems, however, of later date, as Śrīvara attributes the construction of a navigable channel towards the Sind to Zainu-l-'ābidin.⁵

66. The lake which supplies the water of the Mahāsarit, is in some respects one of the most favoured spots of

The Ḍal lake. the whole Valley. Its limpid water, the imposing aspect of the mountain amphitheatre which encloses it on three sides, and the charming gardens and orchards around it have made the Ḍal justly famous.

¹ See *Rājat.* viii. 733, 753, 3131.

² See *Srīkaṇṭhac.* iii. 24, *Mahāsaridvitastayoh ... saṅgamaḥ*. Here too as in former translations of the *Rājatarāṅgiṇī*, Mahāsarit has been wrongly taken as an common noun and explained as 'great river.'

³ The term *Māri* is also elsewhere used in the later Chronicles and the *Māhātmyas*; comp., e.g., *Srīv.* i. 442; iv. 298; Fourth Chron. 145, etc.

⁴ It is this narrow canal, more picturesque than sweet-smelling, which has led to the frequent comparisons of Srinagar with Venice. It has not received much attention in recent years and for want of dredging seems in danger of silting up.

⁵ See *Srīv.* i. 440 sq.

The Dal measures about four miles in length and two and a half in width where it is broadest. Its depth nowhere exceeds 30 feet, and in most parts it is far more shallow. At its southern end it is fringed by lagoons, and a great portion of it is covered by the famous floating gardens. Notwithstanding the superabundance of water-plants and vegetable matter, the water everywhere retains an admirable clearness and freshness. This is, no doubt, due to the ampleness of the springs which rise within the lake. Though we find no direct mention of the lake in the Rājatarāṅgiṇī, and though it does not claim any particular sanctity, there is no want around its shores of ancient and holy sites.

The earliest reference to the lake itself occurs in the Chronicle of Śrīvara who describes at length how King Zainu-l-'ābidīn diverted himself on the lake and adorned its vicinity.¹ Śrīvara calls the lake DALA, while the few Māhātmyas which condescend to mention it, use the form *Dala*.² He also mentions the two small artificial islands called *Laṅkā*, and now distinguished as *Rupālāṅk* and *Sunālāṅk* ('the Silver Laṅkā,' 'Golden Laṅkā'). Different names are given to several distinct portions of the lake. But of these only HASTAVĀLIKA, the present Astvöl, can be traced in the Chronicles.

The sacred sites of Gopādri, Jyeṣṭheśvara, Thedā, Sureśvari, etc., with their numerous Nāgas line the eastern shores of the Dal. They will be mentioned below in the description of the vicinity of the capital. The well-known gardens of Shālimār, Nishāt and Nasīm are creations of the Mughal Emperors who did much to enhance the natural beauties of the lake.

Besides the springs of the lake itself the latter is fed also by a stream which comes from the Mār Sar lake, high up in the mountains to the east. The old name of this stream, marked 'Arrah' on the map, is uncertain. The Śarvātāra seems to extend to it the name *Mahāsarit*.³ In its lower course where it approaches the north shore of the Dal, it now bears the name of Tālbāl Nāl (stream). An earlier form is furnished by Śrīvara who calls the stream at this point, by the name of TILAPRASTHĀ; the latter is also found in several Māhātmyas.⁴

67. From the junction with the Mahāsarit downwards the Vitastā flows for over three miles between almost unbroken lines of houses raised high above the water on stone embankments. The latter consist now-a-days chiefly of large blocks of stone which belonged to ancient

¹ Śrīv. i. 418 sqq.

² See, e.g., *Vitastāmāh*, xxi. 39.

³ See *Sarvāv*. iii. 75; iv. 129.

⁴ See Śrīv. i. 421; *Sarvāv*. iv. sqq., etc.

temples and other structures of pre-Muhammadan date. Judging from their size and careful carving we can well picture to our mind the splendid appearance which the river-banks must have here presented in bygone days.

The river within the city flows first in one long reach due north.

The Kṣiptikā.

Near the fourth bridge in the heart of the city, it makes a great bend and turns to the south-west. A canal which leaves the left bank of the river between the Shergarhi palace and the quarter of Kāthūl (Kāṣṭhīla), and rejoins the river near the last bridge, allows boats to cut this great bend. It now bears the name Kuṭṭ²kul, derived from the ancient designation of KṢIPTIKĀKULYĀ.¹ The Kṣiptikā is often mentioned in the later portions of Kalhaṇa's Chronicle which relate the sieges of Śrīnagar witnessed in his own time. It forms to this day the natural line of defence for that part of the city which occupies the left river-bank, and which could be successfully attacked only by crossing the Kṣiptikā.² No information is available to us as to the origin of this canal. Judging from its position it is likely to have been a natural side-channel of the river which was subsequently maintained or improved for the convenience of navigation.

A few hundred yards lower down the Vitastā is joined on its left

The Dugdhagaṅgā.

bank by a considerable river now known as the Dūlgāṅgā, 'the milk Gaṅgā,' or Chats³kul, 'the white stream.' Its ancient name is given as Dugdhasindhu in Bilhaṇa's description of Śrīnagar.³ The Māhātmyas know it by the name of Svetagaṅgā, 'the white Gaṅgā,' to which the alternative modern designation, Chats³kul, exactly corresponds.⁴ Its waters come from the central part of the Pir Pantisāl Range round Mount Tatakūṭi, its chief sources being the mountain-streams marked as 'Sangsofed' (Sangsafed) and 'Yechara' on the map. The confluence of the Vitastā and Dūdgāṅgā, opposite to the old quarter of Diddāmaṭha, is still a Tīrtha of some repute and is probably alluded to already by Bilhaṇa.⁵

¹ Kś. kul < Skr. kulyā is the ordinary term for small streams or canals.

² For detailed evidence of this identification, see *Rājat*, viii. 732 note.

³ *Vikramānka*. xviii. 7.

⁴ See *Vitastāmāh*. xxii; *Svetagaṅgāmāh*., etc. Skr. śveta becomes in Kś. by regular phonetic conversion chuth, fem. chats³.

The Nīlamata curiously enough does not mention the Dūdgāṅgā unless it is meant by *Kṣīranadī*, 1281. The latter name, meaning 'the river of milk,' is given to the Dūdgāṅgā by a passage of the modern *Vitastāmāhātmya*, xxii.

⁵ See *Vikram*, xviii. 22.

SECTION VI.—LOWER COURSE OF THE VITASTĀ.

68. Immediately below Śrīnagar we come to marshes which stretch along both sides of the river for a considerable distance. Those on the left bank, of which the Hukh²sar and Paṇz¹nōr Nambal are the nearest, are fed by mountain-streams of smaller volume. The marshes to the north of the river are more extensive and belong to the Delta of the Sind River, the greatest tributary of the Vitastā within the Valley.

Our survey of the northern range of mountains has already taken us to the true headwaters of the Sind near the Zōji-Lā and the Āmburnāth Peak. Its traditional source in the sacred Gaṅgā-lake on Mount Haramukh has also been noticed. This great river has a course of over sixty miles and drains the largest and highest portion of the mountain-chain in the north. Its ancient name, SINDHU, means simply 'the river' and is thus identical with the original designation of the Indus.¹ The Rājatarāṅgiṇī mentions the river repeatedly, and it figures largely in the Nilamata, Haracaritacintāmaṇi and the Māhātmyas.² Everywhere it is identified with the Gaṅgā, as already by Alberūni's informants. The valley of the Sind forms the district of Lār, the ancient Lahara, one of the main subdivisions of Kāśmīr territory.

Where this valley debouches into the great Kāśmīr plain, near the village of Dud²rhōm, the old *Dugdhāśrama*, the river spreads out in numerous branches. These form an extensive Delta, covered in its greatest portion by shallow marshes and known as *Anch⁴ār*. Its eastern side extends along the strip of high ground which connects Śrīnagar with the foot of the spur at the mouth of the Sind Valley. The western

¹ It is customary in Kāśmīr to distinguish the two rivers by giving the designation of 'the Great Sind (Buḍ Sind),' to the Indus. This is found as '*Brhatsindhu*,' already in the *Haracaritacintāmaṇi*, xii. 45.

The identity of the two river names has led to a great deal of confusion in geographical works down to the beginning of the present century. The Sind River of Kāśmīr was elevated to the rank of one of the chief sources of the Indus, or else represented as a branch of the great river taking its way through Kāśmīr (!). This curious error is traceable, *e.g.*, in the map of 'L'Empire du Grand Mogol' reproduced in Bernier's *Travels*, ed. Constable, p. 238, from the Paris Edition of 1670, and in the map of Ancient India attached to TIEFFENTHALER, *Description de l'Inde*, 1786, p. 60. Compare HÜGEL, *Kaschmir*, i. p. 330. Even WILSON, writing in 1825, says of the Kāśmīr Sind that "it is not improbably a branch of the Indus."

² See *Rājat*, i. 57 note; also iv. 391; v. 97 sqq.; viii. 1129; *Jonar*, 982; *Śrīv*, iv. 110, 227, etc.

side of the delta is marked by an alluvial plateau which continues the right or western side of the lower Sind Valley down to the river's confluence with the Vitastā. The base of the triangle is the Vitastā itself which between Srinagar and this junction flows in a bed separated by artificial banks from the marshes on either side. The waters of the Sind after spreading over this wide Delta leave it in a single channel at its western extremity, opposite to the village of *Shādīpūr*.

The confluence of the Vitastā and Sindhu has from early times enjoyed exceptional sanctity as a Tirtha. Kāśmir tradition, as recorded already in the *Nilamata*, identifies the Vitastā and Sindhu, the largest and holiest rivers of the country, with the *Yamunā* and *Gaṅgā*, respectively. Their junction represents, therefore, the Kāśmirian equivalent of the famous *Prayāga* at the confluence of the great Indian rivers. The *VITASTĀSINDHUSAṅGAMA* is often referred to as an important Tirtha in the *Rājatarāṅgiṇī*, the *Nilamata* and numerous other texts. It is actually known by the name of *PRAYĀGA* to the modern tradition and the *Māhātmyas*.¹ A small island built of solid masonry rises in the river-bed at the point where the waters of the two rivers mingle. It is the object of regular pilgrimages on particular Parvans throughout the year. On it stands an old Cinār tree which to the pious Kāśmirian represents the far-famed *Ficus Indica* tree of the real *Prayāga*.

Notwithstanding the accumulated holiness of this Tirtha there is most explicit evidence to show that its present position dates back only to about a thousand years. We owe the knowledge of this interesting fact to the detailed account which Kalhaṇa has given us of the great regulation of the Vitastā carried out under King Avantivarman (A.D. 855-883). As the change in the confluence of the Vitastā and Sindhu forms one of the most striking results of this regulation, Kalhaṇa's account of the latter may conveniently be noticed in the present place. I shall restrict myself to an indication of the main facts connected with these operations, referring for all detailed evidence to Note I (v. 97-100) of my translation.

69. Kalhaṇa tells us in his opening notice² that the produce of Kāśmir had in earlier times been greatly restricted owing to disastrous floods, particularly from the Mahāpadma or Volur lake, and the general water-locked condition of the country. Drainage operations

¹ For a detailed account of the references to the Vitastā-Sindhusaṅgama and the ancient remains near it, see Note I (*Rājat.* v. 97-100), §§ 14, 15; also note iv. 391.

² See *Rājat.* v. 68 sqq.

under King Lalitāditya had led to an increase of agricultural produce. But these works were apparently neglected under his feeble successors, and disastrous floods, followed by famines, became again frequent. In Avantivarman's time *Suyya*, a man of conspicuous talents but low origin, offered to remedy these troubles. Receiving the king's assent for his scheme and the necessary means, he set about regulating the course of the Vitastā with a view to a better drainage of the whole Valley. Omitting legendary details with which evidently popular tradition has embellished *Suyya's* story, the course adopted was briefly the following.

The operations commenced in Kramarājya at the locality called YAKṢADARA where large "rocks which had rolled down from the mountains lining both river banks," obstructed the Vitastā.¹ We have already when describing the Vitastā Valley route, referred to Yakṣadara, the present Dyār²gul, as a spur projecting into the river-bed some three miles below the commencement of the Bārāmūla gorge. Its rocky foot forms the first rapid of the river. By removing the obstructing rocks the level of the river was lowered. Then a stone-dam was constructed across the bed of the river, and the latter thus blocked up completely for seven days. During this time "the river-bed was cleared at the bottom, and stone walls constructed to protect it against rocks which might roll down."² The dam was then removed, and the river flowed forth with increased rapidity through the cleared passage.

I must leave it to competent engineering opinion to decide to what extent and at which point of the Bārāmūla gorge the operations so far described were practicable with the technical means of that age. What follows in Kalhaṇa's account is so matter-of-fact and so accurate in topographical points, that a presumption is raised as to the previous statements also resting, partially at least, on historical facts.

Wherever inundation breaches were known to occur in times of flood, new beds were constructed for the river. One of these changes in the river-bed affected the confluence of the Vitastā and Sindhu, and this is specially explained to us in v. 97-100. The topographical indications here given by Kalhaṇa are so detailed and exact that they enabled me to trace with great probability what I believe to have been the main course of the Vitastā before *Suyya's* regulation.

70. Kalhaṇa describes to us successively the position of the old and
 Change of confluence the new confluence relative to certain temples
 of Vitastā and situated at the village of Trigrāmī and other
 Sindhu. points on the river-banks. Most of these structures I have been able to identify, and a close examination of the

¹ See v. 87 sqq.

² Compare v. 92 sq.

general topographical features in their neighbourhood has fully borne out the correctness of Kalhana's account. Without the help of a larger-scale map it would, however, be impossible to explain here accurately the topographical evidence collected.¹ I must, therefore, once more refer to the above-quoted detailed note in my forthcoming work, where a special map, on the scale of one inch to the mile, has been inserted for the illustration of this tract. In the present place I must restrict myself to indicating the main results of my enquiries.

These have shown that while the new confluence which Kalhana knew in his own time, is identical with the present junction opposite Shādīpūr,² the old one lay about two miles to the south-east of it, between the village of Trigām and the Parāspōr plateau. The latter is the site of the great ruins of *Parihāsapura*, first identified by me and shown on the map (see below, § 121.) Trigām marks the position of the ancient *Trigrāmī*, and a short distance south of it stands the temple ruin which I identify with the shrine of Viṣṇu *Vaiṇyasvāmin*.

Kalhana mentions this temple as the point near which "the two rivers, the Sindhu and Vitastā, formerly met flowing to the left and right of Trigāmī, respectively." Standing on the raised ground before the ruin and turning towards Shādīpūr, we have on our left a narrow swamp about a quarter of a mile broad which runs north-east in the direction of Trigām. In this swamp and a shallow Nāla continuing it towards Shādīpūr, we can yet recognize the old bed of the Sindhu. On the right we have the Badrihāl Nāla which divides the alluvial plateau of Trigām and Parāspōr. This Nāla is clearly marked as an old river-bed by the formation of its banks and is still known as such to the villagers of the neighbourhood.

The Badrihāl Nāla connects the great swamp to the east known as *Pañznōr Nambal* with the extensive marshes stretching west and north-west of Parāspōr towards the Volur. This channel still serves regularly as an outflow for the *Pañznōr Nambal* whenever the latter is flooded from the Vitastā at times of high-water. Were it not for the great embankments which guard the bed of the Vitastā towards the low *Pañznōr Nambal*, the latter would still form a regular course of the

¹ In the copies of the map accompanying this memoir the faint outlines by which the engraved Atlas of India sheet marks the low alluvial plateaus, the marshes, and similar features of this tract, have become much effaced. A reference to the original groundmap or the larger Survey map (2 miles to the inch) is hence recommended.

² Shādīpūr is a modern contraction for *Shahābuddīnpūr*, the name given to the place by Sultān *Shahābu-d-dīn* (A.D. 1354-73) who founded it, as Jonarāja, 409, tells us, at the confluence of the Vitastā and Sindhu.

river. Even so it is still liable to be invaded by the Vitastā at times of flood. For the swamp as well as the fertile village lands reclaimed around it, lie below the level of the river-bed.¹

The old course of the rivers here briefly indicated explains the curious position of the Nōr (map 'Noroo'). This canal which is of importance for navigation leaves the Vitastā on the left bank just opposite to the present junction with the Sindhu and practically continues the southwesterly course of the latter for some distance. Only about $\frac{1}{3}$ mile of low ground divides the Nōr from the end of the swamp which marks the bed of the Sindhu at the point of its old junction opposite the Vainyasvāmin ruin.

Similarly the position of *Parihāsapura* which King Lalitāditya chose for his splendid capital, becomes now intelligible. The plateau or Karēwa of Parāspōr which still preserves its name is now flanked on the east by the Panz'nōr Nambal and on the west by the marshes of Hārātrāṭh. Neither of them affords in their present condition the convenient waterway we find invariably near all other Kāśmīr capitals. Before Suyya's regulation, however, the Vitastā flowed as we have seen, immediately to the north of the plateau and at the very foot of the great temples erected here by King Lalitāditya.

71. The object and result of the change of the confluence can, I think, also be traced yet. By forcing the Vitastā to pass north of Trigām instead of south of it, the reclamation of the marshes south of the Volur lake must have been greatly facilitated. The course thus given to the river carries its waters by the nearest way into that part of the Volur which by its depth and well-defined boundaries is naturally designed as a great reservoir to receive the surplus water of dangerous floods. The southern shores of the lake are still to this day the scene of a constant struggle between the cultivator and floods. The reclamation of land which has gone on for centuries in these low marshy tracts,² could never have been undertaken if the Vitastā had been allowed to spread itself over them from the south, the direction marked by its old course.

The change in the confluence of the Vitastā and Sindhu was a necessary condition for the subsequent course given to the united rivers. It

¹ See LAWRENCE, *Valley*, pp. 210 sq. Kalhana's account shows that the huge embankments guarding the Panz'nōr tract must be far older than the times of the Mughals to which they are popularly attributed.

² Compare DREW, *Jummoo*, p. 116, for a description of these tracts and the amphibious ways of the inhabitants who get their living as much from the water as the land around.

was thus closely connected with the general scheme of regulation and drainage. Kalhana indicates this by referring immediately after the above passage to stone-embankments constructed along the Vitastā for seven Yojanas (circ. 42 miles) and the damming-in of the Volur lake.¹

On the land reclaimed new populous villages were founded. From the circular dykes which were built around these villages, they are said to have received the popular designation of *kuṇḍala*, 'ring.' We actually still find two villages on the low ground near the Volur showing in their modern names the ending *kuṇḍāl*, derived from Skr. *kuṇḍala*. *Uṭṣ²kuṇḍāl* (map wrongly 'Watr koondl') and *Mar²kuṇḍāl* are situated both close to the left bank of the Vitastā before it enters the marshes at the south-eastern end of the Volur. Their names and position seem to support the assumption that the present northerly course of the river above Trigrāmī and *Shādīpūr* is directly due to Suyya's operations.

Kalhana adds that even in his own time, i.e., two and a half centuries later, there were "seen, growing on the banks of the former river-beds, old trees which bore the marks of the boat ropes fastened to them."² Similarly the observant Chronicler noted the old pales securing the embankments "which the rivers displayed when low in the autumn."³ We must be grateful to him for the evident interest with which he ascertained and recorded the details of Avantivarman's operations. For he has thus enabled us even at the present day to trace some of the important changes then effected in the hydrography of the whole Valley.

72. Following the course of the Vitastā below its present confluence with the Sindhu we soon pass the village

Course of Vitastā towards the Volur lake.

of Sāmbal where the route from Srinagar to the north of the Volur lake and thence to the Trāg^abal Pass, crosses the river. Here at some distance from the left bank is the site of the ancient *Jayapura*, the capital founded by King Jayāpīḍa in the second half of the eighth century.⁴ It is marked by the village of And^rrkōṭh situated on an island between the Sāmbal marsh and a branch of the canal known as Nōr. An ancient causeway connects the island with the strip of land separating the marsh from the present course of the Vitastā.

¹ See v. 103 sqq.

² v. 101.

³ It is still the common belief in Kāśmīr that "no embankment on the riverside is sound unless it has a foundation of piles"; LAWRENCE, *Valley*, p. 211. Considering the peaty nature of the soil along the lower course of the river, this belief may be justified by old experience.

⁴ See for the identification of this site, *Rājat.* v. 506 note, and below, § 122.

We should have some difficulty in understanding the position chosen for a town which was intended to be a place of importance if we did not know the great change effected in the course of the river by the subsequent regulation of Avantivarman. In King Jayāpīḍa's time one of the main branches of the Vitastā probably followed the line of the Nōr in this neighbourhood. The island of And²rkōṭh which forms a small alluvial plateau, raised perhaps artificially in parts, was then a convenient site. This is no longer the case since the river flows to the east of And²rkōṭh and at a considerable distance. We can safely attribute to this change the fact that Jayapura like the similarly situated Parihāsapura had fallen into insignificance already before Kalhaṇa's time.

Close to Sambal the river passes the foot of an isolated hill known as *Ākṣtyung*, rising about a thousand feet above the plain. Under its shelter on the north is the small lake of *Mānasbal* which is mentioned by the name of *Mānasa[saras]* in the *Nilamata* and by *Jonarāja*.¹ It is about two miles long, and occupying a rock-basin is deeper than the other lakes of the Kāśmīr plains. It is connected with the river by a short channel and partially fed by an irrigation canal carried into it from the Sind River.² Its ancient name is derived from the sacred lake on Kailāsa, famous in the Purāṇas and Epics and usually located in the Mansarōvar of the Tibetan highlands.

A short distance lower down the villages of Ute²kuṇḍ² and Mar²kuṇḍ² already referred to above, are passed on the left bank. There are various indications which make it probable that in old times the Volur lake reached much closer to these villages than it does at present. Kalhaṇa's reference seems to indicate that these villages enclosed by circular dykes were actually reclaimed from the lake, and *Jonarāja* still places them on the very shore of the lake.³ In the same way *Srīvara* speaking of the villages stretching from *Samudrakōṭa*,⁴ the present Sud²rkōṭh, to the vicinity of *Dvārikā*, near And²rkōṭh, seems to place them along the shore of the Volur.

A glance at the map shows that the land on the left bank of the river below the 'Kuṇḍala' villages projects like a peninsula into the lake.

¹ As *Jonarāja*, 864 sq., makes the ancient name quite certain, the latter could have safely been shown on the map. In some passages of the *Nilamata* and *Māhātmyas* it might be doubted whether this lake or the *Uttaramānasa* on Mount *Haramukh* is intended; see however *Nilamata*, 1338, where the *Mānasa* lake is mentioned after the *Vitastāsindhusaṅgama*.

² The construction of this canal is ascribed by *Jonarāja*, 864 sq., to *Zainu-l-ābidin*.

³ See *Rājat.* v. 120, and *Jonar.* 1230, (Bo. ed.).

⁴ See *Srīv.* i. 400 sq.

It can be safely assumed that the creation of this strip of land which now accompanies the river-channel for some seven miles farther, is due to the continual deposits of silt. This silting-up process is still going on in this as in other portions of the Volur where streams enter it, and is likely to reduce the expanse of the lake still further in the future.¹

A striking proof for the gradual change thus effected is afforded by the position of the artificial island known now as Zain^alānk. It was constructed by King Zainu-l-'ābidin from whom it took its proper designation of *Jainalānkā*. It was then, according to Jonarāja's description, in the middle of the Volur where the water was deep.² It is now situated in a shallow marsh close to the present embouchure of the river.

73. The great lake, with the southern shores of which we have already become acquainted, is a very important feature in the hydrographic system of

Volur lake. *Kaśmīr*. It acts as a huge flood-reservoir for the greatest part of the drainage of *Kaśmīr* and gives to the western portion of the Valley its peculiar character. Its dimensions vary at different periods, owing to the low shores to the south being liable to inundation. In normal years the length of the lake may be reckoned at about 12 and its width at 6 miles, with an area of about 78 square miles. In years of flood the lake extends to about 13 miles in length and 8 miles in width.³ Its depth is nowhere more than about 15 feet and is continually lessening in those parts where the streams debouch into it. Notwithstanding this slight depth navigation on the lake often becomes dangerous when violent storms sweep over it from the mountains in the north. The boundaries of the lake are ill-defined in the south and partly in the east; the marshes and peaty meadows merge almost imperceptibly into the area of the lake. On the north the shores slope up towards an amphitheatre of mountains from which some rocky spurs run down to the water's edge. The fertile tract at the foot of these mountains forms the ancient *Khūyāsrama*, the modern Pargaṇa of *Khuyākhōm*.

The ancient name of the lake is MAHĀPADMASARAS, derived from the **Mahāpadma Nāga**. Nāga *Mahāpadma*, who is located in the lake as its tutelary deity. This designation is by far the most common in the Chronicles, the Nilamata, and other old

¹ Compare DREW, p. 166, and LAWRENCE, *Valley*, p. 20. The latter author is probably reproducing a popular tradition when mentioning that in King Zainu-l-'ābidin's time the waters of the Volur stretched south to Āsam and Sāmbal.

² See *Jonar*. (Bo. ed.) 1227 sqq. The name Jainalānkā was mutilated in the Calcutta edition; else it would have been shown on the map.

³ See LAWRENCE, p. 20.

texts.¹ It is also used, as we have seen, in the description of Kāśmīr given by the T'ang annals.

The name *Ullola* from which the present Volur (*vulgo* 'Woolar') seems to be derived, is found only in one passage of Jonarāja's Chronicle and in a single modern Māhātmya.² Skr. *ullola* can be interpreted to mean 'turbulent' or '[the lake] with high-going waves.'³ Those who have experienced the sensation of crossing the lake with a strong wind, will readily allow the appropriateness of this designation. Yet it is impossible to dismiss altogether the suspicion that the name which seems wholly unknown to the older texts, may be only a clever adaptation of the Kāśmīrī name Volur or its earlier representative. It is certainly curious that in modern Māhātmyas we meet with Ullola as a name for the Vulgar Pargaṇa, the genuine ancient designation of which is Holaḍā.⁴ Jonarāja in his commentary on Śrīkaṇṭhacarita, iii. 9, uses Ullola as a paraphrase for Mahāpadma.

74. From an early date various legends seem to have clustered around this, the greatest of Kāśmīr lakes. The Nilamata relates at length how the lake became the habitation of the Mahāpadma Nāga.⁵

Legends of Mahā- padma Nāga.

Originally it was occupied by the wicked Nāga Śaḍaṅgula who used to carry off the women of the country. Nila, the lord of Kāśmīr Nāgas, banished Śaḍaṅgula to the land of the Dārvas. The site left dry on his departure was occupied by a town called *Candrapura* under King Viśvagaśva. The Muni Durvāsa not receiving hospitable reception in this town, cursed it and foretold its destruction by water. When subsequently the Nāga Mahāpadma sought a refuge in Kāśmīr and asked Nila for the allotment of a suitable habitation, he was granted permission to occupy Candrapura. The Mahāpadma Nāga thereupon approached King Viśvagaśva in the disguise of an old Brahman and asked to be allowed to settle in the town with his family. When his prayer was agreed to he shewed himself in his true form and announced to the King the approaching submersion of his city. At the Nāga's direction the King with his people emigrated and founded two Yojanas further west the new town of *Viśvagaśvapura*. The Nāga then converted the city into a lake, henceforth his and his family's dwelling place. A recollection of this legend still lives in popular tradition, and the ruins of the doomed city are supposed to be sighted occasionally in the water.

¹ For detailed references see *Rājat.* iv. 593 note.

² See *Jonar.* (Bo. ed.) 1227-30; *Dhyāneśvaramāh.* 30, 33.

³ See BÜHLER, *Report*, p. 9.

⁴ See *Vitastāmāh.* v. 48; *Haridrāgaṇeśamāh.*

⁵ See *Nilamata*, 976-1008, and BÜHLER, *Report*, p. 10.

Another legend has found a lengthy record in Kalhaṇa's narrative of King Jayāpīḍa's reign, iv. 592 *sqq.* The Nāga Mahāpadma being threatened with desiccation by a Dravidian sorcerer, appeared to the King in his dream and asked for protection. As a reward he promised to show a gold mine to the King. Jayāpīḍa agreed to the Nāga's prayer. Curiosity, however, induced him to let the Dravidian first try his magic on the lake. When the waters had been dried up so far that the Nāga and his dependents were seen as human-faced snakes wriggling in the mud, the king interfered and caused the lake to be restored. The Nāga, however, resented the insult and showed to the king only a rich copper ore instead of the gold mine.

With reference to a Purāṇic legend the Mahāpadma is sometimes identified with the Nāga *Kāliya* who was vanquished by Kṛṣṇa. As the foot of the god when touching the Nāga's head made lotuses (*padma*) appear on it, Mahāpadma is treated by Kāśmīrian poets as another form of *Kāliya*.¹

75. Of the streams which fall into the Volur lake besides the Vitastā, the stream of the *Baṇḍāpūr* Nāla is the most considerable. It drains the range between Mount Haramukh and the Trāg^abal

Pass and forms a small Delta of its own to the north of the lake. Its ancient name is *Madhumatī*.² It is repeatedly mentioned in the *Rājatarāṅgiṇī* in connection with the route leading to the Dard territory, but must be distinguished from another, smaller *Madhumatī* which flows into the *Kiṣāṅgaṅgā* near the *Śārādātirtha*.

The outflow of the lake's waters is at its southwest corner about two miles above the town of *Sōpūr*. The latter is the ancient *Suyyapura*, founded by *Suyya* and commemorating his name.³ If we may judge from the position of the town and the words used by Kalhaṇa in another passage,⁴ it appears probable that the operations of *Avantivarman's* great engineer extended also to the river's bed on this side of the lake.

About four miles below *Sōpūr* the *Vitastā* which now flows in a winding but well-defined bed, receives its last considerable tributary within Kāśmīr. It is the *Pohur* which before its junction has collected the various streams draining the extreme northwest of the Valley.

¹ Compare *Śrīkaṇṭha* c. iii. 9; *Jonar.* 933, and my note *Rājat.* v. 114.

² See *Rājat.* vii. 1179 and note 1171; also viii. 2883; *Nilamata* 1259 *sqq.*, 1398, etc.

³ See *Rājat.* v. 118 note.

⁴ V. 104: "Trained by him, the *Vitastā* starts rapidly on her way from the basin of the Mahāpadma lake, like an arrow from the bow."

This portion of the country figures but little in Kalhaṇa's narrative ; hence we find in the *Rājatarāṅgiṇī* no reference to the Pohur or any of its affluents. The old name of the river is uncertain. Jonarāja in a passage which is found only in the Bombay edition, calls this river *Pahara* ; the *Māhātmyas* vary between *Prahara* and *Prahāra*.¹ Of the side-streams the *Māvur* (map 'Maur') flowing through the Maḥipōr Pargana is named in the *Nilamata* as *Māhurī*.² The name of the Hamal stream is identical with that of the Pargana through which its course lies, the ancient *Samālā*.³

About 18 miles from the point where the Vitastā leaves the Volur, it reaches the entrance of the gorge of Bārāmūla. Through this defile we have already before followed the course of the river. At Bārāmūla navigation ceases. After passing with a violent current the ravine immediately below the town, the river, so placid within the Valley, turns into a large torrent rushing down in falls and rapids.

SECTION VII.—SOIL AND CLIMATE OF THE VALLEY.

76. Our survey of Kaśmīr rivers has taken us along that great flat of river alluvium which forms the lowest and most fertile part of the Valley. We must now turn to the higher ground of the Vale which consists of the peculiar plateaus already alluded to.

The genuine Kaśmīrī term for these plateaus is *uḍar*, found in its Sanskrit form as *uḍḍāra* in the *Chronicles*. Another modern designation of Persian origin now often used, is *karēwa*. The word *uḍḍāra* is twice found as an ending of local names in the *Rājatarāṅgiṇī* ⁴, while the latter *Chronicles* use it frequently in designations of well-known plateaus.⁵ An earlier Sanskrit term no longer surviving in use, is *sūda*, originally meaning 'barren waste ground.' Kalhaṇa employs it when speaking of the well-known Dām^adar Uḍar.⁶

The Uḍars of the Kaśmīr Valleys are usually considered by geologists to be due to lacustrine deposits. They appear either isolated by

¹ See *Jonar.* (Bo. ed.) 1150, 1152 ; *Vitastāmāh.* xxvii. 2 ; *Svayambhūmāh.*

² *Nilamata*, 1322 sqq.

³ See *Rājat.* vii. 159 note.

⁴ *Locanoḍḍāra* and *Dhyānoḍḍāra*, *Rājat.* viii. 1427 note.

⁵ See *Gusikōḍḍāra*, the Uḍar of Gūs near Rāmuh, *Śrīv.* iv. 465, 592, 596 ; *Dāmo-daroḍḍāra*, the Dām^adar Uḍar, *Śrīv.* iv. 618 ; *Laulapuroḍḍāra*, Fourth Chron. 175, etc.

⁶ See *Rājat.* i. 156 note.

lower ground around them or connected by very gentle slopes with spurs descending from the mountains. Often the tops of these plateaus seem almost perfectly flat, forming table lands of varying dimensions. They rise generally from 100 to 300 feet above the level of the ravines and valleys which intersect them, and through which the streams from the mountains and their own drainage find their way to the Vitastā. Most of the Uḍars are found on the south-western side of the Valley, stretching from Sūpiyaṇ to Bārāmūla. But they also occur across the river on the north-eastern side of the Valley, and at both extremities of the river-flat in the south-east and north-west.

Owing to the inferiority of the soil and the difficulty of irrigation, the Uḍars show a marked difference in point of fertility from other parts of the Valley. Those which slope down from the foot of the mountains have been brought under cultivation with the help of water-courses conducted over them from the higher ground behind. Most of these irrigation-channels are, no doubt, of ancient date, and some are specially mentioned in the Chronicles. To other Uḍars, particularly those which are entirely isolated, water could not be brought. These are either barren wastes covered with low jungle or if cultivated, yield only precarious crops owing to the uncertainty of the rainfall.

Some of the Uḍars, owing to their position near the Vitastā or for other reasons, are sites of importance in the ancient topography of Kāśmīr. Such are the plateaus of Mārtāṇḍa, Cakradhara, Padmapura, Parihāsapura. Another, the 'Uḍar of Dāmodara,' plays an interesting part in the legendary lore of the country. All these will be duly noticed in the next chapter.

77. Climatic conditions are so closely connected with a country's

Kāśmīr climate. topography *that the few old notices and references which we have regarding those of

Kāśmīr, may fitly find mention here.

The only distinct account of the Kāśmīr climate is given by Albērūnī.¹ He clearly indicates the reason why Kāśmīr is exempt from the heavy Monsoon rains of India proper. When the heavy clouds, he explains, reach the mountains which enclose Kāśmīr on the south, "the mountain-sides strike against them, and the clouds are pressed like olives or grapes." In consequence "the rain pours down and the rains never pass beyond the mountains. Therefore Kāśmīr has no *varṣakāla*, but continual snowfall during two and a half months, beginning with Māgha, and shortly after the middle of Caitra continual rain sets in for a few days, melting the snow and cleansing the earth. This rule has seldom an exception; however, a certain amount of extraordinary meteorological occurrences is peculiar to every province in India."

¹ See *India*, i. p. 211.

That this description is on the whole as accurate as Albērūnī's other data regarding Kaśmīr, will be easily seen by a reference to the detailed statements of Mr. LAWRENCE and Mr. ELIOT.¹ What chiefly characterizes the climate of Kaśmīr as against that of the Indian plains, is the absence of a rainy season and the equally marked absence of excessive heat. The moderate temperature of the Kaśmīr summer is ensured by the high elevation of the Valley, and has at all times been duly appreciated by its inhabitants as well as its visitors.

Kalhana already proudly claims this exemption from the torments of a fierce sun as one of the favours accorded to his country by the gods.² His enthusiastic description of a Kaśmīr summer passed "in the regions above the forests" shows that he was no stranger to the charms of that season in the alpine parts of the country.³ More than once he refers to the sufferings which the heat of an Indian summer outside the Valley inflicts on Kaśmīrian exiles. Even in the hill regions immediately to the south of Pir Panṭāl the hot season with its accompanying fevers has often proved disastrous to the Kaśmīrian troops employed there.⁴

On the other hand we find also the rigours of a Kaśmīr winter duly illustrated by the Chronicle's narrative. We may refer to the description of the heavy and continued snowfall which followed Sussala's murder in Phālguna of 1128 A.D., the freezing of the Vitastā in the winter of 1087-8 A.D., etc.⁵ The graphic account of Bhoja's flight to the Upper Kiṣangaṅgā Valley shows us in full detail the difficulties which attend a winter-march over the snow-covered mountains to the north of the Valley.⁶ Nor do we fail to be reminded otherwise of the great differences in climate which are implied by the varying altitudes of Kaśmīr localities.⁷

Exceptionally early snowfall* in the autumn such as saved the garrison of the frontier fort on the Dugdhaghāta Pass, has always been known and dreaded even low down in the Valley. The danger it represents for the rice crops is illustrated by Kalhana's account of the famines resulting from such premature snowfalls.⁸

¹ See LAWRENCE, p. 24 sqq.

² See i. 41.

³ ii. 138.

⁴ Compare vii. 970; viii. 1634, 1830, 1836, 1865; regarding the fever-season of Rājapuri and neighbouring districts, my note viii. 1873.

⁵ *Rājat.* viii. 1376 sqq.; 1434 sqq.; vii. 592.

⁶ See viii. 2710 sqq. It must be remembered that as much as forty to sixty feet of snow falls in a severe winter on the higher ranges around Kaśmīr; see also viii. 411.

⁷ Compare vii. 916; viii. 2511; ii. 138.

⁸ See ii. 18 sqq.; viii. 2449.

In this as in other respects there is nothing to suggest any material change of the climatic conditions during historical times. Kalhana, it is true, in describing the reign of Abhimanyu I., speaks of deep snow as "falling each year to cause distress to the Baudhhas" and obliging the king to pass six months of the cold season in Dārvābhisāra. But the whole story there related is nothing but a mere rechauffé of the ancient legend told in the Nilamata of the annual migrations caused by the presence of the Pisācas. It therefore can claim no historical value whatever.¹

78. Cultivation such as appears to have been carried on in Kāśmīr since the earliest historical period, must necessarily leave its traces in the topography of a country and may hence claim a passing notice.

Rice has as far as we can go back, always been the largest and most important produce of the Valley. Its character as the main cereal is sufficiently emphasized by the fact that it is usually referred to in the Chronicles by the simple term of *dhānya* 'grain.'² The conditions of its cultivation presuppose an extensive system of irrigation, and for this the Kāśmīr Valley with its abundance of streams and springs is admirably adapted by nature. The elaborate arrangements which exist at present for taking water from the streams large and small and distributing it over all the ground capable of irrigation, will be found fully detailed in Mr. LAWRENCE's valuable and exhaustive account of Kāśmīr agriculture.³ There is every reason to believe that they have come down with little, if any, change from a very early period.

Many of the larger irrigation channels which intersect the fertile alluvial flats, or skirt the terraced slopes of the Uḍars and mountain-sides, are shown on the map; see, *e.g.*, the tracts on the lower course of the Lidar, Vesān, Sind, and other rivers. In old times when the population was larger than now, much land which is at present allowed to lie waste on the hill-sides, on the Uḍars and in the low-lying tracts by the marshes, must have been under cultivation.⁴ I have often come across traces of old irrigation-cuts long ago abandoned, which brought down the water of the melting snows from alpine plateaus high above the forest zone. Their distance from any lands capable of rice-cultivation is so great

¹ See i. 180, and note i. 184.

² "The Kashmīris, so far, have considered no crop worthy of attention save rice;" LAWRENCE, *Valley*, p. 319.

³ See *Valley*, pp. 323 sq.

⁴ Compare *Valley*, pp. 239 and 356, as to the extensive areas which were once cultivated and are likely to be so again in future.

and the trouble of their construction must have been so considerable that only a far greater demand for irrigation than the present one can account for their existence.

In the earliest traditions recorded by Kalhaṇa the construction of irrigation canals plays already a significant part. The *Suvarṇamānikūlyā* which is ascribed to King Suvarṇa and which still brings water to a great part of the Āḍṇin district, has already been noticed.¹ The reference to the aqueduct by which King Dāmodara is supposed to have attempted to bring water to the great Uḍar named after him, though legendary in the main, is also characteristic.² Lalitāditya is credited with having supplied villages near Cakradhara (*Tsak^adar*) with the means of irrigation by the construction of a series of water-wheels (*araghaṭṭa*) which raised the water of the Vitastā.³

To Suyya, however, Avantivarman's engineer, is ascribed the merit of having on an extensive scale secured river-water for village-lands. From Kalhaṇa's detailed description it is evident that Suyya's regulation of the Vitastā was accompanied by systematic arrangements for the construction of irrigation channels. For these the water of various hill-streams was utilized as well as that of the main-river. The size and distribution of the water-course for each village was fixed on a permanent basis. He is thus said "to have embellished all regions with an abundance of irrigated fields which were distinguished for excellent produce." The increase in produce consequent on these measures and the reclamation of new lands from the river and marshes is said to have lowered the average price of a Khāri of rice from two hundred to thirty-six Dinnāras.⁴

The importance of irrigation from a revenue point of view must have always been recognized by the rulers of the country. Hence even in later times we find every respite from internal troubles marked by repairs of ancient canals or the construction of new ones. The long and peaceful reign of Zainu-l-'ābidīn which in many respects revived the traditions of the earlier Hindu rule, seems in particular to have been productive of important irrigation works. Jonarāja's and Śrīvara's Chronicles give a considerable list of canals constructed under this king.⁵ Among these the canal which distributed the water of the Pohur River over the Zain^agir Pargana, and the one by which the

¹ See above, § 64.

⁵ See *Jonar.* (Bo. ed.) 1141-55, 1257 sqq.; *Śrīv.* i. 414 sqq. For repairs of old canals, see *Rājat.* viii. 2880.

water of the Lidar was conducted to the arid plateau of Mārtāṇḍa, deserve special mention. In the latter locality some work of this kind must have existed already at a far earlier period. Or else we could scarcely understand how it could have been chosen as the site for Lalitāditya's magnificent temple and the flourishing township which once surrounded it.¹

Of the other products of the Valley only two may be mentioned here, since they have from old times received special attention in all descriptions of the country. Already Kalhaṇa in his introduction designates saffron and grapes among "the things that even in heaven are difficult to find but are common there."² Saffron (*kuṅkuma*) has to the present day remained a famous product of Kāśmīr. Its cultivation has apparently from an early time specially flourished about Padmapura, the present Pāmpar, where the Uḍar lands are still chiefly utilized for it. The Fourth Chronicle describes at length the plant and its treatment. Abū-l-Faḍl mentions it also in the same locality and devotes to it a long notice.³

The grapes of Kāśmīr which Kalhaṇa mentions repeatedly,⁴ have not retained their area of cultivation with equal persistence. They must have enjoyed reputation outside Kāśmīr, because the name *Kāśmīrā* is given by Sanskrit Kośas as the designation of a special variety of grapes.⁵ They were once plentiful at Mārtāṇḍa where both Kalhaṇa and the Fourth Chronicle mention them, and at many other localities.⁶

In Akbar's time grapes were abundant in Kāśmīr and very cheap; but Abū-l-Faḍl notes that the finer qualities were rare.⁷ Since then, viticulture among the people generally has greatly declined. Though vines of remarkable size and age can still be found in many places, they are mostly wild. The produce of grapes is now restricted to a few old gardens at the mouth of the Sind Valley and to the new vineyards established on the Dal shores by the late Mahārāja for the cultivation of French vines.⁸

79. It will be useful to refer here briefly to the data we possess
Old ethnography regarding the old ethnography of Kaśmīr and
of Kaśmīr. the adjacent hill regions.

As far as Kaśmīr itself is concerned our information does not allow us to connect any particular localities with ethnic divisions. Judging from Kalhaṇa's Chronicle and what other sources of information are available to us, the population of Kaśmīr has shown already in old times the same homogeneity that it does at present. The physical and ethnic characteristics which so sharply mark off the Kaśmīrī from all surrounding races, have always struck observant visitors to the Valley and have hence often been described.¹ Hiuen Tsiang's brief sketch reproduced above is the earliest in date and yet applies closely to the modern inhabitants.

That the Kaśmīris form a branch of the race which brought the languages of the Indo-Aryan type into India, is a fact established by the evidence of their language and physical appearance. But when their settlement in the country took place, and from which direction they immigrated, are questions beyond the present range of historical research. The purity of race which has often been noted as distinguishing the great mass of the Kaśmīr population, may be admitted with a qualification. It is probably due not only to the country's natural isolation but also to a curious faculty for absorbing foreign elements. Colonies of Mughals, Pathāns, Panjābīs, and Pahāris, settled within comparatively recent times in the Valley, are being amalgamated with remarkable rapidity through intermarriage and other means.

The complete absorption of these settlements which is going on
Absorption of under our own eyes as it were, furnishes a
foreign ethnic likely analogy for the ethnic history of earlier
elements. times. We have reason to assume that Kaśmīr
 has also in Hindu times been often under
 foreign rule. It is difficult to believe that the reign of foreign dynasties has not been accompanied also by settlements of immigrants of the same nationality. But it is not likely that these foreign colonies were ever extensive. In any case we find no trace of their having retained a distinct and independent existence.

Various tribal sections of the population are mentioned in Kalhaṇa's narrative, but we have no means of deciding to what extent they were based on race or caste distinctions. The names of the *Lavanyas* and *Tantrins* survive in 'Krāms,' or tribal names, still borne by sections of

¹ For a general account of the Kaśmīrī population DREW's remarks, *Jummoo*, pp. 174 *sqq.*, may still be recommended. Fuller details regarding the various classes, castes, etc., will be found in Mr. LAWRENCE's work, pp. 302 *sqq.*

the Muhammadan rural population (*Lūn*¹ and *Tāntr*¹).¹ But whatever distinctions of race or caste may have originally been indicated by these 'Krāms,' they have long ago disappeared.

It is equally certain from an examination of the Chronicle that these sections were never confined to particular territorial divisions, but spread all over the Valley. The humblest of these sections is probably the one which has least changed its character during the course of centuries. The modern Dūmbas, the descendants of the old *Dombas*,² are still the low-caste watchmen and village-menials as which they figure in Kalhana's narrative. They, like the still more despised Vātals or scavengers, cannot intermarry with other Kāsmīris. They have thus retained in their appearance a distinctive type of their own which points to relationship with the gipsy-tribes of India and Europe.

It is difficult to come to any definite conclusion as regards the *Ki-li-to* whom Hiuen Tsiang mentions as a low-born race settled in Kāsmīr from early times and opposed to the Bauddhas.³ Their name, usually transcribed *Kritiya*, cannot be traced in indigenous records. There is nothing to support their identification with the *Kīras*, as suggested by General Cunningham.⁴ The latter seems to have been a tribe settled somewhere in the vicinity of Kāsmīr.⁵

80. The ethnography of the territories immediately adjoining
Races on Kāsmīr borders. Kāsmīr can be traced quite clearly from the
 notices of the *Rājataraṅgiṇī*.

In the south and west the adjacent hill-regions were occupied by *Khaśas*. Their settlements extended, as shown by numerous passages of the Chronicle, in a wide semi-circle from *Kaṣṭavār* in the south-east to the Vitastā Valley in the west.⁶ The hill-states of Rājapuri and Lohara were held by Khaśa families; the dynasty of the latter territory succeeded to the rule of Kāsmīr in the 11th century. I have shown elsewhere that the *Khaśas* are identical with the present *Khakha* tribe to which most of the petty chiefs in the Vitastā Valley below Kāsmīr and in the neighbouring hills belong. We have already seen that the

¹ Compare notes v. 248; vii. 1171.

² See *Rājat.* note iv. 475; also v. 353 *sqq.*, vi. 84, 182; vii. 964, 1133, viii. 94. These passages show that the Dombas also earned their bread as hunters, fishermen, buffoons, quacks, etc., and their daughters as singers and dancers. Their occupations thus closely resembled those of the gipsies whose name, *Rom*, is undoubtedly derived from Skr. *ḍomba*; see *P. W. s. v.*

³ See *Si-yu-ki*, transl. Beal, i. pp. 150, 156 *sqq.*

⁴ See *Anc. Geogr.*, p. 93.

⁵ Compare my note viii. 2767.

⁶ See *Rājat.* i. 317 note.

Khakhas have until very recent times worthily maintained the reputation which their forefathers enjoyed as marauders and turbulent hill-men.

North of the Vitastā Valley and as far as the Kiṣangaṅgā we now find the Bombas as the neighbours of the Khakhas to whom they are closely related. It is probable that the Karnāv district was held by them already in old times. Kalhaṇa seems to comprise them, viii. 3088, under the designation of Khaśa.

The upper Kiṣangaṅgā Valley above Śardi was in old days already as at present inhabited by Dards (Skr. *Darad*, *Dārada*) who are often referred to by Kalhaṇa as the neighbours of Kaśmīr on the north.¹ Their seats extended then too probably much further to the north-west, where they are now found in Citrāl, Yāsīn, Gilgit and the intervening regions towards Kaśmīr. Megasthenes already knew them in the Upper Indus regions. Kalhaṇa relating events of his own time speaks of *Mlecchas* further to the north. These might have been Muhammadanized Dards on the Indus, and beyond.²

The regions immediately to the north-east and east of Kaśmīr were held by the *Bhauṭṭas*. We have already seen that these represent the people of Tibetan descent, the modern *Buts*, of Drās, Ladākḥ and the neighbouring mountain districts.³

² See note viii. 2762-64.

³ See above, § 58.

CHAPTER IV.

POLITICAL TOPOGRAPHY.

SECTION I.—FRONTIERS OF ANCIENT KĀSMĪR.

81. Our account of the political topography of ancient Kāsmīr may conveniently open with a survey of its frontiers. These agree so closely with the natural boundaries of the Valley that we have already had occasion to trace them when dealing with the mountain ranges enclosing the latter. It will however be useful to supplement our information regarding these frontiers by a brief notice of the territories which lay beyond them and formed the neighbours of the Kāsmīr kingdom in Hindu times.

Beginning in the south-east we have first the Valley of KĀṢ-
 Territories S. E. of Kāsmīr. THAVĀṬA, the present Kaṣṭhāvār ('Kishtwar' of the maps) on the upper Cināb. It is mentioned by Kalhana as a separate hill state in the time of Kalaśa.¹ Its Rājās who were Hindus till Aurangzeb's time, practically retained their independence until the conquest of their territory by Mahārāja Gulāb Singh.

The hill-district of Bhadravāh lower down on the Cināb is once named in the Rājatarāṅgiṇī as *Bhadrāvākāśa*.² Its Rājās were tributary to Cambā in recent centuries. This was probably the case also in earlier times as we do not find a ruler of Bhadrāvākāśa referred to in Kalhana's lists of hill Rājās.

¹ See *Rājat.* vii. 590 note.

² See *Rājat.* viii. 501 note.

The Rājās of Cambā, the ancient CAMPĀ, on the other hand figure often in the Kāśmīr Chronicle.¹ Their territory has since early times comprised the valleys of the sources of the Rāvi between Kāngra, the ancient Trigarta, and Kāṣṭhavāṭa. The ancient Rājput family which rules this hill state to the present day, often intermarried with the Lohara dynasty which reigned in Kāśmīr.

To the west of Campā and south of Bhadrāvakaśā lay the chiefship of VALLĀPURA, the modern Ballāvar.² Its rulers are repeatedly referred to in Kalhaṇa's narrative and retained their independence as petty hill-chiefs till the rise of the Jammu family early in this century. 'Ballāwar' was known also to Albērūnī.

Of the political organization of the hill-territories between Vallāpura in the south-east and Rājapuri in the north-west we have no distinct information. The Hindu inhabitants of this tract including Ballāvar call themselves now *Dogrās* and their country *Dugar*. This name is traditionally derived from Skr. **Dvigarta*,³ but this term is nowhere found in our historical texts and has probably been created for the sake of an etymology in analogy of the ancient Trigarta. The original of the name seems to be *Durgara*.⁴

It is very probable that the region of the lower and middle hills between the limits indicated was already in old times divided into a number of small chiefships. Of these some eleven seem to have existed up to the time of the extension of the Sikh power into the Panjāb Kōhistān.⁵ They were all absorbed in the growing state of Jammu which was originally one of them.

Among these small hill-chiefs of limited territory but ancient descent, we have probably to class the Thakkura Deṅgapāla on the Cināb who gave his daughter to the pretender *Bhikṣācara* in marriage.⁶ Also the Rājā of KĀNDA must probably be located in this hill tract.⁷ Other Thakkuras in this region are mentioned as levying blackmail on Prince Mallārjuna when on his march to Kāśmīr from the plains.⁸ Immediately at the foot of the Bān^hāl Pass in the territory of VIṢALĀṬĀ we find the castle of a 'Khaśa lord,' who gave shelter to Bhikṣācara and at the time

⁷ See note vii. 590.

⁸ viii. 1989 sqq.

was evidently independent.¹ Temporarily the Khasas of the hills immediately south of the Pir Panjal Range may have acknowledged the suzerainty of strong Kashmir rulers. But during the greatest part of the period which is known to us from historical sources, they appear to have held their own and rather to have levied subsidies, *i.e.*, blackmail from the Kashmir rulers.²

82. Some of the petty hill states here referred to must have been included in the region which by its ancient name was known as DĀRVĀBHISĀRA. I have elsewhere shown that this name, as a geographical term, was applied to the whole tract of the lower and middle hills between the Candrabhāgā and Vitastā.³ The combined names of the Dārvas and Abhisāras are found already in the ethnographical lists of the Mahābhārata and Brhatsamhitā. A chief of this region figures by the ethnic appellation of *Abisares* in the accounts of Alexander's Indian campaign.

The most important of the hill-states in this territory was certainly the ancient RĀJAPURĪ represented by the modern district of Rajauri.⁴ It comprised the valleys drained by the Tohī of Rajauri and its tributaries. Owing to its position on the most direct route to the Panjāb, Rājapuri was necessarily often brought into political relations with Kashmir. When Hiuen Tsiang passed through it, the 'kingdom of Rājapuri' was subject to Kashmir. From the 10th century onwards we find the chiefs of Rājapuri as practically independent rulers, though the Chronicle tells us of numerous expeditions undertaken into their territory by the later Kashmir kings. The upper valley of the Tohī of Prunt leading to the Pir Panjal Pass, was included in Rājapuri territory.⁵ Here lay probably the famous strong-hold of *Rājagiri* known also to Albēruni.⁶

Rājapuri took its name from its capital which is repeatedly mentioned by Kalhaṇa and undoubtedly occupied the position of the present town of Rajauri.⁷ The ruling family belonged to the Khasa tribe. Its descendants were the Muhammadanized Rājput chiefs who retained this territory down to the present century.

On the north-west Rājapuri was adjoined by the territory of

⁷ See vii. 973 *sqq.*

LOHARA.¹ The chief valley belonging to this hill-state was the present Loharin which we have already visited when examining the Tōṣmaidān route. Lohara became important for Kāśmīr from the end of the 11th century when a branch of its ruling family acquired the Kāśmīr throne. Subsequently this branch succeeded also to Lohara which thus became united to Kāśmīr under the same ruler. As the ancestral home and stronghold of the dynasty, the castle of Lohara has played a great part during the last reigns related by Kalhaṇa. The chiefs of Lohara are distinctly named as belonging to the Khaśa tribe.

Lohara seems to have included in those times also the town and district of PARṢOTSĀ corresponding to the present Pūnch or Prūṅṭṣ (the Kāśmīrī form), in the lower valley of the Tohi (Tauṣī).² In Hiuen Tsiang's time Parṣotsa gave its name to the whole hill-state which was then tributary to Kāśmīr. The Muhammadan Rājās of Prūṅṭṣ, closely related to the Khakhas of the Vitastā Valley, remained more or less independent till the conquest of Mahārāja Gulāb Singh. Their territory forms now a separate small principality under a branch of the Jammu family. Parṣotsa being on the great route to the western Panjāb is often mentioned in the Kāśmīr Chronicles. The large percentage of the Kāśmīrī element in the population of Prūṅṭṣ attests the closeness and ancient date of its relations to Kāśmīr.

The hills to the south-west of Prūṅṭṣ were held till early in this century by petty chiefs, known as the Rājās of Kōḷi. It is possible that the small hill-state of KĀLIṆJARA repeatedly referred to by Kalhaṇa and known also to Ferishta, lay in this direction.³

Proceeding to the north-west of Parṣotsa we come to the valley of the Vitastā. This, as has already been shown above, was held in old times as an outlying frontier-district of Kāśmīr as far down as BOLYĀ-SAKA, the present Buliāsa. Beyond this point it was occupied by Khaśas. In Muhammadan times the valley was divided between several petty chiefs of the Khakha and Bomba clans who seem to have acknowledged as their nominal head the Khakha Rājā of Muẓaffarābād. The portion of the valley between Muẓaffarābād and Buliāsa bore the old name of DVĀRAVATĪ from which the modern designation of this tract, *Dvārbidī*, is derived (see above, § 53).

¹ Compare for the history of *Lohara* and its various localities, Note E, *Rājat.* iv. 177, reproduced in *Ind. Ant.*, 1897, pp. 225 sqq.

² See for details note iv. 18. Hiuen Tsiang's reference shows that the town of *Parṣotsa* must be older than the time of Lalitāditya to whom Kalhaṇa ascribes its foundation.

³ See note *Rājat.* vii. 1256.

83. Further to the west and beyond the course of the Vitastā after its great bend, lay the ancient kingdom of Uraśā.¹ Its greatest part is comprised in the British district of Hazāra, between the Vitastā and Indus. It is the *Oḡapora* or *ʿApora* of Ptolemy; its ruler figures as *Arsakes* in the accounts of Alexander's campaigns. Hiuen Tsiang mentions the territory by the name of *Wu-lu-shi* and found it tributary to Kāśmīr. Though this dependence seems soon to have ceased we find Uraśā often referred to in the Rājatarāṅgiṇī. The account of Śaṃkaravarman's ill-fated expedition in this direction furnishes us with a clue as to the position of the old capital of Uraśā. It probably lay between the present Mansahra and Abbottabad.² Kalhana's notice of an expedition undertaken in his own time mentions in Uraśā the town of *ATRUGRAPURA*.³ I have shown in my note on the passage that this locality is probably represented by the modern *Agrōr*, situated on the border of Hazāra towards the 'Black Mountains.' We have an intermediary form of the name in Ptolemy's *Ἰθαγοῦρος*, given as the designation of a town in Uarsa or Arsa north of Taxila.

In Muhammadan times Uraśā was included in the region known as Pakhli. This is defined by Abū-l-Faẓl as comprising the whole of the hill territory between Kāśmīr in the east and the Indus on the west.⁴ To Pakhli belonged also the lower valley of the Kiṣangaṅgā and the valleys of the streams which flow into the latter from the Kājnāg Range and the mountains to the north-west of Kāśmīr.

This tract which is now known as *Karnau*, bore the old name of **Kiṣangaṅgā Valley.** *KARNAHA.* It seems to have been held by small chiefs nominally tributary to Kāśmīr even in later Hindu times.⁵ It is but rarely mentioned in the Chronicle. The inhabitants were *Khaśas*,⁶ who are represented by the modern Bomba clans still holding *Karnau*. Their Rājās were practically independent till the Sikh conquest and often harried the north-western parts of Kāśmīr.⁷ The last irruption of the *Karnat Bombas* and their allies, the *Khakha* chiefs of the Vitastā Valley, occurred as late as 1846.

¹ For a detailed synopsis of the old notices, see *Rājat.* v. 217 note.

² See *Rājat.* v. 217 note and CUNNINGHAM, *Anc. Geogr.*, p. 104.

³ Compare note viii. 3402.

⁴ See *Āin-i-Akb.*, ii. pp. 390 sq.

⁵ Compare *Rājat.* viii. 2485 note.

⁶ See viii. 2756, 3006, 3088.

⁷ Compare for the modern *Karnau*, BATES, *Gazetteer*, p. 228.

The valley of the *Kiṣangaṅgā* above its junction with the *Karnau* river and as far as *Sardi*, forms a separate tract known as *Drāva*. This is possibly the *DURĀṆPA* mentioned in a passage of *Kaḥaṇa's Chronicle*.¹ The northernmost portion of the tract seems to have been a dependency of *Kaśmīr* even during the later Hindu reigns. At *Ṣardi* we find the shrine of *Śārādā*, one of the most sacred *Tīrthas* of old *Kaśmīr*. To this as well as an old feudal stronghold in its neighbourhood we shall have occasion to refer thereafter (§ 127).

Through *Sardi* leads a route to *Cilās* on the *Indus*. But this territory as well as the other portions of the Upper *Indus Valley* lay apparently quite beyond the sphere of *Kaśmīr* political influence. Hence we meet nowhere in the *Chronicles* with their ancient names.

84. Immediately above *Sardi* the valley of the *Kiṣangaṅgā* turns, as we have seen, into a narrow uninhabited gorge. At the other end of this gorge we reach the territory of the *Darads*. Their settlements on the Upper *Kiṣangaṅgā* and its tributaries seem to have formed a separate little kingdom, called by a general name *DARADDEŚA* in the *Chronicle*.² Its inhabitants who bore Hindu names, more than once attempted invasions of *Kaśmīr*. *DARATPURI*, 'the town of the *Darads*,' which was the capital of their chiefs, may have occupied the position of the modern *Gurēz* (map 'Gorais').³ The latter is the chief place of the valley where the *Nawābs* governing it till the *Sikh* conquest resided. The 'Mleccha' chiefs who on two occasions figure as the *Darad Rājās*' allies from the north, were perhaps rulers of other *Darad* tribes further towards the *Indus* who had early been converted to *Islām*.⁴

Crossing from the head-waters of the *Kiṣangaṅgā* to those of the *Drās River* we arrive in high-level valleys inhabited by people of Tibetan race and language, the *Bhautṭas* of the *Chronicles*. The *Rājatarāṅgiṇī* tells us nothing of the political organization or topography of the *Bhautṭa* territories. It is, however, possible that we have a reference to *Leh*, the capital of *Ladākh*, in the "foreign country called *Loḥ*," which *Kaḥaṇa* names in iii. 10.

Nor do the later *Chronicles* supply us with any details in this direction, though the several invasions which *Kaśmīr* suffered from this side give *Jonarāja* and *Śrīvara* occasion to refer more frequently to the *Bhautṭas* and their rulers. It may, however be noted that *Śrīvara*

¹ See viii. 2709 note.

² Compare *Rājat.* vii. 911; for other references to the *Darads*, i. 312 note.

³ See vii. 911 note.

⁴ See viii. 2762 note.

already knows the terms 'Little and Great Bhūtṭa-land.'¹ They refer to Baltistān (Skardo) and Ladākh which have continued to be known to the present day as 'Little and Great Tibet,' or among Kāsmīris as *Lukh Buṭun* and *Buḍ Buṭun*.² These terms are in fact of a far older date, as they are found already in the Chinese Annals as *Little and Great Poliu*.³

The eastern frontier of Kāsmīr is, as we have seen, formed by a mountain range which runs from the Zōjī-Lā almost due south towards Kaṣṭāvār. Along this range on the east lies a long narrow valley marked as Maru-Wardwan on the map (in Kāsmīrī *Maḍivāḍvan*). It is drained by a large river which joins the Cināb near the town of Kaṣṭāvār. Owing to its high elevation and the rigours of its climate it is inhabited only by a scanty population. According to Mr. Drew's race map and other authorities, this consists now chiefly of Kāsmīris. Whether this was already the case in old times, is uncertain. The Valley is nowhere mentioned in our old Kāsmīrian texts.⁴ It is hence doubtful whether it belonged to Kāsmīr territory in Hindu times. Yet Abū-l-Faḍl counts it among the Parganas of Kāsmīr.⁵ Beyond it to the east stretches an uninhabited belt of high mountains and glaciers, dividing Maḍivāḍvan from the Tibetan tracts of Sūru and Zauskar. To the south we reach once more the territory of Kāṣṭhavāṭa from which our present survey has started.

¹ See *S'riv.* iii 445 (*Sūksmabṛhadbhūtṭadesan*).

² *Buṭun* (connected with the ethnic term *Buṭ* < Bhautṭa; see above, § 58), is the Kāsmīrī term for Tibet in general.

³ Compare A. RÉMUSAT, *Nouveaux mélanges asiatiques*, i. p. 194; and SIR H. YULE, *Cathay*, p. lxx.

⁴ The *Trisaṃdhyāmāhātmya* which refers to the Valley as *Maḍavātīra*, cannot claim any particular antiquity.

⁵ See *Ām-i-Akb.*, ii. p. 369.

SECTION II.—ANCIENT POLITICAL DIVISIONS.

85. The Valley of Kaśmīr to which we may now return has from early times been divided into two great parts, known by their modern names as *Kamrāz* and *Marāz*. These terms are derived from Skr. KRAMARĀJYA and MAPAVARĀJYA, which are found very frequently in the Rājatarāṅgiṇī as well as the later Chronicles.¹ The original form of the modern Kamrāz was known to the tradition of the Śrinagar Paṇḍits generally. With the old name Maḍavarājya, however, I found only those few acquainted who, like the late Paṇḍit Dāmodara and Paṇḍit Govind Kaul, had specially studied Kalhaṇa's Chronicle.

According to the generally prevailing notion Marāz comprises the districts on both sides of the Vitastā above Śrinagar, and Kamrāz those below. The present tradition places the boundary of the two great divisions more accurately at the Shērgarhi palace. That the boundary was already in old times indicated by a line drawn through the capital is easily proved by an examination of all passages in the Rājatarāṅgiṇī and other Chronicles naming Maḍavarājya and Kramarājya. They invariably show localities situated above Śrinagar in the former and those below in the latter division.

We arrive at the same result on a reference to the Āin-i Akbarī. Abū-l-Faẓl distinctly informs us that "the whole kingdom was divided under its ancient rulers into two divisions, *Marāj* on the east and *Kamrāj* on the west."² He then proceeds to tabulate the thirty-eight Pargaṇas into which Kaśmīr was divided under Akbar's administration, separately under the two main-heads of Marāj and Kamrāj. The city of Śrinagar is counted with the former, and so are also all Pargaṇas above the capital, while those below are shown in Kamrāj.

The term of Kamrāz has in modern times occasionally been used also in a more restricted sense, for the designation of the Pargaṇas to the west and north-west of the Volur lake. This usage probably arose from the fact that at various periods several of the small Pargaṇas in this portion of the Valley were for administrative purposes grouped together in one Pargaṇa, to which the name Kamrāz was given.³ This

¹ See my note on *Rājat.* ii. 15.

² Compare *Āin-i Akb.*, ii. p. 368.

³ Thus Abū-l-Faẓl's table seems to show that in Akbar's time the old Pargaṇas of Uttar, Lolau, Hamal and Maḥipūr were embodied in the large Pargaṇa of 'Kamrāj'; see *Āin-i Akb.*, ii. p. 371. In Moorcroft's and Baron Hügel's list the Pargaṇa Kamrāj includes Uttar, Hamal and Maḥipūr. Owing to the frequent changes

circumstance explains the different accounts referred to by Prof. Bühler in his note on the term Kramarājya.¹

Though the terms Maḍavarājya and Kramarājya are so often employed in the Chronicles, we have no distinct evidence of the two divisions having in Hindu times formed separate administrative units or provinces. It is possible that this was the case at one or the other period. But Abū-l-Faẓl's account as well as the usage traceable from his time to the present day show that the terms in their popular geographical significance could maintain themselves quite independently of actual administrative divisions.²

86. The whole of the Valley has from an early date been subdivided for administrative purposes into a considerable number of small districts known in recent times as 'Pargaṇas.' Their ancient designation was *viṣaya*.³ The number, names and limits of these subdivisions have been subject to considerable variations during the period over which our documents extend.

The great majority of the Pargaṇas known in recent times can be safely assumed to have existed already during the Hindu rule. This is proved by the fact that the names of numerous Pargaṇas are found in their ancient forms already in the Rājatarāṅgiṇī and the other Chronicles. But these texts do not furnish us anywhere with a complete list of the Pargaṇas. It is hence impossible for us to restore in full detail the map of the administrative sub-divisions for any particular epoch

of the Pargaṇa divisions (see below) the extent of the 'Pargaṇa Kamrāj' has also varied from time to time.

¹ See *Report*, p. 11.

² The only trace I can find of a general division of Kaśmīr other than that into Maḍavarājya and Kramarājya, is contained in an unfortunately corrupt and fragmentary passage of the Lokaprakāśa, iv. It seems to divide the twenty-seven Viṣayas or Pargaṇas of Kaśmīr (see below) into three tracts, viz. (i) *Kramarājya* from Khōyāsramika onwards (Khuyā²hōm, the old Khūyāsrama is meant); (ii) *Madhyamarājya* from the Cānūlā [river ?] to Lahara or Lār; (iii) *Maḍavarājya* from *Srīvantaka* (?).

The text is in a deplorable condition and the explanation of Cānūlā and Srīvantaka quite uncertain. The former may be the river of doubtful name and identity referred to in Rājat. note v. 109. It appears as if at the time to which the Lokaprakāśa's notice goes back, an intermediate slice of territory had been formed between Kramarājya and Maḍavarājya and dubbed *Madhyamarājya* 'the middle province.' Five thousand villages out of the 66,063 with which the text credits Kaśmīr, are attributed to this intermediate division.

³ Compare for the term *viṣaya* Rājat. v. 51; viii. 1260, 1413, 2697.

The expression Pargaṇa may have been introduced by the Mughal administration. Its Skr. original **puragaṇa* is not found in the Chronicles.

during Hindu times. The Lokaprakāśa, it is true, tells us of the division of Kasmīr into twenty-seven Viṣayas and enumerates some nineteen of the latter. But several of the names are so corrupt as to be beyond recognition, while others bear a distinctly modern look. In any case it is impossible to fix the date to which this notice may belong or to judge of its authenticity.¹

Abū-l-Faẓl's account is the first which presents us with a systematic statement of Kasmīr Parganas. It is of special interest because it shows us how their list could be increased or re-adjusted within certain limits according to fiscal requirements or administrative fancies. The return of Āsaf Khān reproduced by Abū-l-Faẓl shows thirty-eight Parganas, while the earlier one of Qāẓi 'Alī contained forty-one. The difference is accounted for by the amalgamation of some and the splitting-up of other Parganas. The Parganas varied greatly in size, as shown by the striking contrasts in the revenue-assessments. Thus, *e.g.*, Paṭan was assessed at circ. 5300 Kharwārs, while the revenue from 'Kamraj' amounted to 446,500 Kharwārs.

The number of Parganas had changed but little during Mughal and Paṭhān times. For the Sikhs on their conquest of the Valley seem to have found thirty-six as the accepted traditional number. But there had been various changes in the names and extent of these Parganas. These changes became still more frequent under the Sikh administration, as is seen by a comparison of the lists given by Moorecroft (1823), Baron Hügel (1835) and Vigne (circ. 1840). They all show a total of thirty-six Parganas but vary among themselves in the names of individual Parganas.

These frequent changes and redistributions of the Parganas continued during Dogrā Rule. The most accurate list I am able to refer to for this most recent period, is that given by Major Bates. It shows a total of forty-three Parganas for the year 1865.² Subsequent reforms introduced Tahsils after the fashion of British provinces with a view to reducing the number of sub-divisions. The latest list shows eleven Tahsils.³ In their constitution little regard was paid to the historical divisions of the country. Fortunately, however, Kasmīrīs are as con-

¹ Of the Lokaprakāśa's Viṣayas *Khoyāśramī*, *Samālā*, *Laharī*, *Aulaḍīya*, *Nilāśa*, *Khaḍvīya* correspond clearly to the *Khūyāśrama*, *Samālā*, *Lahara*, *Holaḍī*, *Nilāśva*, *Khaḍvī* of the *Rājatarāṅgiṇī*. *Ekena*, *Devasūvī* may possibly be corruptions for *Evenaka* and *Devasarasa*. *Krodhana*, *Dvāvimśatī*, *Bhrīga*, *Phāgvā* probably represent the modern Parganas of *Kruhān*, *Dūntg*, *Bring*, *Phākh*. *Čālana*, *Vitasthā*, *Satrava*, *Svanavāri*, *Nīlā*, *Hārī*, *Jalahaḍīya*, are quite uncertain.

² See *Gazetteer*, p. 2 sqq.

³ Compare the sketch-map attached to MR. LAWRENCE'S *Valley*.

servative in their topographical nomenclature as in many other matters. The old Pargana names are hence still in ordinary use and likely to remain so for some time to come.¹

The absence of a complete list of Parganas for an earlier period and the changes in their constitution during more recent times make a systematic exposition of the ancient territorial divisions impracticable. In a separate note I have given a comparative table of the Pargana lists we possess since Akbar's time. There too I have indicated the ancient equivalents of the Pargana names, as far as they can be traced in the Sanskrit Chronicles.² We shall have occasion to refer to these names and their history in the course of our detailed survey of ancient localities in the Valley.

87. The large number of administrative sub-divisions which as we have seen goes back to an early date, may be taken as an indication of the dense population then occupying the Valley. We have no means of forming any accurate estimate as to the number of the population which the country contained in Hindu times. But there is every reason to believe that even at a later period it was far larger than at the present day. The existence of a very great number of deserted village-sites, in all parts of the country, the remains already alluded to of a far more extended system of irrigation, the number of great temple ruins, and the uniform tradition of the people,—all point to the same conclusion.

The present century has witnessed in Kashmīr a series of appalling famines and epidemics, which wrought terrible havoc in the mass of the rural population particularly. The last famine, 1878-79, alone is supposed to have removed three-fifth of the population from the Valley.³ The political vicissitudes of the first half of the century had a baneful influence on the economical condition of Kashmīr and brought about an extensive emigration both among the industrial and agriculturist classes. Notwithstanding all these trials the population which in 1835 was estimated at about 200,000 souls, had risen to 814,000 according to the census of 1891.

These figures indicate great powers of recuperation. Yet it is held by competent judges that the present agricultural population is by no means sufficient even for the land actually under cultivation. It would hence manifestly be hazardous to make any guess as to the numbers

¹ The Survey of India maps indicates the approximate extent of the Parganas recognized in the fifties.

² See Supplementary Note BB.

³ Compare for this and other statistical details Mr. LAWRENCE'S *Valley*, p. 223 sqq.

which the country might have supported in the most prosperous times of Hindu rule.

The fact of Kaśmīr having possessed a far greater population in ancient times helps to explain the curious traditional verse which puts the number of villages of Kaśmīr at 66,063. The verse is found twice in the Lokaprakāśa and still lives in the oral tradition of the Brahmans throughout the Valley. It has been reproduced from the latter in Paṇḍit Sāhibrām's Tirthasaṃgraha.¹ That it can claim some antiquity is evident from the allusion made to the number in Jonarāja's Chronicle.²

Though that figure must have at all times implied a considerable exaggeration, it is nevertheless characteristic of the popular notion on the subject. Even Sharifu-d-dīn whose information, collected about A.D. 1400, is generally accurate and matter-of-fact, records: "It is popularly believed that in the whole of the province—plains and mountains together—are comprised 100,000 villages. The land is thickly inhabited."³ It is curious that Mirzā Ḥaidar who had ruled Kaśmīr himself copies this statement without modification or dissent.

SECTION III.—THE OLD AND NEW CAPITALS.

88. The ancient divisions of Kramarājya and Maḍavarājya are separated by a line drawn through Srinagar. This fact as well as the great historical interest attaching to Srinagar as the capital of the country make it the convenient starting-point for our survey. The history of Kaśmīr has always been reflected as it were in that of its capital. The site of the latter has not changed for more than thirteen centuries. It is thus easy to account for the ample historical data which enable us to restore in great part the ancient topography of Srinagar and to trace back the city's history to the time of its foundation.

Hiuen Tsiang who visited the Kaśmīr capital about A.D. 631, and whose record is the earliest we possess, found Srinagara in the position of the present Srinagar. He describes it as situated along the

¹ *Ṣaṣṭir grāmasahasrāṇi ṣaṣṭir grāmasatāni ca ṣaṣṭir grāmās trayo grāmā hyetat Kaśmīramanḍalam* ||; comp. Lokaprakāśa, *Ind. Studien*, xviii. p. 375.

² See Jonar. (Bo. ed.), 153.

³ See *Tārīkh-i-Rashidī*, p. 430. Ritter who reproduces the passage of the Zafarnāma from De la Croix's translation, shows the number of villages as 10,000; see *Asien*, ii. p. 1123. It may be noted in passing that according to the Census of 1891 the number of villages in Kaśmīr was then reckoned at 2870.

east bank of a great river, *i.e.* the Vitastā, 12 or 13 *li* long from north to south and 4 or 5 *li* broad from east to west. About 10 *li* to the south-east of this, "the new city," the pilgrim notices a Buddhist convent which lay between a high mountain on the north and the site of 'the old city' on the south.

It is the merit of General Cunningham to have first recognized that the situation here indicated for the new capital of Hiuen Tsiang's time corresponds exactly to that of the modern Srinagar.¹ A glance at the map shows that the position and dimensions ascribed by Hiuen Tsiang to the new city apply closely to that part of Srinagar which occupies the right or eastern riverbank, and which, as we shall see, forms the older portion of the city. The two and a half miles represented by the 12 or 13 *li* of the Chinese measurement, agree accurately with the length of the city within its ancient limits along the eastern bank of the Vitastā. The estimate of its breadth at somewhat less than one mile (4 or 5 *li*) is equally correct.

89. The position of 'the old city' is marked by the present village of *Pāndrēthan* which derives its name from **Purāṇādhiṣṭhāna**. the appellation **PURĀṆĀDHISTHĀNA**, meaning 'the Old Capital.' It lies to the south-east of Srinagar just as Hiuen Tsiang says, at the south foot of a mountain spur which rises with bold slopes to a height of about 3000 feet above the village. Measured from the nearest point of old Srinagar, the distance to the presumptive site of the monastery between Pāndrēthan and the steep hill-side is exactly two miles or 10 *li*.

The history of 'the Old Capital' is so closely connected with that of Srinagara that it will be useful to acquaint ourselves first with the data bearing upon it. The name of **PURĀṆĀDHISTHĀNA** meets us first in Kalhana's account of the reign of King Pravarasena I. (or Sreṣṭhasena) who is said to have erected there a shrine known as that of *Siva Pravareśvara*.² At the beginning of the tenth century the minister Meruvardhana built at Purāṇādhiṣṭhāna a Viṣṇu temple called after his own name. This has been rightly identified by General Cunningham with the well-preserved little temple which still stands in the village of Pāndrēthan and has often been described by European travellers.³

¹ Gen. CUNNINGHAM's identification was first indicated in his paper on the architecture of Kāśmīr temples, *J. A. S. B.*, 1848, p. 283. For a fuller account, see *Anc. Geogr.*, pp. 93 sqq.

² See *Rājat.* iii. 99 note, where detailed references have been given regarding the site.

³ See v. 267 note, also for descriptions of the temple.

Even in Kalhaṇa's own time pious foundations are recorded at this ancient site.

The identity of Pāṇḍrēthan with the site named in the Chronicle as 'the Old Capital' is proved by ample evidence. It is indicated in the old gloss on Rājat. v. 267 and is still known to Paṇḍit tradition. Śrīvara in describing the flight of some troops which had been defeated in Śrinagar and were retiring along the Vitastā to the east, speaks of the road from the Samudrāmaṭha (Sud^{*}rmar on the right bank of the river near the second bridge) to *Pūrvādhiṣṭhāna* as covered with the corpses of the slain.¹ It is clear that by the latter designation which also means 'the Old Capital,' he refers to our present Pāṇḍrēthan. This name itself is the direct phonetic derivative of *Purānādhiṣṭhāna*.²

90. General Cunningham has assumed that 'the Old Capital' marked by the site of Pāṇḍrēthan was in **Aśoka's Śrinagari**. reality the ancient ŚRINAGARĪ which Kalhaṇa mentions as the capital founded by the great Aśoka.³ His assumption was based on another passage of the Chronicle which mentions the foundation of the shrine of Jyeṣṭharudra at Śrinagari by Jalauka, the son of Aśoka. General Cunningham thought he could recognize this shrine in the extant temple on the top of the Takht-i Sulaimān hill, below which at a distance of about one and a half miles Pāṇḍrēthan is situated.

I have shown in my note on the passage that no reliance can be placed on the alleged tradition which General Cunningham had adduced as the sole proof of his location of the shrine. Yet at the same time the evidence recorded by me proves that Jyeṣṭharudra must have been worshipped either on the hill itself or in its close vicinity. Accordingly Aśoka's Śrinagari may safely be looked for in the same neighbourhood. Our present data do not allow us to decide with absolute certainty whether its site was at Pāṇḍrēthan or elsewhere. But there are at least sufficient indications to make General Cunningham's view appear very tempting and probable.

¹ See *Śiv.* iv. 290.

² The Kś. derivative of Skr. *Purāṇa* is *prāṇ*^{*} 'old'; this forms, with assimilation of the initial double consonant, the first part, *Pān*-, of the modern name. The elision of the second *ā* in the assumed intermediary form *P[*u*]rān[*ā*]dēthan is accounted for by the influence of the stress accent which lies on the second syllable of the modern name. The development of the combination *nd* into *nḍr* is paralleled by similar cases in other Indo-Aryan Vernaculars; comp. DR. GRIERSON, *Phonology of Indo-Aryan Vernaculars*, *Z.D.M.G.*, i. p. 37, § 115. The nazalisation of *ē* may be of recent date, as the old gloss of A₂ on Rājat. v. 267 shows the name as *Pāṇyḍrēthan*, i. e. *Pāṇⁱdrethan*.

³ See Note C, i. 124.

There is in the first place the significant name *Purāṇādhiṣṭhāna*, 'the Old Capital,' which shows that the site of Pāndrēthan must have once been occupied by an important city. Next it is to be noted that Kalhana's narrative knows nothing of any other capital which might have been founded in this vicinity previous to the new capital built by Pravarasena II. on the site of the present Srinagar. Lastly we have an indication in the very name *Srinagara* which Pravarasena's city has come to bear in general usage instead of its proper and official designation *Pravarapura*.

If Aśoka's Srinagarī actually lay at or near the present Pāndrēthan the transfer of its name to the new capital is most readily accounted for. General Cunningham already has rightly pointed out the numerous analogies for such a transfer furnished by the history of other Indian capitals.¹ Pravarasena's city was practically contiguous to the older Srinagarī and existed for centuries side by side with it. We can hence easily understand that popular usage retained for the new capital the old familiar designation.² Exactly in the same way the several new cities founded by successive kings in the vicinity of Delhi all continued to be known simply by the name "Delhi," though each of them was originally intended to bear the distinctive name of its founder.

Though Purāṇādhiṣṭhāna had sunk to small importance already in Hindu times, extensive remains of ancient buildings can still be traced on the terraced slopes rising immediately to the north and north-east of Pāndrēthan. Foundations of old walls, carved slabs, and architectural fragments cover the foot of the hill-side for about one and a half miles. Broken Liṅgas of colossal dimensions are scattered among them. All the remains above ground, however, are far too much decayed to permit of a distinction of individual structures.³

The advantages of Pāndrēthan as the site for a great city cannot be compared with those offered by the position of Srinagar. Yet the close vicinity of the Vitastā, coupled with the security from floods which the near hill-slopes afford, must have been appreciated in an earlier

¹ See *Anc. Geogr.*, pp. 97 sq.

² The feminine form *Srinagarī* is used also for the new capital; comp. *Rājat.* i. 104 note. There is thus no difference in the name as applied to both Aśoka's and Pravarasena's cities. *Srinagara* or *Srinagarī* means the "City of Śrī", i.e. of Lakṣmī, the Goddess of Fortune. For a whimsical etymology of European growth, which has turned Srinagar into the "City of the Sun", see above § 4, note.

³ Compare for an account of these ruins, CUNNINGHAM, *J. A. S. B.*, 1848, pp. 283 sq., *Anc. Geogr.* 95 sq. [The remarks made in the latter place as to the supposed cause of the desertion of Purāṇādhiṣṭhāna rest on a misinterpretation of certain Rājatarāṅgiṇī passages. The reconstruction of an alleged 'Pravareśvara symbol' at Pāndrēthan, *J. A. S. B.*, 1848, pp. 324 sq., is also unsupported by evidence.]

period when probably the riveraine flats of the valley were less drained. The small semi-circular glens which are formed between projecting spurs both north and east of the present village, with their gentle slopes offer convenient building sites. The fertile shores of the Dal are also within easy reach of Pāndrēthan through the gap in the hill-range which separates the Takht-i Sulaimān hill from the greater heights to the east. It is probably in this direction that we have to look for the Saṅghārāma mentioned by Hiuen Tsiang in connection with 'the old city.'

91. Kalhaṇa's Chronicle furnishes us with a full account of the origin of the new city which was the capital of the Kaśmīr in his time and destined to remain so to the present day.¹ Kalhaṇa attributes the foundation of this capital to King Pravarasena II. The topographical details of his description make it clear beyond all doubt that its site was that of the present Srinagar.

The identity of the latter with Pravarasena's town was duly recognized by General Cunningham who referred to the close agreement between the general features of Kalhaṇa's description and the situation of the present capital. He also pointed out that Kalhaṇa distinctly mentions as one of the pious buildings founded in Pravarasena's city that very *Jayendravīhāra* in which Hiuen Tsiang resided during his long stay in the Kaśmīr capital.² Subsequently Professor Bühler noticed the survival of several old local names for parts of the modern city which also prove its identity with Pravarasena's capital.³ The most convincing evidence, however, is contained in the long list of ancient buildings and localities which Kalhaṇa mentions in Pravarasena's town. In the course of our survey we shall be able to identify many of them within the modern Srinagar and its environs.

The attribution of this new capital to King Pravarasena rests on equally strong proof. Through a chain of references extending over nearly twelve centuries we can trace the use of the name PRAVARAPURA, shortened (*bhīmaavat*) for *Pravarasenapura*, as the official and correct designation of the city occupying the site of the present Srinagar. We have found this appellation already in the record of the T'ang Annals going back to the commencement of the eighth century. It is also found in the works of Kṣemendra, Bilhaṇa, and numerous other Kaśmīrian authors. It has continued to be used to the present day in colophons of Sanskrit Manuscripts, in horoscopes and similar documents.⁴

¹ See *Rājat.* iii. 336-363.

² See *Anc. Geogr.*, p. 97; also *Rājat.* iii. 355 note.

³ Compare *Report*, p. 16.

⁴ For detailed references see my note *Rājat.* iii. 339-349. *Śrī-Pravarapura* for

The date of King Pravarasena II. whose name the above designation of the new capital was intended to preserve, cannot be fixed with accuracy. Various historical and numismatic indications, however, make it probable that he ruled at some period of the 6th century. Thus we can easily understand that at the time of Hiuen Tsiang's visit (A.D. 631) Śrinagara or Pravarapura was still the 'new city.'

92. The traditional account of the foundation of Pravarapura as recorded by Kalhaṇa is of considerable interest. Though largely interwoven with legendary matter it preserves for us a series of exact topographical data. Kalhaṇa's story is contained in verses 336-349 of the Third Book, and runs briefly as follows.¹

When King Pravarasena II. had returned from his victorious expeditions abroad, he desired to found a new capital which was to bear his name. He was then residing in the city of his grandfather Pravarasena I., i.e., in Purāṇādhiṣṭhāna.² From there the king went forth at night in order, as the text says, "to ascertain in a supernatural way the proper site and the auspicious time for the foundation of the new city." On his way he reached a stream which skirted a burning ground, and was illuminated by the glow of funeral pyres. Then on the other bank of the stream there appeared to him a demon of terrible form. Promising him fulfilment of his desire, the demon invited the king to cross over to his own side by the embankment he was preparing for him. Thereupon "the Rākṣasa stretched out his own knee from the other bank, and thus caused the water of the Mahāsarit to be parted by an embankment (Setu)." The courageous Pravarasena drew out his dagger (*kṣurikā*), cut with it steps into the flesh of the Rākṣasa, and thus crossed over to the place which has since been known as *Kṣurikābala*. The demon then indicated to him the auspicious time and disappeared, after telling him to build his town where he would see the measuring line laid down in the morning. This line (*sūtra*) of the Vetāla the king eventually discovered "at the village of *Sārītaka* at which the goddess *Sārikū* and the demon *Aṭṭa* resided." There he built his city in which the first shrine erected was the famous one of *Siva Pravareśvara*.

Śripravarasenapura is often written in the abbreviated form *Śrīpre* in the formulas of the Lokaprakāśa, almanacs, etc. Kalhaṇa often uses the simple *Pura* for Pravarapura and *Nagara* for Śrinagara.

¹ For all detailed references in connection with this story, note iii. 339-349 should be consulted.

² That *Purāṇādhiṣṭhāna* is meant is proved by iii. 99. There Kalhaṇa, speaking of a foundation of Pravarasena I. in his capital, by a kind of anachronism uses the designation of *Purāṇādhiṣṭhāna*.

Keeping in view the details of the ancient topography of Srinagar, we can still follow up step by step the localities by which the legend here related leads King Pravarasena to the site of his new city. We have already seen that the *Mahāsarit* is the stream now known as *Tsūṇṭh Kul* which flows from the *Ḍal* into the *Vitastā*. Near its confluence with the *Vitastā* which we have also found already mentioned as a *Tirtha*, there existed, until the times of Mahārāja Raṇbir Singh, a much frequented Hindu burning Ghāt. It was undoubtedly of ancient date. Kalhaṇa relates how the body of King Uccala, murdered in his palace at Srinagar, was hurriedly cremated at the burning place situated on the island at the confluence of the *Mahāsarit* and *Vitastā*.¹ It is certain that the island of *Māy*sum* (Skr. *Mākṣika-svāmin*) is meant here, at the western end of which the *Mahāsarit* or *Tsūṇṭh Kul* falls into the *Vitastā*.

The stream flowing from the *Ḍal* is bounded on its northern bank by an old embankment which stretches from the west foot of the *Takht-i Sulaimān* close to the high bank of the *Vitastā* near the Second Bridge. This embankment which is the most substantial at or around Srinagar and known only by the general designation of *Suth* (from Skr. *setu*), 'dyke,' is undoubtedly of very early date. It protects the whole of the low-lying portions of the city on the right river-bank as well as the floating gardens and shores of the *Ḍal* which would otherwise be exposed to annual inundations from the *Vitastā*. A tradition still heard by Mr. Vigne ascribed the construction of this embankment to King Pravarasena.² It is indeed evident that its construction was a necessary condition for the safety of the newly founded city.

Several topographical indications warrant the conclusion that it was this old dyke in which the popular legend recorded by Kalhaṇa recognized the leg and knee of the demon. A glance at the map shows that the eastern portion of the 'Suth' turns sharply at a right angle and thus curiously resembles a bent knee. *Kṣurikābala* was the name of the place where Pravarasena according to the legend was supposed to have reached firm ground after crossing the stream. I have shown that this name in the form of its Kāśmīrī derivative *Khuḍqabal* still attaches to the city quarter which lies at the western end of the *Suth*.³

Finally it will be seen from the map that Kalhaṇa's words regarding the 'Setu' dividing the waters of the *Mahāsarit*, describe exactly the present embankment which has on one side the *Tsūṇṭh Kul* and on the other side the various marshes and canals fed by the *Mār*. It

¹ See viii. 339.

² See VIGNE, *Travels*, ii. p. 69.

³ See note iii. 339-349.

has been shown above that this second outflow of the Dal also shared the old name of *Mahāsarit*.¹

93. The name of the village *Sārītaka* where the demon showed to the king the proper site for his city, has long ago disappeared. Its position, however, is sufficiently marked by the mention of the goddess *Sārikā*. The latter, a form of *Durgā*, has since ancient times been worshipped on the hill which rises to the north of the central part of *Srinagar* and is still called after her. The modern name of the hill, *Hārāparvat*, is the regular phonetic derivative of *Skr. Sārikāparvata*. By this name it is designated in the latter *Chronicles* and *Māhātmyas*.²

Another passage of the *Rājatarāṅgiṇī* shows that the term *Vetālasūtrapāta*, 'the demon's measuring line,' clearly connected with the above legend, was also in later times applied to the limits of the oldest part of *Pravarapura*.³ But our materials do not enable us to ascertain these limits in detail. *Kalhana* it is true, has not failed to specify them, as he mentions the temples of *Vardhanasvāmin* and *Viśvakarman* as marking the extreme ends of *Pravarasena's* city⁴. Unfortunately the position of neither of these structures can now be traced.

So much, however, is clear that the new city was at first confined to the right bank of the river. *Kalhana* tells this distinctly,⁵ and those sites and structures which he particularly mentions in his description of *Pravarasena's* capital, are all found as far as they can be identified, on the right bank. The account of *Hsien Tsiang* and the *T'ang Annals* show that even in the 7th century *Pravarapura* extended mainly along the eastern bank of the river.⁶

Kalhana follows up his account of the foundation of the city with a brief description of its splendours⁷. He notes the extravagant story of its having once counted thirty-six lakhs of houses, and

Kalhana's description of Pravarapura.

¹ Compare § 65.

² See note iii. 339-349. *Hārā* is the *Kaśmīrī* name of the goddess *Sārikā* as well as of the *Sārikā* bird (*Maina*); comp. *BÜHLER, Report*, pp. 16 sq.

Panjābis and other foreign visitors from India have by a popular etymology turned the 'Hill of *Sārikā*' into the 'Hill of *Hari* (*Viṣṇu*)' or the 'Verdant Hill.' The latter interpretation could be justified only on the principle of *lucus a non lucendo*; for verdure is scarce indeed on the rocky faces of the *Sārikāparvata*. *DR. BERNIER* already, *Travels*, p. 398, was told this popular etymology, probably by his friends from Delhi.

⁴ iii. 357.

⁵ iii. 358.

⁶ See above, §§ 8, 10.

⁷ iii. 357-363.

refers to the regularly arranged markets with which its founder had provided it. The city of his own time still boasted of "mansions which reached to the clouds" built, no doubt, mostly of wood just as the mass of private houses in modern Srinagar.¹

When he mentions "the streams meeting, pure and lovely, at pleasure-residences and near market streets," he means evidently the numerous canals from the Dal and Anchar lakes which intersect the suburbs and also pass through the heart of the city. They and the river still serve as the main thoroughfares for the market traffic, and all principal Bazars are built along their banks.² The Śārikāparvata receives due mention as "the pleasure-hill from which the splendour of all the houses is visible as if from the sky." Nor does he forget to praise the cool water of the Vitastā which the citizens find before their very houses on hot summer-days.

Finally he refers to the abundance of magnificent temples with which successive kings had adorned Pravarapura, and of which so many are particularly mentioned in his narrative. Of the number and imposing appearance of these structures we can even at the present day form some idea if we examine their massive remains which meet us in every part of modern Srinagar. The high embankments which now line the river's course within the city, are mainly composed of carved slabs, columns and other ancient stone materials. Their profusion and imposing dimensions must even to a superficial observer suggest an idea of the architectural splendour of ancient Srinagar.

94. It can scarcely be the result of chance that Pravarasena's city has escaped the fate of so many Indian capitals, of being superseded by later foundations.

Advantages of the site of Srinagar.

There had indeed not been wanting attempts on the part of later rulers to transfer the capital to other sites which they had chosen for their own cities. The great Lalitāditya, then Jayāpīḍa, Avantivarman,

¹ Both Mirzā Haidar and Abū-l-Faẓl speak with admiration of the many lofty houses of Srinagar, built of pine wood. This material was used, then as now, as being cheap and more secure against earthquakes. According to Mirzā Haidar "most of these houses are at least five stories high and each story contains apartments, halls, galleries and towers" (*Tārīkh-i-Rashīdī*, p. 425). That the mass of private dwellings in Srinagar were already in Hindu times constructed of wood, is shown by *Rājat*. viii. 2390. The many disastrous fires recorded point to the same conclusion.

² Useful and convenient as these canals undoubtedly are, it is rather difficult to concede to them now the epithets of 'pure and lovely.' They add, however, greatly to the picturesqueness of the city and certainly make the want of carriage roads less felt.

and Śaṃkaravarman, had successively endeavoured to effect this object. The great ruins of Parihāsapura, Jayapura and Avantipura show sufficiently that the failure of the first three kings was not due in any way to deficient means or want of purpose.

Of Lalitāditya the Chronicle distinctly records that he proposed, Nero-like, to burn down the ancient capital to assure the predominance of his own creation, Parihāsapura. And the long list of splendid edifices erected at the latter place during his own reign shows plainly that for a time at least that monarch's pleasure had succeeded. Yet each one of these temporary capitals speedily sank into insignificance, while Pravarapura continued to be the political and cultural centre of Kāsmīr down to the present day.

We can safely attribute this exceptional position of Śrinagar to the great natural advantages of its site. Occupying a place close to the true centre of the Valley, Śrinagar enjoys facilities of communication which no other site could offer. The river along which the city is built provides at all seasons the most convenient route for trade and traffic, both up and down the Valley. The two lakes which flank Śrinagar, offer the same facilities for the fertile tracts which lie immediately to the north. The lakes themselves furnish an abundant supply of products which materially facilitate the maintenance of a large city population. The great trade route from Central Asia debouches through the Sind Valley only one short march from the capital.

Nor can we underrate the security which the position of Śrinagar

Natural defences of Śrinagar.

assures both against floods and armed attack. The neck of high ground which from the north stretches towards the Vitastā and separates the two lakes, is safe from all possible risk of flood. It is on this ground, round the foot of the Śārikā hill, that the greatest part of the old Pravarapura was originally built. The ancient embankment which connects this high level ground with the foot of the Takht-i-Sulaimān hill sufficed to secure also the low-lying wards fringing the marshes of the Dal. A considerable area, including the present quarters of Khān^ayār and Rānⁱvōr (Skr. *Rājānavāṭikā*), was thus added to the available building ground on the right bank and protected against all ordinary floods.

The frequent sieges which Śrinagar underwent during the last reigns related by Kalhaṇa, give us ample opportunity to appreciate also the military advantages which the city's position assured to its defenders. With the exception of a comparatively narrow neck of dry ground in the north, the Śrinagar of the right river-bank is guarded on all sides by water. On the south the river forms an impassable line of defence.

The east is secured by the Dal and the stream which flows from it. On the west there stretch the broad marches of the Anchār divided from the Vitastā by a narrow strip of firm ground.

From the north, it is true, the city can be approached without passing such natural obstacles. But the map shows that just to the north of the Śārikā hill inlets from the two lakes approach each other within a few thousand feet. The narrow passage left between them could at all times easily be guarded. It is curious to note that the successful attacks on the city of which the Chronicle tells us, were delivered from the north, treachery or the defenders' weakness having opened this passage.¹

The later and smaller portion of Śrīnagar occupying the left river-bank, does not share the same natural advantages as the old one. The present level of the ground on which it stands appears to have been raised gradually by the accumulated débris of centuries. We do not know exactly when the extension of the city in this direction began. The number of ancient sites on this side is comparatively small. The royal residence was transferred to it only in the reign of Ananta (A.D. 1028-63). There too we find a natural line of defence. It is the Kṣiptikā or Kuṭākul which flows round the western edge of this part of the city and is also often mentioned in the accounts of the later sieges.

SECTION IV.—ANCIENT SITES OF SRĪNAGARA.

95. Having thus reviewed the origin and the general position of the Kaśmir capital, we may proceed to a brief survey of the more important ancient sites which our available materials permit us to trace in it. We can conveniently start on our circuit from the Hill of ŚĀRIKĀ to which the legendary account of the city's foundation had taken us.

The goddess Śārikā which has given to the hill its name, has been worshipped since ancient times on the north-west side of the hill. Certain natural markings on a large perpendicular rock are taken by the pious to represent that kind of mystical diagram which in the Tantrasāstra is known as *Śrīcakra*.² This 'Svayambhū' Tirtha is still a much frequented pilgrimage place for the Brahmans of the city and has been so probably since early times.³ The Śārikāmāhātmya now in use relates

¹ Compare for Uccala's entry into Śrīnagar, vii. 1539 sqq.; that of Sussala, viii. 944 sqq.; compare also note viii. 1104-1110.

² Compare *Rājat.* note i. 122, regarding the worship of such diagrams.

³ Compare *Jonar.* (Bo. ed.) 472, 767.

that the hill was carried to its present position by Durgā who had taken the shape of a Sārikā bird. The goddess is supposed to have thus closed a gate of the Daityas dwelling in hell. This legend is alluded to already in the Kathāsaritsāgara.¹

Another ancient designation of the Hārāparvat is 'Hill of Pradyumna' (*Pradyumnapīṭha*, -*giri*, -*śikhara*, etc.), often found in the Chronicles and elsewhere.² The Kathāsaritsāgara accounts for the origin of this name by a story which connects the hill with the love of Uṣā and Aniruddha, the son of Pradyumna. Kalhaṇa mentions a Maṭha for Pāśnpatā mendicants which King Raṇāditya built on the hill. The eastern slopes of the latter are now occupied by extensive buildings connected with the famous Ziārats of Muqaddam Ṣāhib and Ākhūn Mullā Shāh. It is probable that these Muhammadan shrines have taken the place of Hindu religious buildings, as at so many old sites of Kashmir.

Close to the foot of the southern extremity of the hill lies a rock which has from ancient times received worship as an embodiment of Gaṇeśa, under the name of BHĪMASVĀMIN. A legend related by Kalhaṇa connects this 'Svayambhū' image with Pravarasena's foundation of Srinagar.³ From regard for the pious king the god is there said to have turned his face from west to east so as to behold the new city. The rock is covered by the worshippers with so thick a layer of red lead that it is not possible to trace now any resemblance to the head of the elephant-faced god, still less to see whether it is turned to the west or east. In fact, if we are to believe Jonarāja, the rock image has subsequently changed its position yet a second time. This Chronicler relates that Bhīmasvāmin from disgust at the iconoclasm of Sikandar Būtsbhikast has finally turned his back on the city.⁴ This last turn would, no doubt, most satisfactorily account for the present amorphous look of the sacred rock.

There is nothing in the Chronicles that would lead us to assume that the hill of Sārikā was ever fortified in Hindu times. The great bastioned stone-wall which now encloses the hill and the ground around its foot (Nāgar-nagar), was built by Akbar as an inscription still extant over the main-gate proclaims.⁵ The fort which now crowns the summit of the hill, is of even more modern origin.

¹ See lxxiii. 107 sqq.

² See *Rājat.* iii. 460 note.

³ See iii. 352 note.

⁴ See *Jonar.* (Ro. ed.), 766.

⁵ Compare Fourth Chron. 939 sqq.

96. A short distance to the south-east of the Bhimasvāmin rock, and outside Akbar's fortress, lies the Ziārat of Bahāu-d-dīn Ṣāhib, built undoubtedly with the materials of an ancient temple. The cemetery which surrounds it contains also many ancient remains in its tombs and walls. At the south-west corner of this cemetery rises a ruined gateway built of stone-blocks of remarkable size, and still of considerable height. This structure is traditionally believed by the Srinagar Paṇḍits to have belonged to the temple of Śiva PRAVAREŚVARA which Kalhaṇa mentions as the first shrine erected by Pravaraśena in his new capital.¹

An old legend related by Kalhaṇa and before him already by Bilhaṇa, makes the king ascend bodily to heaven from the temple of Pravareśvara. Bilhaṇa speaks of the temple as "showing to this day a gap above, resembling the gate of heaven through which King Pravara bodily ascended to heaven."² Kalhaṇa, writing a century later, also saw at the temple of Pravareśvara "a gate resembling the gate of heaven." Its broken stone roof was supposed to mark the king's passage on his way to Śiva's abode.

This tradition still attaches to the roofless stone-gate above described, which may indeed be the very structure seen by Bilhaṇa and the Chronicler. As far as its architecture is concerned, it might well belong to the earliest monuments of Srinagar. It owes its preservation perhaps to the exceptional solidity of its construction and the massiveness of its stones. Stone-blocks measuring up to sixteen feet in length with a width and thickness equally imposing were no convenient materials for the builders of Muhammadan Ziārats, Hammāms, etc., who have otherwise done so much to efface the remains of ancient structures in Srinagar. The position of the ruin is very central and might well have been chosen by the founder of Pravarapura for a prominent shrine in his new city.

Not far from Bahāu-d-dīn Ṣāhib's Ziārat to the south-west stands the Jāmi' Masjid, the greatest Mosque of Srinagar. Around it numerous ancient remains attest the former existence of Hindu temples. Proceeding still further to the south-west in the midst of a thickly built city quarter, we reach an ancient shrine which has remained in a comparatively fair state of preservation probably owing to its early conversion into a Ziārat. It is now supposed to mark the resting place of the saint styled Pir Ḥājī Muḥammad. It consists of an octa-

¹ See *Rajāt*. iii. 350 note.

² See *Vikram*, xviii. 23.

gonal cella of which the high basement and the side walls are still well-preserved. The quadrangular court in which it stands is enclosed by ancient walls and approached by ornamented gateways.

The position of this shrine has suggested to me its possible identity with the ancient temple of Viṣṇu RAṆASVĀMIN which Kalhaṇa mentions as founded by King Raṇāditya.¹ This temple must have enjoyed considerable celebrity till a comparatively late period. Maṅkha refers to it as an object of his father's devotion and Jonarāja in his comments on the passage speaks of Viṣṇu Raṇasvāmin as one of the chief shrines of Pravarapura.²

In his own Chronicle Jonarāja indicates this temple as the furthest point up to which Zainu-l-'ābidin carried the canal flowing through *Jainanagarī*.³ The latter locality corresponds to the Śrīnagar quarters of Sangīn Darwāza and Naushahr, and the canal itself is the one now known as *Lachām Kul*.⁴ It brings the waters of the Sind River *viā* Āmburhēr to the northern suburbs of Śrīnagar, and after flowing past the Jāmi' Masjīd empties itself into the Mār canal near the bridge called Kādī Kadāl. In the corner formed by the two canals stands the ruined temple above described. If it could be shown that the present termination of the *Lachām Kul* is the same which Jonarāja knew in the middle of the fifteenth century, the identity of those remains with the Raṇasvāmin temple might be considered as certain.

97. Crossing the Mār to the south we reach the city quarter

Bhaṭṭārakamaṭha;
Diddāmaṭha.

known as *Brāḍīmar*, occupying the right bank of the river between the Fourth and Fifth Bridge. It derives its name from the ancient

BHAṬṬĀRAKAMAṬHA which is repeatedly referred to in the Rājatarāṅgiṇī as a building of considerable size and strength.⁵ Bilhaṇa too notices it specially in his description of Śrīnagar. Like other Maṭhas built originally to serve the purposes of a Sarai, it was used on occasion as a place of defence. Queen Diddā sent her infant son there at the time of a dangerous rising.

¹ *Rājat.* iii. 453 sq. note.

² See *Śrīkaṇṭhacar.* iii. 68.

³ See *Jonar.* 872.

⁴ Compare *Rājat.* iii. 453-454 note. The *Lachām Kul* is mentioned by Abū-l-Faẓl, ii. p. 355. It probably took its name (equivalent to *Lakṣmīkulyā) from Lakṣmī, the queen of Shahābū-d-dīn, in whose honour the quarter of Lakṣmīnagarī was found in the vicinity of the present Sangīn Darwāza; see *Jonar.* 407 sq.

⁵ See *Rājat.* vi. 240 note; viii. 2426; *Vikram.* xviii. 11. For the derivation of *Brāḍī* from *Bhaṭṭāraka* comp. *Brāḍīnambal* < *Bhaṭṭāranaḍvalā*, below. That *Bhaṭṭārakamaṭha* was the old name of this locality, is known to the tradition of the Paṇḍits; see BÜHLER, *Report*, p. 16.

The Chronicle shows us often the Maṭhas of Srinagar utilized as places of refuge in the times of internal troubles, occasionally also turned into prisons.¹ We may hence conclude that they were substantially built, probably like modern Sarais in the form of detached quadrangles, and thus better adapted for defence than other city-buildings.

That Maṭhas more than once left their names to the city-quarters in which they stood, is shown by the designation of other wards. Thus the large quarter of *Didamar* which forms the western end of the city on the right river-bank, retains the name of the DIDDAMAṬHA.² It was built by Queen Diddā for the accommodation of travellers from various parts of India. As a local name Diddāmaṭha meets us often in the later Chronicles. Above *Didamar* we find near the Sixth Bridge the quarter of *Balaṇḍimar*.³ It represents in all probability the *Balāḍhyamaṭha* of the later Chronicles which Jonarāja mentions as having been built by Balāḍhyacandra under King Rājadeva in the 13th century.⁴

A little to the north of the Sixth Bridge lies the Mahalla known by the name of *Khandabavan*. It has received
Skandabhavana; its appellation from the ancient Vihāra of
Naḍavana. SKANDABHAVANA, a foundation of Skandagupta whom Kalhaṇa mentions among the ministers of Pravarasena II.'s successor Yudhiṣṭhira.⁵ The site of the Vihāra has been traced by me in the close vicinity of the Ziārat of Pir Muḥammad Bāsūr. Certain ancient remains there were locally known and worshipped till the middle of the present century as a Tirtha sacred to Skanda.⁶

The ground immediately to the north-east of *Khandabavan* is now an open waste space used partly for Muhammadan graveyards. It seems to have been unoccupied already in old times. For it was chosen as the burning place for the widows of the murdered king Sussala when a rebel force hovering around the capital rendered the usual burning ground on the island of Mākṣikasvāmin inaccessible.⁷

The quarter of *Narvor* still further to the north is probably identical with the old *NAṬAVANA*, mentioned by Kalhaṇa as the site of a Vihāra built by one of King Meghavāhana's queens. I have shown in my note on the passage that the modern name goes back to a form

¹ Compare *Rājat.* vi. 223; viii. 374, 1052, 2309.

² See *Rājat.* vi. 300 note.

³ Its old name could not be shown on the map owing to want of room.

⁴ See *Jonar.* 82.

⁵ See iii. 380.

⁶ Compare Note *K*, vi. 137, also for the temple of *Parvagupteśvara* which stood close by.

⁷ *Rājat.* viii. 1441 sq.

*Naḍavāṭa.¹ The termination *vāṭa* 'garden,' frequent in Kāsmīr local names, may safely be taken as the equivalent of *vana* in Kalhaṇa's form of the name.

98. Before we continue our survey further up the river, it will be useful to make a brief reference to the bridges which connect the two river-banks within the city. Śrīnagar has now seven bridges across the Vitastā. Their number has remained unchanged for at least five hundred years.

Already Sharifu-d-din had heard that of the thirty boat-bridges constructed across the great river of Kāsmīr, there were seven in the town of Śrīnagar. The boats were bound together by chains, and through the bridges a way could be opened for the river traffic.² Sharifu-d-din's notice is of interest because it shows clearly that down to the end of the Hindu period permanent bridges across the Vitastā were unknown in Kāsmīr.

I had been led to the same conclusion by an examination of the Rājatarāṅgiṇī passages bearing on the subject.³ Kalhaṇa distinctly says of the two bridges the construction of which he specially records, that they were built with boats. Elsewhere this inference may be drawn from the rapidity with which the bridges are broken at the approach of the enemy or in danger of fire.⁴

The first bridge of this kind is ascribed by Kalhaṇa to Pravara-sena II. who built the 'Great Bridge' (*Brhatsetu*) in his new capital. "Only since then is such construction of boat-bridges known."⁵ This 'Great Bridge' is subsequently mentioned in connection with a great conflagration which destroyed the city in the time of Sussala (A.D. 1123). This fire arose at the southern end of Śrīnagar, and Kalhaṇa mentions that the smoke first rising from Mākṣikasvāmin: Māy⁶sum had scarcely been noticed from the 'Brhatsetu' when the fire was already spreading over the whole city.⁶ Kalhaṇa evidently refers to the 'Great Bridge' as a comparatively distant point from Mākṣikasvāmin. Considering that the river forms an almost straight reach from this locality to the present Fourth Bridge, it appears to me likely that Pravarasena's bridge was somewhere in the vicinity of the latter. The position is in the

¹ Compare *Rājat.* iii. 11 note.

² See *Tārīkh-i-Raṣṭhīdī*, p. 431.

³ See note iii. 354.

⁴ See *Rājat.* vii. 909, 1539; viii. 1182; *Śrīv.* i. 308, 720; ii. 70, 122.

⁵ *Rājat.* iii. 354.

⁶ Compare *Rājat.* viii. 1171-72 note.

very heart of the city. It is just here that Zainu-l-'ābidīn subsequently constructed the first permanent bridge over the Vitastā named after him Zaina Kad^{al} (*Jainakadali*).¹

Another old boat-bridge had been established by Harṣa just opposite to his palace.² The latter as we shall see was situated on the left bank somewhere near the present Second Bridge (Haba Kad^{al}). The bridge proved fatal to Harṣa's fortunes, because it enabled the rebels to make their final and successful assault on the palace.

There can be little doubt that the first permanent bridge across the Vitastā was of wood and showed the same peculiar cantilever construction which the Kāśmīr bridges have preserved to this day. The latter have attracted the attention of all modern travellers and have often been described.³ But it is curious that none of them can be traced back beyond the time of Zainu-l-'ābidīn. The explanation may lie in the fact that that stone-architecture in which the engineers of the Hindu period were so proficient, did not permit of the construction of bridges with a sufficient span. For their Muhammadan successors working chiefly in wood it was easier to overcome this difficulty.

Among the most characteristic features of the river-scene as it now presents itself within Śrīnagar, are the numerous wooden bathing cells moored before all city Ghāṭs. They have been there already in Hindu times. For Kalhaṇa mentions more than once the *snāna-koṣṭhas* of the river.⁴ From a humorous sketch of city-life which Kalhaṇa draws for us, we can see that they formed, then as now, the favourite meeting-place of the idle and curious.⁵

99. Resuming our walk on the river-bank we pass the remains of more than one old temple near the present Eastern quarters of Śrīnagara. Ziārats of Baḍ Shāh (Zainu-l-'ābidīn), Shāh Hamadān and elsewhere. But we have no data for their identification. An old site is marked by the present Ghāṭ Sōm^ayār, below the Second Bridge, which represents the SOMATĪRTHA of the Rājatarāṅgīṇī.⁶ The place is still visited as a Tirtha, and some old Lingas are found by the river-side. The quarter in which the Somatīrtha lies, is known as *Sudarmar*. It owes its name to the SAMUDRĀMATHA built by Samudrā, the queen of Rāmadeva, in

¹ See *Śriv.* i. 231 sq., 296.

² *Rājat.* vii. 1549.

³ See, e.g., VIGNE, *Travels*, ii. 23; LAWRENCE, *Valley*, p. 37.

⁴ Compare *Rājat.* viii. 706, 1182, 2423. Also Kṣemendra, *Samay.* ii. 38, know the term *snānakoṣṭhaka* which lives in the present Kś. *śrāṅgkuṭh*.

⁵ See *Rājat.* viii. 706-710.

⁶ See *Rājat.* viii. 3360 note.

the 13th century. The numerous passages in which the Samudrāmāṭha is mentioned by the later Chronicles, makes this identification quite certain.¹

A little higher up, if we can trust local tradition, stood the ancient temple of VARDHAMĀNEŚA mentioned already in King Saṁdhi-mat's reign. The site so designated by the Purohitas of the adjoining Mahalla is close to the Mal'yār Ghāt. I have referred already in a previous note to the curious manner in which an ancient Linga supposed to be that of Vardhamāneśa was recovered a few years ago from a neighbouring Mosque and a Māhātmya composed for the newly established shrine.²

The confluence of the Tsūnṭh Kul or Mahāsarit with the Vitastā we have also had occasion to notice.³ It is the Tirtha now known as MĀRISAMGAMA. Beyond it lies the great island of *Māyāsum*, the ancient MĀKṢIKASVĀMIN, now chiefly occupied by the houses and camps of European residents and visitors. From the way it is referred to by Kalhaṇa, it appears that it was already partly inhabited in old times.⁴ Following up the right bank of the Mahāsarit above the junction we reach the quarter of *Khuḍ^abal* already identified with the *Kṣurikābala* of King Pravarasena's story.

Here begins the old embankment or *Setu*, noticed in connection with the latter.⁵ To the north of this embankment stretches an extensive marsh fed by canals coming from the Ḍal and known as *Brṛ^rnambal*. It is the *Bhaṭṭāraṇaḍvalā* of the Chronicle into which the body of one of Harṣa's ministers was thrown after his execution.⁶

At the eastern end of the Setu where it joins the rocky foot of the Takht-i Sulaimān hill, there has been for at least a century a gate through which the Tsūnṭh Kul flows out from the lake. It is closed at times of flood when the Vitastā rises higher than the level of the Ḍal. It is highly probable that this gate is very old and contemporary with the construction of the embankment itself. Beyond it lies the suburb of *Drug^ajan*. This is identified in an old gloss of the Rājatarāṅgiṇī with DURGĀGALIKĀ, where according to tradition the blind King Yudhiṣṭhira I. was imprisoned after his abdication.⁷

¹ See *Jonar.* 111; *S'iv.* iv. 121, 169, 290; Fourth Chron. 504, 618.

² See above, § 31 note 2.

³ See above, § 65.

⁴ See *Rājat.* iv. 88 note.

⁵ Compare § 92.

⁶ See *Rājat.* vii. 1038. *Nambal*, from Skr. *naḍvalā*, is the regular Kś. word for 'marsh.' *Brṛ^r* is a direct phonetic derivative of Skr. *bhaṭṭāra* 'god.'

⁷ See *Rājat.* ii. 4.

Leaving the Setu where it makes its great bend and going north across low ground flanked by marshes, we reach the quarter of *Nāvṭpūr*. The bridge which leads here over the Mār or Mahāsarit, is repeatedly mentioned as *NAUPURASETU* by Śrīvara, in connection with later sieges of Śrinagar.¹ By breaking it, the south-eastern parts of the city were rendered more secure. Continuing our route to the north we come to the great suburb of *Rāṇ'vōr*. It is traversed by numerous canals coming from the Dal. Kalhaṇa mentions it repeatedly by its ancient name of *RĀJĀNAVĀTIKĀ* as a place largely inhabited by Brahmans. Their solemn fasts (*prāyopaveśa*) gave no small trouble to King Sussala in his worst straits.² *Rāṇ'vōr* has continued to the present day a favourite place of residence for city Brahmans.

100. We have now completed our circuit of the ancient city as far as it lay on the right bank of the river
Left river bank. and may proceed to the smaller and later portion which occupies the left bank. Just opposite to the 'Mārisaṅgama' stands the *Shērgarhi*, the modern palace of the Dogrā rulers. Its site was apparently first chosen by the Paṭhān governors for their fortified residence.

Immediately below the palace the *Kuṭ^akul* or *Kṣiptikā* branches off from the river. We have already noticed its value as a line of defence for this part of the city.³ The quarter of *Kāṭhūl* which lies next between the *Kuṭ^akul* and the river is of ancient date. It is mentioned as *Kāṣhīla* by Kalhaṇa and other writers, Bilhaṇa speaking of it particularly as a locality inhabited by Brahmans.⁴

At the northern end of the *Kāṭhūl* quarter and close to the present Second Bridge, we must assume the palace
Site of Royal Palace. of the later Hindu kings to have stood. Its position is indicated by an interesting passage of the *Rājatarāṅgiṇī* which informs us that King Ananta (A. D. 1028-63) abandoned the palace of the former dynasties and transferred the royal residence to the vicinity of the shrine of *SADĀSIVA*.⁵ The new site was adhered to by subsequent kings probably till long after Kalhaṇa's time. The mention of the *Sadāsiva* shrine and the fre-

¹ See *Śriv.* iv. 122, 243.

² See *Rājat.* viii. 756, 768, 899. For the phonetic relation of *Rāṇ* < *Skr. Rājāna*, see viii. 756 note; *vōr* is common in Kś. local names and derived from *Skr. vāṭikā* 'garden.'

³ See above, § 67.

⁴ See *Rājat.* viii. 1169 note, and *Vikram.* xviii. 25.

⁵ Compare *Rājat.* viii. 186-187, and for detailed proof of the identification, the note thereon.

quent references to the Kṣiptikā as flowing near to the royal palace (*rājadhānī*) enable us to fix the position of the latter with fair accuracy. In the note on the above passage I have shown that the Sadāśiva temple stood opposite to the Samudrāmāṭha which occupies the right river bank just below the Second Bridge. Exactly in the position thus indicated we find now an ancient Liṅga, on the river Ghāt of Purnṣayār, which the tradition of the local Purohitās knows by the name of *Sadāśiva*.

It is in this neighbourhood, then, that the palace stood which had witnessed so many tragic scenes related in the last two Books of Kalhaṇa's Chronicle. Its great height is specially referred to by Bilhaṇa. This suggests that it was in part at least built of wood, just like a later palace described by Mirzā Ḥaidar.¹ "Sultān Zainu-l-'ābidin built himself a palace in the town which in the dialect of Kashmīr is called *Rājān* [i.e., Skr. *rājadhānī*]. It has twelve stories, some of which contain fifty rooms, halls and corridors. The whole of this lofty structure is built of wood." This construction of the palace would well explain the rapidity with which it was burned down by the pretender Uccala on his final attack upon Harṣa.² We can thus also understand why there are no particularly striking remains at the site which could be attributed to the ruins of this royal residence.

The last-named incident gives Kalhaṇa occasion to mention also some other data regarding the royal palace. Close to it was a garden in which Harṣa and his ill-fated son Bhoja enjoyed a deceptive rest before the rebels' last assault.³ The gardens near the palace are also elsewhere mentioned. Harṣa had their trees cut down because they obstructed the view, and at a later time the besieging Ḍāmaras fed their camp-fires with wood brought from the same gardens.⁴ Even at the present day there are numerous old gardens across the Kṣiptikā close to the site where the palace once stood. In front of the palace was the boat-bridge already mentioned which the king had himself constructed, and which was the scene of his last desperate struggle.⁵

Where the old palace stood which was abandoned by King Ananta, we cannot say with accuracy. It is, however, probable that its site was in the old part of Pravarapura on the right bank. Kalhaṇa mentions it twice as *purāṇarājadhānī* ('the old palace'), but gives no particulars.⁶ Its deserted ground was built over with a Maṭha in Kalhaṇa's own time.

¹ See *Tārīkh-i-Rashidī*, p. 429.

² See *Rājat*. vii. 1565 sq., 1583.

³ *Rājat*. vii. 1538 sqq.

⁴ *Rājat*. vii. 1223; viii. 1056.

⁵ See *Rājat*. vii. 1530, 1540.

⁶ See *Rājat*. viii. 837, 2417.

The embankments on the left side of the river as well as the walls of Ziārats show ample remains of ancient buildings. But we have no means of identifying any particular sites. At the western extremity of this part of the city, however, we may locate with some probability the temple of *Kṣemagaurīśvara*, built by Queen Diddā's weak husband Kṣemagupta. Bilhaṇa in his description of Srinagar mentions it as an imposing building, the 'Maṇḍapas' of which extended to a 'Saṁgama' of the Vitastā.¹ I have shown elsewhere that the confluence meant is probably that of the Vitastā with the Dugdhasindhu or Chats²kul which lies opposite to the quarter of Diddāmaṭha.²

SECTION V. THE ENVIRONS OF SRINAGARA.

101. Having completed our survey of old Srinagara we may now proceed to examine the ancient sites of its environs. They are almost all situated to the north of the Vitastā within the Pargana now known as *Phākh*, and designated as *Phākhuvā* in Sṛivara's Chronicle.³ It comprises the tract lying between the east shore of the Anchar, the range towards the Sind Valley and the hills which enclose the Dal on the east and south. Owing to the facility of communication across the lake and the manifold attractions of its shores, Phākh seems to have always been a favourite resort for the inhabitants of the capital. This fact is fully illustrated by the numerous places of ancient date which we find dotted around the lake.

Starting from its southernmost corner in the immediate vicinity of the city we come first to the hill popularly known as *Takht-i-Sulaimān*. Its bold pyramidal form and the old temple which crowns its summit, make this hill a most conspicuous object in the land-scape of Srinagar. The present name of the hill, meaning 'Solomon's throne,' is undoubtedly of Muhammadan origin. Its alleged derivation from *Samudhimat*, the saintly hero of a well-known legend recorded in the *Rājatarāṅgiṇī*, is nothing but an invention of the Bāchbaṭṭas of Srinagar.⁴

¹ *Vikram*. xviii. 23.

² Compare *Rājat*. vi. 172-173 note.

³ *Sriv*. iv. 306. The Lokaprakāśa writes *Phāgvā* while the modern Māhātmyas of Isālaya or Isṭhar and Sureśvari affect the form *Phālaka*.

⁴ The name *Takht-i-Sulaimān* is common enough in the local nomenclature of Muhammadan countries; compare, e.g., the peak of this name in the *Sulaimān*

That the ancient designation of the hill was Gopādrī is shown beyond all doubt by an interesting passage of Kalhaṇa's Chronicle. It relates how the troops of the pretender Bhikṣācara when thrown back from the city which they had endeavoured to enter after crossing the Mahāsarit, i.e., from the south-east, took refuge on the 'Gopa hill' or *Gopādrī*.¹ There they were besieged by the royal troops until a diversion made by Bhikṣācara enable them to retreat to the higher hills in the east by the low neck which connects these with the Takht-i Sulaimān.

Kalhaṇa in the First Book of his Chronicle informs us that King Gopāditya built a shrine of Śiva Jyeṣṭheśvara on the Gopādrī.² It is difficult not to connect this notice in some way with the extant temple which occupies so prominent a position on the summit of the hill. General Cunningham, it is true, on the strength of an alleged tradition had proposed to identify this temple with the Jyeṣṭharudra shrine which Kalhaṇa mentions as a foundation of Jalauka, Aśoka's son, in the ancient Śrīnagarī.³ But Prof. Bühler has already shown that there is no genuine tradition regarding the temple among the Śrīnagar Brahmins.⁴

It is certain that the superstructures of the present temple belong to a late period.⁵ But the massive and high base on which this temple is raised, and certain parts of the structure are no doubt of a far earlier date. These may well have formed part of a building which in Kalhaṇa's time,—rightly or wrongly, we have no means to judge,—was looked upon as a shrine of Jyeṣṭheśvara erected by King Gopāditya. There is no other ancient ruin on the hill. Nor would the configuration of the latter have admitted at any other point but the summit, of the construction of a shrine of any dimensions. It is of interest to note that the tradition of Abū-l-Faḍl's time distinctly attributed the temple standing on 'Solomon's hill' to the time of Gopāditya.⁶

Kōh, S. of the Gumal Pass. The derivation from Saṁdhimat, referred to by Prof. BÜHLER, *Report*, p. 17, is not supported by any evidence whatever and unknown even to the most modern Māhātmyas.

¹ See *Rājat.* viii. 1104-10 note. That the Takht-i-Sulaimān was called by its ancient name Gopādrī, had been surmised already by Pt. Govind Kaul at the time of Prof. Bühler's visit; see *Report*, p. 17. But the decisive evidence of this passage was not known to him.

² See i. 341 and note.

³ *Rājat.* i. 124; *Anc. Geogr.*, p. 95; also above, § 90.

⁴ See *Report*, p. 17.

⁵ See the remarks of FERGUSSON, *History of Indian Archit.*, p. 282, against Gen. Cunningham's and Major Cole's assumptions who represented the extant temple as one of the earliest buildings in Kāśmīr.

⁶ *Ain-i-Akb.*, ii. p. 383.

102. In my note on Rājat. i. 124 I have shown that an old tradition which can be traced back to at least the sixteenth century, connected the Takht hill with the worship of Śiva Jyeṣṭharudra or, by another form of the name, JYEṢṬHEŚVARA (Jyeṣṭheśa).¹ And we find in fact a Liṅga known by this name worshipped even at the present day at the Tirtha of Jyēṭhēr, scarcely more than one mile from the east foot of the hill.

This Tirtha which undoubtedly derives its name from Jyeṣṭheśvara, lies in a glen of the hill-side, a short distance from the east shore of the Gaḡri Bal portion of the Dal.² Its sacred spring, designated in the comparatively modern Māhātmya as *Jyeṣṭhānāga*, forms a favorite object of pilgrimage for the Brahmans of Srinagar. Fragments of colossal Liṅgas are found in the vicinity of Jyēṭhēr and show with some other ancient remains now built into the Ziārats of Jyēṭhēr and Gupākār, that the site had been held sacred from an early time.

It is in this vicinity that we may look for the ancient shrine of Jyeṣṭharudra, which Jalauka is said to have erected at Srinagarī. But in the absence of distinct archæological evidence its exact position cannot be determined. It is highly probable that whatever the origin and the date of the temple on the Takht hill may be, it was connected with the worship of Jyeṣṭharudra at Jyēṭhēr. No other Tirtha is known in the immediate neighbourhood.

The distance of the shrine from the Tirtha is scarcely greater than that of Lalitāditya's temple at Mārtaṇḍ from the sacred spring in honour of which it was erected. And in both places the distance of the temple is easily accounted for by the more prominent position which was thus secured for it. There is yet another analogy in the case of the two shrines. Both have long ago ceased to be places of popular worship. But the sacred springs, to the presiding deity of which they were dedicated, continue to attract pilgrims though shorn of all splendour of temples and images.

Kalhana in the same passage which mentions the erection of King Gopāditya's shrine on the 'Gopa hill' makes that prince bestow the 'Gopa Agrahāras' on Brahman settlers from Āryadeśa.³ The combination of the two local names suggests that by the Gopā-

¹ Compare Fourth Chron. 592, 853, 806.

² For *Jyeṣṭheśvara* > *Jyēṭhēr* we have exact analogies in *Kapaṭeśvara* > *Kōṭhēr*, *Amareśvara* > *Amburhēr*, etc.

³ See i. 341. *Agrahāra* is the regular term designating a Jāgīr or piece of land bestowed on individuals or religious corporations, etc.; see note i. 87.

GRAHĀRAS are meant the fertile lands of the present *Gupākār*, between the north foot of the Takht hill and the Dal. The name *Gupākār* may be, in fact, the direct phonetic derivative of the term used by Kalhaṇa.¹

Our surmise is supported by the reference which Kalhaṇa in the verse immediately following makes to the village BHŪKṢĪRAVĀṬIKĀ. This place is identified by the old glossator A₂ with *Buch'vōr*, a small hamlet situated on the narrow strip of land at the rocky north-west foot of the Takht hill. The modern name is clearly derived from Kalhaṇa's form. Gopāditya is said to have removed to this confined and secluded spot Brahmans who had given offence by eating garlic.

The combined mention of Gopādrī, Gopāgrahāra and Bhūkṣīravāṭikā in Rājat. i. 341 sq. suggests that Kalhaṇa has reproduced here local traditions collected from the sites immediately adjoining the hill. Whether the connection of these localities with King Gopāditya's reign was based on historical fact, or only an old popular etymology working upon the word *Gopa* found in the first two names, can no longer be decided.

Continuing our route along the eastern shore of the Dal we come, at a distance of about one mile from *Gupākār*, to the large village of *Thīd*, prettily situated amid vineyards and orchards. It is the THEDĀ of the Rājatarāṅgiṇī, mentioned as one of the places which the pious King Saṁdhimat or Āryarāja adorned with Maṭhas, divine images, and Līngas.² Abū-l-Faḍl speaks of *Thīd* as "a delightful spot where seven springs unite; around them are stone buildings, memorials of by-gone times."³ The remains here alluded to can no longer be traced, but the seven springs (*Saptapuṣkarinī*) which are also referred to in the Haracaritacintāmaṇi (iv. 40 sqq.), are still pointed out.

The cluster of villages which we reach about one and a half miles beyond *Thīd*, and which jointly bear the name *Brān*, can be safely identified with BHĪMĀDEVĪ which Kalhaṇa notices along with Thedā. The Nilamata knows the sacred site of Bhīmādevī in conjunction with the Sureśvarī Tīrtha which we shall next visit, and in the Haracaritacintāmaṇi it is named with the seven springs of Thedā. The Tīrtha of Bhīmādevī is no longer known, but may be located with some probability at the fine spring near *Dāmpōr* marked now by a Muhammadan shrine.

¹ *Gupākār* may go back to a form **Gupagār*, with assimilation of *g* to the preceding tenuis. In Kś. the hardening of *g* to *k* is by no means unknown, see Dr. Grierson's remarks, *Z.D.M.G.*, i., p. 3. **Gupagār* could easily be traced back to *Gopāgrahāra* through Pr. forms like **Gupagrār*.

² See Rājat. ii. 135 note.

³ *Āin-i-Akb.*, ii. p. 361.

103. A sacred site of far greater fame and importance is that of **Tirtha of Sureśvarī**. the present village of *Is̥bār* which lies about two miles further north on the *Ḍal* shore and a little beyond the *Mughal* garden of *Nishāt*. The site was known in ancient times as *Sureśvarīkṣetra* ('the field of Sureśvarī').¹ It was sacred to *Durgā-Sureśvarī* who is still worshipped on a high crag rising from the mountain range to the east of *Is̥bār* village. The seat of the goddess is on a rugged rock some 3000 feet above the village, offering no possible room for any building. The numerous shrines erected in her honour were hence built on the gently sloping shore of the lake below.

The Tirtha of Sureśvarī is often referred to in *Kalhana's Chronicle* and other *Kāśmīrian* texts as a spot of exceptional holiness. It was particularly sought by the pious as a place to die at. The pilgrimage to Sureśvarī is connected with visits to several sacred springs in and about *Is̥bār*. One of them, *Satadhārā*, is already mentioned by *Kṣemendra*.² It is passed in a narrow gorge some 1500 feet below the rock of Sureśvarī.

Is̥bār derives its present name from the shrine of *Īśēśvara* which King *Samudhimat-Āryarāja* according to the *Rājatarāṅgiṇī* erected in honour of his Guru *Īśāna*.³ An earlier form, *Is̥br̥ṛ*, which is found in an old gloss of the *Chronicle* and evidently was heard also by *Abū-l-Faḍl*, helps to connect *Is̥bār* and *Īśēśvara*.⁴

Is̥bār is still much frequented as a pilgrimage place. The chief attraction is a sacred spring known as *Guptagaṅgā* which fills an ancient stone-lined tank in the centre of the village. This conveniently accessible Tirtha is the scene of a very popular pilgrimage on the *Vaiśākhi* day and has fairly obscured the importance of the mountain seat of Sureśvarī. A ruined mound immediately behind the tank is popularly believed to mark the site of the *Īśēśvara* shrine. Numerous remains of ancient buildings are found around the sacred springs and elsewhere in the village. They probably belong to the various other temples the erection of which is mentioned by *Kalhana* at the site of Sureśvarī.⁵

Passing round the foot of the ridge on which Sureśvarī is worshipped, we come to the small village of **Ṣaḍarhadvana;** *Hārvaṇ* which the old glossator of the *Rājatarāṅgiṇī* identifies with **Ṣaḍarhadvana** ('the Tripureśvara.

¹ Compare for *Sureśvarī* and the site of *Is̥bār*, note v. 37.

² See *Samay*, ii. 29.

³ See *Rājat*, ii. 134 note.

⁴ *-bār* is a modern contraction for *-br̥ṛ*, from Skr. *bhaṭṭāraka*, which in *Kāśmīr* local names has often taken the place of its synonym *-īśvara*; comp. e.g., Skr. *Vijayeśvara* > Kś. *Vij̥abr̥ṛ*.

⁵ See *Rājat*, v. 37, 40 sq.; viii. 3365.

wood of the six Arhats'). This place is mentioned by Kalhaṇa as the residence of the great Buddhist teacher Nāgārjuna.¹ The name Hārvaṇ may well be derived from Śaḍarhadvana, but in the absence of other evidence the identification cannot be considered as certain. On the hill-side south of the village I observed already in 1888 fragments of ornamented bricks. Since then remarkable remains of ancient brick-pavements have come to light on occasion of excavations made for the new Śrīnagar waterworks.

Proceeding further up the valley of the stream which comes from the Mār Sar lake, we reach, at a distance of about three miles from the Dal, the village of *Triphar*. Evidence I have discussed elsewhere, makes it quite certain that it is the ancient TRIPUREŚVARA (Tripureśa).² The latter is repeatedly mentioned as a site of great sanctity by Kalhaṇa as well as in the Nilamata and some Māhātmyas. But it has long ago ceased to be a separate pilgrimage place. A little stream known as the *Tripuragāṅgā* near Triphar is, however, still visited as one of the stations on the Mahādeva pilgrimage.

Kṣemendra in the colophon of his *Daśāvatāracarita* refers to the hill above Tripureśa as the place where he was wont to find repose and where he composed his work. In Zain-ul-'ābidīn's time Tripureśvara seems yet to have been a Tirtha much frequented by mendicants.³ Tripureśvara too possessed its shrine of Jyeṣṭheśvara, and to this King Avantivarman retired on the approach of death.⁴ A legend related by the *Sarvāvatāra* connected the site of Tripureśvara with the defeat of the demon Tripura by Śiva and with the latter's worship on the neighbouring peak of Mahādeva. I have not been able to examine the site and am hence unable to state whether there are any ancient ruins near it.

The whole mountain-ridge which stretches to the south of Triphar and along the Dal, bore in ancient times the name of ŚRĪDVĀRA.⁵ On the opposite side of the Valley rises the great peak of MAHĀDEVĀ to a height of over 13,000 feet. Numerous references to it in the Nilamata, *Sarvāvatāra*, and other texts, show that it was in old times just as now frequented as a Tirtha.

We may now again descend the valley towards the north shore of the Dal. On our way we pass close to Hārvaṇ the village of *Tsatsa* where the convenience of modern worshippers has located a substitute for the

¹ See *Rājat.* i. 173 note.

² Compare *Rājat.* v. 46 note.

³ See *Śiv.* i. 402.

⁴ See *Rājat.* v. 123 note.

⁵ See *Rājat.* viii. 2422.

ancient Tirtha of the goddess Śārādā (see below § 127). Leaving aside the famous garden of *Shālimār* of which our old texts know nothing,¹ we come to a marshy extension of the *Ḍal* known as *Tēl^abal*. The stream which flows through it and which forms a branch of the river coming from the *Mār Sar*, bore the old name of *Tilaprasthā*.²

104. The road which takes us from *Tēl^abal* to the mouth of the

Hiranyapura.

Sind Valley is the same which was followed by the pretender *Bhikṣācara* and his rebel allies on a march to *Sureśvari* described in the *Rājatarāgiṇī*.³ The narrow embankment on which they fought and defeated the royal troops, leads across the *Tēl^abal* marshes.

At the south foot of the ridge which runs down to the opening of the *Sind Valley*, we find the village of *Ranyil*, the ancient *HIRANYAPURA*.⁴ The place is said by *Kalhaṇa* to have been founded by King *Hiranyākṣa*. As it lies on the high-road from the *Sind Valley* to *Srinagar* it is repeatedly mentioned also in connection with military operations directed from that side against the capital. The victorious *Uccala* when marching upon *Srinagar*, had the *Abhiṣeka* ceremony performed *en route* by the Brahmins of *Hiranyapura*. It seems to have been a place of importance, since it figures in a fairy-tale related in the *Kathāsaritsāgara* as the capital of *Kaśmīr*.⁵ A spring a little to the south of the village is visited by the pilgrims to the *Haramukutaḡaṅgā* and bears in *Māhātmyas* the name of *Hiranyākṣanāga*.

From near *Ranyil* several old water-courses radiate which carry the

<p>Juṣkapura; Amareśvara.</p>	<p>water of the <i>Sind River</i> to the village lying between the <i>Anchīār</i> and the <i>Ḍal</i> lakes. One of these canals passes the village of <i>Zukur</i>.</p>
---	---

A tradition recorded already by General Cunningham identifies this place with the ancient *JUṢKAPURA*. *Kalhaṇa* names the place as a foundation of the *Turuṣka* (*i.e.* *Kuṣana*) King *Juṣka* who also built a *Vihāra* there.⁶ The Muhammadan shrines and tombs of the village contain considerable remains of ancient buildings.

¹ The first reference to this somewhat over-praised locality which I can find, is in *Abū-l-Faḡl* who mentions the waterfall or rather the cascades of '*Shālahmār*'; see ii. p. 361. The *Vitastā*-, *Isālaya*-, and *Mahādeva-Māhātmyas* which are of very modern origin, show this fact also by their references to '*Sūlamāra*' and the whimsical etymologies which they give for the name (*Māraśūlā*, etc.). We might reasonably expect that *Jonarāja* and *Srivara* in their detailed accounts of the *Ḍal* would have mentioned the place if it had then claimed any importance.

² See *Rājat.* v. 46 note; *Sriv.* i. 421.

³ See *Rājat.* viii. 744 note.

⁴ For detailed references see *Rājat.* i. 287 note.

⁵ See *Kathāsar.* lxv. 215 sqq.

⁶ See *Rājat.* i. 168 note; *Anc. Geogr.* p. 101.

To the west of Juṣkapura and on the shore of the Anchār lies the large village of Āmburhār. It is the ancient AMAREŚVARA often mentioned in the Rājatarāṅgī in connection with military operations to the north of Śrinagar.¹ This is easily accounted for by the fact that the place lay then as now on the high road connecting the Sind Valley with the capital. It took its name from a temple of Śiva Amareśvara which Sūryamati, Ananta's queen, endowed with Agrahāras and a Maṭha. The ancient slabs and sculptured fragments which I found in 1895 in and around the Ziārat of Farrukhẓād Ṣāhib, may possibly have belonged to this temple.

Continuing on the road towards Śrinagar for about two miles further we come to the large village of Vicār Nāg prettily situated in extensive walnut groves. A fine Nāga near the village forms the object of a popular Yātrā in the month of Caitra. It is supposed to be an epiphany of the Ailāpattra Nāga who is mentioned also in the Nilamata. An earlier designation seems to be MUKTĀMŪLAKANĀGA which is given to the locality by Śrīvara and in the Tirthasaṃgraha.² To the west of the village and near an inlet of the Anchār are the ruins of three ancient temples now converted into Ziārats and tombs.³

Only a quarter of a mile to the east of Vicār Nāg and on the other side of the old canal called Lachām Kul (*Lakṣmikulyā) stands the hamlet of Āntābavan.

In my "Notes on Ou-k'ong's account of Kāśmīr" I have proved that Āntābavan derives its name from the ancient Vihāra of AMṚTABHAVANA which Amṛtabrahmā, a queen of Meghavāhana, is said to have erected.⁴ Ou-k'ong mentions the Vihāra by the name of *Ngo-mi-t'o-po-wan* which represents a transcribed Prakrit form *Amitabhavana or Āmitabhavana. An ancient mound with traces of a square enclosure around it, which is found between the canal and the hamlet, may possibly belong to the remains of this Vihāra.

Proceeding to the east of Āntābavan for about a mile we come to the large village of Sudarābal situated on a deep inlet of the Dal, known as Sudarākhun. The name of the village and the neighbouring portion of the lake make it very probable that we have to place here the sacred spring of SODARA.⁵ It formed the subject of an ancient legend related by

¹ See *Rājat.* vii. 183 note.

² See *Śiv.* iv. 65. On his authority the name Muktāmūlakanāga ought to have been shown on the map.

³ Compare for a view of these remains, COLE, *Ancient Buildings*, p. 31.

⁴ See *Rājat.* iii. 9 note, and *Notes on Ou-k'ong*, pp. 9 sqq.

⁵ See *Rājat.* i. 125-126 note. Kś. -bal in Sudarābal means merely 'place.'

Kalhaṇa. King Jalauka had built at Śrīnagarī his shrine of Jyeṣṭha-rudra whose original place of worship was at Bhūteśvara, below Mount Haramukūṭa. He then wished to have by the side of the new shrine also the Sodara spring which adjoins the site of Bhūteśvara.¹ To fulfil the king's pious desire "there broke forth from a waterless spot a spring which was alike to Sodara in colour, taste and other respects." A golden cup thrown into the original Sodara spring appeared after two and half days in its Avatāra near Śrīnagarī. This miracle removed all doubts as to their identity.

Close to the mosque of Sudar^abal and by the lake shore are two pools fed by perennial springs. These according to a local tradition were in old times visited by numerous pilgrims. Now all recollection of this Tirtha has been lost among the Brahmans of Śrīnagar. But the name of a portion of the village area, *Baṭṭapūr*, points to a former settlement of Baṭṭas or Purohitas. It is curious, too, that we find only half a mile from the village the Ziārat of Ḥazrat Bal, perhaps the most popular of all Muhammadan shrines in the Valley. It is supposed to be built over the remains of the miracle-working Pir Dastagīr Ṣāhib. Is it possible that the presence of this rather ubiquitous saint at this particular spot had something to do with the earlier Hindu Tirtha?

SECTION VI.—NORTHERN DISTRICTS OF MAḌAVARĀJYA.

105. Our circuit through the Phākh Pargaṇa has brought us back to the purlieus of the capital. We must leave them now once more and start on our tour through the outlying districts. We may direct it first to the upper half of the Valley, the ancient Maḍavarājya. This again is divided by the Vitastā into two portions, one to the north and east, the other to the south and west of the river. We shall begin with the Pargaṇas on the right bank, starting from Śrīnagar.

The Pargaṇa which adjoins Śrīnagar from the south-east, is now known as Vihi. It extends from near Purāṇā-dhiṣṭhāna to the spur of Vast^arvan, near Vāntipūr (Avantipura), and comprises a wide semi-circular tract of fertile Karṣwa lands. In ancient times the district took its name from the village of KHAḌVĪ, the present *Khruv*.² The Dāmaras of the *Khaḍvī* district are repeatedly mentioned by Kalhaṇa along with those of Holaḍā, the modern Vular Pargaṇa.

¹ For *Sodara*, the present Nārān Nāg, see notes i. 123; v. 55-59.

² Compare *Rājat*, viii. 733 note.

The site of Pāndrēthan or Purāpādhiṣṭhāna has already been fully noticed. About two miles higher up the river lies Pānd³chuk village, with some ancient remains and the traces of a stone bridge-head, probably of late date. The old name of the place is unknown. We pass next by the river the village of Simpōr. This may retain the name of SIMHAPURA, founded by King Jayasimha in Kalhana's time.¹

Less than two miles to the north-west of Simpōr lies the village of Zevan, the ancient JAYAVANA. It was correctly identified already by Prof. Bühler on the basis of the happy and exact description given of it by Bilhana.² The poet mentions in this "place of high-rising monuments" the "pool filled with pure water, sacred to *Takṣaka*, lord of snakes." This pool still exists in the *Takṣaka Nāga* which is visited annually by the pilgrims to Harṣeśvara.³

The mention made by Kalhana in his history of Narapura of the pilgrimage to the Takṣaka spring proves that in old times it must have enjoyed great reputation as a separate Tirtha. It is in fact the only Kāśmīr Nāga which is distinctly mentioned in the Tirtha list of the Mahābhārata (iii. lxxxii. 90). Abū-l-Faḍl records the interesting fact that this spring was popularly held to be the place whence the cultivation of saffron flourishing in this neighbourhood originated.⁴ In Akbar's time the cultivators, undoubtedly Muhammadans, still worshipped at this fountain at spring time. It was customary to pour cow's milk into it to secure a good omen for the success of the crop. We see that the Takṣaka Nāga long retained his importance with the cultivators as a local divinity.

About two miles to the north-east of Zevan we come on gently rising ground to the village of *Khun⁴moh*. It is, as already stated above, the ancient KHONAMUṢA, famous as the birthplace of Bilhana. The latter in the *Vikramāṇakadevacarita* gives an enthusiastic description of the charms of his rural home.⁵ The saffron fields which Bilhana mentions extend close to the lower of the two separate hamlets which form the village. In the upper hamlet is a sacred spring called *Dāmodaranāga* with some sculptured funeral Stêlêś and a few fragmentary inscriptions.

On the hill-side above the village issues another Nāga which under

¹ See *Rājat.* viii. 2443 note.

² Compare *Report*, pp. 5 sq.; *Rājat.* vii. 607 note; *Vikram.* xviii. 70.

³ See *Rājat.* i. 220 note.

⁴ See *Am-i-Akb.*, ii. p. 358.

⁵ For a detailed and accurate account of the position and remains of Khonamuṣa, see Prof. BÜLLER's *Report*, pp. 5 sq. The identity of Khun⁴moh with the Khonamuṣa of *Rājat.* i. 90, was first pointed out by Gen. CUNNINGHAM, *Anc. Geogr.*, p. 98.

the name of *Bhuvaneśvarī* is visited on the pilgrimage to HARṢEŚVARA. The latter Tirtha lies on the summit of the high ridge which rises to the north of the village. It consists of a 'Svayambhū' Liṅga situated in a small cave and enjoys considerable popularity. I have not been able to trace its name except in the local Māhātmya and the Tirtha-saṅgraha.

The chief place of the Vihi Pargana is now the town of *Pāmpar*, the ancient PADMAPURA, about four miles south-west of Khun²moh.¹ It was founded in the beginning of the 9th century by Padma, the powerful uncle of the puppet king Cippaṭa-Jayāpīḍa. Padma is said by the Chronicle to have also built a temple of Viṣṇu *Padmasvāmin*. To this may possibly belong the scanty remains of an ancient temple which have been described by General Cunningham.² Close by is the Zīarat of Mir Muḥammad Hamadānī, with some fine ancient columns and ornamented slabs which are likely to have been taken from this temple. Also the other Zīarats of the town show similar remains. Padmapura, owing to its central position in a fertile tract, seems to have always been a place of importance and is often mentioned by Kalhaṇa and the later Chroniclers.

Proceeding north-eastwards of Padmapura we pass first *Bālāhōm*, a large village, which in the Lokaprakāśa and Tirthasaṅgraha figures as *Bālāsrama*. Under a large Deodar near it Bālādevī is now worshipped in the form of an old stone-image. Numerous ancient Stēlēs, showing miniature reproductions of temples, are found in the neighbouring rivulets and canals; they were apparently used in recent times as stepping-stones which would account for their preservation. At the foot of a rocky spur which descends from the mountain-range to the north, lies the picturesque village of *Uyan*, once mentioned by Kalhaṇa under the name of OVANĀ.³ It has a large sulphurous spring visited by the sick.

About two miles further east we reach the large village of *Khruv*, the ancient KHAṬVĪ which, as we have seen, gave to the district its former name. There is an abundance of fine springs in and about Khruv; Abū-l-Faḍl mentions them as objects of worship and estimates their number at 360.⁴ Above the village a so-called Svayambhū-cakra or mystical diagram is shown on a rock.⁵ It is held sacred to Jvālā-

¹ For a detailed notice see *Rājat*. iv. 695 note. The old name of the place is well-known to Srinagar Paṇḍits; VIGNE too, *Travels*, ii. p. 31, recognized it correctly.

² See *J. A. S. B.*, 1848, p. 274.

³ See *Rājat*. vii. 295.

⁴ *Āin-i-Akb.*, ii. p. 358.

⁵ Compare for such diagrams, also designated *Devīcakra* or *Mātrīcakra*, *Rājat*. i. 122 note.

mukhi-Durgā and largely visited by pilgrims. I am, however, unable to trace any old reference to this Tirtha.

Only a mile to the south-east of Khruv is the village of *Sār*, until recently the seat of a flourishing iron-industry.

Sanāra.

Kalhana mentions it by the name of *SANĀRA* as an Agrahāra founded by King Śacinara.¹ Whatever the historical value of this notice may be, which Kalhana took from Padmamilhira, the evidence detailed in my note on the passage proves that the present *Sār* is intended. An intermediate form of the name is preserved in the *Snār* of an old gloss. The Ziārat of *Khawāja Khizr* which stands here near several small springs, is built with remains of a Hindu temple; among them is a *Liṅga*-base some six feet square.

About two miles south-west of *Sār* are found the well-preserved ruins of a temple near the village of *Ladu* (not marked on Survey map). They have been described by Bishop Cowie,² but I am unable to trace any old reference to this shrine in the texts I have examined. It is remarkable for having a circular cella, the only one known to me in Kāśmir. A small square cella to the east of this temple has been annexed to a neighbouring Ziārat.

Near the south end of the Vihi Pargana and on the river lies the village of *Latāpūr*. An old gloss of the *Rājatarāṅgiṇī* identifies it with *LALITAPURA*, a place founded in honour of King Lalitāditya by his architect.³ The King according to the Chronicle was not pleased with the attention; in any case no importance seems to have attached to this place. There are no old remains above ground, but the local tradition still tells of King 'Lalitāditi' as the founder of a large town on the neighbouring Uḍar.

106. Passing round the foot of Mount Vastārvan we enter the

District of Holadā;

Avantipura.

Pargana of *Vular*, the ancient *HOLAPĀ*. This identification is supported, apart from the clear phonetic evidence, by all passages of the *Rājatarāṅgiṇī* which mention *Holadā*.⁴ Its feudal barons played a great part in the troubled times of the later Hindu reigns.

Its most important place in old times was undoubtedly the town of *AVANTIPURA*, founded by King Avantivarman (A.D. 855-883).⁵ Its position is marked by the present village of *Vāntipūr* on the *Vitastā*. The

¹ See note i. 100.

² See *J. A. S. B.*, 1866, pp. 97 *sqq.*

³ See *Rājat.* iv. 186.

⁴ See *Rājat.* i. 306 note.

⁵ See *Rājat.* v. 45 *sq.* note. Its identity with *Vāntipūr* was first pointed out by Dr. Wilson in his note on Moorcroft, *Travels*, ii. p. 244.

conspicuous ruins of this place attracted already the attention of the early European visitors. General Cunningham did not fail to recognize in them the remains of the two great temples of *Avantisvāmin* and *Avantīśvara* which Avantivarman had built here.¹ Of the two great ruins one is at Vāntī-pōr itself, the other and larger one half a mile further down the river close to the hamlet of Jaubrār (map 'Jabair.') Owing to the complete destruction of the central shrines it is impossible to ascertain now which was dedicated to Viṣṇu and which to Śiva. The fine enclosing quadrangles of the temples have also suffered badly. That of Avantisvāmin was used as a temporary fortification in Kalhaṇa's own time and underwent a severe siege.²

The site on which Avantivarman's town was built, had apparently enjoyed some sanctity before these temples were founded, and bore the old name *Viśvaikasāra*. The great extent of the town is indicated by the traces of ruined buildings which cover the foot of the hills east of Vāntī-pōr for a considerable distance. The frequent references to Avantipura in the Chronicles show that the town retained some importance long after the death of its founder.

We hear but little of other old sites in Holadā. The great town of *Mihirapura* which King Mihirakula is said to have founded in it, can no longer be traced.³ *Khuli*, a village situated a short distance to the south-west of Trāl, the modern headquarters of the district, may possibly be the *Khola* of the Chronicle, one of Gopāditya's Agrabāras.⁴ Of *Trāl* I am unable to trace any old notice.

The identification of the village of *Būts*, about two miles south of Khuli, with the old BHAVACCHEDA is also uncertain.⁵ It is based on a gloss of Rājānaka Ratnakarṇṭha, the writer of the Codex Archetypus of the Rājatarāṅgiṇī. Still further south lies the village of *Kai*, probably the old KATIKA named by Kalhaṇa as a foundation of Tuṅjina I.⁶ This identification is made in the old gloss on the passage and supported by the phonetic evidence of the modern name.

Of old remains in Vular the interesting temple of *Nārastān* at the northern extremity of the district (34° 3' lat. 75° 10' long.) deserves notice.⁷ Unfortunately I am unable to find any clue as to its old name

¹ See for a full description *J. A. S. B.*, 1843, pp. 275 sqq.; also *ib.*, 1866, 121 sqq.

² See *Rājat.* viii. 1429 sq., 1474 sqq.

³ See *Rājat.* i. 306.

⁴ See *Rājat.* i. 340.

⁵ Compare iii. 381 note.

⁶ *Rājat.* ii. 14.

⁷ See Mr. LAWRENCE's notice, *Valley*, p. 172. The attached photograph shows the site after my excavations. Regarding the result of the latter, see *Vienna Oriental Journal*, 1891, p. 345 sqq.

or history. Excavations made by me at the site in 1891 brought to light interesting sculptures, but no evidence as to its name. The large village of *Sutur* (map 'Sootoor') to the south-west of Nārastān may possibly account for the entry of *Satrava* in the Lokaprakāśa's list of Parganas.

107. The eastern boundary of Vular is marked by the high spur which descends from the north towards the confluence of the Vitastā and Gambhīrā. The adjoining district to the east is one of considerable extent. It comprises besides the whole right or western side of the Lidār Valley also the low-lying tract between the Vitastā and the lower course of the Viśokā. The modern name of this great Pargana is *Dachūnpōr* which appears in Śrīvara's Chronicle as DAKṢIṆAPĀRA. This clearly means 'the right bank' [of the Ledarī or Lidār]. Another form, of the same significance, is *Dakṣiṇapārśva* found in the Lokaprakāśa and Mārtāṇḍamāhātmya. To this designation corresponds the term *Vāmapārśva*, now Khōvurpōr, which as we shall see, is applied to the left side of the Lidār Valley.¹

The junction of the Vitastā with the Gambhīrā, i.e., the united Viśokā and Ramanyāṭavī, has already been mentioned above as a Tirtha.² Not far from it lies the village of *Marhōm*, on the Vitastā, mentioned by Jonarāja under its old name of MAPAVĀŚRAMA.³ The first part of the name is identical with that of *Maḍavarājya*.

About two miles south-east of Marhōm and not far from the Vitastā, we find the village *Vāgḥōm*, with a sacred spring known by the name of HASTIKARṆA. This name seems to have applied formerly to the place itself which we find twice thus referred to by Kalhaṇa.⁴ It is possibly the Hastikarṇa, where Bhoja, Harṣa's son, was treacherously murdered.

About one mile to the south of Hastikarṇa the Vitastā makes a great bend. The peninsula thus formed is occupied by a small *Uḍar* or alluvial plateau which owing to its height and isolated position is a very conspicuous object in the landscape. It was once the site of

¹ General Cunningham, *Anc. Geogr.*, p. 94, assumes that Kś. *dachūm* 'right' is 'now used to denote the "north," and *kāwar*, (recte *khōvur*) or "left," to denote the "south." This assumption, however, as well as the explanation given for the alleged change of meaning are based on some misunderstanding.

² See § 64.

³ See *Jonar.* (Bo. ed.), 132.

⁴ See *Rājāt.* v. 23 note; also vii. 1650. Another *Hastikarṇa*, mentioned by Śrīvara, i. 441, seems to have been near Śrinagar on the west.

one of the oldest and most famous shrines of the Valley, the temple of Viṣṇu Cakradhara.

The plateau is still known as *Tsakadar* Uḍar.¹ Brahman tradition is aware of the derivation of this name from *Cakradhara*. It was first brought to the notice of European scholars by Prof. BÜHLER who had duly recognized the antiquarian importance of the site.² The shrine of Cakradhara is often mentioned as a Tirtha of great sanctity.³ It was also closely connected with the legends regarding the burned city of *Narapura*, localized as we shall see in its close vicinity. But the only detailed notice of the temple we owe to a historical incident which occurred there during the civil wars of Sussala's reign.⁴

The royal troops having been forced to evacuate the neighbouring town of Vijayēśvara or Vijābrōr, the inhabitants of the latter place and the neighbouring villages took refuge in the temple of Cakradhara. This, by its position on the high and steep Uḍar, was naturally well-adapted for defence. The temple filled by the crowd of fugitives and routed soldiers, was soon besieged by the rebel troops of Bhikṣācara. The temple courtyard was protected by massive wooden ramparts and gates. When these had been set on fire by the assailants a mighty conflagration ensued in which the whole mass of people inside perished. Kalhana vividly describes this great catastrophe which he believes to have provoked divine vengeance and thus to have brought about the downfall of the pretender.

The account here given is of topographical interest. It shows that the temple actually stood on the flat top of the Uḍar, and also explains the scarcity of stone-remains in this locality. The absence of conspicuous ruins had already been noticed by Prof. Bühler. When visiting in 1895 the *Tsakadar* Uḍar, I found only traces of a quadrangular enclosure, about forty yards square. They are marked by hollows at the northern end of the Uḍar which is separated from the rest by a dip in the ground. These hollows may possibly be the last indications of the wooden ramparts which enclosed the shrine.

The temple seems to have been subsequently restored, and Jonarāja mentions the statue of Cakradhara among those chief divine images which Sikandar Butshikast destroyed.⁵ Jayadratha in his

¹ See *Rājat.* i. 38, 201 notes.

² See *Report*, p. 18.

³ See *Rājat.* vii. 258, 261, 269; *Jonar.* (Bo. ed.), 763; *Srikanṭhac.* iii. 12; *Nāla-mata*, 1170.

⁴ See *Rājat.* viii. 971-995. The date of the burning of Cakradhara seems to have been the 12th Śrāvṇa sudi, A.D. 1121.

⁵ See *Jonar.* (Bo. ed.), 763.

Haracaritacintāmaṇi devotes a separate canto, vii., to the relation of the legend which localized the disc-wielding god at the Tirtha of Cakradhara. The latter is still referred to in a general way in the old Vijayēśvaramāhātmya (No. 87, Poona MSS.). Now, however, Cakradhara is no longer visited by the pilgrims to Vijayēśvara though the Purohitas of the latter place still retain a recollection of the former sanctity of the site.

103. There can be no doubt that at the foot of the Cakradhara Uḍar there stood once an ancient town of considerable importance. From the low ground towards the river on the east and from the river-bed itself, ancient coins going back to Greek and Indo-Scythian rule are annually extracted in considerable quantities. Popular tradition still asserts that this site was once occupied by a great town. This tradition existed already in the time of Kalhaṇa who records it in the interesting legend of the burned city of Narapura.¹ This is told at great length in a poetic episode of the First Book.

King *Nara* is said to have founded a splendid capital, called after himself NARAPURA, on the sandy bank of the Vitastā close to the shrine of Cakradhara. "There in a grove was a pond of limpid water, the habitation of the Nāga Suśravas." A young Brahman who had found occasion to assist the Nāga and his two daughters when in distress, was allowed to marry in reward one of the latter. He lived in happiness at Narapura until the beauty of the Nāga lady excited the passion of the wicked king. When Nara found his advances rejected with scorn, he endeavoured to seize the beautiful Candralekhā by force. The couple fled for protection to their father's habitation.

The Nāga then rose in fury from his pool and "burned the king with his town in a rain of fearful thunderbolts." Thousands of people were burned before the image of Viṣṇu Cakradhara to which they had fled for protection. Ramanyā, the Nāga's sister, came down from the mountains carrying along masses of rocks and boulders. These she dropped, as we have seen, along the bed of the Ramanyāṭavi or Rembyār², when she found that Suśravas had already wreaked his vengeance. The Nāga himself feeling remorse at the carnage he had caused, removed to a lake on a far-off mountain. There "he is to the present day seen by the people on the pilgrimage to Amareśvara."² "To this day," thus closes Kalhaṇa's narration, "that tale is remembered by the people when they behold close to Cakradhara that town destroyed by fire and that pond which has become a dry hollow."

¹ See *Rājat.* i. 201-274.

² Compare regarding the lake of the Nāga *Suśravas* on the route to Āmburnāth, above, § 59.

Whatever the origin of the legend here told may have been, it is clear that popular tradition in Kalhana's time looked upon the barren ground which stretches along the river between *Tsakadar* and the present *Vijabrōr* as the site of an ancient city. The ruins which in the 12th century were pointed out as the remains of the burned *Narapura*, may have supplied the immediate starting point of the legend.

What these remains were we cannot say. As the ground referred to is subject to annual inundation it is possible that the remains meant have since disappeared under alluvial deposits. The habitation of the 'Suśram' *Nāga* was still shown to me in a hollow, generally dry, close to the south-east foot of the *Uḍar*. The name of *Narapura* and its king are no longer remembered. But the main features of the legend as heard by Kalhana, still live in the local tradition.

109. The ancient town which once stood in the position indicated, was evidently succeeded by *VIJAYEŚVARA*, the present *Vijabrōr*. The latter place, situated less than two miles above *Cakradhara*, received its name from the ancient shrine of *Śiva Vijayeśvara* (*Vijayeśa*, *Vijayeśāna*).¹ This deity is worshipped to the present day at *Vijabrōr*. The site has evidently from early times been one of the most famous *Tirthas* of *Kāśmīr*. It is mentioned as such in the *Rājatarāṅgiṇī* and many old *Kāśmīrian* texts.² The tradition regarding *Aśoka's* connection with it supplies historical proof for its antiquity. According to Kalhana's account which may well have been based on genuine local tradition or even inscriptional evidence, *Aśoka* had replaced the old stuccoed enclosure of the temple by one of stone. The great king was also credited with having erected within this enclosure two temples called *Aśokeśvara*.

This old temple which is often mentioned by Kalhana and was the scene of many a historical incident, has now completely disappeared. According to the tradition of the local *Purohitas* it stood at a site close the river-bank and nearly opposite to the bridge over the *Vitastā*. When I first visited *Vijabrōr* in 1889 I still found some ancient slabs and fragments at this spot. It was then some 15 feet below the level of the surrounding ground,³ and has since been partly built over. Stone materials are said to have been removed from here for the new temple

¹ Compare for detailed references, *Rājat.* i. 38, 105 notes.

² The legend of the *Tirtha* is given at length in the x. *Prakāśa* of the *Haracarī-tacintāmaṇi*.

³ General Cunningham who saw these remains in 1847, rightly attributes them to the temple of *Vijayeśa*, but calls the place 'Vijayapāra.' He justly points to the difference of level as an indication of the antiquity of the structure; see *Anc. Geogr.*, p. 98.

of Vijayēśvara which was built by Mahārāja Raṇbir Singh some thirty years ago higher up on the river-bank.

It is probable that a temple so much frequented had undergone more than one restoration in the course of the fifteen centuries which lie between the time of Aśoka and the end of Hindu reign in Kāśmīr. Some time before A.D. 1081, while King Ananta was residing at the Tirtha of Vijayēśvara, the temple was burned down in a general conflagration, caused by his son Kalaśa. The latter, however, subsequently restored the shrine. The old Liṅga of Śiva Vijayēśvara seems to have fallen a victim to the iconoclasm of Sikandar Butshikast.¹

The town of Vijayēśvara is ascribed by Kalhaṇa to King Vijaya.² But nothing else is recorded of this ruler, and this may cause a doubt as to his historical existence. It is significant that the town is designated either simply *Vijayēśvara* or as *Vijayakṣetra*, which is abbreviated from *Vijayēśvarakṣetra*. The modern name *Vijābrōr* is the Kś. equivalent of Vijayēśvara, -brōr (from Skr. *bhaṭṭāraka* 'god') having replaced the more specific -*śvara*, the usual designation of Śiva.³

That the town had acquired importance at a comparatively early date, is indicated by the mention of a thousand Agrahāras said to have been granted here by King Mihirakula to a settlement of Gandhāra Brahmans.⁴ It was large enough to accommodate the whole court and army of King Ananta when the latter removed his residence to Vijayēśvara.⁵ The narrative of the civil wars which fills the last Book of Kalhaṇa's Chronicle shows the importance of the town by frequent references to the military operations of which it was the object.⁶ One of these passages proves that there was a bridge over the Vitastā here already in the twelfth century, just as there is one still.

Vijābrōr has remained a town of some importance and still boasts of a considerable number of Brahmans, mostly Purohitas of the Tirtha. The latter being conveniently situated on the pilgrims' way to Mārtāṇḍa

¹ See Jonar. (Bo. ed.), 762; for an earlier mention of this emblem see *ib.*, 127.

² *Rājat.* ii. 62.

³ Compare *Rājat.* i. 38 note; also ii. 134. In the same way *Iśābrōr* represents *Iśēśvara*; with the feminine -brāṇ for *bhaṭṭārīkā* we have *Sundābrāṇ* for *Samādhyaḍevī*, *Budābrāṇ* for *Bheḍāḍevī*, etc.

The forms 'Bijbiāra,' 'Bijbihara,' 'Bijbehara,' etc., under which the local name figures in European books, are all based on a faulty Panjābī pronunciation. A fanciful etymology of the name which sees in the first part of the word *vidyā* 'learning' and in the second 'Vihāra,' has found favour in the guide-books and may be mentioned here for curiosity's sake.

⁴ See *Rājat.* i. 317.

⁵ See *Rājat.* vii. 336 *sqq.*

⁶ *Rājat.* viii. 746 *sqq.*, 969 *sqq.*, 1140, 1509 *sqq.*, etc.

and Amaranātha is much frequented even at the present day. The Māhātmyas of Vijayeśvara do not fail to name a considerable number of minor Tirthas to be visited along with the main site now marked by the new temple above referred to. But apart from *Cakradhara* and *Gambhīrasaṅgama* I am unable to trace any of these in the older texts.

Turning to that portion of the Dachūnpūr district which lies in the Lid^ar Valley we have but few old localities to notice. The village of *Liv^ar*, some ten miles to the north-west of Vijayeśvara, is the *LEVĀRA* of the Rājatarāṅgiṇī, mentioned as an Agrahāra established by King Lava.¹ *Kular*, about four miles higher up the Valley, is identified by an old gloss with *KURUHĀRA*, said to have been an Agrahāra of Lava's son Kuśa.²

Close to *Pah^algām* where the Lid^ar Valley divides into two branches, lies the hamlet of *Māmal*. A small temple of the usual Kāśmīr style built by the side of a fine spring is visited by the pilgrims to Amaranātha. It is designated in the Māhātmya called *Amareśvara-kalpa* as *MAMMEŚVARA*. It is in all probability identical with the shrine of this name mentioned in the Rājatarāṅgiṇī.³

110. As we have already before noticed the several sacred sites

District of
Vāmapārśva. of the Amaranātha pilgrimage, we may now turn back and descend to the left or eastern portion of the Lid^ar Valley. It forms the modern Pargaṇa of *Khōvurpūr*. The latter name meaning 'left side' reproduces the earlier designation *VĀMAPĀRŚVA*, of the same significance, found in Jonarāja's Chronicle, the Lokaparakāśa and elsewhere.⁴ In the upper portion of the Pargaṇa I am not able to identify any particular old locality, though ancient remains in the form of sculptures of some interest are found near several Nāgas of this tract, e.g., at *Lokutⁱpūr* and *Sāli* (*Pāpaharaṇanāga*).

The large village of *Hut^amar* is undoubtedly an old site. Its modern name seems to identify it with the *ŚĀKTAMAṬHA* which Kṣemen-dra names as one of the stations in the peregrinations of his heroine Kaṅkāli. The chief mosque of the place is built with the remains of a Hindu temple and preserves in its walls some sculptured fragments of remarkable beauty.⁵

¹ See *Rājat.* i. 87.

² *Rājat.* i. 88.

³ See viii. 3360.

⁴ *Jonar.* (Bo. ed.) 79,1232.

⁵ See *Samay.* ii. 43. The change of *Śakta* > *Hut^a* is in accordance with the phonetic laws of Kāśmīrī; *mar* is the regular derivative of *maṭha*, see above, § 56. [When preparing my map, I had not noticed the local name of Kṣemendra's text; it is hence not shown on the map].

About one mile below Hut^amar and on the bank of a branch of the Lid^ar, lies the hamlet of *Bum^azu*, which contains an ancient structure of considerable historical interest. The Ziārat of Bāba Bām^adīn

**Shrine of
Bhīmakeśava.**

Śāhib is nothing but a well-preserved temple, converted, with a liberal use of plaster, into the supposed resting place of a Muhammadan saint. I have shown elsewhere that there is good reason to identify this shrine with the BHĪMAKEŚAVA temple which *Bhīma Sāhi*, king of Kābul, the maternal grandfather of Queen Diddā, is said to have erected during the rule of her husband Kṣemagupta (A.D. 950-958).¹

The legendary of the Ziārat relates that the saint was originally a Hindu and bore before his conversion to Islām the name of *Bhīma Sādhi*. It is easy to recognize in this name an adaptation of *Bhīma Sāhi*. Also the name of the locality *Bum^azu* which the Mārtāṇḍa-māhātmya renders by *Bhīmadvīpa*, is clearly derived from the old name of the shrine. *Bhīma* is an abbreviation of *Bhīmakeśava* to which *Ks. zu*, 'island,' has been added with reference to the several islands formed here by the Lid^ar immediately in front of the hamlet.

Kalhaṇa tells us a curious anecdote regarding the fate of *Bhīma Sāhi*'s temple in King Harṣa's time who confiscated the great treasures, with which it was endowed.² Close to the present Ziārat of Bām^adīn Śāhib is a small cave in the cliff containing a well-preserved little temple which is still used for Hindu worship. Another smaller shrine outside has been turned into the tomb of Rishi Ruknu-d-dīn Śāhib.

111. About one mile south of *Bum^azu* we reach the Tirtha sacred to Mārtāṇḍa which has from early times to the present day enjoyed a prominent position among the sacred sites of Kāśmīr. It is marked by a magnificent spring traditionally represented as two, *Vimala* and *Kamala*. An ancient legend connects them with the birth of the sun-god MĀRTAṆḌA.³ The Tirtha is visited at frequent intervals by crowds of pilgrims and is well-known also in India proper.

The popular name of the Tirtha, *Bavan*, is derived from Skr. *bhavana*, '[sacred] habitation.' This somewhat general appellation seems to have come into use already at an early date, as Śrīvara employs it,⁴ and is in itself an indication of the great popularity of the Tirtha. A

¹ See *Rājat*, vi. 178 note. For an accurate description of the temple, see Bishop Cowie's paper, *J. A. S. B.*, 1866, pp. 100 sq.

² See *Rājat*, vii. 1081 sqq.

³ Compare for a detailed account of the Tirtha, *Rājat*, iv. 192 note. The *Vimala Nāga* is named by the *Nilamata*, 963; *Śrīv.* i. 377, etc.

⁴ *Śrīv.* i. 376, 387.

more specific designation is *Mats^abavan*, Skr. '*Matsyabhavana*'; this owes its origin to the abundance of sacred fish which swarm in the large basins filled by the spring.¹

The ancient remains at the sacred spring itself are very scanty. All the more imposing are the ruins of the great temple which King Lalitāditya erected at a short distance in honour of the presiding deity of the Tirtha.²

They are situated a little over a mile to the south-east of 'Bavan,' near the northern edge of the Uḍar which stretches towards Anantnāg. It can scarcely be doubted that the site was chosen with a view to the prominent position it assured to the great temple. Kalhaṇa duly praises "the wonderful shrine of *Mārtāṇḍa* with its massive walls of stone, within a lofty enclosure." Its ruins though much injured by the ravages of time and earthquakes, form still the most impressive specimen of ancient Kāśmīr architecture. They have been much admired by European travellers and often described. They are the earliest ruins in Kāśmīr the date of which is fixed with approximate accuracy.³

The name *Mārtāṇḍa*, in the form of *Mārtāṇḍ* or Maṭan, still attaches to the ruins though they have long ago ceased to be an object of religious interest. King Kalāśa had sought this great fane at the approach of death and expired at the feet of the sacred image (A.D. 1089). Harṣa, his son, respected this temple in the course of the ruthless confiscations to which he subjected the other rich shrines of the country. Subsequently in Kalhaṇa's time the great quadrangular courtyard of the temple with its lofty walls and colonnades was used as a fortification. The destruction of the sacred image is ascribed to Sikandar Butshikast.

Kalhaṇa distinctly mentions the town "swelling with grapes" which Lalitāditya founded near his temple; but of this no trace remains now. It is probable that at that time a canal supplied water from the Lidar to the naturally arid plateau on which the temple stands. This canal seems to have been repaired by Zaiinu-l-'ābidin whose irrigation works on the *Mārtāṇḍ* Uḍar are described at length by Jonarāja.⁴ The

¹ Comp. *Āin-i-Akb.*, ii. p. 358.

² See *Rājat.* iv. 192 and for details my note on the passage. For a description of the temple compare, e.g., CUNNINGHAM, *J. A. S. B.*, 1848, pp. 258 sqq.; COLE, *Ancient Buildings*, pp. 19 sqq. FERGUSSON, *Ind. Architecture*, pp. 285 sqq.

³ Lalitāditya's rule falls in the first half of the eighth century. Gen. Cunningham's assumption that the temple was built by the earlier King Raṇāditya, and only the enclosure by Lalitāditya, rests on a misinterpretation of the *Rājatar.* passages iv. 192 and iii. 462.

⁴ See *Jonar.* 1245 sqq.

The place of pilgrimage is the sacred spring of *Pāpasūdana* ('sin-removing'), situated a short distance above Kōṭhēr. In it Śiva is believed to have shown himself in the disguise (*kapāṭa*) of pieces of wood floating on the water. The legend is related at length in the *Nilamata*, and the author of the *Haracaritacintāmaṇi* devotes to it a separate canto which has now become the official *Māhātmya* of the Tirtha.¹ The importance of the latter is shown by the fact that Kalhaṇa mentions it in his Introduction first among the sacred sites of Kāśmīr.

Before him already Albērūnī had heard of the story that pieces of wood sent by Mahādeva appear annually "in a pond called *Kūdaishahr* to the left of the source of the Vitastā, in the middle of the month of Vaiśākha."² *Kūdaishahr* (کودیشهر), is an easily explained corruption for کودیشور i.e., **Kavadēśvar*, a prakritized form of the name. The map shows that the description of the position of the Tirtha is accurate enough with reference to the Nilanāga as the Vitastā's traditional source. The date named by Albērūnī is identical with that prescribed for the Kapaṭeśvara Yātrā.

The sacred spring rises in a large circular tank, enclosed by an ancient stone-wall with steps leading into the water. According to Kalhaṇa's account this enclosure was constructed about a century before his own time at the expense of the well-known King Bhoja of Mālava. The latter is said to have taken a vow to always wash his face in the water of the Pāpasūdana spring which he caused to be regularly supplied to him in jars of glass.³ In my note on the passage I have shown that local tradition at Kōṭhēr still retains a recollection of this story though in a rather legendary form. A small temple which stands to the east of the tank, and some other remains probably belong to the period of Bhoja. Abū-l-Faẓl too knows, "in the village of Kōṭihār, a deep spring surrounded by stone temples. When its water decreases an image of Mahādeva in sandal wood appears."

About four miles to the north-east of Kōṭhēr and on a branch of the Ārāpath river lies the populous village of *Sāmāṅgāsā*. of *Sāngas*, the ancient *SĀMĀṅGĀSĀ*.⁴ The modern name can be traced back to *Sāmāṅgāsā* through a course of regular phonetic conversion, one stage of which is preserved in the form *Svāngas* supplied by the old glossator of the Chronicle.⁵ Some old

¹ *Haracar.* xiv.

² See *India*, ii. p. 181.

³ See *Rājat.* vii. 190 sqq.

⁴ See *Rājat.* i. 100; viii. 651.

⁵ Compare *Rājat.* i. 100 note and the analogy of *Sanāra* > *Sūr*.

carved slabs built into the chief Ziārat of the place attest its antiquity. A short distance above Sāngas we come to another old place. It is the present village of *Vuterus* which on the authority of the same glossator and the name itself we can safely identify with Kalhaṇa's *Utrūsa*.¹ Uccala and Sussala in their flight from Harṣa's court found a temporary refuge with the Dāmara who resided there.

Turning back to the west we find in the middle of the valley the village of *Khondur*. An old gloss enables us to identify it with the ancient SKANDAPURA mentioned by Kalhaṇa as an Agrahāra of King Gopāditya.² More important is *Achabal*, a large village at the west foot of the ridge which lines the Kuṭāhār Pargana from the south. It is mentioned in the Chronicle under the name of AKṢAVĀLA. The beautiful springs of the place have often been described since Abū-l-Faẓl's time, also by Bernier.³ The park around them was a favourite camping ground of the Mughal court. The Nilamata calls the spring *Akṣipālanāga*.

113. The Kuṭāhār Pargana is adjoined on the south by the district of Bring which coincides with the valley of the Bring stream. Its old name cannot be traced; the Lokaprakāśa transcribes the modern designation by *Bhr̥ṅga*.

At the western end of the Pargana and about 5 miles to the south-west of Achabal is the village of *Lōkabhavan* which an old gloss identifies with the LOKAPUṆYA of the Rājatarāṅgiṇī.⁴ The numerous passages which mention the place agree with this location. The name Lōkabhavan applies also to the fine Nāga adjoining the village, and this explains the second part of the present name -*bavan* (Skr. *bhavana*).⁵ King Lalitāditya is said to have built a town here. A small garden-palace erected in Mughal times near the spring is partly constructed of old materials.

Ascending the Bring valley we come again to an old site at the large village of *Bidār*. It is certainly the BHEPARA of Kalhaṇa who notices here a wealthy Agrahāra of King Balāditya.⁶ A ruined mound in the village and some old sculptures at the neighbouring Brahman village of Hāngalgūnd are the only ancient remains now above ground.

¹ Compare vii. 1254.

² See *Rājat.* i. 340.

³ Compare *Rājat.* i. 338. In the translation of the *Āin-i-Akb.* the name appears as 'Acch Dal', ii. p. 358; see BERNIER, *Travels*, p. 413.

⁴ See *Rājat.* iv. 193 note.

⁵ See above, § 111.

⁶ *Rājat.* iii. 481.

From Bidār we may pay a passing visit to a small Tirtha which though I cannot find it mentioned in any old text, may yet claim some antiquity. About $1\frac{1}{2}$ miles to the south-east of Bidār lies the village

**Tirtha of
Ardhanārīśvara.**

of Nāru in the low hills flanking the valley. It contains a small temple of ancient date which was restored forty years ago by a pious Dogrā official. It stands by the side of a small Nāga at which, according to the local Māhātmya I acquired from the resident Purohita, Śiva is worshipped as ARDHANĀRĪŚVARA, that is, in conjunction with his consort Pārvatī. Inside the temple is an ancient image of Viṣṇu with a short Sanskrit inscription said to have been found in a miraculous way at the restoration of the temple. About half a mile to the south-west is a sacred spring known as *Svedanāga* which seems to have risen originally within a large temple. The remains of the latter lie in shapeless heaps around the spring. The latter is still visited by pilgrims.

It appears to me likely that it is this spot which Abū-l-Faẓl wishes to describe in the following notice. After mentioning the Kukār Nāg and Sundābrār (see below) among the sacred places of Bring, he says : "At a little distance in the midst of a beautiful temple, seven fountains excite the wonderment of the beholder. In the summer-time self-immolating ascetics here heap up a large fire around themselves and with the utmost fortitude suffer themselves to be burned to death."¹ He then mentions a lofty hill containing an iron mine to the north of this spot. This can only be the hill above *Sōp*, on the northern side of the Valley and nearly opposite Nāru, from which iron is still extracted at the present time. There is no other Nāga within Bring to which Abū-l-Faẓl's description would apply so closely as to the *Svedanāga*.

The *Kukār Nāg*, mentioned by Abū-l-Faẓl for its good water inciting a healthy appetite, lies about a mile above Bidār. It is a spring of very great volume, referred to in the *Trisamdhya*māhātmya as *Kukkūṭeśvara*.

Bring contains one of the holiest of Kāśmīr Tirthas in the sacred Tirtha of *Trisamdhya*. spring of the goddess SAMDHYĀ, also called *Trisamdhya*, the modern *Sundābrār*.² It is situated in a side valley opening to the south of the village of Devalgōm, circ. 75° 22' long. 33° 32' lat. The spring of Samdhya derives its fame as well as its appellation from the fact that during uncertain periods in the early summer it flows, or is supposed to flow, intermittently, three times in the day and three times in the night. Owing to the analogy thus presented to the three-fold recitation of the Gāyatri

¹ See *Āin-i-Akḥ*, ii. p. 356.

² See *Rājat*, i. 33 note.

(Saṃdhyā), it is held sacred to the goddess Saṃdhyā. At the season indicated it is visited by a considerable concourse of people.

The small spring, which is usually dry for the greater part of the year, has owing to the curious phenomenon above indicated always enjoyed great fame as one of the 'wonders' of the valley. Kalhaṇa duly mentions it immediately after Kapaṭeśvara. The Nilamata too knows it. Abū-l-Faẓl describes it in detail, and Dr. Bernier made it a special point to visit this 'merveille de Cachemire.'¹ He has observed the phenomenon with his usual accuracy. The ingenious explanation he has recorded of it, shows how closely he had examined the topographical features of the little valley.

Close to the Trisaṃdhyā spring there is another Nāga, sacred to the Seven Ṛṣis, but not sharing the former's peculiar nature. There are no ancient remains in the neighbourhood deserving special notice.

114. To the south of Bring lies the valley of the Sāṇḍran River which forms the Pargaṇa of Shāhābād. This

Nilanāga. name is of comparatively modern origin, as Abū-l-Faẓl still knows the tract as Vēr.² This designation still survives in the designation Vērṇāg, i.e., 'the Nāga of Vēr,' popularly given to the fine spring which we have already noticed as the habitation of the NILANĀGA and the traditional source of the Vitastā. Abū-l-Faẓl saw still to the east of it 'temples of stone.' These have now disappeared, their materials having been used probably for the construction of the fine stone-enclosure which Jahāngīr built round the spring. The deep blue colour of the water which collects in the spring-basin, may possibly account for the location of the Nilanāga in this particular fountain. Kalhaṇa's reference to the "circular pond" from which the Vitastā rises, shows that the spring had also in ancient times an artificial enclosure similar to the present one.³

Reference has already been made to the sacred spring of Vithavutur only about one mile to the north-west of

Vitastātra. Vērṇāg. The small village near by is mentioned by Kalhaṇa as a town under the name of VITASTĀTRA.⁴ Aśoka is said to have erected there numerous Stūpas. Within the Dharmārāmya Vihāra there stood a lofty Caitya built by him, but of these structures no remains can now be traced above ground. Vitastātra could never have been a large town as the ground is too confined. But some importance is assured to the site by the Bānphāl route which leads past

¹ Compare *Āin-i-Akb.*, ii. pp. 355 sq.; BERNIER, *Travels*, pp. 410 sqq.

² See *Āin-i-Akb.*, ii. pp. 361, 370.

³ See *Rājat.* i, 28.

⁴ See *Rājat.* i, 102 note.

it. This pass and its ancient name *Bāṇasālā*, we have already spoken of.¹

Of other old localities PAÑCAHASTĀ, the present *Pānzath*, has already been referred to as the site of one of the traditional sources of the Vitastā. Kalhaṇa mentions it in connection with a Maṭha which Śūravarman, Avantivarman's minister, built here.² A pretty valley which opens to the south of Pānzath, is now known by the name of its chief village *Ruzul*. The latter is mentioned by Jonarāja as RĀJOLAKA.³ About three miles higher up this valley is the Nāga of VĀSUKI. It is mentioned in the Nilamata and other old texts, but does not appear to have ever been an important Tirtha.⁴

115. The Pargaṇa of *Divasar* which adjoins *Shāhābād-Vēr* on the west, may be roughly described as comprising the tract of alluvial plain drained by the *Veśau* (*Viśokā*). By its ancient name of

District of
Devasarasa.

DEVASARASA it is often mentioned in the *Rājatarāṅgiṇī* and other Chronicles.⁵ Being extensively irrigated by canals drawn from the *Viśokā* it is very fertile. This accounts for the great part which the *Dāmaras* or feudal landholders of Devasarasa played during the weak reigns of the latter kings. No certain reference to a specific locality within this tract can be traced in our old texts. But it seems probable that *Pārevisōka*, repeatedly named in Kalhaṇa's Chronicle, must be looked for within Devasarasa; the name means literally 'beyond the *Viśokā*.'⁶

The fertile valleys descending to the right bank of the *Viśokā* from that portion of the *Pir Pantāl Range* which lies between the *Kōnsar Nāg Peak* and the *Mōhi Pass*, form a small district of their own, known in recent times by the double name *Khur-Nārāvāv*. The first part of this name is taken from the large village of *Khur* situated about two miles from the *Viśokā*, circ. 74° 56' 45" long. 33° 37' lat. It is marked as 'Koori' on the larger Survey map. The name *KHERĪ* which we find used by Kalhaṇa and *Śrīvara* for the designation of the tract, is in all probability the older form of *Khur*.⁷ It seems that in later Hindu times the administration of *Kherī*, perhaps as a royal allodial domain, formed a special charge. Kalhaṇa often refers to the *Kherikārya* as a high state-office. The Sikhs and *Dogrās* who established *Jāgīrs* for members

⁷ Compare regarding the identification of *Kherī*, *Rājat.* i. 335 note.

of the reigning family in Khur-Nārāvāv, may thus have followed an earlier arrangement.

The only localities in this little district that are known to us by their old names, are GODHARĀ and HASTISĀLĀ, the present *Gudar* and *Astihēl*.¹ These two villages are situated close together, on a branch of the Viśokā near the eastern limits of Khur-Nārāvāv. Kalhaṇa mentions the 'Agrahāra of Godharā-Hastisālā' as a foundation of King Godhara. The old gloss which transcribes these local names by *Godhar-Astihil* enabled me to identify the places intended.

A small stream which falls into the Viśokā at Gudar is known by the name of Godāvarī and forms a Tirtha of some repute among the Brahmins of the neighbouring districts. In the Māhātmya of the Tirtha the site of the village is called *Godara*, and its name connected with the legend of the appearance of the *Godāvarī*. The local tradition heard by me on the spot tells of a town which King Gudar is supposed to have founded here. It is possible that the name of King Godhara, which we know Kalhaṇa took indirectly from Helārāja's 'List of Kings,' rests on no better foundation than this long-surviving local tradition.² There are no ancient remains traceable above ground at Gudar, and the locality is far too confined for a larger settlement.

The Naubandhana Tirtha and the Kramasaras or Kōns'r Nāg south of this district have already been previously noticed.

116. To the north of Div^{as}ar lies the considerable district of *Ād^{vin}* extending from the western end of District of Karāla Khur-Nārāvāv to the lower course of the (Ardhavana). Viśokā. Its present name is derived from that of the large village of *Ād^{vin}*, which lies on the left bank of the Viśokā, about three miles south-west of Vij^{br}ōr. In the form of *Ardhavana* this name is found already in a passage of Jonarāja's Chronicle, supplied by the new edition.³ The ancient designation of the district, however, was KARĀLA. This is used by Kalhaṇa when speaking of the *Suvarṇamanikulyā*, the present Sun^{man} Kul, which has already been referred to as irrigating part of *Ād^{vin}*.⁴

In the lower portion of the district and on the left bank of the Viśokā, we have the ancient *Katimuṣa*, the present village of *Kaimuh*.

¹ For details compare *Rājat.* i. 96 note.

² Regarding the unhistorical character of the royal names which Kalhaṇa inserted on Helārāja's authority, see *Rājat.* i. 86 note. They seem to be all of an eponymic character.

³ See *Jonar.* (Bo. ed.) 1330.

⁴ See *Rājat.* i. 97 note, and above, § 78.

The place is mentioned by Kalhaṇa as an Agrahāra founded by Tuṇjina I., and contains some old remains built into its chief Ziārat.¹

Part of Āḍṛvin lies on an alluvial plateau. The northernmost portion of this Uḍar seems to have been formed into a separate Pargaṇa after Zainu-l-'ābidīn had constructed there extensive irrigation channels. From the small town of *Jainapurī* founded by him the new subdivision took the name of Zainṣpōr or JAINAPURA.² At the east foot of the Zainṣpōr Uḍar lies the village of *Vāchī* (map 'Woochi') which on the authority of an old gloss may be identified with VĀŚCİKĀ (or Vāścika), an Agrahāra founded by Gopāditya.³

The Pargaṇa which joins on to Āḍṛvin in the north-east, is now known as *Bōṭ* (map 'Battoo'). Its ancient name is unknown. The only old locality I can trace in it is the village of *Sīdan*, 74° 51' long. 33° 41' lat., the ancient SIDDHAPATHA.⁴ It has given its name to the route previously mentioned which leads to the Būdil and Kōns'r Nāg Passes.

It is curious that we find no old mention whatever of *Supiyan*, a considerable town, which is now the trade emporium for the Pir Pantṣāl route. In this character *Supiyan* has replaced the ancient *Sūrapura* or Hūrṣpōr, but the change must be a comparatively recent one.

SŪRAPURA which we have already noticed as the Kāśmīr terminus of the Pir Pantṣāl route, lies some seven miles higher up on the Rembyār.⁵ It received its name from the minister *Sūravarma*n who built it in the time of *Avanti-varma*n and transferred to it the watch-station or 'Draṅga' of the route. The position of the latter is marked by a spot known as *Ilāhi Darwāza*, a short distance above Hūrṣpōr.⁶ *Sūrapura* must have been a place of considerable extent as ruins of old habitations can be traced on the river banks for over two miles below the present Hūrṣpōr. It evidently retained its importance down to Akbar's time. For it is regularly mentioned by all the later Chroniclers in connection with marches and traffic by the Pir Pantṣāl route. The ancient remains of the place have been described by me in my notes on the latter.⁷

Our previous account of the old localities on the way to the Pir

⁷ See *J. A. S. B.*, 1895, p. 385.

Pantāl Pass makes it unnecessary for us to proceed now further in this direction. Descending, then, by the Rembyār* we come on its left bank to the village of *Dēgām* situated about one and a half miles to the west of *Śūpiyaṇ*. It is the *DEGRĀMA* of the *Rājatarāṅgiṇī* and the site of the *Kapālamocana Tirtha*.¹ At the spring of the latter *Śiva* is supposed to have cleaned himself from the sin attaching to him after the cutting-off of Brahman's head (*kapāla*). The *Tirtha* is old, because the *Haracaritacintāmaṇi* mentions it twice.² There are but few ancient remains at the sacred site, and the extant *Māhātmya* is evidently not of old date. It calls the village by the name of *Drigrāma* and knows the modern *Śūpiyaṇ* by the name of *Śūrpāyaṇa*.

117. The villages which lie at the foot of the pine-clad spurs descending into the valley west and north-west of *Śūpiyaṇ*, formed until recent times a small distinct *Pargaṇa* known as *Śūparsāmūn*. *Abū-l-Faẓl* mentions it (*Sōparsāman*), but I am not able to trace it in our older texts.

To the north of this tract and of *Bōṭ* extends the *Pargaṇa* of *Sukru*.

. *Kalyāṇapura*.

Its old name is unknown. Here at the foot of the hills, we have the ancient *KALYĀṆAPURA*, represented by the present village of *Kalampōr*, situated 74° 54' long. 33° 48' lat. It was founded by *Kalyāṇadevi*, a queen of *Jayāpiḍa*.³ Being on the high road from the *Pir Pantāl* Pass to *Śrīnagar*, it was repeatedly the scene of battles fought with invaders from that direction.⁴

At *Kalyāṇapura* there was in *Kalhaṇa*'s time the splendid country-seat of a powerful *Dāmara*.⁵ The large village of *Drābhagām*, some three miles north of *Kalampōr*, is mentioned as *DRĀBHAGRĀMA* by *Śrīvara*, along with *Kalyāṇapura*, in the description of a battle which was fought between the two places.⁶

High up in the valley of the *Birnai* stream which debouches at

Tīrtha of *Bheḍā*.

Drābhagām from the south-west, is the site of an ancient *Tīrtha* which though now completely forgotten must have ranked once amongst the most popular in *Kāśmir*. In *Kalhaṇa*'s introduction there is named, along with *Trisamdhya*, *Svayāmbhū*, *Śārādā* and other famous sites, "the hill of *Bheḍa* (*Bheḍagiri*) sanctified by the *Gangodbheda* spring." There the goddess *Sarasvatī*

was believed to have shown herself as a swan in a lake situated on the summit of the hill. This Tirtha has long ago ceased to be visited by pilgrims, and all recollection regarding its position has been lost to Paṇḍit tradition. Fortunately the old Māhātmya of the sacred lake has survived in a single copy. With the help of some indications furnished by it and an opportune notice of Abū-l-Faḍl, I was able to make a search for this ancient Tirtha which ultimately led to its discovery at the present Buḍ^abrār in the valley above indicated.

For the detailed evidence regarding this identification I must refer to my note on Kalhaṇa's passage.¹ Here a brief reference to the topographical peculiarity of the site will suffice. The Māhātmya describes the lake sacred to the goddess Sarasvatī-Bheḍā as situated on the summit of a hill, and Gaṅgodbheda as a spring flowing from it. At Buḍ^abrār, a small Gujar hamlet, which occupies the position marked by BHEPAGIRI on the map, I found an ancient stone-lined tank fed by a spring on the top of a small hillock. The latter rises about seventy feet above the level of the narrow valley in which it is situated. From the side of the hillock issues a spring which is the natural outflow of the tank and exactly corresponds to the description given of Gaṅgodbheda. The name Buḍ^abrār is the direct derivative of Bheḍādevī, 'the goddess Bheḍā,' the popular designation of the Tirtha found in the Māhātmya; -brār < Skr. bhāṭṭārikā is the equivalent of devī as in Sund^abrār, Har^abrār and other names.

The water of the spring which fills the tank, is said to keep warm in the winter. This accounts evidently for the story told in the Māhātmya that snow never lies on the ground around the sacred tank. Also Abū-l-Faḍl's notice of the Tirtha mentions this particular feature: "Near Shukroh (Sukru) is a low hill on the summit of which is a fountain which flows throughout the year and is a place of pilgrimage for the devout. The snow does not fall on this spur."²

Also Śrīvara helped to guide my search in the direction of Buḍ^abrār and to confirm the subsequent identification. He mentions the route through Bheḍāvana, 'the forest of Bheḍā,' as the line of retreat taken by the troops who after their defeat in the above-mentioned engagement near Drāb^agām were fleeing towards Rajauri.³ A glance at the map shows that the thickly wooded valley of Buḍ^abrār is meant here. For a force beaten near Drāb^agām it affords the most direct and safest retreat to the Pīr Panṭāl Pass and hence to Rajauri. The route leading through the valley joins the 'Imperial Road' at Dubji and is shown on the map.

¹ See *Rājat.* i. 35, Note A.

² See *Āin-i-Akb.*, ii. p. 362.

³ Compare *Śrīv.* iv. 496 and the preceding narrative.

Returning once more to the plain we have yet to notice two other old localities of Sūkru. *Bilau* (map 'Belloh') about four miles north-east of Drāb^agām is probably the 'village of BILĀVA' once mentioned by Kalhana.¹ Within a mile of it lies the village *Sun^asāmīl* which we may safely identify with the SŪVARNASĀNŪRA of the Rājatarāṅgīnī, in view of the resemblance of the names and the repeated mention of the latter place together with Kalyāṇapura.²

118. East of Sūkru towards the Vitastā stretches the Pargana of *Sāvur* (map 'Showra'). The earlier form of its name cannot be traced. Its northern part is formed by the alluvial plateau known as the

Districts of Śāvur
and Chrāṭh.

Naunagar Uḍar. This latter is twice referred to as NAUNAGARA in Kalhana's Chronicle.³ The village of *Pāyer* which lies at the foot of the Uḍar at its north-western end contains a well-preserved little temple often described by European travellers.⁴ Nothing is known regarding the original name of the locality.

To the north of Sūkru we have the district of *Chrāṭh* (shown by name on the larger survey map). It extends from the hills above Rāmuh in a north-easterly direction to the left bank of the Vitastā. Its old name is restored in Paṇḍit Sāhibram's Tirthasaṅgraha as **Śrīrāṣṭra*, but I do not know on what authority. *Rāmuh*, first correctly identified by Prof. Bühler with Kalhana's RĀMUṢA,⁵ is a considerable village on the high road from Supiyaṇ to Śrinagar. It is first mentioned as an Agrahāra, founded by a queen of Tuṅjina I. A small spring at the northern end of the village, called *Dhananāga*, is visited as a Tirtha and contains some fragments of ancient sculptures. The temple erected by the Brahman family of the Dars which now holds Rāmuh as a Jāgīr, does not seem to mark an old site.

A short distance to the north of Rāmuh rises an alluvial plateau which is crossed by the road to Śrinagar. It is known as *Gūs Uḍar*, from the village of *Gūs* situated at its eastern foot, about two miles from Rāmuh. The place is mentioned as GUSIKĀ in Śrīvara's

¹ See *Rājat.* vii. 1016.

² See *Rājat.* vii. 1519 note; *sun^a* 'gold' is the regular Kś. derivative of Skr. *suvarṇa*.

³ See *Rājat.* vii. 358.

⁴ Compare, e.g., CUNNINGHAM, J. A. S. B., 1848, pp. 254 sqq. I am unable to explain why the place figures in all European accounts as Pāyech, Pā Yech, etc. VIENE, ii. 41, first uses this form which is locally quite unknown, and does not fail to explain it by one of his naïve etymologies.

⁵ *Rājat.* ii. 55; *Report*, p. 7. Medial *ṣ* becomes in Kś. regularly *h*; comp. *Katīmuṣa* > *Kaimuh*, *Khonamuṣa* > *Khun^amoh*, etc.

Chronicle which also knows the plateau by the name *Gusikoḍḍāra*.¹ At the other end of Chrāṭh towards the Vitastā lies the large village of *Ratanpōr*, 75° 1' long. 33° 55' lat., which in all probability represents the RATNĀPURA of the Rājatarāṅgiṇī.² The latter was founded in Kalhaṇa's time by Queen Ratnādevi who also constructed there a fine Maṭha.

With Chrāṭh may be mentioned two localities on the left bank of the Vitastā though in recent times they were counted with the riveraine Pargaṇa of Sāiru-l-Mawāzī' Bālā. *Gūrīpūr*, a small village opposite to the foot of Mount Vastārvan, is identified by an old gloss with GOPĀLAPURA which, according to Kalhaṇa, was founded by Queen Sugandhā (A.D. 904-6).³

Lower down on the river is the large village Kākāpōr which forms as it were the riverside station or port for Sūpiyaṇ. A note from the hand of Paṇḍit Rājānaka Ratnakaṇṭha who wrote about the middle of the 17th century the Codex Archetypus of the Rājatarāṅgiṇī, identifies UTPALAPURA with Kākāpōr.⁴ Utpalapura was founded by Utpala, an uncle of King Cippaṭa-Jayāpīḍa, in the early part of the 9th century. If this identification is correct, one of the ruined temples extant at Kākāpōr and noticed already by Gen. Cunningham, may be the shrine of Viṣṇu *Utpalasvāmin* mentioned by Kalhaṇa in connection with the foundation of Utpalapura. Jonarāja also knows the latter place and records a late restoration of its Viṣṇu temple.⁵

119. North of Chrāṭh we come to the district of Nāgām which is one of considerable extent. Its old name NĀGRĀMA is often mentioned in the later Chronicles.⁶ The only old locality which I can trace in it, is the village of *Ārīgōm*, situated 74° 45' long. 33° 56' lat. It is the HĀPIGRĀMA of Kalhaṇa, mentioned as an Agrahāra of Gopāditya and as the scene of several fights in the Chronicler's own time.⁷

¹ *Skr.* iv. 532, 465, 592 sqq.; -*uḍḍāra* is the Skr. original of the Kś. term *uḍar*, see *Rājat.* note viii. 1427.

² See *Rājat.* viii. 2434.

³ See *Rājat.* v. 244 note.

⁴ See *Rājat.* iv. 695 note. The learned copyist's note is in a copy of the *Kṣetrapālāpadāhātī* seen by me in 1895 in the possession of a Kāśmīr Brahman resident at Lahore.

⁵ See *Jonar.* (Bo. ed.) 111 sqq., 369, 1142.

⁶ Compare *Jonar.* (Bo. ed.) 661; *Skr.* ii. 10; iii. 24, 430; iv. 349; Fourth Chron. 258, etc.

⁷ See *Rājat.* i. 340 note. The old glossator on this passage renders Hāḍigrāma correctly by *Āḍegrām*.

Some remains of old buildings are reported to exist at this place ; I have not seen it myself.

About five miles due south of Ārīgōm we find a small lake known as Nilānāg, situated in a valley between low spurs descending from the Pir Pantṣāl Range. It appears to have been formed by an old landslip which blocked a narrow defile in the Valley. This lake does not appear ever to have enjoyed any particular sanctity. But Abū-l-Faḍl by some curious misapprehension transfers to it the legends of the famous Nilanāga (at Vērṇāg). He adds to them what appears like a garbled version of the story of the city submerged in the Mahāpadma or Volur lake.¹

Nāgām is adjoined on the north by the Pargana of Yech which extends to the immediate vicinity of Śrīnagar. Its old name is given as IḡṣIKĀ by Śrīvara.² In the centre of the tract lies an arid alluvial plateau known as *Dāmādar Uḍar*, where an ancient popular tradition surviving to the present day has localized the legend of King *Dāmodara*.

The story as related by Kalhaṇa, represents the king as having built a town on the Uḍar which latter was called *Dāmodara's Uḍar*. after him *DĀMODARASŪDA*.³ In order to bring water to it he had a great dam, called *GUDDASETU*, constructed by supernatural agency. Once hungry Brahmans asked the king for food, just as he was going to bathe. The king refused to comply with their request until he had taken his bath. The Brahmans thereupon cursed him so that he became a snake. Ever since the unfortunate king is seen by people in the form of a snake "rushing about in search of water far and wide on the *Dāmodara-Sūda*." He is not to be delivered from the curse until he hears the *whole* Rāmāyaṇa recited to him in a single day, a task which renders his release hopeless.

The modern name *Dāmādar Uḍar* is the exact equivalent of Kalhaṇa's *Dāmodara-Sūda*, the old Skr. term *sūda* meaning a 'place where the soil is barren.' The local name *Guddasetu* still lives in that of the small village *Gudṣuth* situated at the south foot of the Uḍar. Just at this point the latter shows its greatest relative elevation and falls off towards the valley with a steep bank over one hundred feet high. The wall-like appearance of this bank probably suggested the story of an embankment which was to bring water to the plateau. In view of the configuration of the ground no serious attempt at irrigation by means of an aqueduct could ever have been made in this locality.

¹ Compare *Āin-i-Akb.*, ii. p. 363. It is possible that of the two Nilanāgas which the Nilamata, 903, mentions besides the famous spring of that name, one was located in the Nāgām lake.

² *Śrīv.* iii. 25.

³ Compare for detailed references, *Rājat.* i. 156 note.

The Uḍar stretches in a north-westerly direction, for about six miles from the village of Vah**tōr*, with a breadth varying from two to three miles. It bears only scanty crops of Indian corn in patches. Being entirely devoid of water, it is a dry and barren waste, a haunt of jackals as in the days when King Kṣemagupta hunted over the '*Dāmodarāranya*.'¹ The main features of the legend regarding it are well known to popular tradition throughout Kāśmīr. The inhabitants of the neighbouring villages also point to a spot on the Uḍar known as *Sat*ras Tēng*, as the site of Dāmodara's palace. A spring called *Dāmodar-Nāg* in the village of Lālgām, is believed to have served for the king's ablutions.

To Yech belongs also the small village of *Somq*bug* on the left bank of the Vitastā which according to the note of the old glossator A₂ marks the site of the temple of Viṣṇu SAMARASVĀMIN mentioned by Kalhaṇa.² Another old locality in Yech is probably marked by the hamlet of *Hal*thal* to which Abū-l-Faḍl refers. It is not shown on the Survey map, and I have not been able to ascertain its exact position. *Hal*thal* is evidently a derivative of SĀLĀSTHALA, the name given by Kalhaṇa to a locality where a fight took place in the time of King Ananta.³ Abū-l-Faḍl mentions '*Halthal*' for its quivering tree. "If the smallest branch of it be shaken, the whole tree becomes tremulous."

SECTION VIII.—SOUTHERN DISTRICTS OF KRAMARĀJYA.

120.—To the west of Yech and reaching close up to the capital, Districts of Dūntṣ, lies the Pargaṇa now called *Dūntṣ* (map Bīru, Māñch**hōm*. 'Doonsoo'). Its ancient name is uncertain; possibly it is intended by the name *Dvāvimśati* in the Lokaprakāśa's list of 'Viṣayas.' In Abū-l-Faḍl's table of Pargaṇas *Dūntṣ* ('Dūnsū') is already counted with Kamrāz. An old locality in it is *Sīl**pōr**, a large village situated circ. 74° 45' long. 34° 1' lat. (map 'Shalipoor'). We may safely recognize in it the SELYAPURA of the Rājatarāṅgiṇī which is referred to as a place on the direct route from the Tōs*maidān Pass and the Kārkotadrāṅga to Śrīnagar.⁴

*Hukh*lit*er* (map 'Haklitri') can safely be identified, in view of the name and the evidence of an old gloss, with S'USKALETRA mentioned in the

¹ Compare *Rājat.* vi. 183.

² See note v. 25.—The ending *-bug* is not rare in Kāśmīr village names. According to Paṇḍit tradition, it is derived from Skr. *bhoga* in the sense of 'property granted for the usufruct [of a temple].'

³ See note vii. 159; *Ām-i-Akb.*, ii. p. 363.

⁴ See *Rājat.* vii. 494 note; viii. 200.

Rājatarāṅgiṇī as a place where Stūpas were erected by King Aśoka.¹ I have not visited the village myself and am hence unable to say whether there are any remains in the vicinity which could be attributed to Stūpas. Kalhaṇa locates at Suṣkalettra the fierce battle in which King Jayāpiḍa recovered his kingdom.

West of Dūntis and towards the mountains of the Pir Panṭāl lies the Pargana of Bīru. Its old designation BAHURŪPA is derived from the spring of that name which is situated at the present village of Bīru, 74° 39' long. 34° 1' lat., and is already referred to as a Tirtha in the Nilamata.² Abū-l-Faḍl knows the village and spring by an intermediate form of the name, Bīruwā, and mentions the miraculous power of the spring to heal leprosy.³ Close to the village of Bīru is *Sunapāh* in which we may, with an old glossator of the Rājatarāṅgiṇī, recognize SUVARṆAPĀRŚVA, an Agrahāra of Lalitāditya.⁴

About four miles to the south-west of Bīru we reach Khāg, a considerable place. It is undoubtedly the KHĀGI or KHĀGIKĀ mentioned by Kalhaṇa as an Agrahāra both of King Khagendra and of Gopāditya.⁵

Some miles north of Khāg an isolated spur known as Pūṣkar projects into the level plain from the slopes of the Pir Panṭāl Range. At its eastern foot is the Pūṣkaranāga, referred to as a Tirtha in the Nilamata and several older Māhātmyas, and still the object of a regular pilgrimage.⁶ Of the route which leads down into Bīru from the Tōṣamāidān Pass, and of KĀRKOTADRAṄGA, the watch station on it, we have already spoken above.

Bīru and Dūntis are adjoined on the north by the Pargana of Māñchāhōm which extends eastwards as far as the Vitastā. It is probably intended by the name of Mākṣāśrama found in a single passage of Śivara and in the Lokaparakāśa.⁷ The village of Ratasm, situated 74° 38' long. 34° 4' lat., is probably, as indicated by an old gloss, the

¹ Compare *Rājat.* notes i. 102; iv. 473; Kś. *Hukhḷitor* is the direct phonetic derivative of the Skr. form.

² See *Nilamata*, 948, 1180, 1341 sq. The name Bahurūpa is given to the tract by *Jonar.* (Bo. ed.) 286, 840; *Śriv.* ii. 19, iii. 159; iv. 620, and ought to have been shown on the map.

³ *Āin-i-Akb.*, ii. p. 363.

⁴ See *Rājat.* iv. 673.

⁵ Compare *Rājat.* i. 90, 340.

⁶ See *Nilamata*, 1021, 1347. There were several other Pūṣkara Tirthas in Kāśmīr. One was connected with the Sureśvari pilgrimage and probably situated in Phākh; see *Sarvāv.* v. 56 sqq.

⁷ See *Śriv.* iv. 351.

ARISTOTSĀDANA of the Rājatarāṅgiṇī.¹ From this form the modern name of the village can be derived without difficulty. A temple is said to have been erected there by a queen of Bālāditya.

On the Vitastā some six miles below Śrinagar is the small village of *Malur* which on the authority of Rājānaka Ratnakāṇṭha may be identified with MALHĀṆAPURA, a foundation of King Jayāpīḍa.² *Zain²kōṭh*, situated near marshy ground about two miles south-east of it, preserves the name of Zainu-l-'ābidin, its founder, and is mentioned as JAINAKOṬṬA by Jonarāja.³

121. The Pargaṇa of *Par²spōr* (map 'Paraspoor') which lies next to Māñch²hōm, is one of small extent, but *Parihāsapura*. contains a site of great historical interest. It has received its name from the ancient PARIHĀSAPURA, which King Lalitāditya had built as his capital.⁴ The identity of the name *Par²spōr* and *Parihāsapura* is evident on phonetic grounds and was well-known to the authors of the Persian abstracts of the Rājatarāṅgiṇī. Yet curiously enough the site of Parihāsapura had remained unidentified until I visited the spot in 1892 and traced the ruins of Lalitāditya's great structures as described by Kalhaṇa, on the plateau known as the 'Par²spōr Uḍar.'

This plateau rises south-east of Shād¹pūr, between the marshes of Panz¹nōr on the east and those of Hār²atrāṭh on the west. Its length is about two miles from north to south, and its greatest breadth not much over a mile. On the north this plateau is separated from the higher ground of Trigām by the Badrihēl Nāla which, as I have shown above, represents the old bed of the Vitastā previous to Suyya's regulation.⁵ On the other sides it is surrounded by marshes which for a great part of the year are still accessible by boats. Its general elevation is about one hundred feet.

A broad ravine which cuts into the plateau from the south, and in which the village of *Divar* (map 'Diara') nestles, divides it into two parts. On the south-western portion are the ruins of two large temples, much decayed, but still showing dimensions which considerably exceed those of the great temple of Mārtāṇḍa. On that part of the Uḍar which lies to the north-east and towards the Badrihēl Nāla, there is a whole

¹ *Rājat.* iii. 482.

² Compare *Rājat.* iv. 484.

³ *Jonar.* (Bo. ed.), 1248.

⁴ For a detailed account of the site of Parihāsapura and its identification, compare Note F, *Rājat.* iv. 194-204. The large scale map added to Note I shows the position of the several ruins in detail.

⁵ See § 70.

series of ruined structures. Among these three great buildings attract attention. As an indication of their size it may be mentioned that the ruined mound which marks the central shrine of the northernmost building has a diameter of nearly 300 feet. Though it consists now only of a confused heap of massive blocks it still rises to a height of over 30 feet from the ground. The enclosing quadrangle which can also be traced, measures about 410 feet square. At some distance from this group of ruins there is another smaller one at the south-eastern extremity of the plateau now known as *Gurdan*.

I must refer for a more detailed account of these ruins and their relative position to the Note on Parihāsapura, *F*, appended to my translation of the Chronicle. Here it will suffice to point out that the four great temples of Viṣṇu Parihāsakeśava, Muktākeśava, Mahāvarāha, Govardhanadhara as well as the *Rājavihāra* with its colossal image of Buddha, which Kalhana mentions as Lalitāditya's chief structures at Parihāsapura, must all be looked for among these ruins. Their extremely decayed condition makes an attempt at detailed identification difficult.

Still less we can hope to trace now the position of the numerous shrines, Liṅgas, Vihāras, etc., which are mentioned by Kalhana as having been erected at the king's favourite residence by his queens and court.¹ One of the great ruins of the northern group shows features characteristic of a Vihāra and may be the *Rājavihāra*. Some clue is also furnished by the name *Gurdan* attaching to the isolated ruins above mentioned. *Gurdan* is the common Kāśmīrī form of the name *Govardhana*, and hence points to these ruins being the remains of the temple called GOVARDHANADHARA.

The state of utter destruction in which the ruins of Parihāsapura, are now found, is easily accounted for by the history of the site. Parihāsapura ceased to be the royal residence already under the son of its founder. The Chronicle distinctly records of King Vajrāditya that he withdrew the various foundations which his father Lalitāditya had made there.² When a century later King Avantivarman effected his great regulation of the Vitastā, the bed of the river and its junction with the Sindhu was diverted to *Shādīpūr*, nearly three miles away from Parihāsapura.³ This change must have still more seriously diminished the importance of the latter. The ruinous condition into which Parihāsapura must have fallen only one and a half centuries after its foundation,

¹ See *Rājat.* iv. 207-216.

² *Rājat.* iv. 395.

³ See above, §§ 70, 71.

is shown by the fact that Śaṅkaravarman (A.D. 883-902) carried away from it materials for the construction of his new town and temples at *Pattana* (Paṭan).¹

Some of the shrines of Parihāsapura, however, survived to a later period. Thus we find the colossal copper statue of Buddha at the Rājavihāra mentioned as one of the few sacred images which escaped being melted down in the reign of King Harṣa (A.D. 1089-1101). Also a great religious festival established at Parihāsapura by Lalitāditya seems to have been held still in Kalhaṇa's time.² In the rising which led to the downfall of Harṣa, Parihāsapura was occupied by the pretender Uccala.³ The steep slopes of the plateau and the marshes around made it a position of military value. When Uccala had suffered a defeat some of the routed rebels threw themselves into the Rājavihāra, which was subsequently burned down. After this, Harṣa carried away and broke up the famous silver statue of Viṣṇu which had been placed by Lalitāditya in the temple of Parihāsakesava.

The final destruction of the temples is attributed by Abū-l-Faẓl and the Muhammadan chroniclers to Sikandar Būṭshikast. The former records the tradition that after the destruction of the lofty temple of 'Paraspūr' a copper tablet with a Sanskrit inscription was discovered which predicted its destruction 'after the lapse of eleven hundred years' by one Sikandar.⁴ This prophecy *post factum* shows that its author, whoever he may have been, was rather weak in historical chronology. Parihāsapura had been founded only about six and a half centuries before Sikandar Būṭshikast's time.⁵ At the beginning of the eighteenth century the ruins seem still to have been in a somewhat better condition than now. Both Muḥammad 'Azīm and Nārāyaṇ Kaul mention them and speak particularly of fragments of a large monolithic column. Tradition seems to have connected these fragments with the pillar of Garuḍa which Kalhaṇa mentions as having been set up by Lalitāditya.⁶ The huge square block of stone still visible on the top of the northernmost mound is perhaps one of them.

¹ See *Rājat.* v. 161.

² See *Rājat.* iv. 242 sq. For the temple of Rāmasvāmin which was seen empty in Kalhaṇa's time, compare iv. 275, 334 sq.

³ *Rājat.* vii. 1326 sqq.

⁴ See *Āin-i-Akb.*, i. p. 364.

⁵ Exactly the same tradition is now current among the Purohitas of Vijābrūr about the destruction of the Vijayēśvara image. This alleged inscription is said to have run: *Ekādasaśataṁ varṣaṁ Sikendaramahābalaḥ bismilla iti mantrēṇa naśyante Vijayēśvarāḥ* || The curious Sanskrit of this doggerel is an indication that its author may probably have belonged himself to the noble guild of the Bāchbāṭṭas.

⁶ Compare WILSON, *Essay*, p. 50; also footnote 16 to Note F, on Parihāsapura.

The ruins of Parihāsapura have served ever since Śaṃkaravarman's time as quarries for stone-material. Their position near to navigable water-channels made them particularly convenient for this purpose. Since 1892 when I first saw the ruins, till 1896 many large stone-blocks have found their way as road metal into the new Tonga Road which passes the plateau on the south. On my report steps were subsequently taken by the Darbār to stop this vandalism and prevent its recurrence.

122. We have already above when describing the old bed of the

Trigrāmī;

Phalapura,

Vitastā near Parihāsapura, had occasion to refer to the village of *Trigām*, the ancient TRIGRĀMĪ. It lies about one and a half miles to

the north-east of the Par^{sp}or ruins. The place is mentioned already in Lalitāditya's time in connection with an affray which took place at Parihāsapura.¹ The *Bōn^sar* (*Bhavanasaras?) lake to the west of Trigām is visited as a subsidiary Tirtha on the Kapālamocana pilgrimage. The ruined temple south of Trigām which I believe may be identified with the VAINYASVĀMIN temple, has already been mentioned in our remarks on the site of the old confluence.

A ruined site which lies opposite to Vainyasvāmin on the western side of the Trigām swamp, may for reasons set forth elsewhere be taken for the old *Viṣṇusvāmin* temple.² This is named by Kalhana as having been situated opposite to the Vainyasvāmin shrine on the other side of the old confluence. The passage of the Chronicle describes the temple of Viṣṇusvāmin as belonging already to Phalapura, while Vainyasvāmin was counted with Parihāsapura.

From this and some other indications I conclude that PHALAPURA was the designation of a small territorial subdivision which probably extended along the present left bank of the Vitastā near Shādh¹pūr.³ The site at which I locate the Viṣṇusvāmin temple, was included in recent times in the riveraine Pargana of Sāiru-l-mawāzi' Pāyīn (map 'Salimozapaiteen'). This, we know from Abū-l-Faẓl, was created already before Akbar's time and probably absorbed Phalapura as well as other minor tracts.⁴ Phalapura had received its designation from a locality of that name which Lalitāditya had founded apparently before Parihāsapura,⁵ just as the latter gave its name to the Par^{sp}or Pargana.

⁵ Compare *Rājat.* iv. 184, 673.

Descending by the left bank of the Vitastā for about five miles

Jayapura.

below Shādīpūr, we approach the site of king Jayāpīḍa's capital, the ancient JAYAPURA.¹ It is marked by the present village of *Andarkōṭh*. This consists of two distinct parts. One lies on an island in the marshes opposite Sāmbal and the other facing the former on the strip of land which separates these marshes from the Vitastā. On the island there are conspicuous remains of ancient temples which have been first examined and described by Prof. Bühler.² They are attributed by the local tradition to King 'Jayāpīḍ.' The identity of *Andarkōṭh* with King Jayāpīḍa's town is also well-known to the Śrīnagar Paṇḍits. As Śrīvara still uses the term Jayapura or Jayāpīḍapura for the designation of the present *Andarkōṭh*, we can easily understand the survival of the tradition.

Kalhana's description of the town indicates clearly the situation of the latter and also accounts for its modern name. Jayāpīḍa according to this notice had the castle (*koṭṭa*) of Jayapura built in the middle of a lake, after having the ground required for it filled up, as the legend asserts, by the help of Rākṣasas. There he constructed a large Vihāra with Buddha images, a temple of Keśava (Viṣṇu), and several other shrines; other sacred structures were erected by his ministers. Besides Jayapura the king built on ground recovered from the lake another place, called DVĀRAVATĪ, in imitation of Kṛṣṇa's famous town by the sea-shore. Kalhana notes that in his own time Jayapura was popularly designated as the 'Inner Castle' (*ābhyanṭara koṭṭa*) while Dvāravatī was known as the 'Outer Castle' (*bāhya koṭṭa*).

The present name ANDARKŌṬH (from Skr. **Antarakoṭṭa*) is the direct derivative of this popular designation of Jayapura. It has in the course of time been extended also to the site on which originally Dvāravatī stood. In my note on the passage I have shown that Jayapura must be identified with the island portion of *Andarkōṭh*, while the remains in that part of the village which lies on the lake shore opposite, belong to Dvāravatī. These remains are far less extensive than those on the island. This is in full agreement with the fact that Kalhana men-

¹ For a detailed note on the position of the twin towns Jayapura-Dvāravatī, see *Rājat.* iv. 501-511. For a map showing the site on a larger scale refer to Note I, v. 97-100.

² See *Report*, pp. 13 *seqq.* where the topography and ruins of *Andarkōṭh* are described in detail. General Cunningham had already heard of the identity of *Andarkōṭh* with Jayāpīḍa's town but he does not seem to have visited the place; *Anc. Geogr.*, p. 101. Owing to the erroneous location of Parihāsapura on the right bank of the Vitastā opposite Sāmbal, there is a good deal of confusion in his notes on the two capitals.

tions great religious buildings only in Jayapura and not in Dvāravati. The latter is, indeed, referred to only in connection with the foundation of Jayapura and does not appear ever to have been a place of importance. We can thus understand why its original name Dvāravati and its subsequent designation 'Outer Castle' have both completely disappeared. The distance between the island and the opposite lake shore being only about four hundred yards at the narrowest point, the name of the far more important 'Inner Castle' was naturally extended also to this outlying suburb.

The term *koṭṭa* which Kalhaṇa repeatedly applies to Jayapura, and which is contained also in its popular designation, is justified by its position surrounded on all sides by water.¹ The limited extent of the island precludes the belief of Jayapura ever having been a populous place. But it retained a certain importance far longer than Parihāsapura and served occasionally as a royal residence even in late times. Queen Koṭā, the last of the Hindu rulers of Kāśmīr, retired to Jayapura, and there she was murdered by her husband, the adventurer *Shāhmīr* (A.D. 1339).² Zainu-l-'ābidin restored the town which had fallen into decay and built there a new palace on the lake-shore.³

We have no distinct information as to the old course which the Vitastā followed in the neighbourhood of Jayapura previous to Avanti-varman's regulation. If our views on the subject as above indicated are right, the main channel of the river must then have passed through the marshes west of Jayapura. Notwithstanding the change subsequently effected, Jayāpīḍa's town did not lose its convenient access to river communication. The great canal known as *Nōr* which, as we saw, is in reality nothing but an old river-bed, runs but a short distance to the south-west of And²rkōṭh. A branch of it which is much used by boats even at the present day though not shown on the map, passes still actually along the old Ghāṭs on the south side of the And²rkōṭh island. It seems probable that Jayapura owed its preservation from the fate of Parihāsapura in part at least to the retention of a convenient waterway.

In Abū-l-Faẓl's time And²rkōṭh gave its name to a separate small Pargana.

123. From the marshy tracts south of the Volur which we have approached at And²rkōṭh, we may return once more to Par²spōr. Crossing the swamps formed west of the Par²spōr plateau by the

¹ *Rājat.* iv. 506, 512; vii. 1625. *Srīvara*, iv. 540, 545, applies to Jayapura the expression *durga*, 'fort.'

² See *Jonar.* 300.

³ See *Srīv.* i. 250 sqq.

Sukhnāg and other hill streams, we come to the considerable district of *Bāngil*. It is often referred in the *Rājatarāṅgiṇī* and the other Chronicles by its ancient name of BHĀṆGILA.¹ No old localities belonging to it are mentioned in our texts, unless we may count with *Bāngil* the closely adjacent *Paṭan* situated on the shore of the Pambāsar marsh, circ. 74° 37' long. 34° 10' lat.

This large village occupies the site chosen by King Śaṁkaravarman (A.D. 883-902) for the town which was to bear his name.² Kalhaṇa, however, informs us that *Śaṁkarapura* "subsequently lost its proper appellation and became known only by the name PATTANA, 'the town.'"³ This somewhat general designation still survives in the present *Paṭan*. Kalhaṇa sees in this disappearance of the original appellation the just retribution of fate for the king's cruelty and other bad qualities. Yet the old name must have long lingered on by the side of the popular 'Pattana.' For Kṣemendra mentions *Śaṁkarapura*, and Kalhaṇa himself speaks of the 'town of Śaṁkaravarman' when subsequently referring to events of his own time.⁴ Paṇḍit tradition too has retained a recollection of the founder of Pattana and its original name.

Śaṁkaravarman is said to have carried off "whatever was of value at *Parihāsapura*," in order to raise the fame of his own town. At the same time Kalhaṇa plainly tells us that "what gave fame to that town was only what is still to be found at Pattana,—manufacture of woollen cloths, trade in cattle, and the like."⁵

The only ancient remains of any pretension which can now be found at *Paṭan*, are, in fact, the ruins of the two temples which were erected there by Śaṁkaravarman and his queen *Sugandhā*.⁶ These shrines which bore the names of *Śaṁkaragauriśa* and *Sugandheśa* are structures of no great dimensions and are without the fine quadrangular courts which enclose all more important Kāśmirian temples. They have been fully described by General Cunningham and others. Kalhaṇa when mentioning these buildings ironically alludes to kings who like bad poets take the materials for their works from others' property. This combined with the immediately following mention of Śaṁkaravarman's exploitation of *Parihāsapura*, makes it probable that the building materials for these very temples were taken from the ruins of *Parihāsapura*. This could have easily been done, owing to the convenient water-

¹ See *Rājat.* vii. 498 note.

² See *Rājat.* v. 156 note.

³ Compare v. 213.

⁴ Compare *Samay.* ii. 13; *Rājat.* viii. 2488, 3130.

⁵ *Rājat.* v. 161 sq.

⁶ Compare *Rājat.* v. 158 note.

route offered by the marshes which stretch between Par²spōr and Paṭan, a distance of only seven miles.

Though Śaṁkarapura owed thus to its founder but little that could secure distinction, yet the site he had chosen for it was one likely to retain some importance. Paṭan still lies on the direct road between Śrīnagar and Bārāmūla, reckoned at two daily marches, and has probably always just as now been the half-way station between the two places. Considering that Bārāmūla is the starting point of the route to the west, traffic and trade were thus sure to be attracted to Śaṁkaravarman's town. We find it referred to as a local centre still in Kalhaṇa's time, and it has remained to the present day a large and thriving place.

Paṭan figures as a separate Pargaṇa in Abū-l-Faẓl's list. A popular tradition has it that when Tōdar Mal, Akbar's minister, was arranging for the redistribution of Pargaṇas, he inadvertently omitted the Paṭan village at which he was just then encamped. To remedy the mistake Paṭan with its immediate vicinity was made into an additional Pargaṇa.¹ However this may be, we find Paṭan subsequently named as the chief place of the Til^agām Pargaṇa.² At the last settlement it became the headquarters of one of the new Taḥsils.

The Pambāsar lake which stretches to the east of Paṭan as far as the 'Gond Ibrahim' and 'Adin River' of the map, is referred to by Kalhaṇa under the name of PAMPĀSARAS. King Harṣa seems to have extended or regulated it.³ The Karēwa ground to the west of Paṭan with the deep valleys which intersect it, forms the Pargaṇa of Til^agām. It is mentioned in the Fourth Chronicle, 780, by the name of TAILA-GRĀMA.

About four miles to the north-west of Paṭan and on the high road to Bārāmūla lies *Tāpar*, a considerable village.

Pratāpapura.

On the evidence of an old gloss and several passages of the Chronicles, it can be safely identified with the ancient PRATĀPAPURA.⁴ The latter was founded by King Pratāpāditya-Durlabhaka, the father of Lalitāditya, probably in the second half of the seventh century. When visiting the place in 1892 I found close to the road two ruined mounds covered with large slabs and architectural fragments evidently marking the sites of old temples. Since then, I am informed, most of these remains have been turned into road metal by the native contractors employed in the construction of the new cart-road to Śrīnagar.

¹ See BATES, *Gazetteer*, p. 2.

² See MOORECROFT, ii. p. 113; VIGNÉ, ii. 166.

³ See *Rājat*. vii. 940 note.

⁴ Compare *Rājat*. iv. 10 note.

124. The district through which the Vitastā flows immediately before leaving the Valley, bears now the name of *Kruhin*. The ancient form of this name is unknown unless the Lokaprakāśa's 'Krodhanaviśaya' may be connected with the tract. Kruhin extends along both sides of the river, but its greater portion lies on the left bank.

Proceeding on the road towards Bārāmūla and at a distance of about six miles from the latter place, we pass on our right the village of *Kānispōr*. It is identified by an old glossator of the Rājatarāṅgiṇī and by the Persian Chroniclers with the ancient KANIŠKAPURA. The latter is mentioned in the Rājatarāṅgiṇī as a town founded by the Turuška king Kaniška,¹ whom we know as the great Indo-Scythian or Kuṣāna ruler from the coins and Buddhist tradition. There are no conspicuous remains above ground at Kānispōr, but old coins and carved stones are occasionally extracted from an old mound near the village.

We have already had occasion to speak of the important position occupied by the ancient twin towns HUṢKAPURA and VARĀHAMŪLA. Built on the banks of the Vitastā immediately above the gorge through which the river leaves the Valley, they form the starting-point on the great route of communication to the west. It is unnecessary to refer here again to the commercial and other advantages which have made this site one of great importance from ancient times to the present day.

Varāhamūla, situated on the right river-bank, has left its name to the present town of *Varahmul*, usually called *Bārāmūla* by Panjābis and other foreigners.² The name Varāhamūla or Vārāhamūla—both forms occur in our texts—is itself derived from the ancient Tirtha of Viṣṇu Ādi-Varāha who was worshipped here evidently since early times. From it the site of the town and its whole neighbourhood received also the designation of *Varāhakṣetra*. Various legends related at length in the *Varāhakṣetramāhātmya* and often alluded to in the *Nilamata* and the other *Māhātmyas*, connect this sacred site and the Tirthas of the immediate neighbourhood with the Varāha or Boar incarnation of Viṣṇu. An abstract of these legends as well as an accurate description of the scanty remains of ancient date to be found at the several Tirthas, has been given by Prof. Bühler.³

¹ Compare *Rājat.* i. 168 note. General Cunningham's suggested identification of Kaniṣkapura with 'Kāmpōr,' on the road from Srinagar to Supiyan, is unsupported by any evidence. The place is really called Khāmpōr and has no ancient remains whatever.

² For detailed references regarding *Varāhamūla* and *Varāhakṣetra*, see *Rājat.* vi. 186 note.

³ See *Report*, pp. 11 sqq.

The ancient temple of Varāha which seems to have been one of the most famous shrines of Kaśmīr, is repeatedly mentioned by Kalhaṇa. According to the tradition of the local Purohitas it stood near the site of the present *Koṭitīrtha*, at the western extremity of the town and close to the river-bank. Some ancient Liṅgas and sculptures found at the *Koṭitīrtha* may have originally belonged to the temple. The destruction of its sacred image is noted by Jonarāja in the reign of Sikandar Būtsḥikast.¹ A short distance below this site where a steep spur runs down to the river-bed, stood the ancient watch-station, still known as *Drang*, which has already been described. A bridge over the Vitastā existed at Varāhamūla already in old times.²

It cannot be doubted that Varāhamūla is a very ancient place. It enjoyed the advantage of being on the right river-bank, which is followed by the old route down the Vitastā Valley. But on the other hand the contracted nature of the ground which it occupies, between the hill-side and the river, did not favour the development of a large town. On this account we find that the twin town of HUṢKAPURA built on the open plain of the opposite bank was in ancient times the larger of the two places.

Huṣkapura is mentioned by Kalhaṇa as the town built by King Huṣka, the Turuṣka, and is often referred to in his subsequent narrative.³ Its name survives in that of the small village of *Uṣkūr*, situated about two miles to the south-east of the present Bārāmūla. The identity of *Uṣkūr* and Huṣkapura, correctly noted already by General Cunningham,⁴ is well-known to Śrinagar Paṇḍits, and is indicated also by an old glossator of the *Rājatarāṅgiṇī*. Kalhaṇa in one passage distinctly includes Huṣkapura within Varāhakṣetra, i.e., the sacred environs of the Varāha Tīrtha,⁵ and the same location is implied by numerous other references in the Chronicle.

King Huṣka of the *Rājatarāṅgiṇī* has long ago been identified with the Indo-Scythian ruler who succeeded Kaniska, the Huviṣka of the inscriptions and the OOHṢKI of the coins. The foundation of Huṣkapura falls thus probably within the first century of our era. Hiuen Tsiang, as we saw, spent his first night after passing through the western entrance of the kingdom, in a convent of *Hu-se-kia-lo* or Huṣkapura. Albēri too knows 'Uṣhkārā' opposite to Bārāmūla.

¹ Compare *Jonar.* 600.

² See *Rājat.* viii. 413.

³ For detailed references as to Huṣkapura: *Uṣkūr*, see *Rājat.* i. 168 note.

⁴ See *Anc. Geogr.*, pp. 99 sq.

⁵ See vi. 186.

Kaḥaṇa mentions Huṣkapura far more frequently than Varāhamūla. The conclusion to be drawn herefrom as to the relative importance of the two places in Hindu times, is confirmed by the frequent references which the Chronicle makes to religious buildings erected in Huṣkapura. Of King Lalitāditya-Muktāpīḍa it is recorded that he built there the great temple of Viṣṇu *Muktasvāmin* and a large Vihāra with a Stūpa.¹ Kṣemagupta who sought the sacred soil of Vārāhakṣetra in his fatal illness, had founded two Maṭhas at Huṣkapura.²

At present foundations of ancient buildings can be traced at numerous points of the plain which stretches from the left river-bank towards the low hills behind Uṣkūr. These remains as well as two colossal Liṅgas still *in situ* have already been noted by Bishop Cowie.³ About 400 yards to the west of the village are the much-damaged remains of a Stūpa, which had been found still intact by Bishop Cowie and photographed in that condition by Major Cole (1870). Subsequently it was dug into and partly levelled down "by some Śāhib's order," as the villagers told me. Of this excavation I have not been able to trace a report. But General Cunningham refers to an ancient coin of the Taxila type which was found in this Stūpa and had come into his possession.⁴

It is possible that this Stūpa was identical with the one which King Lalitāditya erected at Huṣkapura. Of the Vihāra which Kaḥaṇa mentions in connection with the king's Stūpa, I have shown elsewhere that it was in all probability the same convent which Ou-k'ong refers to under the name of *Moung-ti* Vihāra.⁵ The *Moung-ti* of the Chinese transcription seems to represent a prakritized form of the shortened name *Mukta* or *Muktā*. The latter forms which are abbreviations (*bhāmavat*) for *Muktāpīḍa*, occur also in the designations of other religious buildings erected by that king (*Muktākeśava*, *Muktasvāmin*).

As we do not meet with the name of Huṣkapura in any of the later Chronicles it may be assumed that its importance did not survive the time of Hindu rule.

SECTION IX.—THE NORTHERN DISTRICTS OF KRAMARĀJYA.

125. The ancient localities in the Vitastā Valley below Varāhamūla have been noted by us already in connection with the route which leads through it. We may therefore proceed now to those Parganas of the ancient Kramarājya which lie to the north of the river and the Volur lake.

The district which adjoins Kruhin in this direction, is known as *Hamal* (map 'Hummel'). Its ancient name was *SAMĀLĀ* from which the former designation is the direct phonetic derivative.¹ *Sāmālā* is very frequently mentioned in the last two Books of the *Rājatarāṅgiṇī*, particularly on account of its feudal chiefs or *Dāmaras* who played a prominent part in all the civil wars of the later reigns. The pretender *Bhikṣācara* in particular had his most powerful adherents in *Sāmālā* and often took refuge with them. The village of *VAṆAGRĀMA* which is mentioned on one of these occasions, is probably identical with the present *Vangām*, situated circ. 74° 25' long. 34° 19' lat.² *Kākaruḥa*, another place in *Sāmālā*, referred to in connection with *Bhikṣācara*'s campaigns, can no longer be traced.

To the north of *Hamal* we reach the Pargana of *Maḥīpūr* (map 'Mochipoora.') Its ancient name is nowhere mentioned. In it lies the sacred site of *SVAYAMBHŪ* which owing to the apparently volcanic phenomenon there observed has from early times been renowned as a *Tirtha*. *Kalhana* in his introduction duly notes the 'Self-created Fire' (*Svayambhū*), which "rising from the womb of the earth, receives with numerous arms of flame the offerings of the sacrificers."³

The spot meant is still known as *Svayambhū*, or to the villagers as *Swyam*. It lies on a low ridge about half a mile south-west of the village of *Nichāhōm* (not shown on map) and about one and a half miles north of *Tsakāvaḍar* (map 'Sheikwadda.') Visiting it in 1892 I found there in a shallow hollow the soil bright red like burned clay and furrowed by narrow fissures. In certain years steam has been known to issue from these fissures. The ground then becomes sufficiently hot to boil the *Srāddha* offerings of the pilgrims who at such times flock to the site in great numbers. The phenomenon which may be either truly volcanic or, according to a modern authority, be caused by hidden seams of coal taking fire, was last observed in the year 1876. Occurrences at

¹ See *Rājat.* vii. 159 note.

² See *Rājat.* viii. 1438.

³ See *Rājat.* i. 34, and for further references the note thereon.

the beginning of the present century are referred to by Mr. Vigne and Dr. Falconer.¹ Abū-l-Faẓl too mentions the phenomenon at 'Soyam.'²

Considering the rarity of the occasions when this manifestation of the 'Self-created Fire' is observed and the pilgrimage performed, the total absence of ancient remains cannot surprise us. There is, however, a Māhātmya of the Tirtha, and the latter is also referred to in the Nilamata. A pilgrimage which King Uccala (A.D. 1101-11) made to Svayambhū gives Kalhana occasion to acquaint us with some localities of the neighbourhood.³ The king who was stopping in Kramarājya, is said to have started for the village of VARHAṬACAKRA with a small retinue to see the miracle there. On his way which took him past the village of KAMBALEŚVARA, he was set upon in a deep mountain gorge by robbers from whom he escaped only with difficulty.

I believe, the places mentioned in connection with this adventure, can still be identified without difficulty. Varhaṭacakra is probably the present *Tsak^avaḍar*, *tsak^a* being the ordinary Kś. form for Skr. *cakra* and *vaḍar* the phonetic derivative of *Varhaṭa*.⁴ Cases of village names in which the two component parts, being originally distinct names, can alternate in their position, are by no means unfrequent in Kāśmīr. Thus we have now *Dārā-Sād^apūr* and *Sād^apūr-Dārā*, etc.

In *Kambaleśvara* we may safely recognize the present village of *Krambhar*, situated about six miles north-east of Svayambhū; for the ending *-har* as the derivative of Skr. *-śvara*, compare *Triphar* < *Tripuresvara*, etc.⁵ The way from Krambhar to Svayambhū leads through the valley of the Panjtar stream. The latter as I convinced myself by personal inspection on a tour in 1892, passes above Rāj^apūr a narrow thickly-wooded gorge. The path which follows the tortuous course of the stream at the bottom of the gorge, offers excellent opportunities for an ambuscade such as described by Kalhana.

Bad^arkāl, a small village, about four miles south-east of Krambhar, has a small local Tirtha marked by a spring and some old Liṅgas. It is visited on the pilgrimage to Svayambhū and mentioned by the name of BHADRAKĀLI in the Māhātmya of the latter.

126. The Pargana of Uttar stretching along the foot of the range District of Uttara. towards the Kiṣangangā, forms the extreme north-west of the Kāśmīr Valley. A passage

¹ See VIGNE, *Travels*, ii. p. 280; LAWRENCE, *Valley*, p. 42.

² *Āin-i-Akb.*, ii. p. 365.

³ Compare *Rājat.* viii. 250 sq. note.

⁴ For medial Skr. *r* > Kś. *ḍ*, compare e.g., *Bhaṭṭāraka*[*maṭha* > *Brḍḍ*][*mar* for *t* > *r*, e.g. *Kaṣṭhavāṭa* > *Kaṣṭ^avār*.

⁵ For detailed evidence on the phonetic points alluded to, see *Rājat.* viii. 250 note.

of the *Rājatarāṅgiṇī* records its ancient name *UTTARA*, and refers also to *Ghoṣa* as a locality situated in it.¹ The place meant is undoubtedly the present *Gus* situated in the centre of *Uttar*, near the confluence of the *Kāmil* River and the stream coming from *Lōlau*. It is the starting-point for the *Sāradā* pilgrimage and is mentioned correctly as *Ghoṣa* in the *Sāradāmāhātmya*.

About ten miles higher up the *Kāmil* river lies the village of *Pānzgām*, circ. $74^{\circ} 7'$ long. $34^{\circ} 29'$ lat. I take its position from Major Bates' Gazetteer; the 'Atlas of India' map does not show the place. It is in all probability identical with *PĀNČIGRĀMĪ*, mentioned by *Kalhaṇa* in connection with the surrender of the pretender *Bhoja*.² I have not been able to visit this portion of the district, and Major Bates' reference to *Pānzgām* attracted my attention only after the preparation of my map.³

In the extreme north-east of *Uttar* and within a mile of each other, we have the old villages of *Drang* and *Hāyāhōm*, referred to by *Kalhaṇa* under their ancient designations of *DRANGA* and *HĀYĀŚRAMA*.⁴ The latter place, as its name shows, marks the position of an old frontier watch-station towards the *Kiṣangaṅgā*. We have already seen that there is a route leading past it to *Sardi*, the ancient *Tirtha* of *Sāradā* situated on that river.

Dranga and *Hāyāśrama* are both mentioned by *Kalhaṇa* in connection with the siege of the *Siraḥṣilā* castle which took place in his own time. A brief reference may therefore be made here both to this stronghold and the neighbouring shrine of *Sāradā*, though they are both situated outside the limits of the *Kāśmīr* Valley.

127. The introduction of the *Rājatarāṅgiṇī* mentions the temple of the goddess *Sāradā* amongst the foremost **The Tirtha of Sāradā.** Tirthas of *Kāśmīr*.⁵ It was well known even far beyond the frontiers of *Kāśmīr*. *Albērūnī* had heard of it,⁶ and a story recorded in a *Jaina* life of the great grammarian *Hemacandra* proves that its fame had spread even to far-off *Gujrāt*.

¹ See *Rājat.* vi. 281.

² See *Rājat.* viii. 3124.

³ There seems to be good reason to suspect that *TĀRAMŪLAKA*, a place repeatedly referred to in connection with *Bhoja's* last campaign, lay somewhere in or near *Uttar*. Unfortunately this locality which is of importance also for other portions of *Kalhaṇa's* narrative, has not yet been identified; see note vii. 1307.

⁴ For *Hāyāśrama*, see *Rājat.* viii. 2937 note; for *Dranga*, viii. 2507 note, also Note B, i. 37.

⁵ The position and history of the temple of *Sāradā* have been fully discussed in Note B, i. 37.

⁶ See *India*, i. p. 117.

Notwithstanding this former celebrity the Sāradā shrine is now almost completely forgotten by the Paṇḍits of Srinagar and the great mass of the Brahman population of the Valley. Fortunately, however, tradition had been more tenacious in the immediately adjoining tracts of Kamrāz. Guided by it I was able to ascertain the position of the ancient Tirtha at the present *Sardī*, situated circ. 74° 15' long. 34° 48' lat., on the right bank of the Kiṣangaṅgā.

My note on Rājat. i. 37 (B) gives a detailed account of the tour which in 1892 led me to the Tirtha as well as a description of the ancient temple still extant at the site. The situation of the shrine corresponds exactly to Kalhaṇa's description. Immediately in front of it the sacred stream of the MADHUMATĪ falls into the Kiṣangaṅgā, while another confluence, that with the SARASVATĪ river coming from the north, is also visible from the temple.

In Jonarāja's time the shrine was still sufficiently popular to attract a visit even from Sultān Zainu-l-'ābidin.¹ Soon afterwards apparently the miracle-working image of the goddess was destroyed. Abū-l-Faḍl, however, still notes the sanctity of the site and correctly indicates its position on the bank of the Madhumatī.²

The subsequent neglect of this Tirtha must be ascribed chiefly to the obstacles to the pilgrimage which arose from the troubled political condition of the Upper Kiṣangaṅgā Valley. The Bomba chiefs of the latter had made themselves independent in the later Mughal and Paṭhān times. Their predatory inroads often threatened the adjacent tracts of Kāśmīr while their own territory became practically inaccessible to peaceful pilgrims. It is only since the advent of the Sikhs that the pilgrimage to Sāradā's seat was revived. It is probable that the difficulties here briefly indicated must be held to account for the several substitute Tirthas of Sāradā which are now to be found in various parts of Kāśmīr proper.

My visit to the old 'Sāradāsthāna' also enabled me to identify with certainty the site of the SĪRAḤSĪLĀ Castle. The latter had been the scene of a memorable siege by King Jayasimha's troops which Kalhaṇa describes at length.³ The accurate topographical data furnished in this account prove clearly that the castle occupied the top of the steep ridge which projects into the Kiṣangaṅgā valley about two and a half miles below the Sāradā temple.

¹ *Jonar.* (Bo. ed.) 1056-71. This visit apparently took place A.D. 1422.

² *Āin-i-Akb.*, ii. pp. 365 sq. Abū-l-Faḍl places Sāradā's stone temple "at two days' distance from Hāehāmūn," i.e. Hāyṭhōm.

³ *Rājat.* viii. 2492-2709. The position of SĪRAḤSĪLĀ and the evidence for its identity with the 'Gaṇeś Ghāṭī' hill have been fully discussed in my Note L, viii. 2492.

The several incidents of the siege, in particular those connected with the attempted escape of the pretender Bhoja, became at once easily intelligible on a close inspection of this site. The ridge bears now the name of *Ganeś Ghāṭī*, from a curious rock formation on its side which resembles the head of an elephant and is accordingly worshipped as a 'Svayambhū' representation of the elephant-faced god. It is very probable that the older name *Siraḥsilā* which means literally 'the rock of the head,' owed its origin also to this very rock.

128. Returning from our excursion to the Kiṣangaṅgā and the confines of the Dard country, we enter immediately to the east of Drang-Hāy^hhōm the Pargaṇa usually called *Lōlāb*. Its proper Kāśmīrī name is *Lōlau*, derived from Skr. LAULĀHA.¹ In the picturesque valley which forms this district, no old localities can be specified.

Lōlau is adjoined on the south by the Pargaṇa of Zain^ggīr which comprises the fertile Karēwa tract between the Volur and the left bank of the Pohur River. It received its present name from Zainu-l-'ābidīn who is credited with having carried irrigation canals from the Pohur to the Uḍar ground of JAINAGIRI.² The earlier name of this tract can no longer be traced.

The chief place in it is the town of *Sōpūr*, the ancient SUYAPURA, the foundation of which by Suyya, Avantivarman's engineer, has already been mentioned.³ *Sōpūr* which lies a short distance below the point where the Vitastā leaves the Volur, has retained its importance to this day, and is still a town of over 8000 inhabitants. It has during recent times been the official head-quarters for the whole of Kamrāz. From a passage of Śrīvara it appears that this had been the case already at an earlier period.⁴ Relating a great conflagration which destroyed Suyyapura in Zainu-l-'ābidīn's time, this Chronicler tells us that in it perished the whole of the official archives relating to Kramarājya. The royal residence, however, escaped and the town itself was again built up by the king in great splendour. Of this, however, nothing has remained; nor does the town now show older remains of any interest.

The suggested identity of the village *Zōlur* (map 'Zohlar') in the north-west part of Zain^ggīr with JĀLORA once mentioned as a foundation of King Janaka,⁵ is doubtful, resting only on the resemblance of

¹ Compare *Rājat.* vii. 1241 note.

² See *Jonar.* (Bo. ed.) 1449-56; also *Śrīv.* i. 562 sq.; iii. 59, 78.

³ Compare for Suyyapura, *Rājat.* v. 118 note.

⁴ Compare *Śrīv.* i. 560 sqq.

⁵ See *Rājat.* i. 98.

the names. The large village of *Bumai* (map 'Bamhai'), situated $74^{\circ} 30'$ long. $34^{\circ} 22'$ lat., may be Kalhaṇa's *BHĪMATIKĀ*. The name *Bumai* can be traced back without difficulty to the older form; but the context of the single passage in which *Bhīmatikā* is mentioned, does not supply any evidence as to its location.¹

Round the north shore of the Volur lake there stretches in a semi-

District of
Khūyāsrama.

circle the district of *Khuy^hhōm*. Its ancient name is given by Kalhaṇa as *KHŪYĀSRAMA* while *Śrīvara* and the *Lokaparakāśa*, with a slight variation, call it *Khoyāsrama*.² The old route which led up to the *Madhumatī* stream and over the Pass of *DUGDHAGHĀTA* or *Dud^hkhut* into the *Darad* territory on the *Kiṣāṅgā*, has been already fully described.³

In connection with a *Darad* invasion which was directed into *Kāśmīr* by this route, we read of *MĀTRGRĀMA* as the place where the invading force encamped.⁴ This is certainly the present village of *Mātr^ggōm* situated close to the foot of the *Trāg^abal* Pass, circ. $74^{\circ} 43'$ long. $34^{\circ} 28'$ lat. It lies just at the point where the route along the *Madhumatī* debouches into an open valley, and is the first place where a larger camp could conveniently be formed.

The tract on the north-east shore of the Volur appears in old times to have formed a separate small sub-division called *EVENAKA*. It is once mentioned by Kalhaṇa, and also referred to in the *Tirthasaṅgraha*.⁵ But the evidence is not sufficient for a certain location. To it may possibly have belonged also the village of *Sud^hrkōṭh*, circ. $74^{\circ} 43'$ long. $34^{\circ} 18'$ lat., which *Śrīvara* refers to by the name of *SAMUDRAKOTĀ*.⁶

129. We have now reached the vicinity of the *Sind* Valley which

District of Lahara.

forms the largest of the *Pargana*s of *Kāśmīr*. The district now known as *Lār* comprises the whole of the valleys drained by the *Sind* and its tributaries as well as the alluvial tract on the right bank of that river after its entry into the great *Kāśmīr* plain.

Its ancient name was *LAHARA*, and by this it is mentioned in very

¹ Compare *Rājat.* vii. 6; as to the relation of *Bumai* < *Bhīmatikā* comp. *Bum^h*. [zu: *Bhīma*[keśava].

² See *Rājat.* viii. 2695-98 note.

³ See above, § 56.

⁴ See *Rājat.* viii. 2775.

⁵ Compare *Rājat.* viii. 2695-98 note.

⁶ See *Śrīv.* i. 400.

numerous passages of the *Rājatarāṅgiṇī* and the later Chronicles.¹ The lands of the district seem to have been from early times in the hands of great territorial nobles. One family of *Ḍāmaras* resident in Lahara was powerful enough for its members to play the part of true kingmakers during a succession of reigns following after *Harṣa*.² It is probable that the great trade-route to *Ladākh* and Central Asia which passes through the district, added already in old times to its wealth and importance.

In the midst of the wide water-logged tract of the *Sind Delta* we find the ancient *Tirtha* of *Tūlamūlya* at the village now known as *Tulmul*, situated 74° 48' long. 34° 13' lat. The *Purohita* corporation of *Tūlamūlya* is represented as a well-to-do and influential body already under King *Jayāpiḍa*.³ The large spring of *Tūlamūlya* is sacred to *Mahārājūi*, a form of *Durgā*, and is still held in great veneration by the *Brahman* population of *Srinagar*. It is supposed to exhibit from time to time miraculous changes in the colour of its water, which are ascribed to the manifestation of the goddess. Owing to its convenient position the *Tirtha* attracts large numbers of pilgrims from the capital. *Abū-l-Faḍl* notices the place and its marshy surroundings.⁴ About two and a half miles to the east of *Tulmul* lies the village of *Dudrhōm*, on the main branch of the *Sind* which becomes here navigable. It is repeatedly spoken of by *Srīvara* under its old name of *DUGDHĀŚRAMA*.⁵

Ascending the valley we come to the large village of *Mañigām*, situated a short distance from the right bank of the river, 74° 52' long. 34° 17' lat. It is the *MAYAGRĀMA* of *Kalhana's Chronicle*, mentioned in connection with a campaign of *Bhikṣācara* in Lahara.⁶ In the time of King *Samgrāmarāja* (A.D. 1003-28) *Mayagrāma* gave its name to a separate fund (*Mayagrāmīnagañja*) which Queen *Srilekhā* had established evidently with the revenue assigned from this village.⁷ *Mañigām-Mayagrāma* still owns a large area of excellent rice-fields. The village itself contains no ancient remains; but a short distance above it, at the foot of the spur which descends from a high alp known as

¹ Compare for the identification of *Lār* and *Lahara*, note *Rājat.* v. 51. The authors of the *St. Petersburg Dictionary* were already aware of it; see P. W. s. v. LAHARA.

² Compare regarding the political part played by *Janakacandra*, *Gargacandra* and their descendants, *Rājat.* viii. 15 sqq., 354 sqq., 502 sqq., etc. For an earlier instance of *Ḍāmara* power in Lahara, see v. 51 sqq.

³ See *Rājat.* iv. 638 note.

⁴ *Āin-i-Akb.*, ii. p. 364.

⁵ *Srīv.* iv. 110, 136, 263.

⁶ See *Rājat.* viii. 729.

⁷ Compare *Rājat.* vii. 126.

Mohand Marg, there is an ancient stone-lined tank filled by a fine spring known as *Vuṭṣān Nāg*. This is visited as a Tirtha by the Brahmins of the neighbourhood and is also mentioned under the name of *Uccaiḥśirṇa Nāga* in the *Haramukūṭa* and several other *Māhātmyas*. About a mile above the village the high-road leading up the valley passes a shapeless mound of large slabs which undoubtedly belonged to an ancient temple.

130. About four miles above *Mañigām* on the left bank of the Tirtha of *Cīramocana*. Sind we reach a site which has enjoyed sanctity from an early period. Close to the village of *Prang* (not shown on map) situated circ. $74^{\circ} 55' 30''$ long. $34^{\circ} 16' 45''$ lat., a small branch of the *Kānkānai River* (*Kanakavāhinī*) flows into the Sind. This confluence is now visited by the pilgrims proceeding to the *Haramukūṭa* lakes as one of the chief Tirthas on the route. In the modern *Haramukūṭa Māhātmya* it is designated as *Karaṅkatīrtha*. But I have shown that it is in reality identical with the ancient Tirtha of *CīRAMOCANA* mentioned in the *Rājatarāṅgiṇī*, the *Nilamata* and the old *Nandikṣetramāhātmya*.¹

The *Kānkānai* or *Kanakavāhinī* which is always named together with *Cīramocana*, is a sacred river as it carries down the waters of the holy *Gaṅgā*-lake below the *Haramukūṭa Peaks*.² This explains the importance attached to this 'Saṅgama.' The *Haramukūṭa Māhātmya* which shows its comparatively recent origin by many of its local names, metamorphoses the old *Kanavāhinī* into *Karaṅkanadī* and consequently also changes the name of its confluence into *Karaṅkatīrtha*.³ King *Jalauka*, the son of *Aśoka*, whom the *Chronicle* represents as a fervent worshipper of *Sīva Bhūteśa* and of *Nandīśa*, is said to have ended his days at *Cīramocana*.

Our survey has already taken us to the sacred sites of *BHŪTEŚA* and *JYEṢṬHARUDRA* marked by the ruined temples
Tirthas of *Bhūteśa*, at the present *Buthīśēr* high up in the *Kānkā-*
Jyeṣṭharudra. *nai Valley*. They are closely connected with
the Tirthas of *NANDIKṢETRA* below the *Haramukūṭa glaciers* which
have also been described.⁴ The village of *Vāngath*, which is the highest
permanently inhabited place in the valley, lies about two miles below
Buthīśēr. It is named *VASIṢṬHĀŚRAMA* in the *Māhātmyas* and believed to
mark the residence of the *Rṣi Vasiṣṭha*. Allusions in the *Rājatarāṅgiṇī*
and *Nilamata* show that this legendary location is of old date.⁵

¹ See *Rājat.* i. 149-150 note.

² See above, § 57.

³ Regarding the local nomenclature of this *Māhātmya*, see above, § 31.

⁴ See above, § 57; also *Rājat.* notes i. 36, 107, 113; v. 55-59.

⁵ Compare *Rājat.* viii, 2430 note.

At the mouth of Kāṅk^anai Valley, and about two miles to the north-east of Cīramocana, is the hamlet of *Bāravul* which Kalhaṇa mentions as an Agrabhāra of King Jalauka under the name of VĀRABĀLA.¹ A large sculptured Liṅga base which I found here in 1891, shows the antiquity of the place.

131. Returning to the main valley we come, about three miles above Cīramocana, to the large village of **Upper Sind Valley.**

Kangan situated on the right bank on the Sind. It is, perhaps, identical with KĀṆKAṆAPURA which Queen Diddā is said to have founded in commemoration of her husband Kṣemagupta, known by the epithet of 'Kankaṇavarṣa.'² No old localities can be identified with certainty in the Sind Valley until we reach the village of *Gagangīr*, situated two marches above Kangan, circ. 75° 15' long. 34° 18' lat. This is undoubtedly the GAGANAGIRI of Jonarāja, and the Fourth Chronicle.³ The place is mentioned in both texts in connection with invasions which were made into Kāśmīr over the Zōji-Lā Pass. The first was that of the Bhauṭṭa Rīñcana, the second the famous inroad of the Mughal leader Mirzā Ḥaidar (A.D. 1532).⁴ The account which the latter himself has left us of his exploit, fully explains the special reference made to Gaganagiri by the Hindu Chronicler.

About three miles above *Gagangīr* two rocky spurs descend from opposite sides into the valley and reduce it to a narrow gorge (see map). The passage of this defile was until recent improvements of the road distinctly difficult, as large fallen rocks blocked the narrow space between the right bank of the river and the high cliffs rising above it. It is at this point of the valley which Mirzā Ḥaidar calls 'the narrow defile of Lār,' that the Kāśmīr chiefs vainly attempted to stop the brave Turks of the invader's advanced guard.

Kalhaṇa's Chronicles shows that the defile here indicated had witnessed fighting already at an earlier epoch. When King Sussala's forces had driven Gargacandra, the great feudal chief, from his seats in Lahara, we are told that the Dāmara with his followers retired to the mountain called DHUPĀVANA. There he was long besieged by the troops

¹ See *Rājat.* i. 121 note.

² See *Rājat.* vi. 301.

³ Compare *Jonar.* (Bo. ed.), 197, and Fourth Chron. 316. The old name of the locality ought to have been entered in the map. The Bombay edition of the Fourth Chron. wrongly reads *gamananiryanta* for *gaganagiryanta* of the MSS.

⁴ See *Tārīkh-i Rashīdī*, p. 423. Mr. ELIAS in his note on the passage has quite correctly identified the defile meant by his author. The Fourth Chronicle names the autumn of the Laukika year [460]8 as the date of the event which agrees exactly with Mirzā Ḥaidar's A.H. 939 Jamād II (December, 1532 A.D.).

"of the king who was encamped at the foot of the mountain." In my note on the passage I have shown that the name *Dhūḍāvana* survives in *Dūrūn Nār* (map 'Darnar'), the appellation of the high spur which descends into the Sind Valley from the south between Gagangīr and Sun^amarg.¹ It is exactly at the foot of this spur that the river passes through the gorge above described. The position taken up by the king's opponent is thus fully explained.

Gagangīr being already 7400 feet above the sea, is the last permanently inhabited place in the valley. Some twenty-five miles higher up we arrive at the Zōji-Lā Pass. Here we have reached the limits of Kāśmīr as well as the end of our survey.

¹ See *Rājat.* viii. 595 sqq.—*Dūrūn* is the direct phonetic derivative of *Dhūḍāvana*. *Nār*, the Kś. equivalent of Skr. *nāḍa*, the Anglo-Indian 'Nullah,' is often found as the second part in names of high hill-ranges in Kāśmīr; compare, *e.g.*, the 'Soornar' and 'Baibnar' of the map, east of the Haramukh Peaks.

SUPPLEMENTARY NOTE AA.—§ 29.

MĀHĀTMYAS OF KĀSMĪRIAN TĪRTHAS.

The following is a complete list of the MĀHĀTMYA texts acquired by me in Kāśmīr. The numbers in the fourth column refer to the manuscripts representing these texts in my collection. Where the same text is found in several Manuscripts, the number of the best copy has been shown first. In the column of Remarks the Tirtha to which the Māhātmya refers has also been indicated, as well as the paragraph of the present Memoir in which it has been discussed.

Serial No.	Name of text.	Alleged source.	Nos. of MSS. in my collection.	REMARKS.
1	Amaranāthamāhātmya ...	Bhṛngīśasamhitā ...	8, 7	Amaranātha, § 59.

SUPPLEMENTARY NOTE BB.—§ 86.

THE LISTS OF KASHMĪR PARGANAS.

The following table shows the names of Kashmīr Parganas as contained in the lists of Abū-l-Faḡl, Moorcroft, Von Hügel, Vigne and Major Bates. The list of the latter (*Gazetteer*, p. 2) is the fullest and also indicates the division of the Parganas between Marāz and Kamrāz as shown in the table.

The arrangement of the Pargana names conforms to the topographical order followed in Chapter IV. of this Memoir. The second column gives the Pargana names according to their present Kashmīri pronunciation, without regard to the often curiously distorted forms in which these names are presented by the earlier lists. The third column shows the authorities in whose lists each particular name is found. In the fourth column the Sanskrit name of the district has been indicated, whenever known, together with the text in which it first occurs. In the last column references have been given to the paragraphs of the Memoir specially dealing with the historical topography of the several districts.

Besides the Parganas shown in the table, Abū-l-Faḡl counts with Kashmīr the Parganas of 'Maru Aḡwīn' (Maḡdivāḡvan), 'Banihāl' (Bān^ahāl), and 'Dachhīn Khāwarah' (i.e., Dachūn-Khōvur, the valley on both banks of the Vitastā below Bārāmūla). In the same way Moorcroft adds the Parganas of 'Durbid' (i.e., Dvārbidi in the Vitastā Valley, comp. § 53), 'Karnao' and 'Tahirabad'; of the position of the last-named tract I am not certain.

[The list of Kashmīr Parganas given by P. JOSEPH TIEFFENTHALER, *Description de l'Inde*, p. 77, is only a defective reproduction of Abū-l-Faḡl's list. RITTER, *Asien*, ii. pp. 1136 sq., has endeavoured to elucidate

Tieffenthaler's queer names with whatever materials were then available].

ADDITIONAL NOTE.—§ 14.

Mr. W. MERK, C.S.I., C.S., at present Deputy Commissioner of the Hazāra District, to whom I submitted the above-printed remarks on Albērūnī's route to Kāśmīr (p. 23) and on the town of *Babrahān* mentioned by him, has kindly supplied me in a letter, dated 25th April, 1899, with the interesting information that "the basin formed by the three Nullahs which unite at *Chamhad* is called the '*Babarhān*' tract." *Chamhad* is shown on the map as a village in the Mian Khaki Nullah, south-west of Abbottabad, circ. $34^{\circ} 7'$ lat., $73^{\circ} 7'$ long.

Mr. Merk believes that the position of Albērūnī's "town *Babrahān*, half-way between the rivers Sindh and Jailam" is marked by the present '*Babarhān*' which practically retains the same name. There is much to support this identification. The Nullah called Mian Khaki on the Survey map forms a convenient route from the central plain of Hazāra, about Mirpur, towards the Siran Valley through which the Indus could conveniently be gained at Torbela. The latter has remained a favourite crossing place to the present day, being situated just where the Indus debouches from the mountains.

The 8 *Farsakh* or about 39 miles which Albērūnī counts from *Babrahān* to "the bridge over the river," *i.e.*, according to my explanation, the present Muzaffarābād, would well agree with the actual distance between the latter place and *Babarhān*. In calculating this distance it must be kept in view that the old road from the Indus to Kāśmīr, according to Mr. Merk's information, descended to Garhi Habibullā, on the Kunhār River, through the Doga Nullah, *i.e.*, by a more direct route than that followed by the modern cart-road *viâ* Mansahra.

I am further indebted to Mr. Merk for the very interesting notice that the plain near Mirpur, about 5 miles north-northwest of Abbottabad, is popularly known by the name of *Urash* or *Orash*. There can be no doubt as to this local name being the modern representative of the ancient *Uraśā*. Its survival in that particular locality strikingly confirms the conclusion indicated above in § 83, and also in my note on Rājat. v. 217, as to the position of the old capital of *Uraśā*. The designation of this capital was undoubtedly *Uraśā*.

TABLE OF CONTENTS.

CHAPTER I.—INTRODUCTORY.

Para.		Page.
1.	Ancient topography in Kalhana's Chronicle	1
2.	Preparation of maps	2
3.	Arrangement of Memoir	3
4.	Earlier Publications (Wilson, Troyer, Cunningham, Lassen, Bühler)	4

CHAPTER II.—ACCOUNTS OF OLD KĀSMĪR.

SECTION I.—CLASSICAL NOTICES.

5.	Alexander's invasion.—Ptolemy's Kaspeiria	8
6.	The Kaspeiroi of Dionysios and Nonnos	10
7.	Kaspatyros of Herodotos.—Supposed Derivation of 'Kāś- mīra' from *Kāśyapapura	11

SECTION II.—CHINESE RECORDS.

8.	Earliest Chinese notice	13
9.	Visit of Hiuen Tsiang (A. D. 631)	14
10.	Kāsmīr in T'ang Annals	17
11.	Ou-k'ong (A. D. 759)	18

SECTION III.—MUHAMMADAN NOTICES.

12.	Kāsmīr closed to Arab geographers	20
13.	Albērūnī's interest in Kāsmīr	21
14.	Albērūnī's account of Kāsmīr.—Route into Kāsmīr.—De- scription of the Valley.—Description of Pir Panṭsāl.— The fortress Lauhūr... ..	23

SECTION IV.—INDIAN NOTICES.

15.	Deficiency of information in Non-Kāsmīrian texts	28
-----	---	----

SECTION V.—THE KĀSMĪR CHRONICLES.

Para.		Page.
16.	Abundance of Kāsmīrian sources	29
17.	Kalhaṇa's Rājatarāṅgiṇī	30
18.	Kalhaṇa's notices of Tirthas	31
19.	Kalhaṇa's references to foundations	33
